## Key findings for May 2018

### Final manufactured goods – headline PPI

The annual percentage change in the PPI for final manufactured goods was 4,6% in May 2018 (compared with 4,4% in April 2018). From April 2018 to May 2018 the PPI for final manufactured goods increased by 0,7%.

The main contributors to the annual rate of 4,6% were coke, petroleum, chemical, rubber and plastic products (2,2 percentage points), transport equipment (0,6 of a percentage point) and paper and printed products (0,5 of a percentage point) (see Figure 1.2).

The main contributor to the monthly increase of 0,7% was coke, petroleum, chemical, rubber and plastic products (0,5 of a percentage point) (see Figure 1.1).

### Intermediate manufactured goods

The annual percentage change in the PPI for intermediate manufactured goods was 0,2% in May 2018 (compared with 0,1% in April 2018). From April 2018 to May 2018 the PPI for intermediate manufactured goods increased by 0,4%.

The main contributors to the annual rate of 0,2% were sawmilling and wood (0,5 of a percentage point) and recycling and manufacturing n.e.c. (0,5 of a percentage point) (see Figure 2.2).

The main contributors to the monthly increase of 0,4% were chemicals, rubber and plastic products (0,4 of a percentage point) and basic and fabricated metals (0,3 of a percentage point) (see Figure 2.1).

### Electricity and water

The annual percentage change in the PPI for electricity and water was 4,5% in May 2018 (compared with 4,9% in April 2018). From April 2018 to May 2018 the PPI for electricity and water increased by 0,2%.

The contributors to the annual rate of 4,5% were electricity (3,1 percentage points) and water (1,3 percentage points) (see Figure 3.2).

The contributor to the monthly increase of 0,2% was electricity (0,2 of a percentage point) (see Figure 3.1).

### Mining

The annual percentage change in the PPI for mining was 3,5% in May 2018 (compared with -2,6% in April 2018). From April 2018 to May 2018 the PPI for mining increased by 2,0%.

The main contributors to the annual rate of 3,5% were coal and gas (5,9 percentage points) and non-ferrous metal ores (4,1 percentage points) (see Figure 4.2).

The main contributors to the monthly increase of 2,0% were coal and gas (2,2 percentage points) and non-ferrous metal ores (0,7 of a percentage point) (see Figure 4.1).

### Agriculture, forestry and fishing

The annual percentage change in the PPI for agriculture, forestry and fishing was 2,6% in May 2018 (compared with 0,4% in April 2018). From April 2018 to May 2018 the PPI for agriculture, forestry and fishing increased by 2,2%.

The contributors to the annual rate of 2,6% were agriculture (1,6 percentage points), forestry (0,6 of a percentage point) and fishing (0,5 of a percentage point) (see Figure 5.2).

The main contributor to the monthly increase of 2,2% was agriculture (2,0 percentage points) (see Figure 5.1).

## Explanatory notes

<p><b>Purpose and results of the survey</b></p>	<p>The Producer Price Index (PPI) measures changes in the prices of locally produced commodities. A sample of producers is surveyed each month and the results of this survey are used to compile the producer price indices for final manufactured goods, intermediate manufactured goods, electricity and water, mining, and agriculture, forestry and fishing. The PPI can be used as an economic indicator of inflation, as an escalator in contracts and as a deflator in the calculation of the national accounts.</p> <p>Further information on the weighting structure, sources of information and methods of compilation of the PPI can be found in the PPI sources and methods document, available on the Stats SA website.</p>

## Glossary

<p><b>Producer Price Index</b></p>	<p>The PPI is defined as “A measure of the change in the prices of goods either as they leave their place of production or as they enter the production process (OECD).”</p>
<p><b>Contributions</b></p>	<p>The monthly (annual) contribution of a specific product or group of products to the specific PPI is calculated by multiplying the weight of this product or group of products with the difference of the current index and the previous month (year) index for this product or group of products, divided by the index for the specific index, for the previous month (year).</p>
<p><b>Annual inflation rate</b></p>	<p>The annual inflation rate per specific PPI is the change in the specific PPI for all items of the relevant month of the current year compared with the specific PPI for all items of the same month in the previous year expressed as a percentage.</p>
<p><b>Annual percentage change</b></p>	<p>The annual percentage change is the change in the index of the relevant month of the current year compared with the index of the same month in the previous year expressed as a percentage.</p>
<p><b>Average annual inflation rate</b></p>	<p>The average annual inflation rate is the change in the average specific PPI for all items of one year compared with the average specific PPI for all items of the previous year expressed as a percentage.</p>
<p><b>Average annual percentage change</b></p>	<p>The average annual percentage change is the change in the average index of one year compared with the average index of the previous year expressed as a percentage.</p>
<p><b>Monthly percentage change</b></p>	<p>The monthly percentage change is the change in the specific PPI of the relevant month compared with the specific PPI of the previous month expressed as a percentage.</p>
<p><b>Chain linking</b></p>	<p>The construction of a continuous price series by multiplying together price indices that have been using different weights reference periods. The resulting index is referred to as a chained index (Practical Guide to producing Consumer Price Indices; 2009). Linking is intended to ensure that the individual indices on all levels show the correct development through time, but leads to non-additivity (IMF,2005).</p>

## General information

Stats SA publishes approximately 300 different statistical releases each year. It is not economically viable to produce them in more than one of South Africa's eleven official languages. Since the releases are used extensively, not only locally but also by international economic and social-scientific communities, Stats SA releases are published in English only.

Stats SA has copyright on this publication. Users may apply the information as they wish, provided that they acknowledge Stats SA as the source of the basic data wherever they process, apply, utilise, publish or distribute the data; and also that they specify that the relevant application and analysis (where applicable) result from their own processing of the data.
