Key findings for May 2013

Final manufactured goods – headline PPI

The annual percentage change in the PPI for final manufactured goods was 4,9% in May 2013 (compared with 5,4% in April 2013). From April 2013 to May 2013 the PPI for final manufactured goods increased by 0,3%.

The main contributors to the annual rate of 4,9% were food products, beverages and tobacco products (6,1% year-on-year and contributing 2,0 percentage points) and coke, petroleum, chemical, rubber and plastic products (4,5% year-on-year and contributing 0,8 of a percentage point) (see Figure 1.2).

The main contributors to the monthly increase of 0,3% were food products, beverages and tobacco products (0,7% month-on-month and contributing 0,2 of a percentage point) and transport equipment (1,4% month-on-month and contributing 0,2 of a percentage point) (see Figure 1.1).

Intermediate manufactured goods

The annual percentage change in the PPI for intermediate manufactured goods was 7,8% in May 2013 (compared with 7,2% in April 2013). From April 2013 to May 2013 the PPI for intermediate manufactured goods increased by 0,9%.

The main contributors to the annual rate of 7,8% were chemicals, rubber and plastic products (6,3% year-on-year and contributing 2,6 percentage points) and basic and fabricated metals (7,0% year-on-year and contributing 2,0 percentage points) (see Figure 2.2).

The main contributor to the monthly increase of 0,9% was basic and fabricated metals (1,2% month-on-month and contributing 0,4 of a percentage point) (see Figure 2.1).

Electricity and water

The annual percentage change in the PPI for electricity and water was 13,5% in May 2013 (compared with 12,9% in April 2013). From April 2013 to May 2013 the PPI for electricity and water increased by 2,0%.

The contributors to the annual rate of 13,5% were electricity (14,0% year-on-year and contributing 11,6 percentage points) and water (11,5% year-on-year and contributing 2,0 percentage points) (see Figure 3.2).

The contributor to the monthly increase of 2,0% was electricity (2,5% month-on-month and contributing 2,1 percentage points) (see Figure 3.1).

Mining

The annual percentage change in the PPI for mining was 5,7% in May 2013 (compared with 4,5% in April 2013). From April 2013 to May 2013 the PPI for mining increased by 1,4%.

The main contributor to the annual rate of 5,7% was non-ferrous metal ores (9,5% year-on-year and contributing 4,3 percentage points) (see Figure 4.2).

The main contributors to the monthly rate of 1,4% were gold and other metal ores (1,8% month-on-month and contributing 0,4 of a percentage point) and non-ferrous metal ores (1,1% month-on-month and contributing 0,5 of a percentage point) (see Figure 4.1).

Agriculture, forestry and fishing

The annual percentage change in the PPI for agriculture, forestry and fishing was 2,9% in May 2013 (compared with 1,7% in April 2013). From April 2013 to May 2013 the PPI for agriculture, forestry and fishing decreased by 0,2%.

The main contributor to the annual rate of 2,9% was agriculture (2,6% year-on-year and contributing 2,0 percentage points) (see Figure 5.2).

The main contributor to the monthly rate of -0,2% was agriculture (-0,2% month-on-month and contributing -0,2 of a percentage point) (see Figure 5.1).

Key figures and analytical series

Table A - Key figures

Product	Weight	Index (2012=100)			Percentage change	
		May 2012	Apr 2013	May 2013	May 2013 vs. Apr 2013	May 2013 vs. May 2012
Final manufactured goods	100,00	100,0	104,6	104,9	0,3	4,9
Intermediate manufactured goods	100,00	98,9	105,7	106,6	0,9	7,8
Electricity and water	100,00	88,0	97,9	99,9	2,0	13,5
Mining	100,00	98,9	103,1	104,5	1,4	5,7
Agriculture, forestry and fishing	100,00	96,7	99,7	99,5	-0,2	2,9

Table B - Analytical series

Product	Weight	Index (2012=100)			Percentage change	
		May 2012	Apr 2013	May 2013	May 2013 vs. Apr 2013	May 2013 vs. May 2012
Final manufactured goods excluding petroleum products	92,72	99,8	104,5	104,9	0,4	5,1
Final manufactured goods excluding food	76,01	100,2	104,7	104,8	0,1	4,6
Intermediate manufactured goods excluding basic metals	88,06	98,3	105,7	106,7	0,9	8,5
Mining excluding precious metals and stones	54,32	101,7	105,1	105,9	0,8	4,1
Precious metals and stones	45,68	95,7	100,5	102,7	2,2	7,3

Note:

The PPI and the relevant statistical releases changed significantly in January 2013. These changes can be summarised as follows:

- The PPI for domestic output was replaced with five stages-of-production PPIs, which are published in statistical release P0142.1;
- The weights for the stages-of-production PPIs changed, and the product classification is based on the latest Central Product Classification (CPC version 2);
- The base year changed from 2000 to 2012 (2012=100);
- The PPIs for export and import goods are published in a new statistical release P0142.6 (Export and Import Price Indices);
- The PPIs for selected materials (Tables 11 and 12 in the previous PPI releases) are continued in statistical release P0151 (CPAP Work Groups and Selected Materials Indices, Tables 3 and 4) and are rebased to 2012=100.

Explanatory notes

Purpose and results of the survey	The Producer Price Index (PPI) measures changes in the prices of locally produced commodities. A sample of producers is surveyed each month and the results of this survey are used to compile the producer price indices for final manufactured goods, intermediate manufactured goods, electricity and water, mining, and agriculture, forestry and fishing. The PPI can be used as an economic indicator of inflation, as an escalator in contracts and as a deflator in the calculation of the national accounts. Further information on the weighting structure, sources of information and methods of compilation of the PPI can be found in the PPI sources and methods document, available on the Stats SA website.
--	---

Glossary

Producer Price Index	The PPI is defined as “ <i>A measure of the change in the prices of goods either as they leave their place of production or as they enter the production process (OECD).</i> ”
Contributions	The monthly (annual) contribution of a specific product or group of products to the specific PPI is calculated by multiplying the weight of this product or group of products with the difference of the current index and the previous month (year) index for this product or group of products, divided by the index for the specific index, for the previous month (year).
Annual inflation rate	The annual inflation rate per specific PPI is the change in the specific PPI for all items of the relevant month of the current year compared with the specific PPI for all items of the same month in the previous year expressed as a percentage.
Annual percentage change	The annual percentage change is the change in the index of the relevant month of the current year compared with the index of the same month in the previous year expressed as a percentage.
Average annual inflation rate	The average annual inflation rate is the change in the average specific PPI for all items of one year compared with the average specific PPI for all items of the previous year expressed as a percentage.
Average annual percentage change	The average annual percentage change is the change in the average index of one year compared with the average index of the previous year expressed as a percentage.
Monthly percentage change	The monthly percentage change is the change in the specific PPI of the relevant month compared with the specific PPI of the previous month expressed as a percentage.
Chain linking	The construction of a continuous price series by multiplying together price indices that have been using different weights reference periods. The resulting index is referred to as a chained index (Practical Guide to producing Consumer Price Indices; 2009). Linking is intended to ensure that the individual indices on all levels show the correct development through time, but leads to non-additivity (IMF,2005).

General information

Stats SA publishes approximately 300 different statistical releases each year. It is not economically viable to produce them in more than one of South Africa's eleven official languages. Since the releases are used extensively, not only locally but also by international economic and social-scientific communities, Stats SA releases are published in English only.

Stats SA has copyright on this publication. Users may apply the information as they wish, provided that they acknowledge Stats SA as the source of the basic data wherever they process, apply, utilise, publish or distribute the data; and also that they specify that the relevant application and analysis (where applicable) result from their own processing of the data.

Advance release calendar

An advance release calendar is disseminated on www.statssa.gov.za

Stats SA products

A complete set of Stats SA publications is available at the Stats SA Library and the following libraries:

National Library of South Africa, Pretoria Division
National Library of South Africa, Cape Town Division
Natal Society Library, Pietermaritzburg
Library of Parliament, Cape Town
Bloemfontein Public Library
Johannesburg Public Library
Eastern Cape Library Services, King William's Town
Central Regional Library, Polokwane
Central Reference Library, Nelspruit
Central Reference Collection, Kimberley
Central Reference Library, Mmabatho

Stats SA also provides a subscription service.

Electronic services

A large range of data are available via on-line services, diskette and computer printouts. For more details about our electronic data services, contact (012) 310 8600/8390/8351/4892/8496/8095.

Forthcoming issue	Issue	Expected release date
