## Introduction

South Africa has had three censuses since the first general elections in 1994. The first census was conducted in 1996, the second one followed five years later (2001), whilst the recent census was conducted just over a year ago (2011). In this publication, data from the three censuses are compared.

The following points are brought to the attention of the reader of this publication:

- Comparisons of the results of labour market indicators in the post-apartheid population censuses over time have been a cause for concern. Improvements to key questions over the years mean that the labour market outcomes based on the post-apartheid censuses have to be analysed with caution. Such analysis will be the subject of research published in a separate publication in 2013. The differences in the results over the years may be partly attributable to improvements in the questionnaire since 1996 rather than to actual developments in the labour market. The numbers published in this volume for the 1996, 2001, and 2011 censuses are therefore not comparable over time and are higher from those published by Statistics South Africa in the surveys designed specifically for capturing official labour market results.
- For purposes of comparison over the period 1996–2011, certain categories of responses to questions in the censuses of 1996, 2001 and 2011, have either been merged or separated.
- The tenure status question for 1996 has been dropped since the question asked was totally unrelated to that asked thereafter. Comparisons for 2001 and 2011 do however remain.
- All household variables are controlled for housing units only and hence exclude all collective living arrangements as well as transient populations.
- The slight differences in totals for annual household income as compared to that published in the Statistical Release of Census 2011 are due to rounding.
- When making comparisons of any indicator it must be taken into account that the time period between the first two censuses is five years and that between the second and third censuses is ten years. Although Census captures information at one given point in time, the period available for an indicator to change is different.

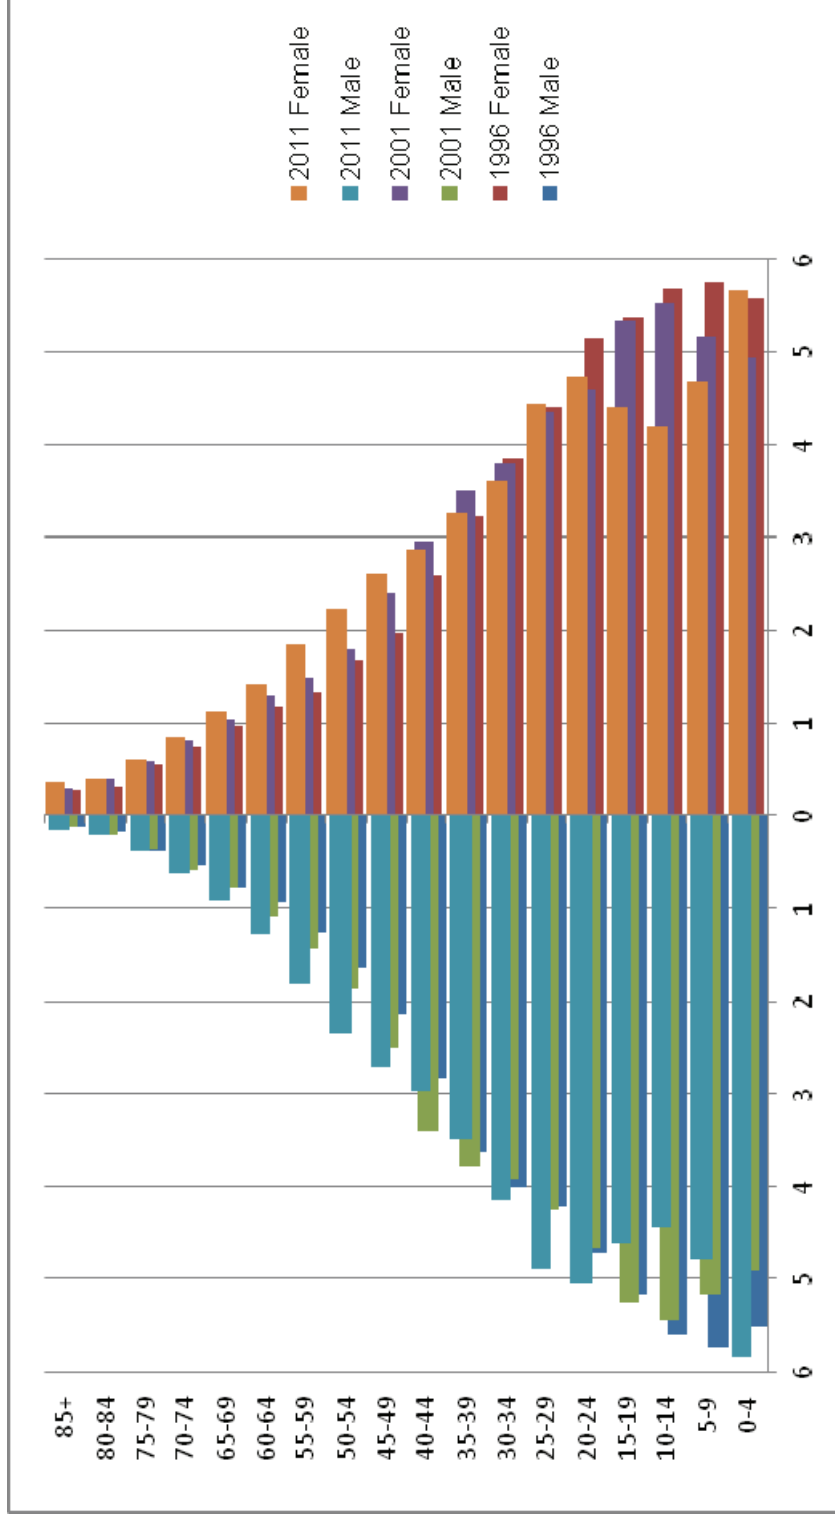

## 6. North West

### 6.1 Demographics

#### 6.1.1 Age-sex structure of the population

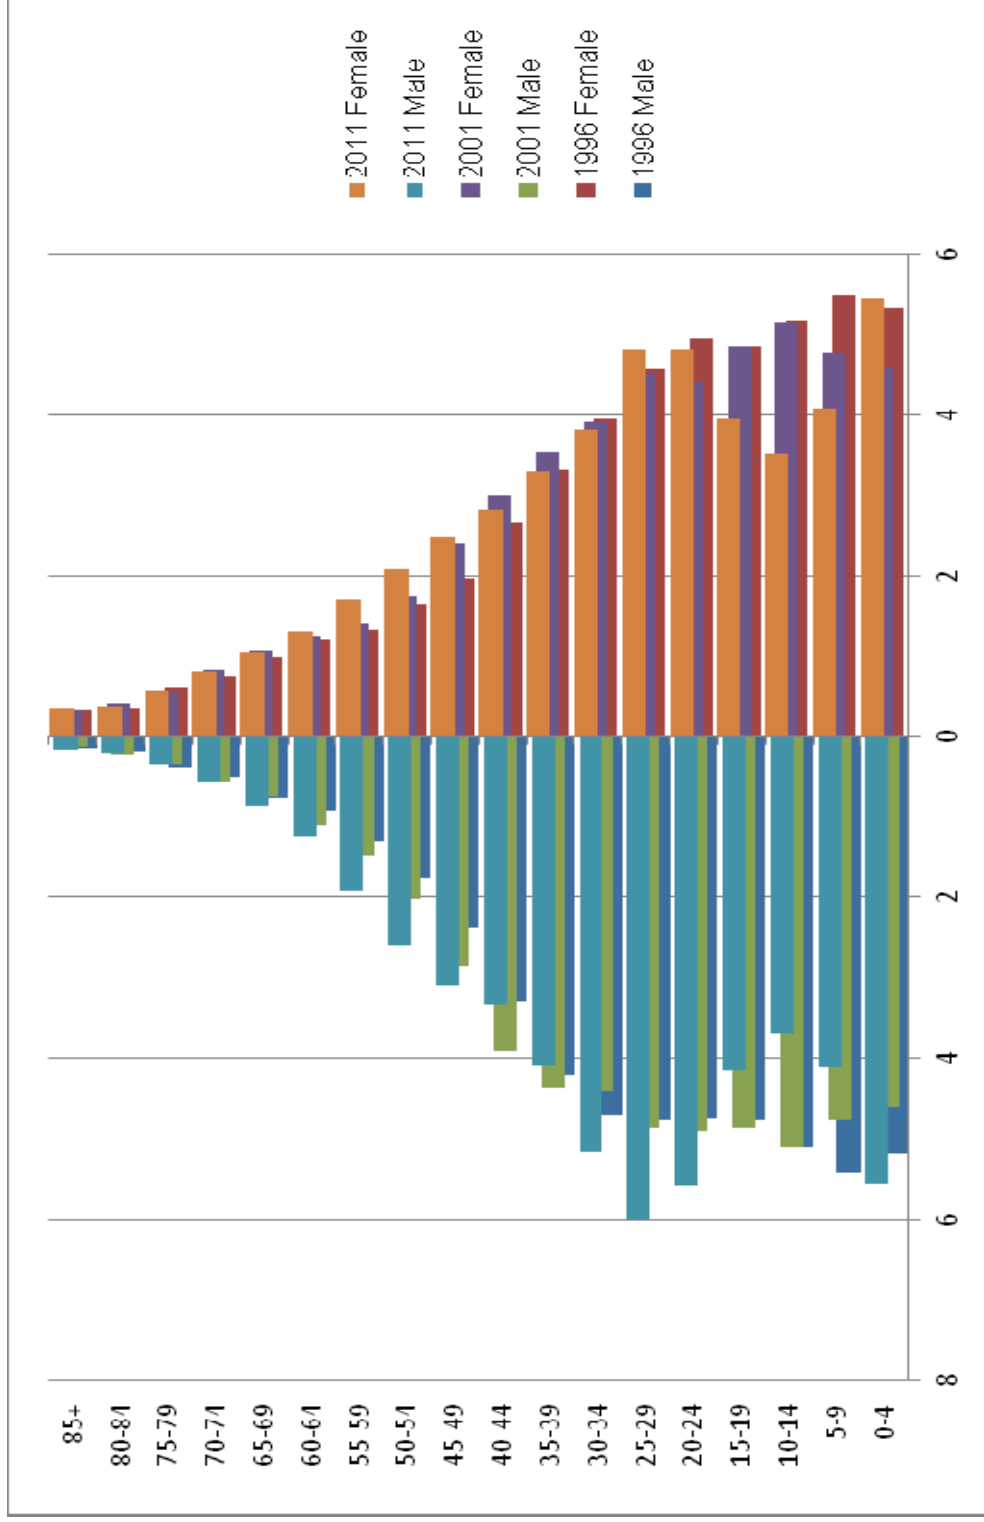

Figures 6.1.1.1 to 6.1.1.5 show the population pyramids for North West and its districts respectively. The pyramids indicate that the population is still young; the majority of the population is aged below 35 years.

**Figure 6.1.1.1: Distribution of population by age and sex, North West – 1996, 2001 and 2011**

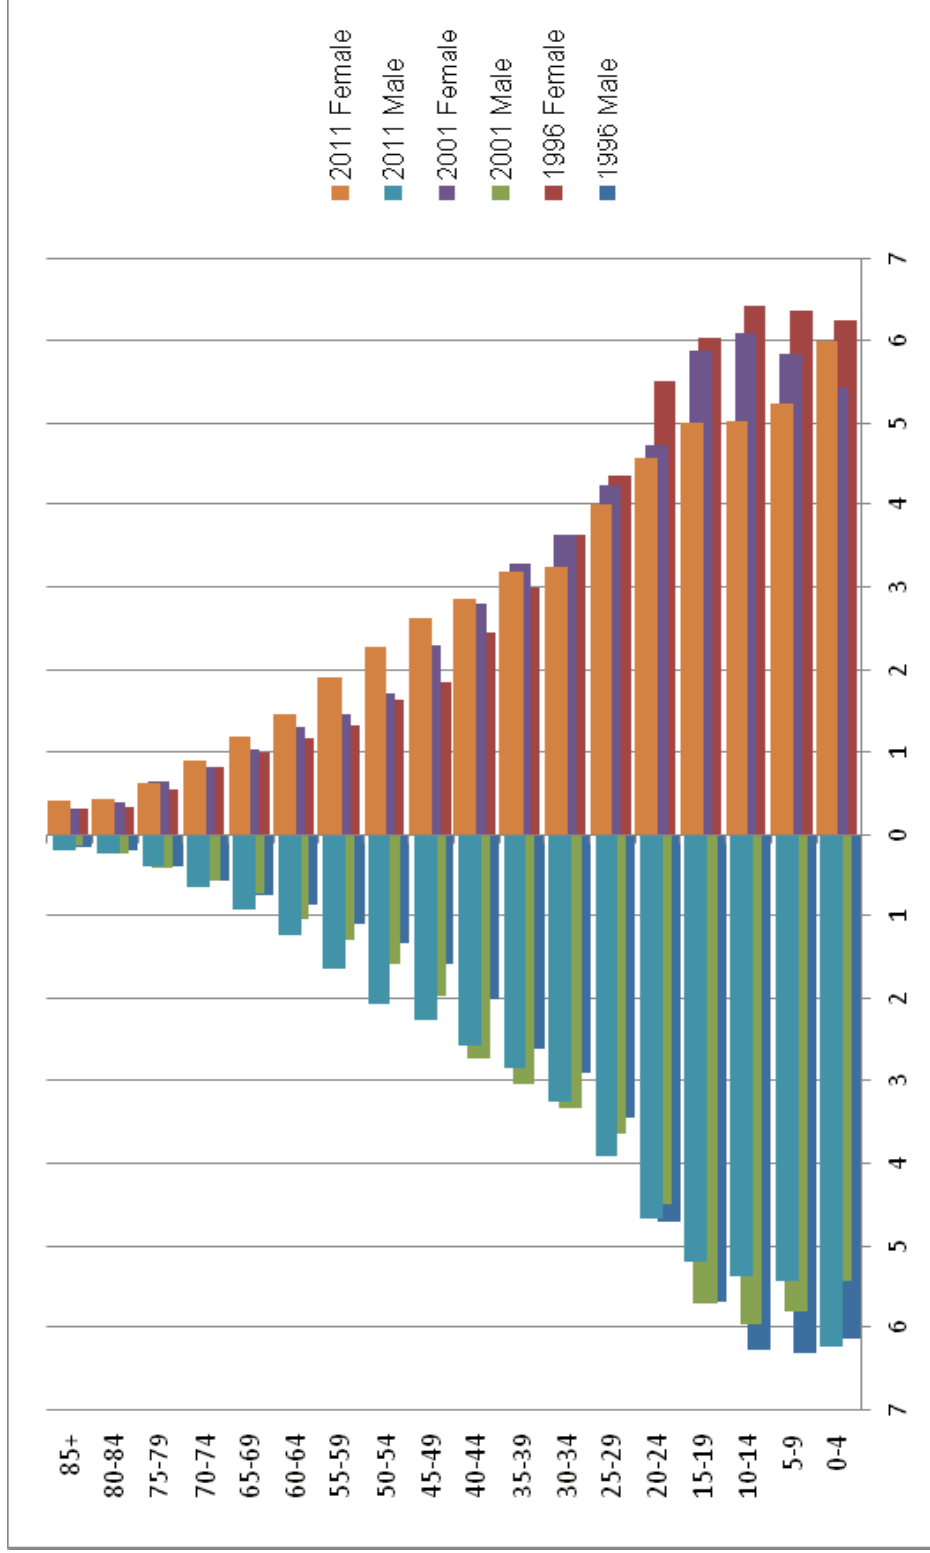

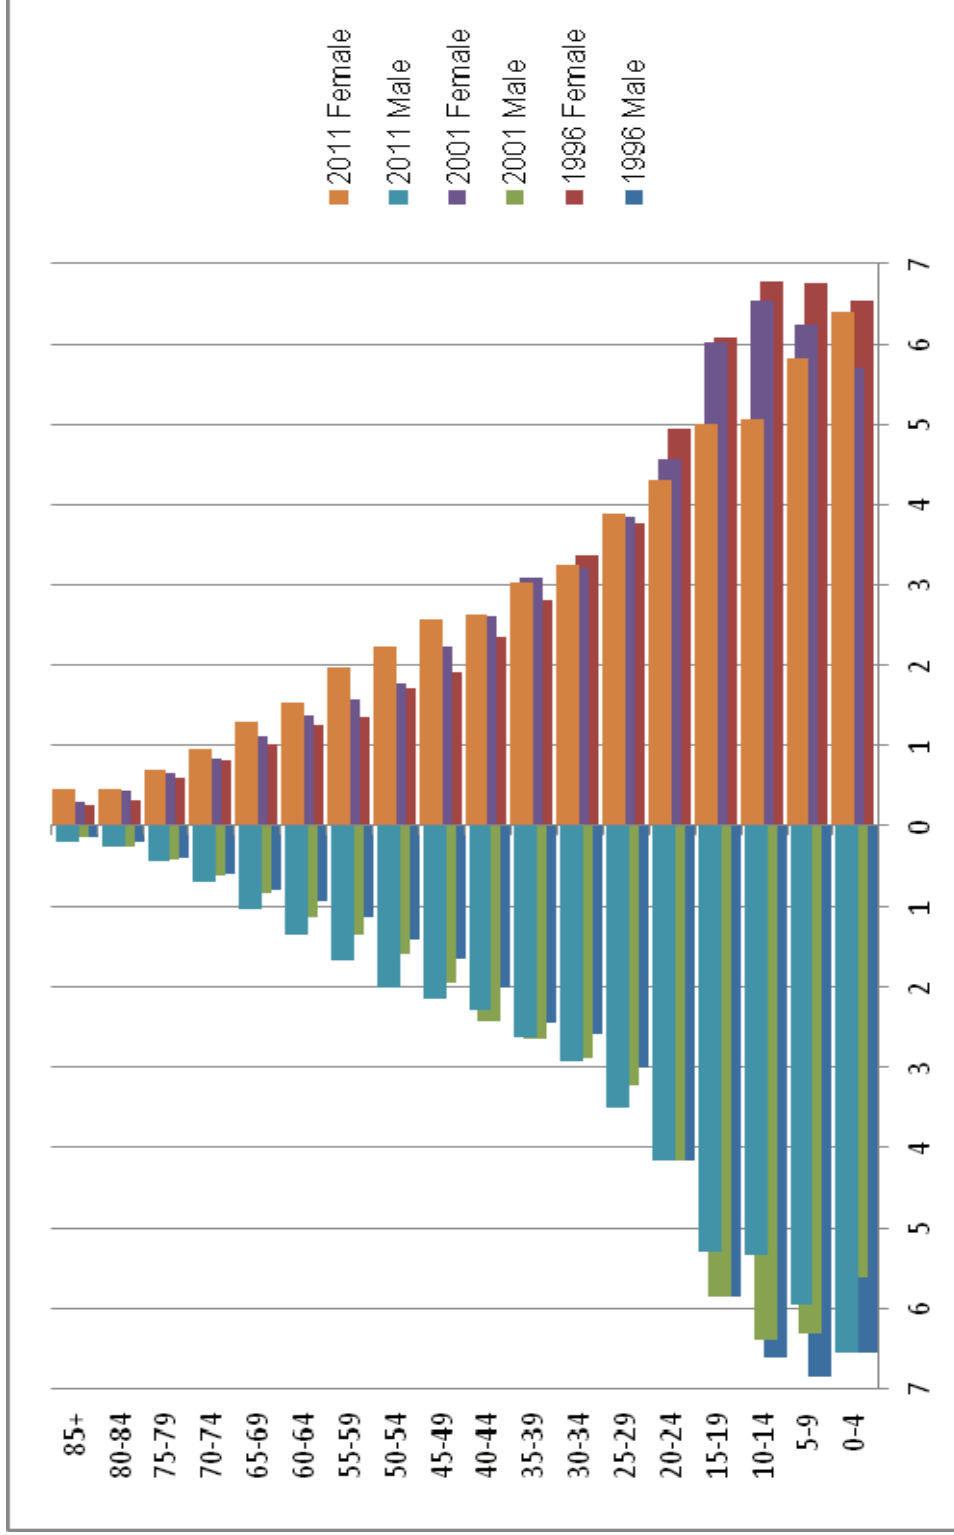

**Figure 6.1.1.2: Distribution of population by age and sex, Bojanala – 1996, 2001 and 2011**

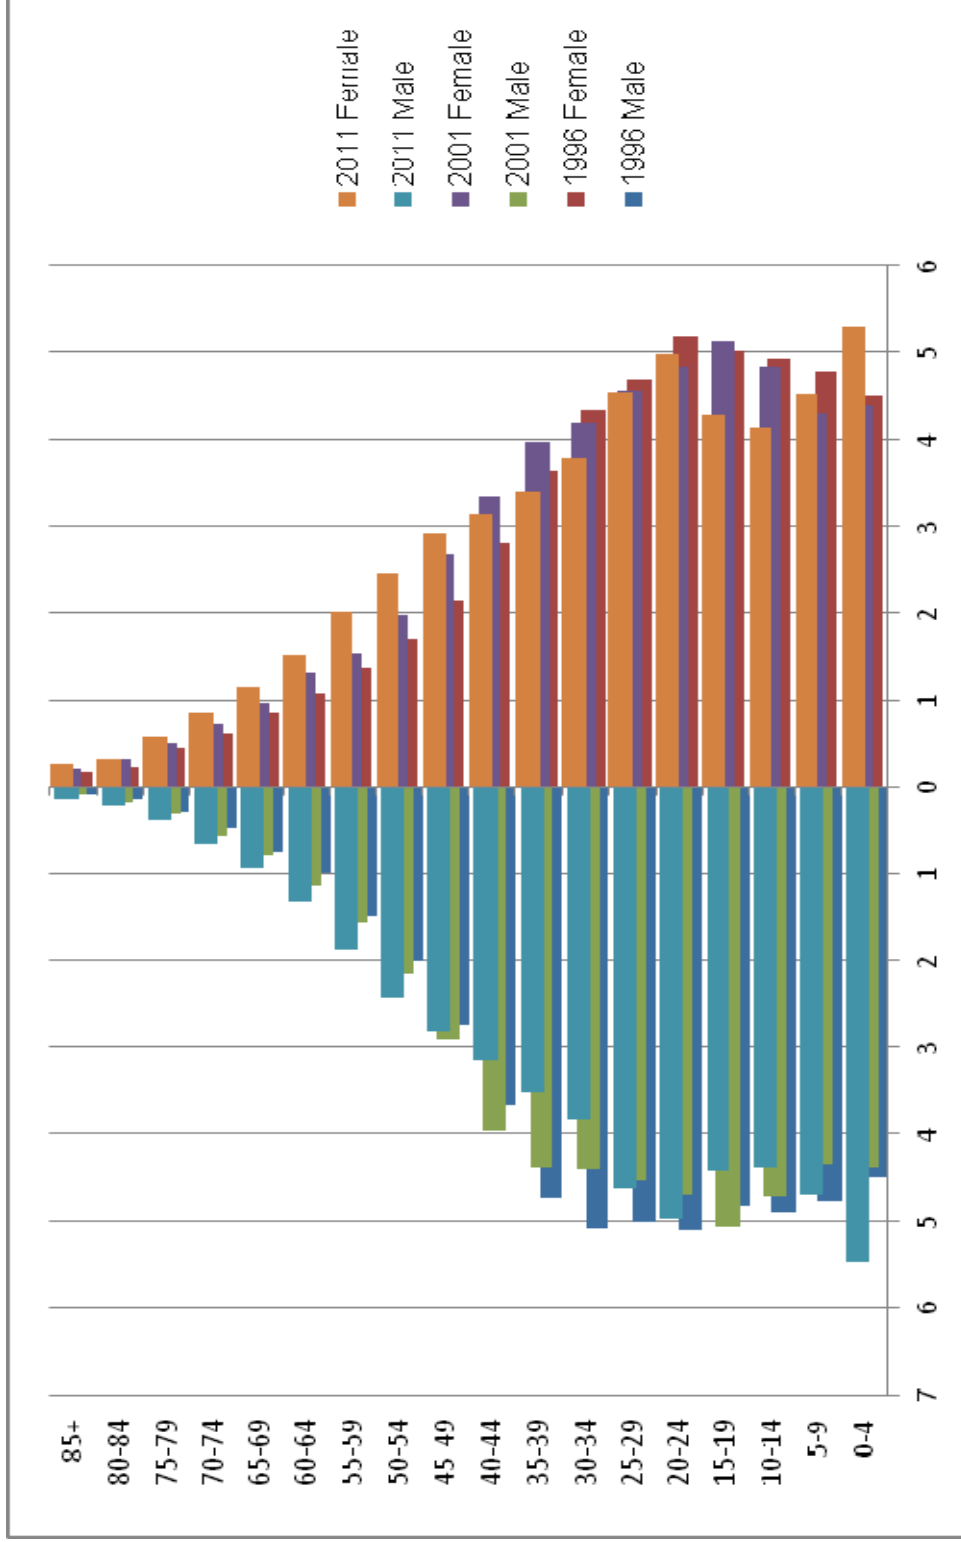

**Figure 6.1.1.3: Distribution of population by age and sex, Ngaka Modiri Molema – 1996, 2001 and 2011**

**Figure 6.1.1.4: Distribution of population by age and sex, Dr Ruth Segomotsi Mompati – 1996, 2001, and 2011**

**Figure 6.1.1.5: Distribution of population by age and sex, Dr Kenneth Kaunda – 1996, 2001, 2011**

### 6.1.2 Population growth rates

Figure 6.1.2.1: Population growth rates by district municipality – 1996, 2001 and 2011

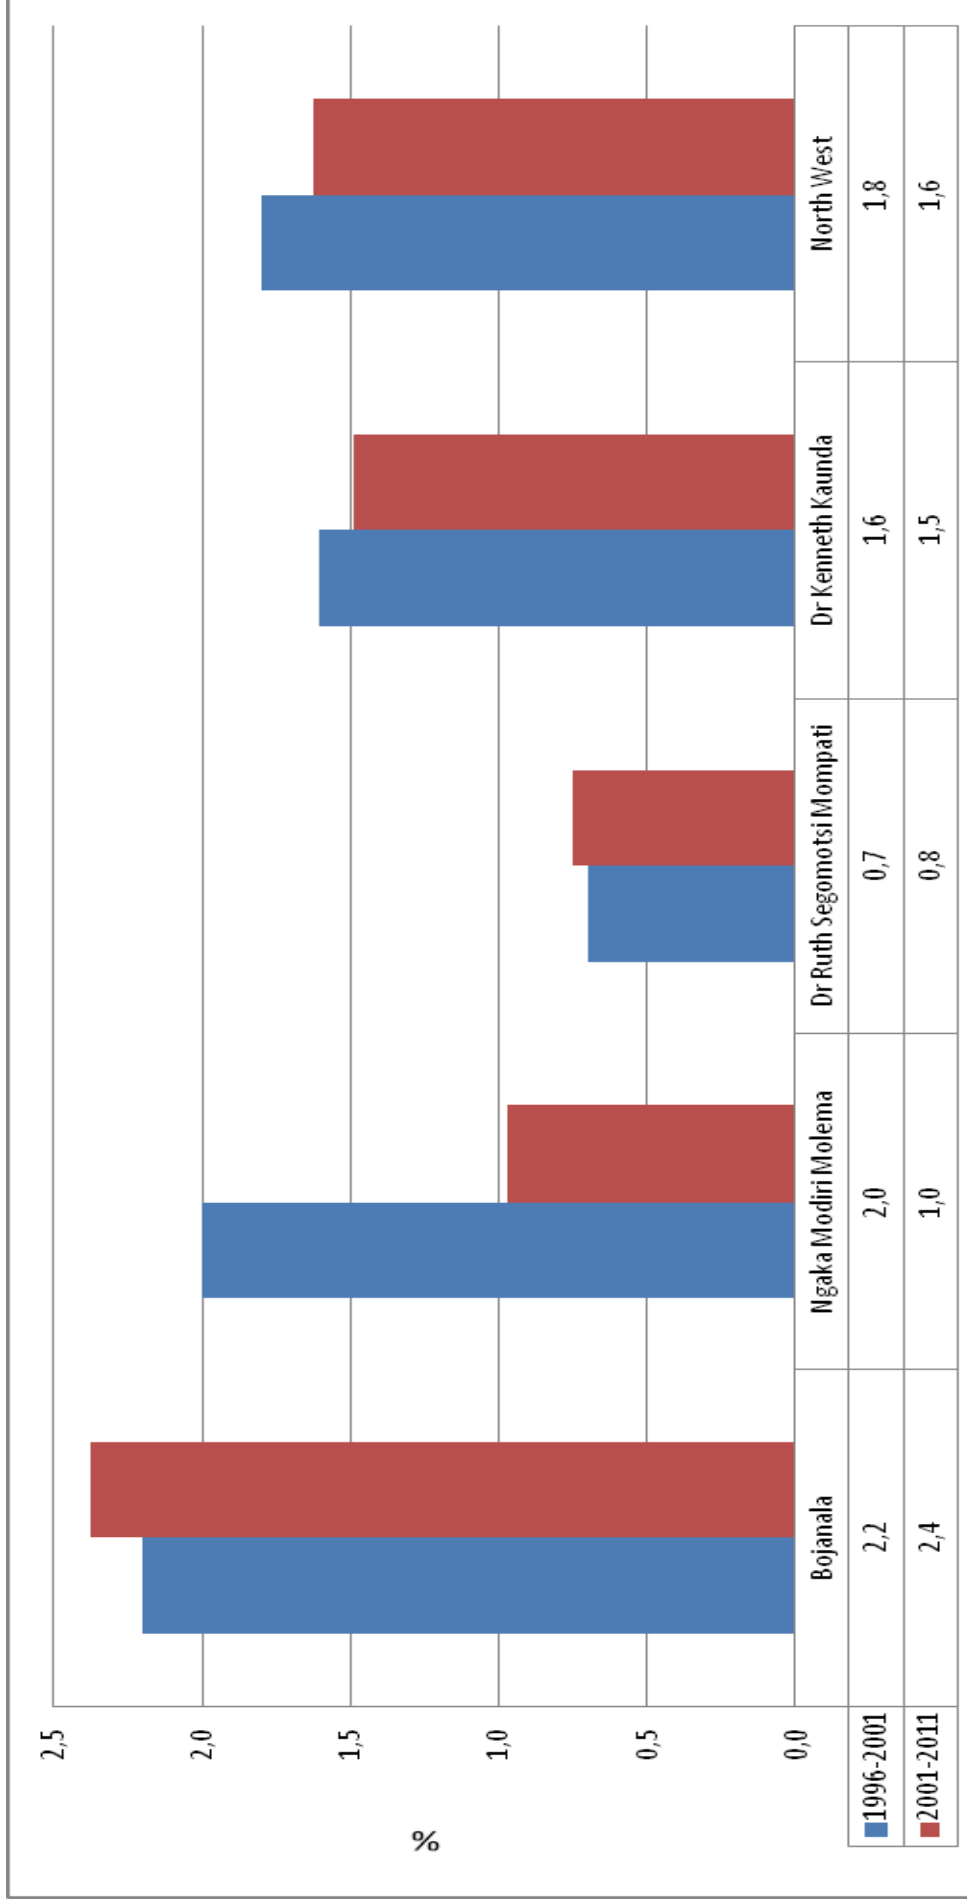

Figure 6.1.2.1 suggests a slow population growth in the province with Bojanala and Dr Ruth Segomotsi Mompoti consistently having a highest and lowest growth rate than other districts respectively. The growth rate for Ngaka Modiri Molema district has slowed down substantially; 2,0 and 1,0% between periods 1996 - 2001 and 2001 - 2011 respectively.

### 6.1.3 Sex ratios

**Figure 6.1.3.1: Sex ratios by district municipality – 1996, 2001 and 2011**

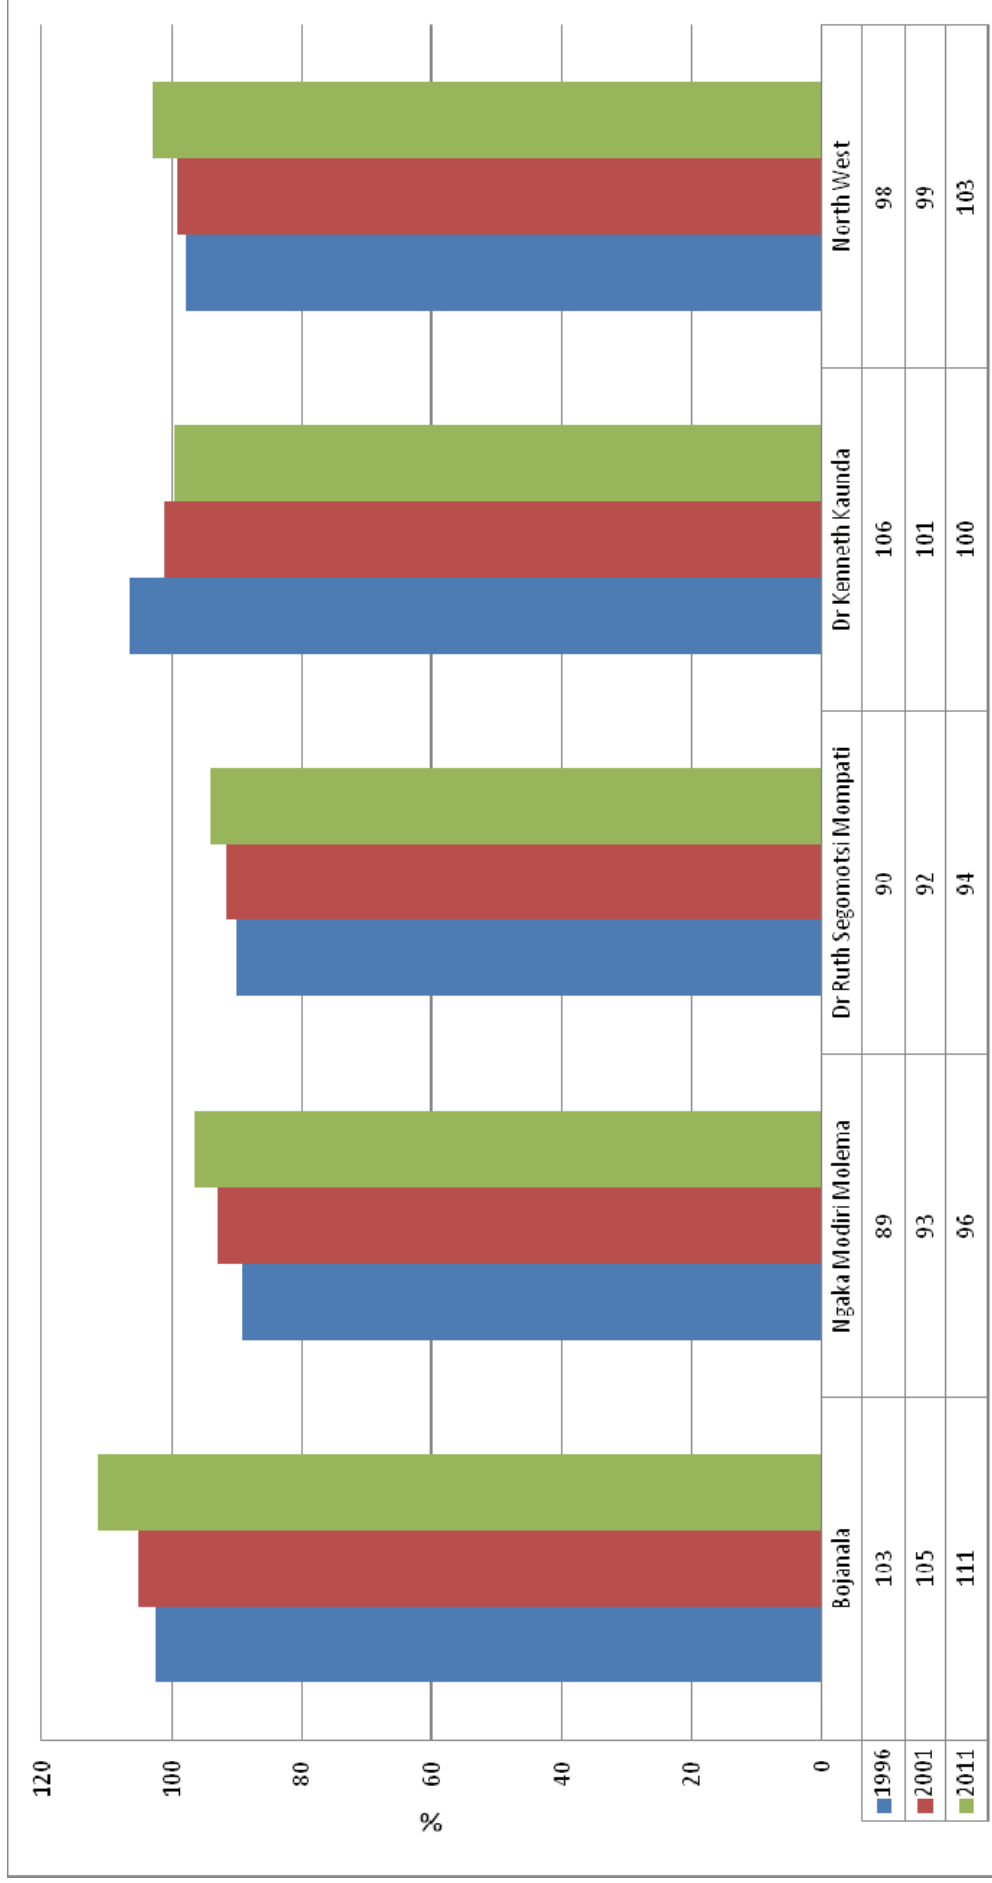

Figure 6.1.3.1 shows that the number of males has increased steadily over the years in the province except in Dr Kenneth Kaunda district which has declined and was the same as for females in 2011. Dr Ruth Segomotsi Mompoti and Ngaka Modiri Molema districts continue to have fewer males than females. Bojanala's male population is higher compared to the provincial average.

### 6.1.4 Population group

**Figure 6.1.4.1: Distribution of the population by population group and district municipality – 1996, 2001 and 2011**

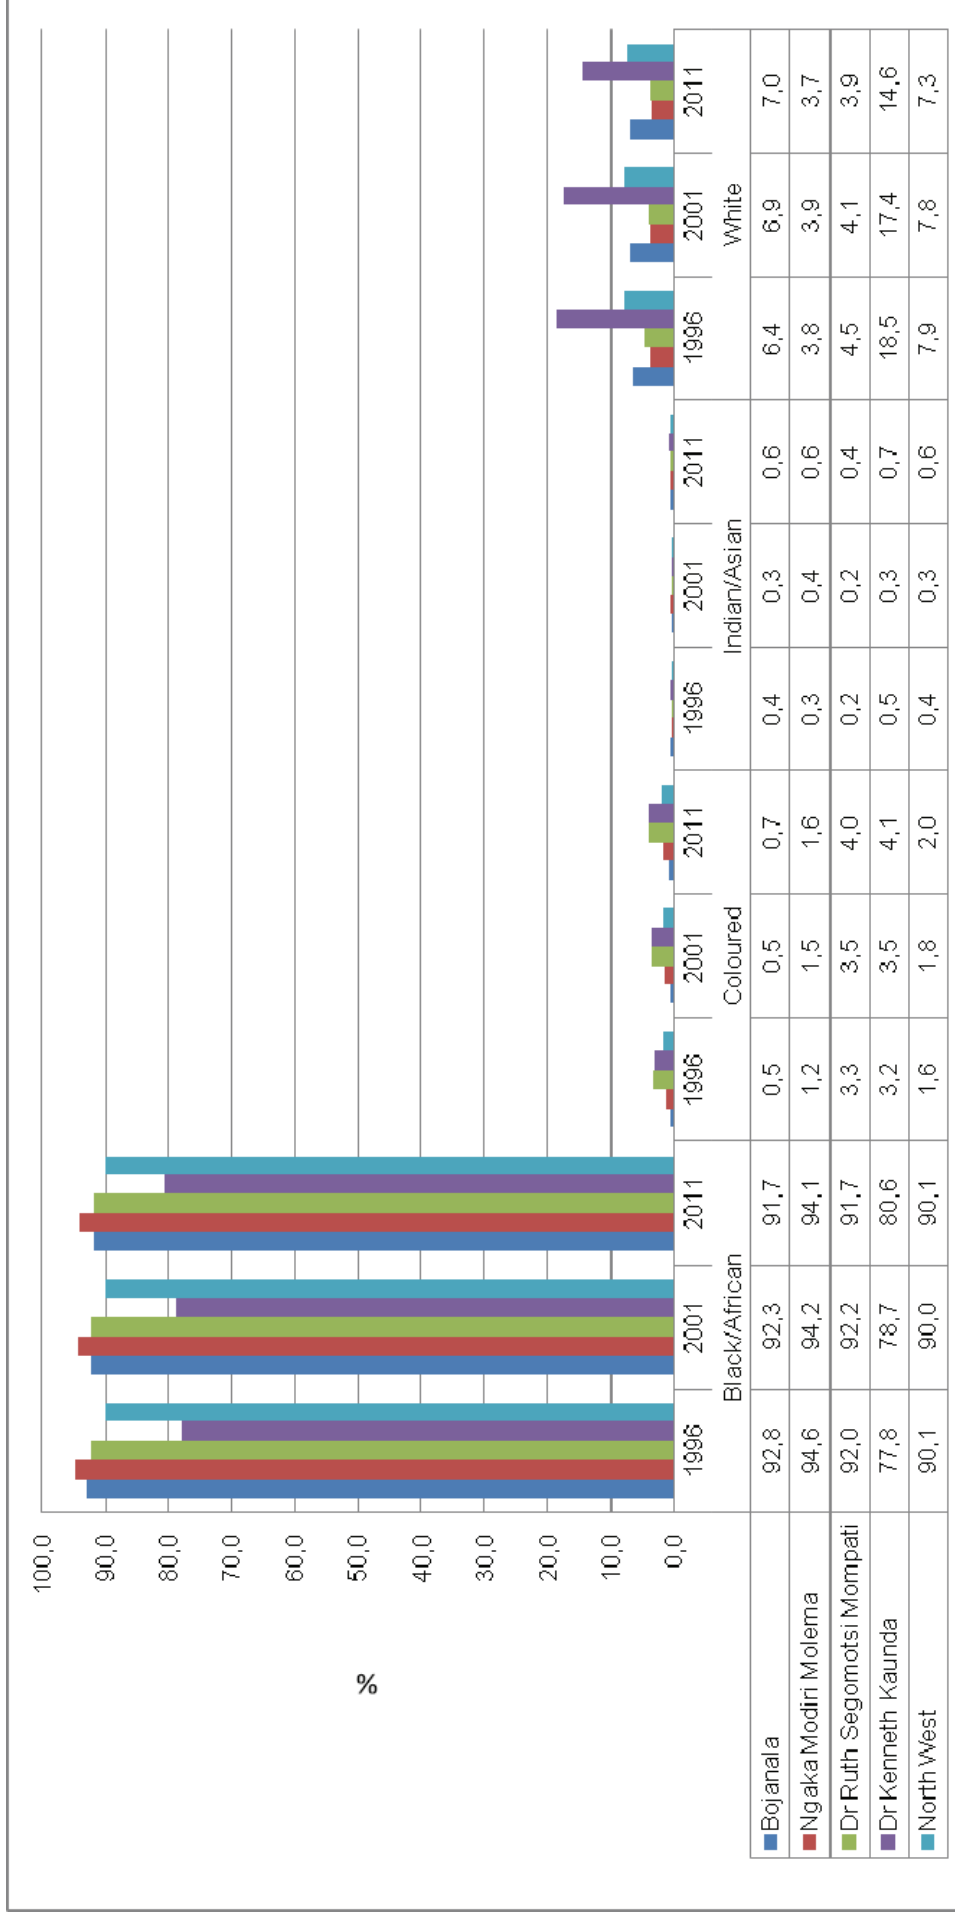

Figure 6.1.4.1 illustrates that Black Africans constitute the majority population group in the province followed by the Whites, the Coloured and then the Indian/Asians.

### 6.1.5 Population by functional age groups

**Figure 6.1.5.1: Distribution of the population by functional age groups and district municipality – 1996, 2001 and 2011**

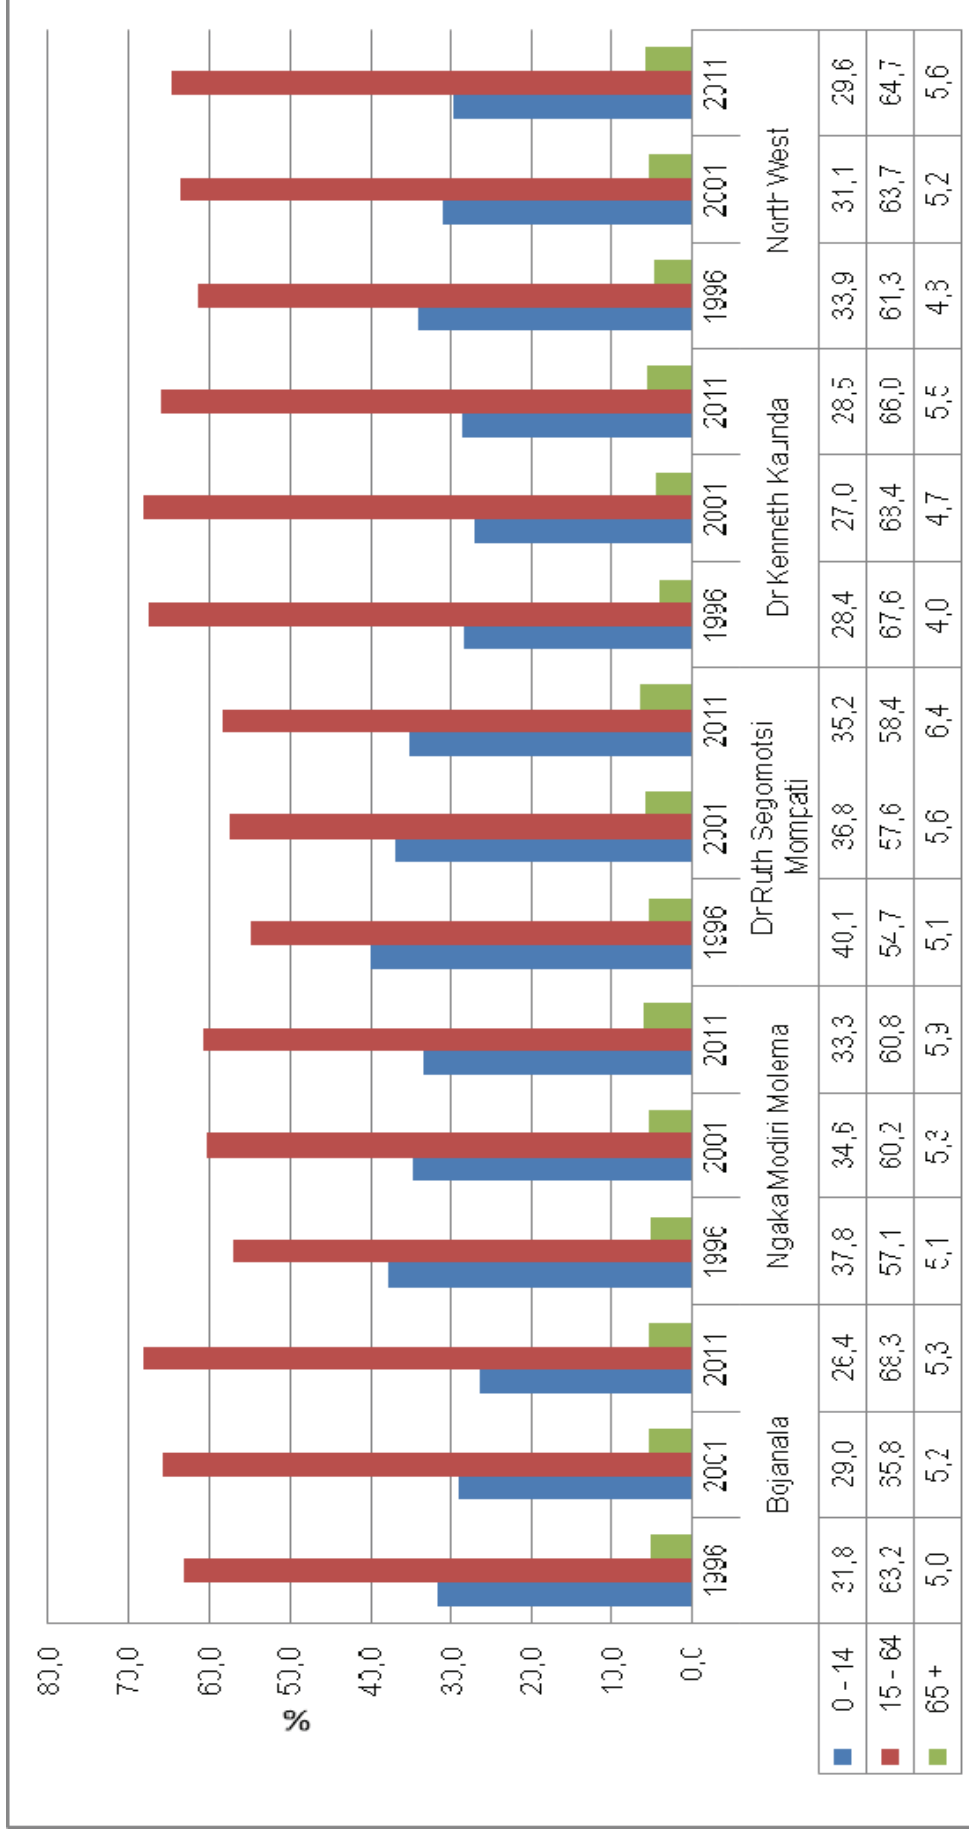

Figure 6.1.5.1 shows a consistent decline in the proportion of the population aged 0–14; an increase in the proportion aged 15–64 except for Dr Kenneth Kaunda; and a marginal increase in the proportion of the 65+ population in the province over time. Strikingly; Bojanala has the lowest and highest proportion of population aged 0–14 and 15–64 respectively.

### 6.1.6 Dependency ratios

Figure 6.1.6.1: Dependency ratios by district municipality – 1996, 2001 and 2011

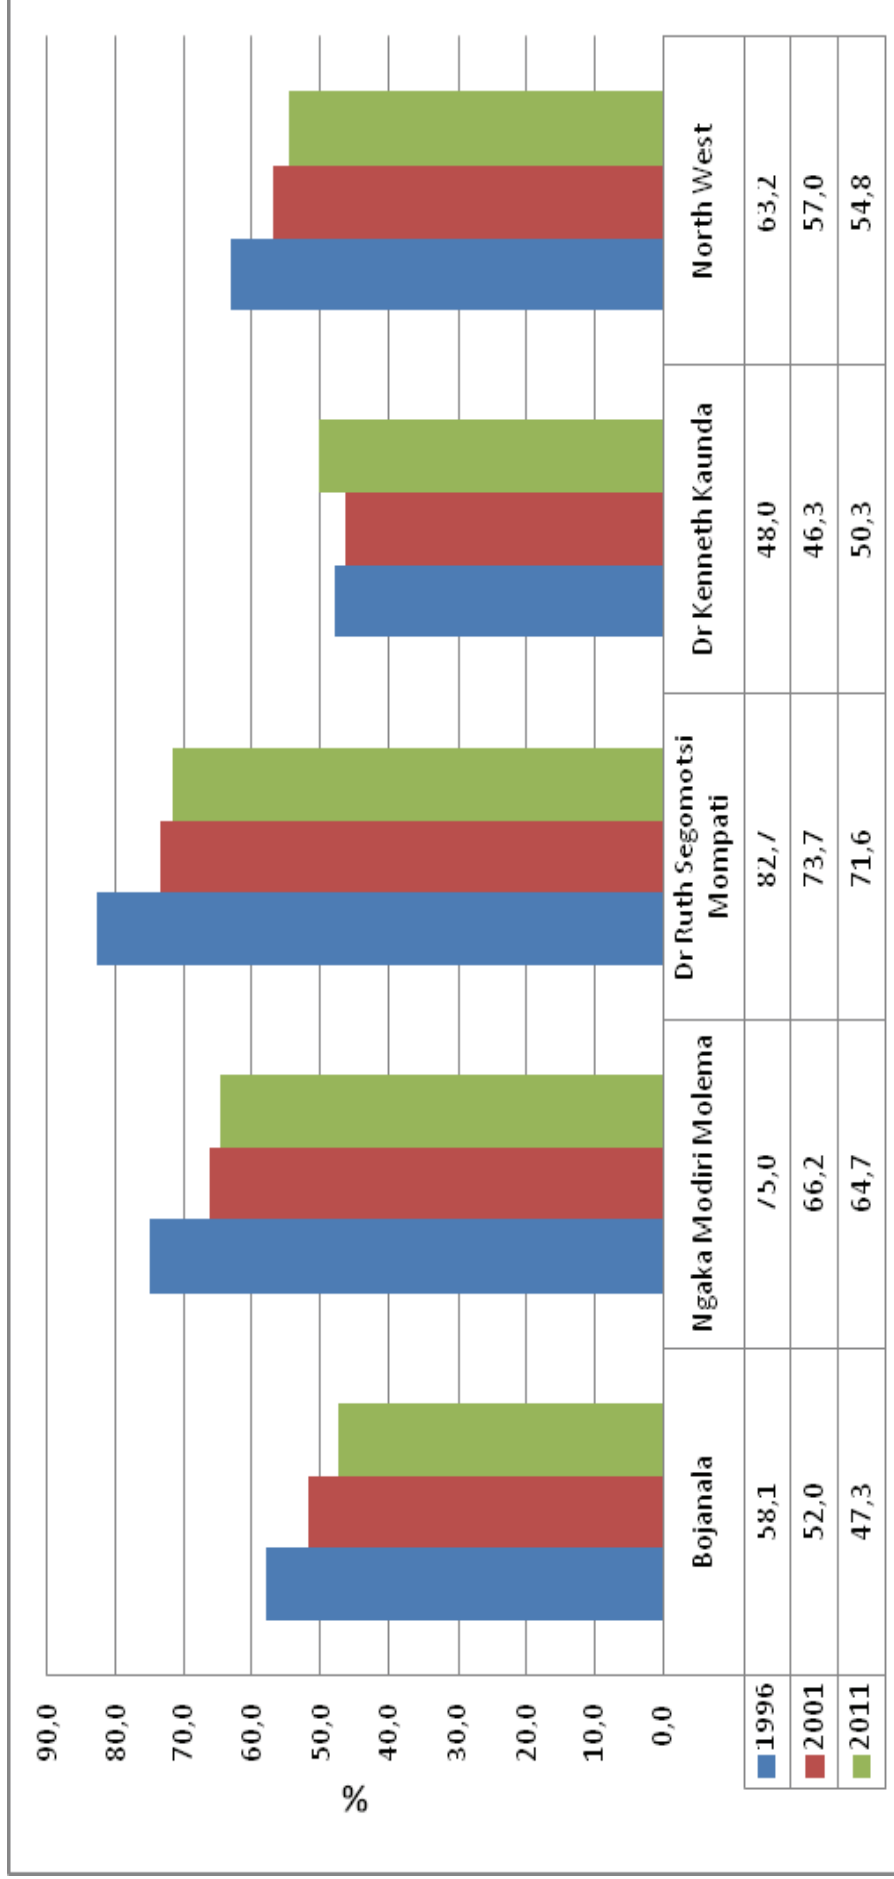

Figure 6.1.6.1 illustrates that the dependency ratio in North West has decreased significantly from 63,3% in 1996 to 54,8% in 2011 though there are disparities across districts.

### 6.1.7 Marital status

**Figure 6.1.7.1: Distribution of the population by marital status and district municipality – 1996, 2001 and 2011**

Figure 6.1.7.1 shows that 29,2% of the population in North West were married or living together as married in 2011, showing a gradual increase from 27,9% in 1996. The proportion widowed increased from 1996 to 2001 and thereafter decreased.

## 6.2 Education

### 6.2.1 Highest level of education attained

**Figure 6.2.1.1: Distribution of the population aged 20 years and older by highest level of education attained and district municipality – 1996, 2001 and 2011**

Figure 6.2.1.1 shows that the percentage of people with no schooling has declined significantly over time. This is also true for those who completed Grade 12/Matric and Higher education. Bojanala and Dr Ruth Segomotsi Mompoti consistently have the lowest and highest proportions of people with no schooling respectively.

### 6.2.2 School attendance

**Figure 6.2.2.1: Distribution of the population (aged 5–24 years) by school attendance, North West – 1996, 2001 and 2011**

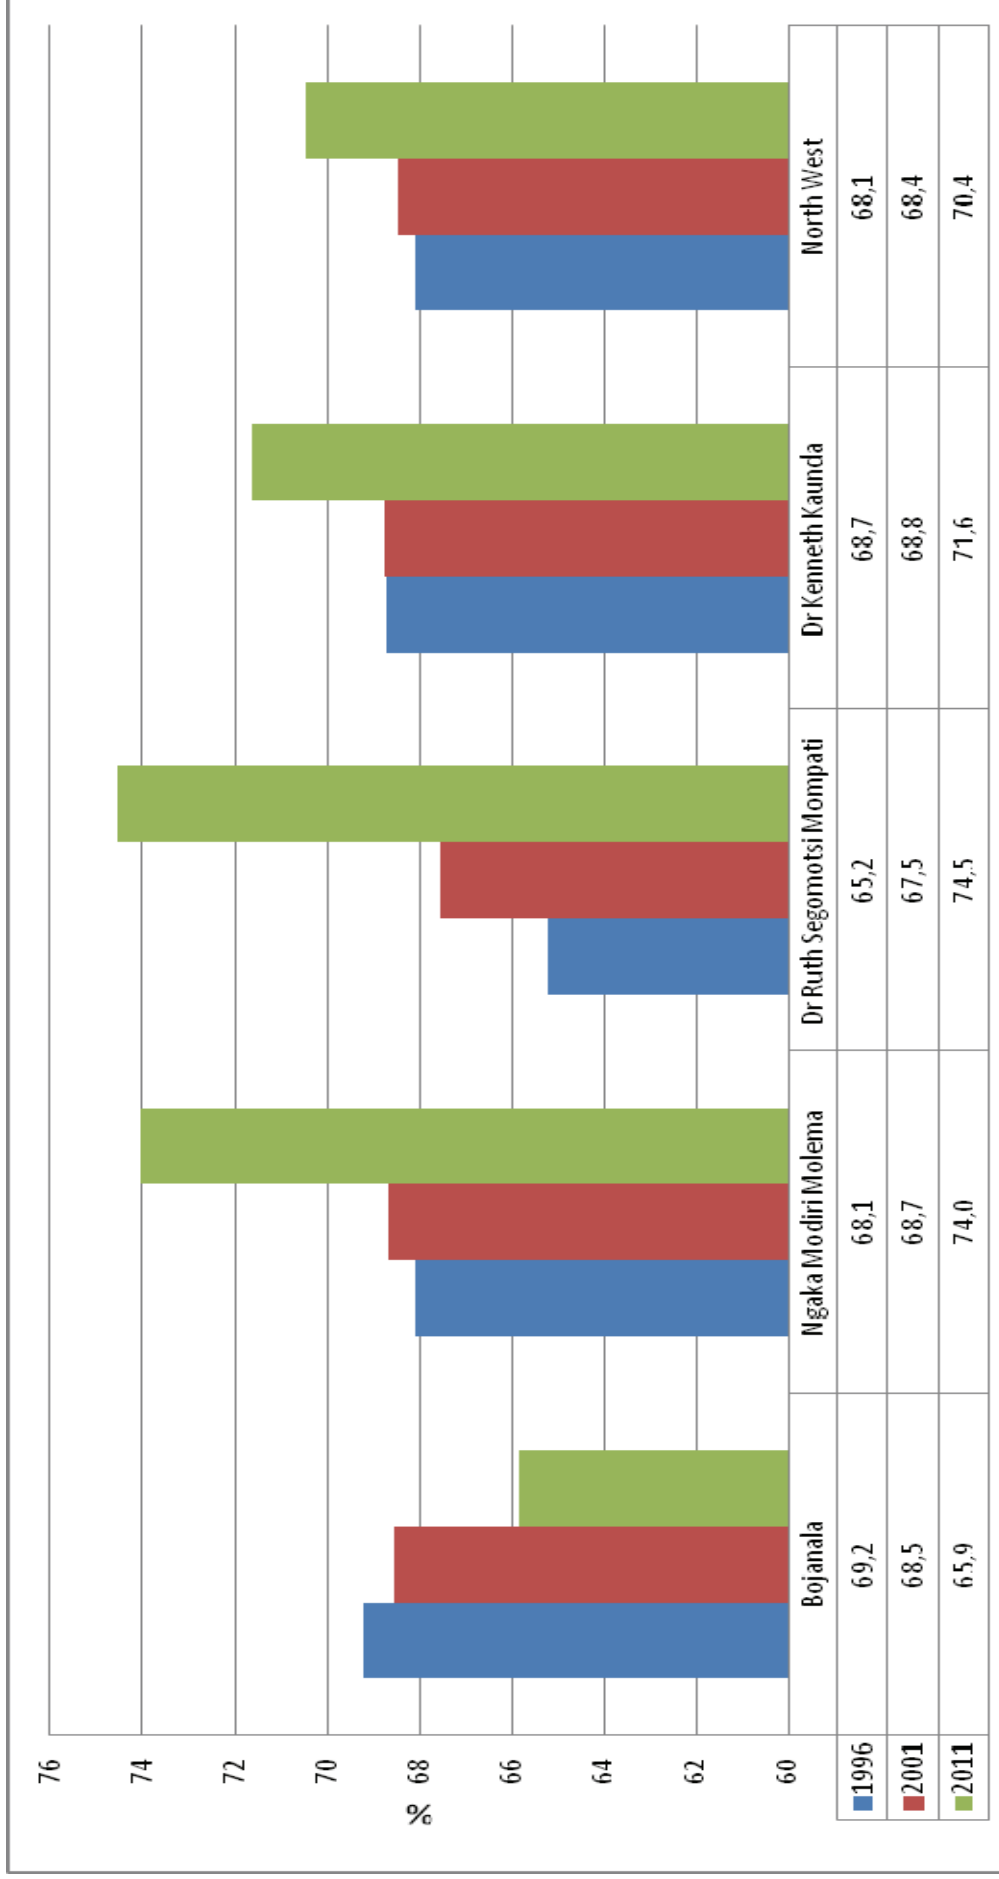

Figure 6.2.2.1 shows a steady increase in the percentage of people who attended school in North West (from 68,1% in 1996 to 70,4% in 2011) except in Bojanala.

### 6.3 Labour market

#### 6.3.1 Unemployment rate

**Figure 6.3.1.1: Unemployment rate (official definition) by district municipality – 1996, 2001 and 2011**

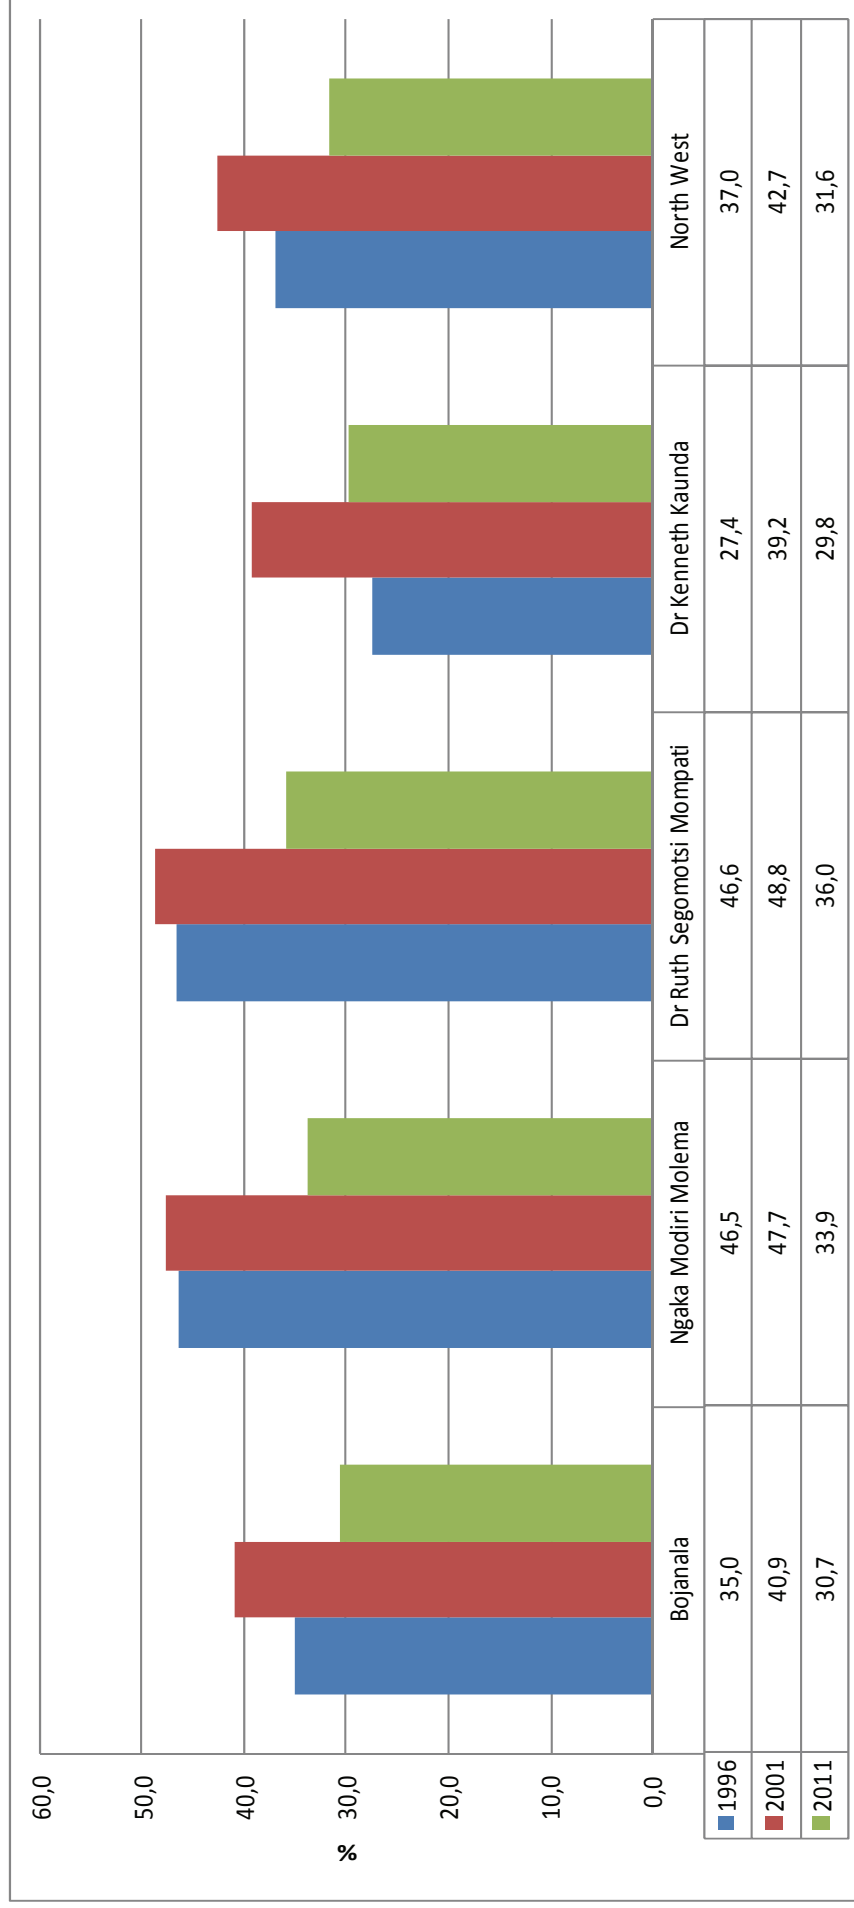

Figure 6.3.1.1 suggests that the unemployment rates in all districts increased between 1996 and 2001 and thereafter declined significantly. **Readers are requested to heed the disclaimer in the introduction to this publication.**

## 6.4 Housing

### 6.4.1 Average household size

Figure 6.4.1.1: Average household size and district municipality – 1996, 2001 and 2011

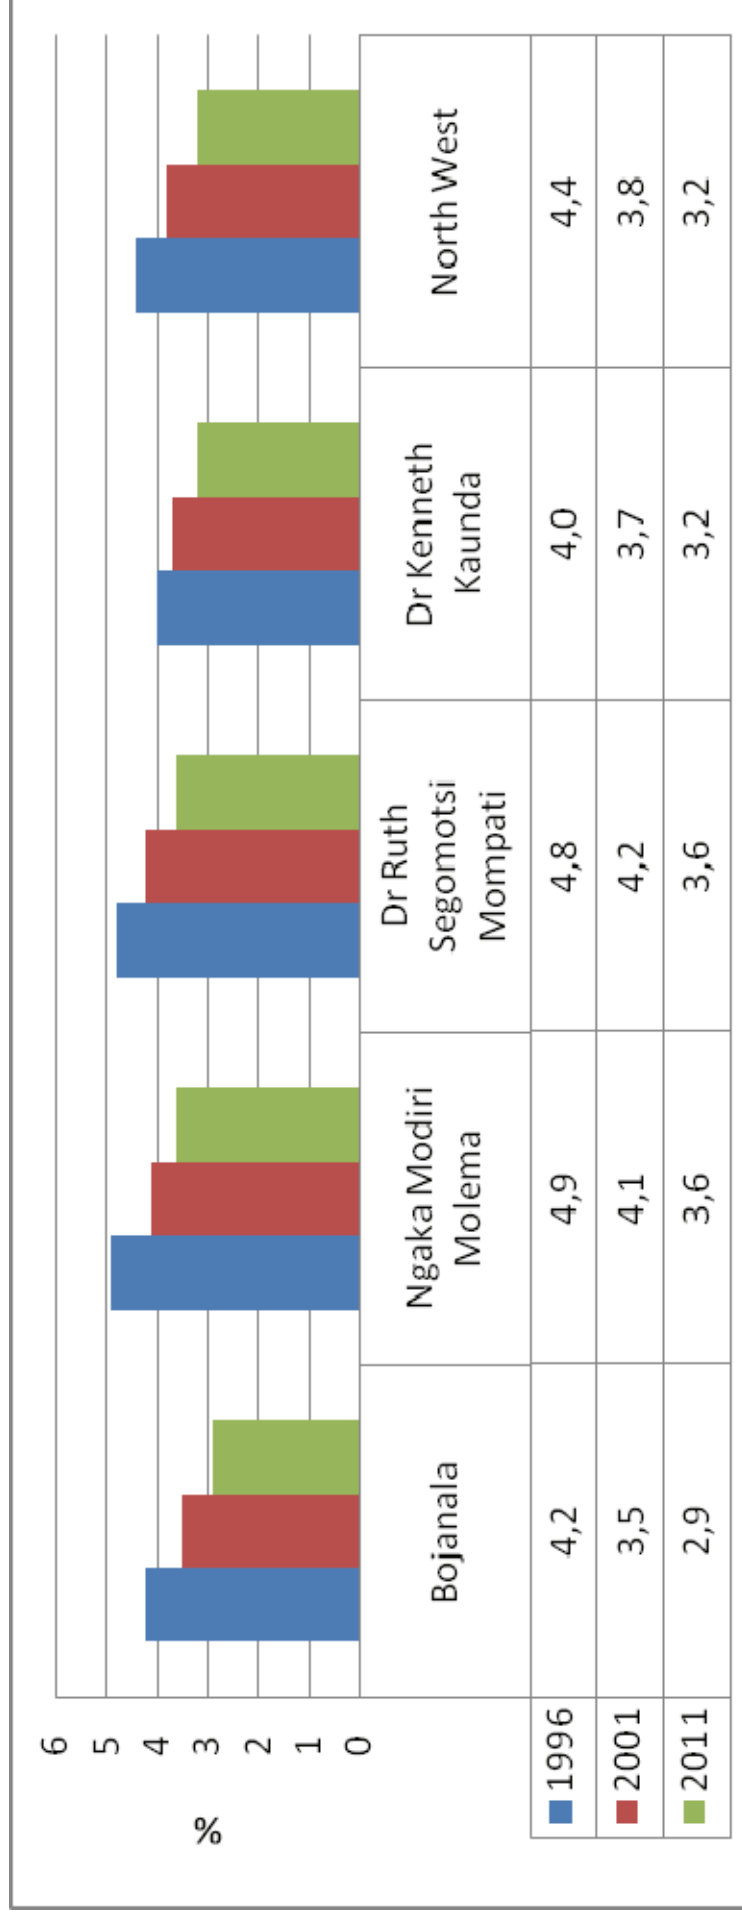

Figure 6.4.1.1 shows that the average household size in the province has declined over time.

### 6.4.2 Type of main dwelling

Figure 6.4.2.1: Distribution of households by type of main dwelling and district municipality – 1996, 2001 and 2011

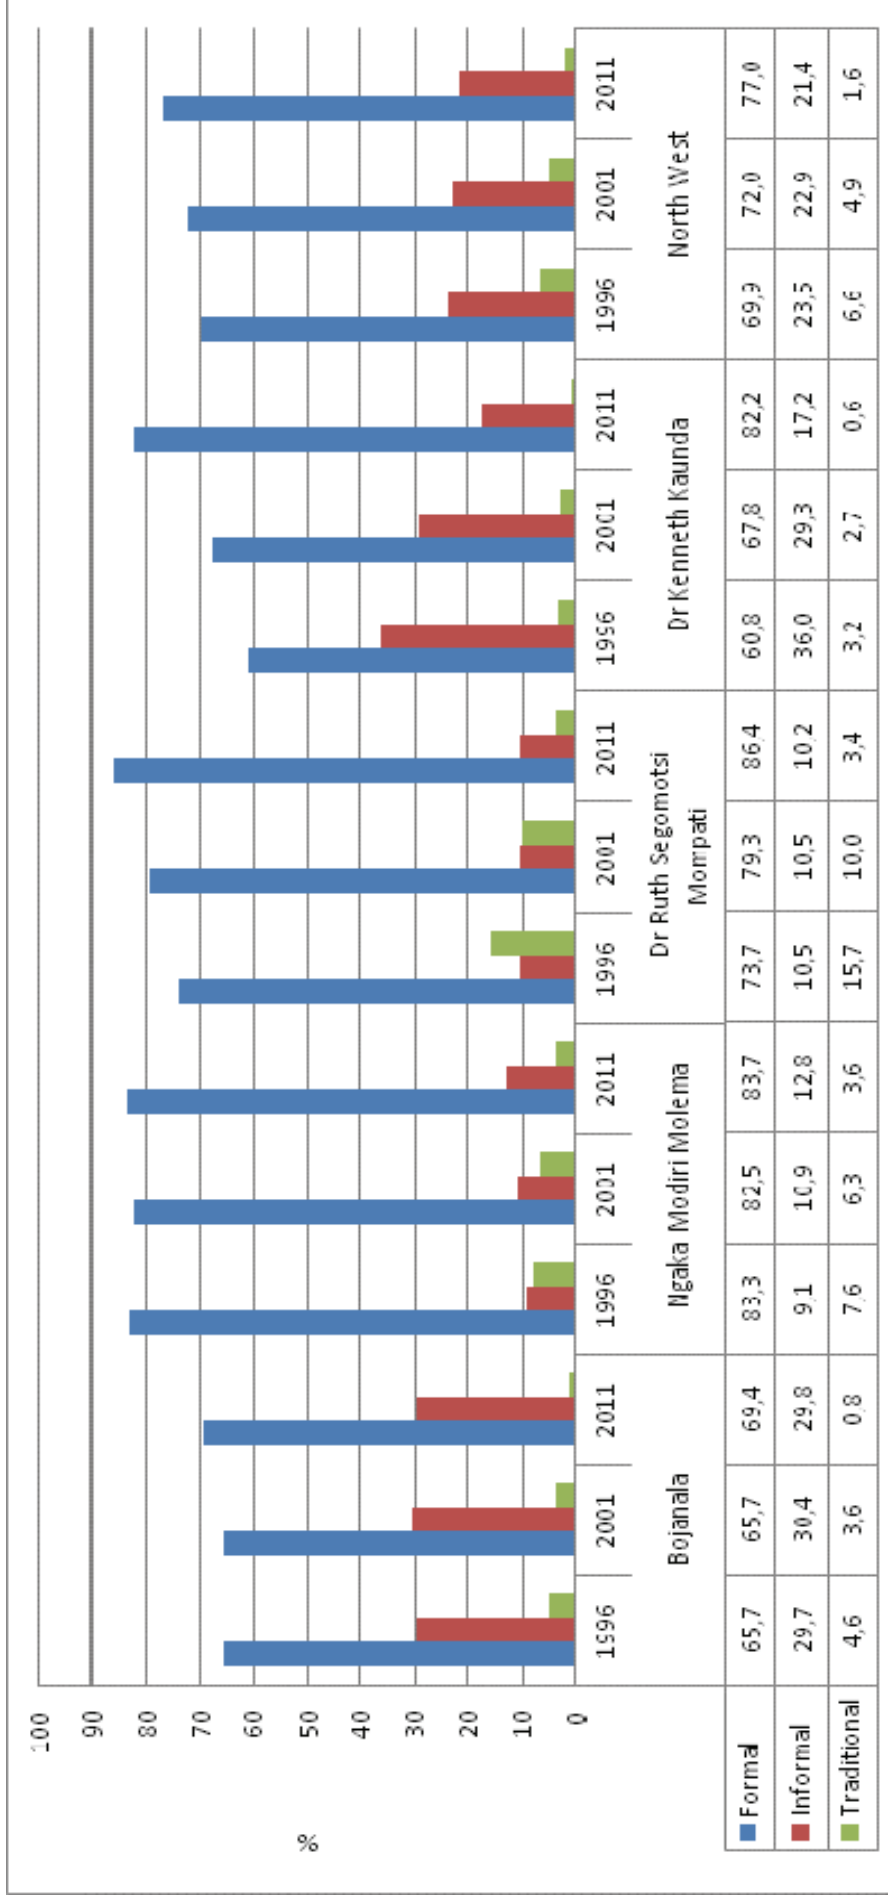

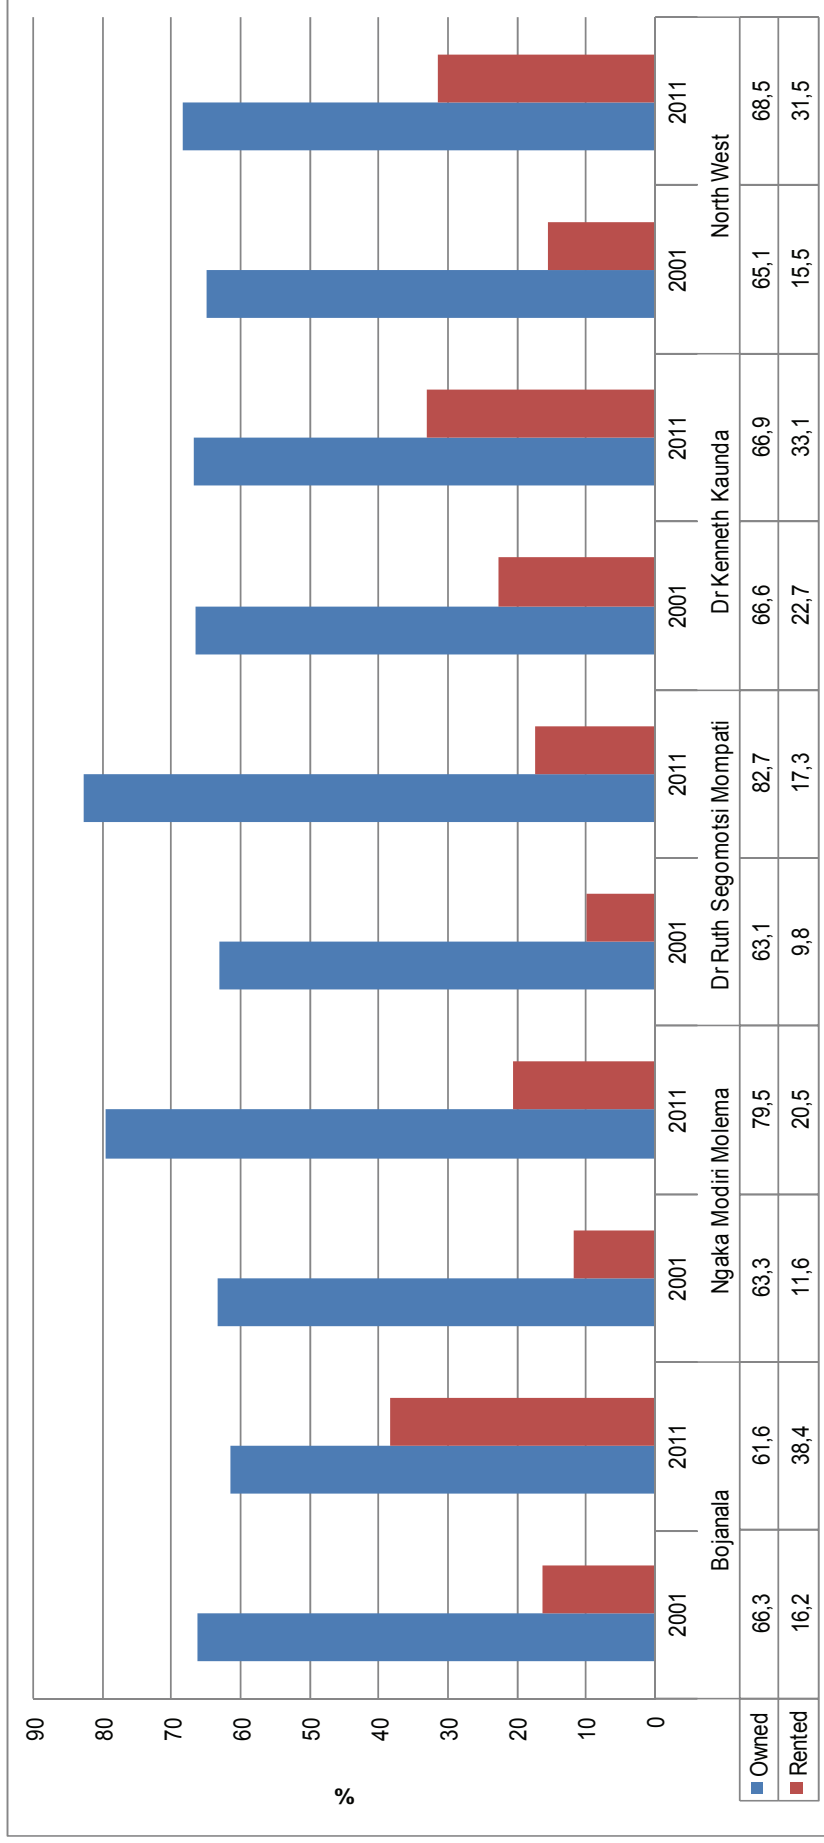

Figure 6.4.2.1 shows that more than three quarters of the households were living in formal dwellings in North West in 2011 except in Bojanala. The proportion of households living in traditional dwellings significantly declined over time.

### 6.4.3 Tenure status

**Figure 6.4.3.1: Distribution of households by tenure status and district municipality - 2001 and 2011**

\*Owned refers to fully paid off and not yet paid off dwelling units.

Figure 6.4.3.1 shows that the proportions of households who own their dwellings have declined significantly. Alongside is the increase in the proportion of households with rented dwellings.

**6.4.4 Household goods**

**Figure 6.4.4.1: Distribution of households with a radio, television, computer, refrigerator, cellphone, landline/telephone and internet by district municipality, 2001 and 2011**

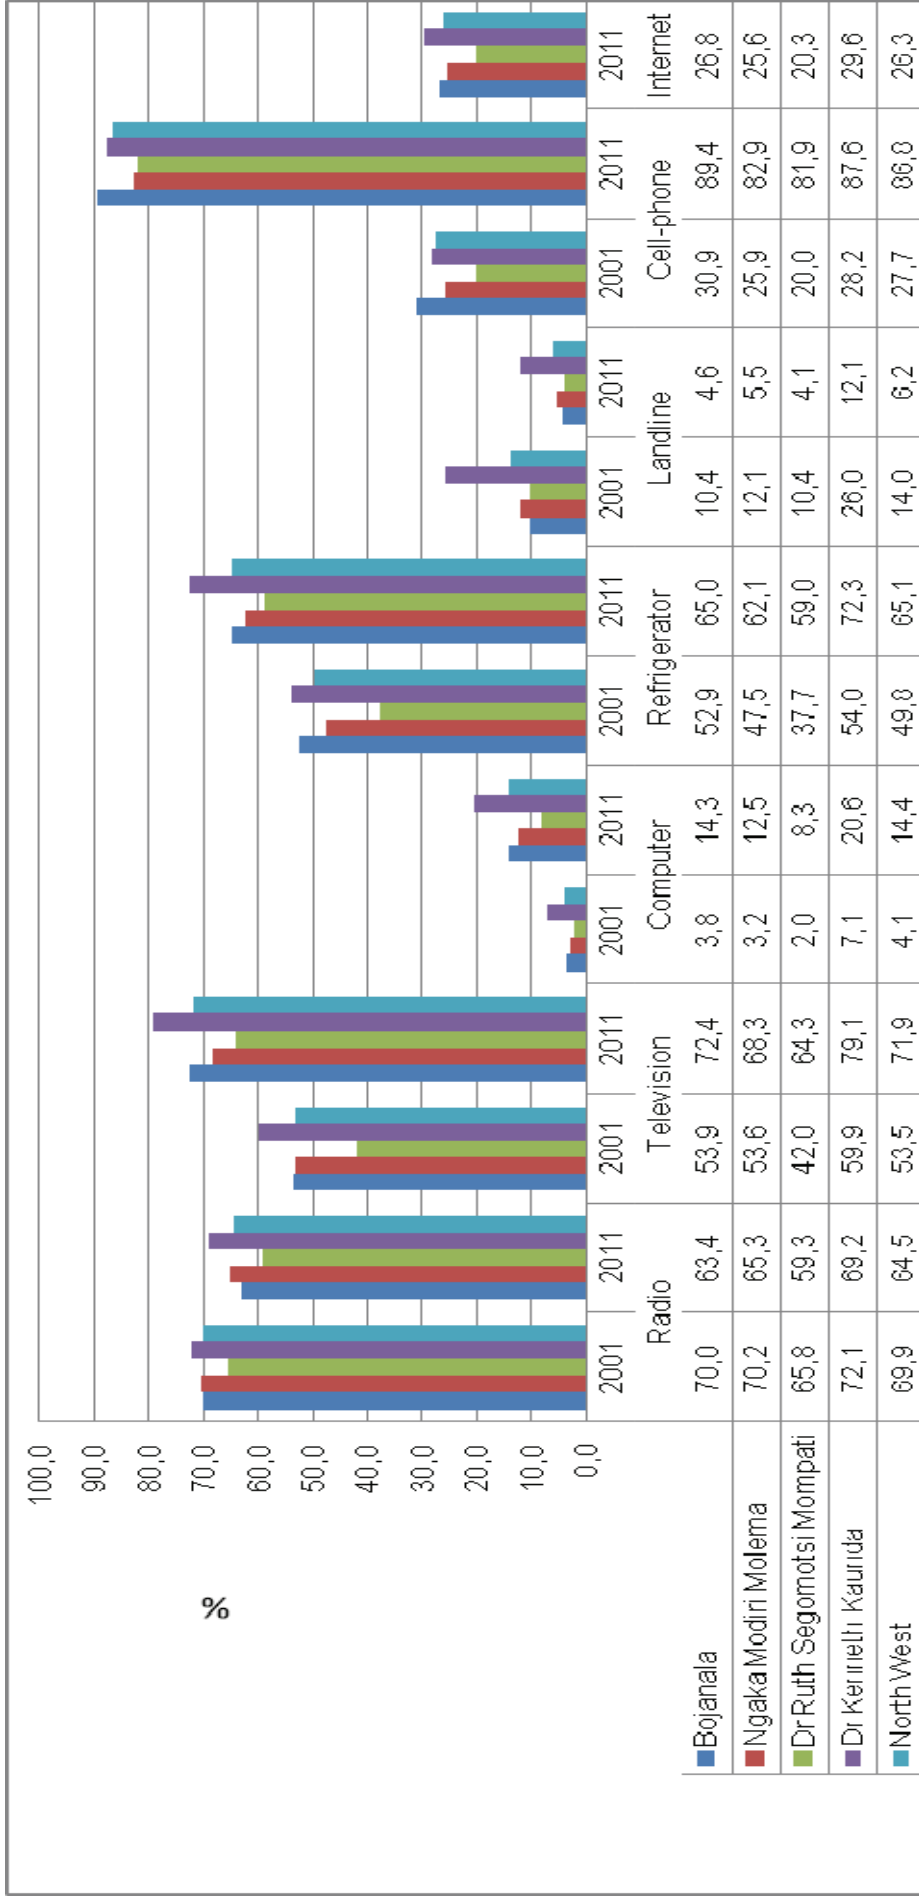

Figure 6.4.4.1 shows that the proportion of households who own radios and landline/telephones decreased, while those owning televisions, computers, refrigerators and cell-phones increased over time. More than 20% of the households have internet access in the province.

### 6.4.5 Electricity for lighting, heating, cooking

**Figure 6.4.5.1: Distribution of households using electricity for lighting, heating and cooking by district municipality – 1996, 2001 and 2011**

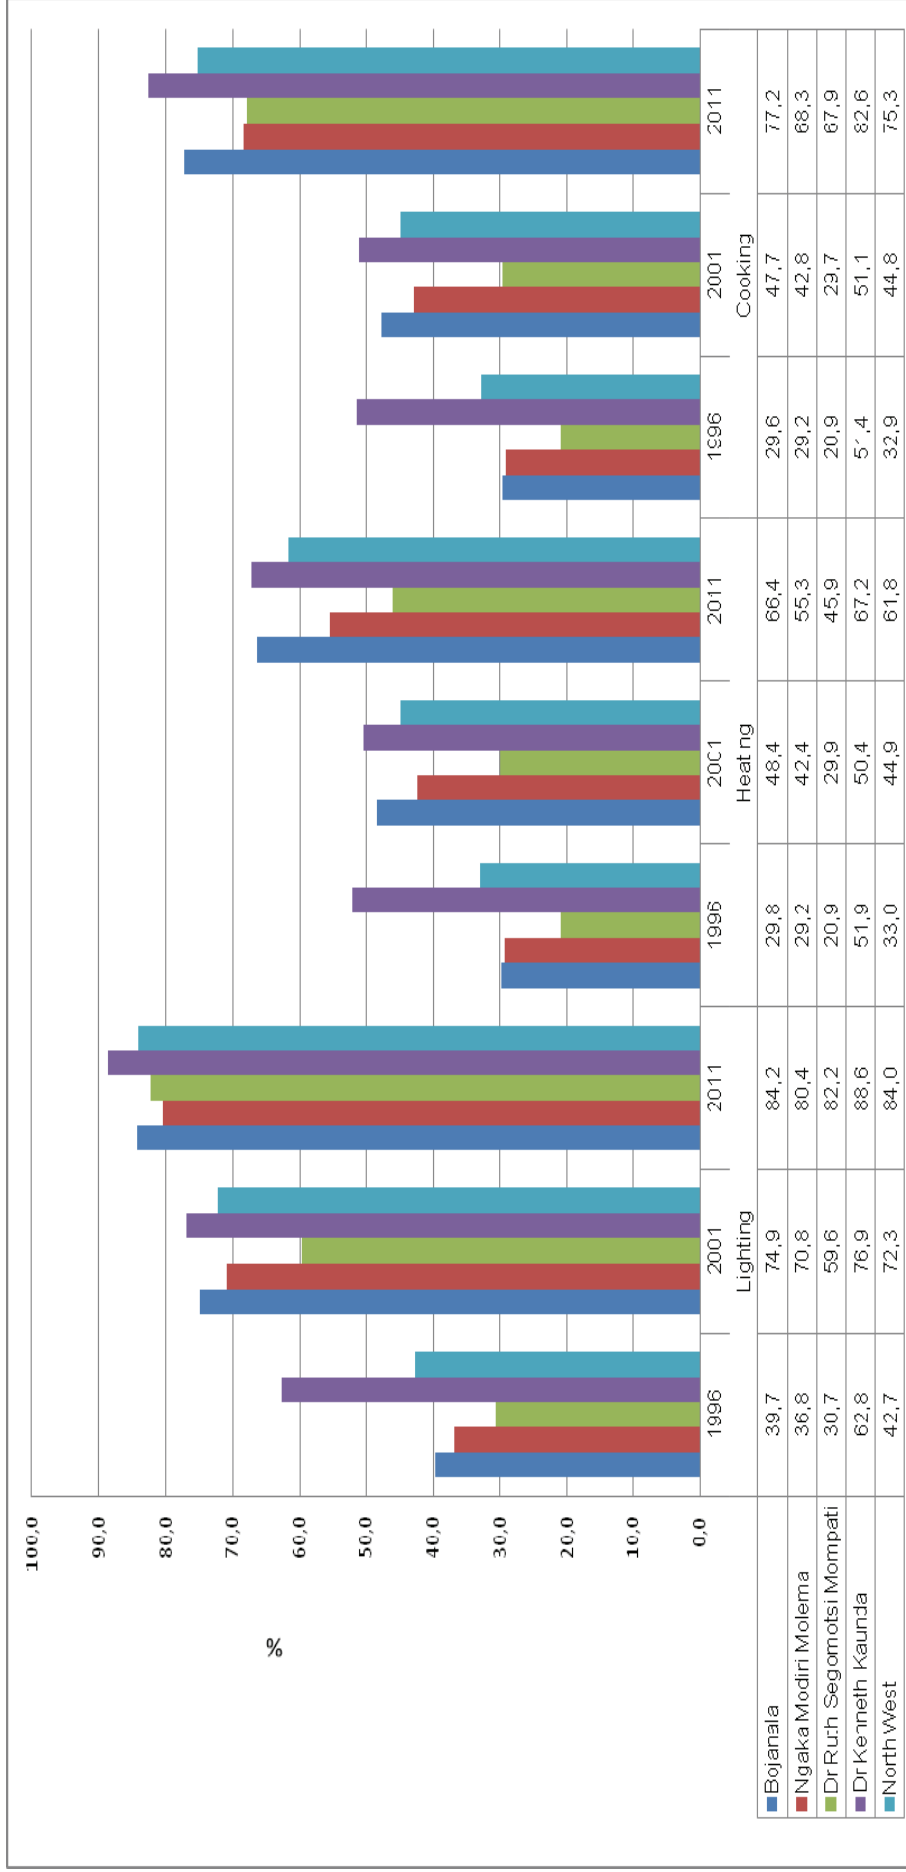

Figure 6.4.5.1 indicates that over the period 1996–2011, the proportion of households using electricity as the main source of energy for lighting; heating and cooking increased significantly across the province. Dr Kenneth Kaunda district has the highest percentages of households using electricity for all the three purposes.

### 6.4.7 Refuse disposal

**Figure 6.4.7.1: Distribution of households by refuse removal and district municipality – 1996, 2001 and 2011**

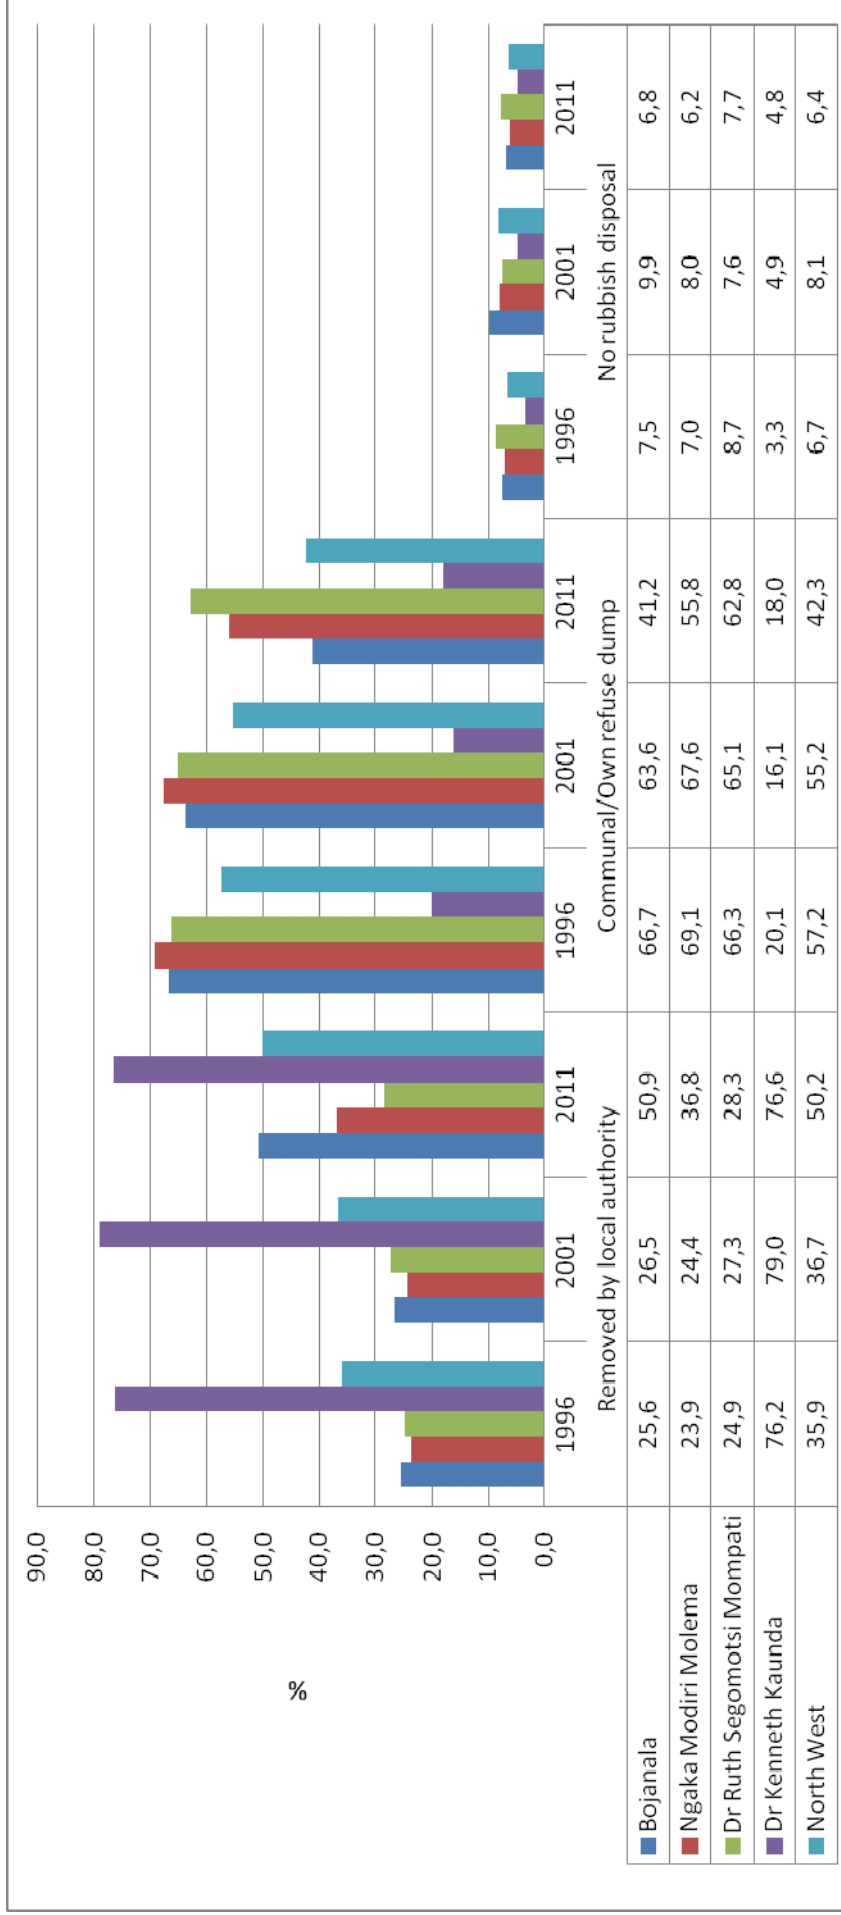

Figure 6.4.7.1 show that the proportion of households with refuse removed by local authority or private company increased in North West over time. Alongside is the decline in the percentage of households using communal/own refuse dump or have no access to refuse removal.

### 6.4.8 Toilet facilities

**Figure 6.4.8.1: Distribution of households by toilet facility and district Municipality – 1996, 2001 and 2011**

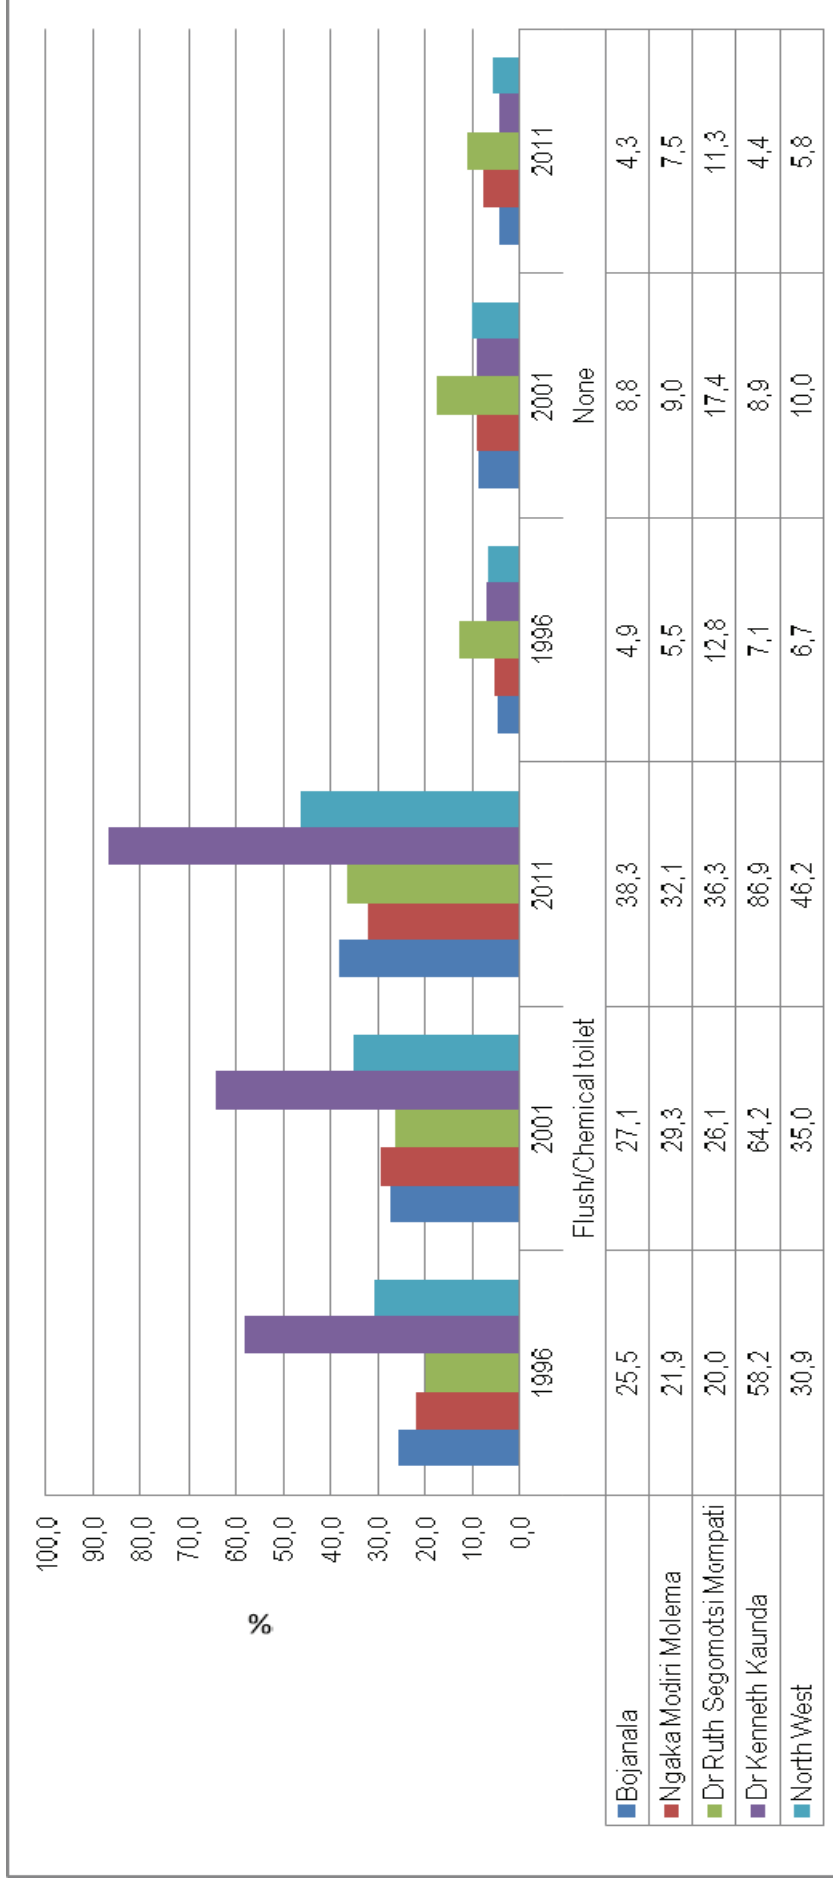

Figure 6.4.8.1 shows that the percentage of households with access to flush or chemical toilet has increased in all the districts. The graph also shows that the percentages of households with no toilet facility increased in all the districts during the period 1996–2001 and decreased thereafter. Dr Ruth Segomotsi Mompoti district recorded the highest percentage of households with no toilet facility in all the years.

**6.4.9 Average household income**

**Figure 6.4.9.1: Average household income and district municipality – 2001 and 2011**

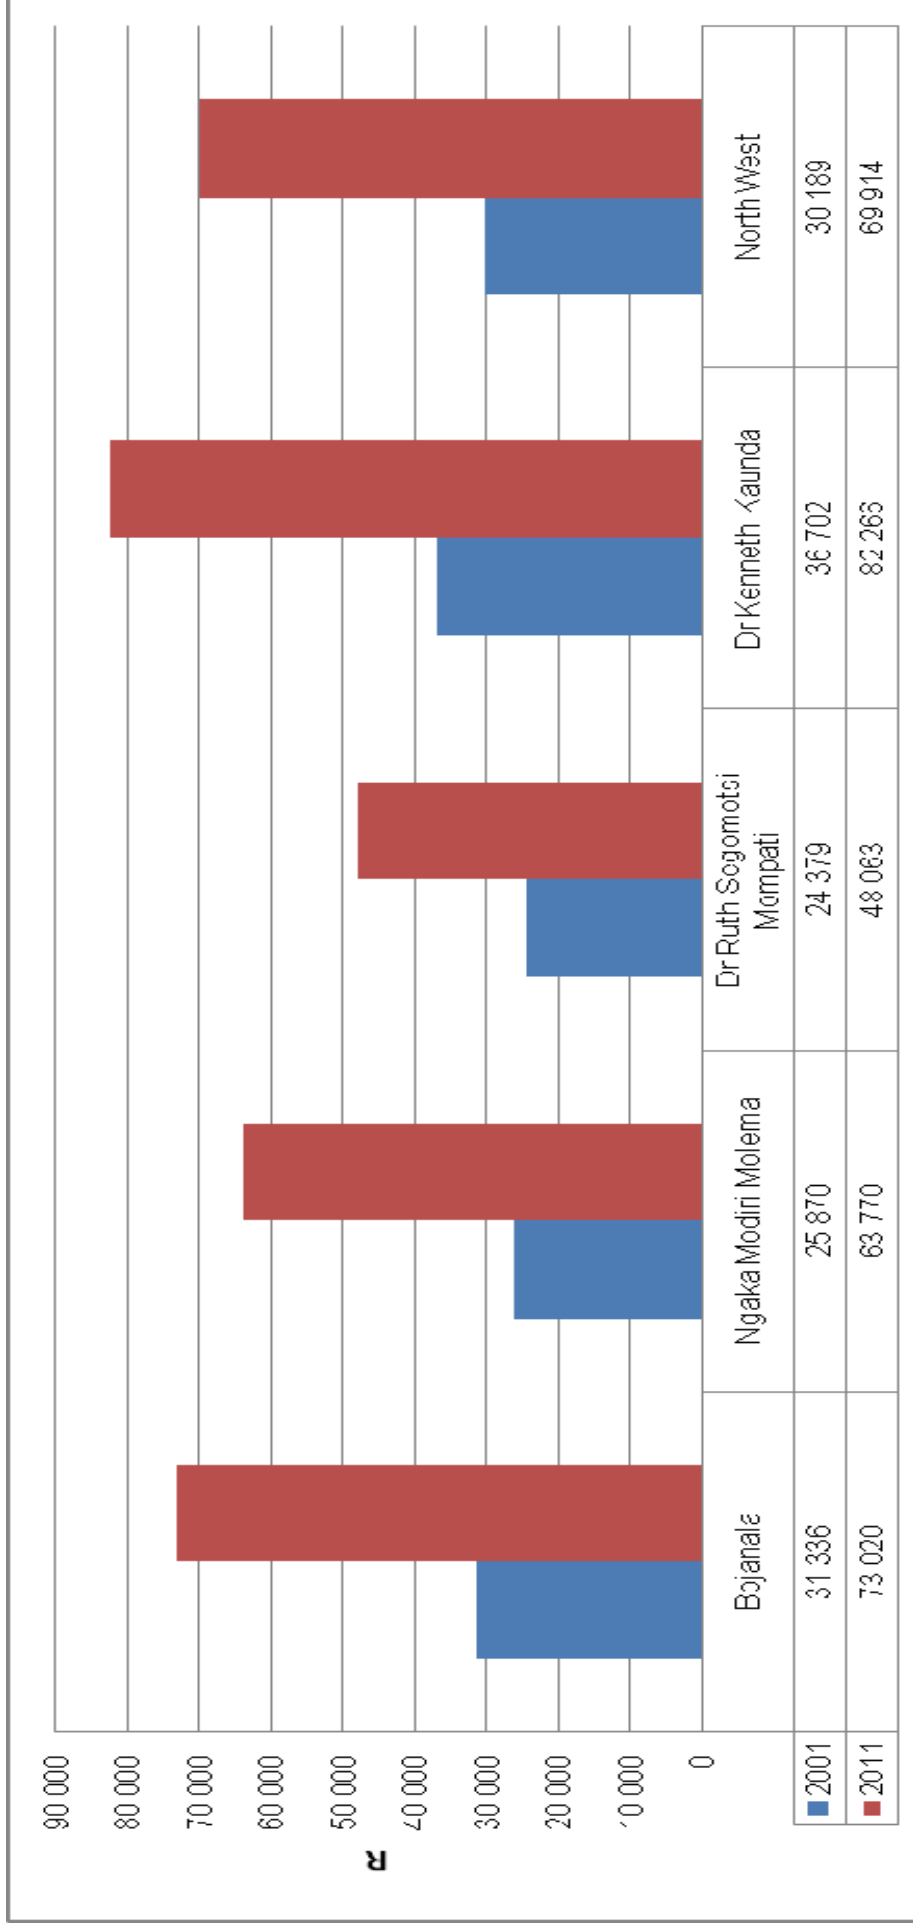

Figure 9.4.9.1 shows an increase in the average household income in the province.

**6.4.10 Female headed households**

**Figure 6.4.10.1: Distribution of female headed households by district municipality – 1996, 2001 and 2011**

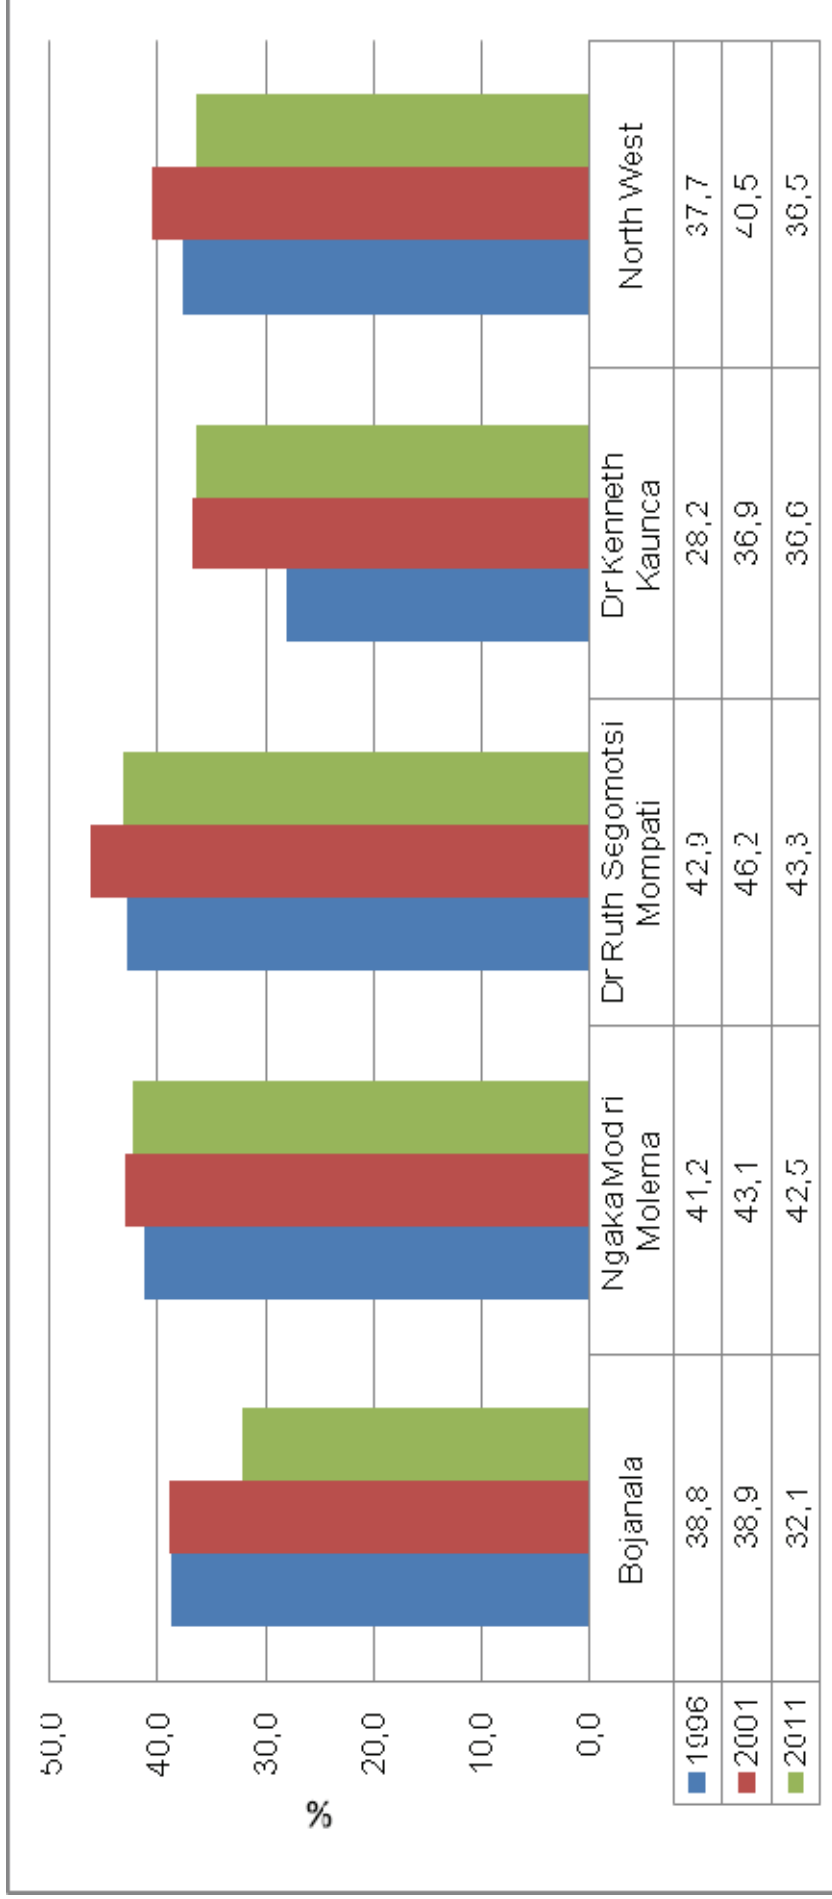

Figure 6.4.10.1 suggests a decline in the proportion of households headed by females. Dr Ruth Segomotsi Mompoti and Ngaka Modiri Molema had the highest female headed households.

### 6.4.11 Child headed households

**Figure 6.4.11.1: Distribution of child headed households by district municipality – 1996, 2001 and 2011**

The proportion of households headed by children continued to decrease across all districts as shown in Figure 6.4.11.1.

## Appendix
