KEY FINDINGS

Headline consumer price index (CPI for all urban areas)

Annual consumer price inflation was 6,0% in July 2016, down from 6,3% in June 2016. The consumer price index increased by 0,8% month-on-month in July 2016.

Table C (page 5) shows contributions to headline annual consumer price inflation.

- **Housing and utilities** decreased from 1,6 percentage points in June to 1,4 percentage points in July. The index increased by 5,8% year-on-year.

Table D (page 5) shows contributions to monthly consumer price inflation.

- **Food and non-alcoholic beverages** contributed 0,1 of a percentage point in July. The index increased by 0,5% month-on-month, mainly due to a 2,7% increase in sugar, sweets and desserts, a 1,1% increase in milk, eggs and cheese and a 0,8% increase in bread and cereals.
- **Housing and utilities** contributed 0,6 of a percentage point in July. The index increased by 2,4% month-on-month, mainly due to a 10,1% increase in water tariffs, a 5,5% increase in assessment rates and a 7,5% increase in electricity tariffs.
- **Transport** contributed 0,1 of a percentage point in July. The index increased by 0,8% month-on-month, mainly due to the 11c/l increase in the petrol price.

In July the CPI for **goods** increased by 6,5% year-on-year (down from 6,7% in June), and the CPI for **services** increased by 5,7% year-on-year (down from 5,8% in June).

Provincial annual inflation rates ranged from 4,8% in Northern Cape to 7,9% in Limpopo (see Table A).

Note: Not all items in the CPI are surveyed every month. Table F (page 8) shows the survey schedule for items that are not surveyed monthly. No additional surveys are scheduled for August 2016.

GLOSSARY

A complete set of definitions is available in the methods and sources document on the Stats SA website

<http://www.statssa.gov.za>

Annual inflation rate	The annual inflation rate is the change in the index of the relevant month of the current year compared with the index of the same month in the previous year expressed as a percentage.
Annual percentage change	The annual percentage change is the change in the index of the relevant month of the current year compared with the index of the same month in the previous year expressed as a percentage.
Average annual inflation rate	The average annual inflation rate is the change in the average index of one year compared with the average index of the previous year expressed as a percentage.
Average annual percentage change	The average annual percentage change is the change in the average index of one year compared with the average index of the previous year expressed as a percentage.
CPI for administered prices	An administered price is defined as the price of a product which is set consciously by an individual producer or group of producers and/or any price which can be determined or influenced by government, either directly or through a government agency/institution without reference to market forces. Products and services included are assessment rates, sanitary fees, refuse removal, water, electricity, paraffin, petrol, public transport – trains, motor licences, motor registration, telephone fees, postage, cell calls, television licence, school fees, university/technicons/colleges and university boarding fees.
CPI for regulated prices	Regulated prices are those administered prices that are monitored and controlled by government policy. To this end, price regulation does not necessarily imply the presence of an economic regulator, but the restriction on the extent to which prices in August vary, depending on government's policy objective. Products and services included are water, electricity, paraffin, petrol, telephone fees, postage and cell calls.
CPI per expenditure quintile	quintile 1 - up to R 21 399; quintile 2 - R 21 400 up to R 35 750; quintile 3 - R 35 751 up to R 61 624; quintile 4 - R 61 625 up to R 142 083; and quintile 5 - R 142 084 and more.
Inflation rate	The inflation rate is the change in the CPI for all items of the relevant month of the current year compared with the CPI for all items of the same month in the previous year expressed as a percentage.
Monthly percentage change	The monthly percentage change is the change in the index of the relevant month compared with the index of the previous month expressed as a percentage.
