KEY FINDINGS

Headline consumer price index (CPI for all urban areas)

Annual consumer price inflation was 3,3% in October 2020, up from 3,0% in September 2020. The consumer price index increased by 0,3% month-on-month in October 2020.

The main contributors to the 3,3% annual inflation rate were food and non-alcoholic beverages; housing and utilities; and miscellaneous goods and services (Table C on page 6).

Food and non-alcoholic beverages increased by 5,4% year-on-year, and contributed 0,9 of a percentage point to the total CPI annual rate of 3,3%.

Housing and utilities increased by 2,8% year-on-year, and contributed 0,7 of a percentage point.

Miscellaneous goods and services increased by 6,7% year-on-year, and contributed 1,1 percentage point.

The annual inflation rates for goods and for services were 2,6% and 3,8% respectively. Provincial annual inflation rates ranged from 2,9% in Gauteng and Mpumalanga to 3,9% in Western Cape (Table A on page 4).

Note: Not all items in the CPI are surveyed every month. Table F (page 9) shows the survey schedule for items that are not surveyed monthly.

Note regarding COVID-19

Resulting from COVID-19 health protocols, retail-based prices recorded across all regions (including online prices) have been pooled to create national average price changes which are then applied to each elementary index at a regional level. This means that the geographic index (including total country) changes will, in the main, vary according to different weights and not different price changes.
