KEY FINDINGS

Exports

The UVI for exported commodities shows an annual rate of change of 2,3% in February 2017. From January 2017 to February 2017 the UVI for exported commodities decreased by 3,5%.

The main contributors to the annual rate of 2,3% were ores and minerals (4,2 percentage points) and agriculture (0,1 of a percentage point) (see Figure 4.2).

The main contributors to the monthly decrease of 3,5% were ores and minerals (-2,1 percentage points), agriculture (-0,5 of a percentage point) and other transportable goods (-0,5 of a percentage point) (see Figure 4.1).

Imports

The UVI for imported commodities shows an annual rate of change of -9,0% in February 2017. From January 2017 to February 2017 the UVI for imported commodities increased by 0,3%.

The main contributors to the annual rate of -9,0% were metal products, machinery and equipment (-6,4 percentage points) and other transportable goods (-3,1 percentage points) (see Figure 5.2).

The main contributor to the monthly increase of 0,3% was crude petroleum (0,6 of a percentage point) (see Figure 5.1).

KEY FIGURES AND ANALYTICAL SERIES

Table A - Key figures

Product	Weight	Index (Dec 2016=100)			Percentage change	
		Feb 2016	Jan 2017	Feb 2017	Feb 2017 vs. Jan 2017	Feb 2017 vs. Feb 2016
Exports	100,00	95,9	101,7	98,1	-3,5	2,3
Imports	100,00	110,7	100,4	100,7	0,3	-9,0

Table B - Analytical series

Product	Weight	Index (Dec 2016=100)			Percentage change	
		Feb 2016	Jan 2017	Feb 2017	Feb 2017 vs. Jan 2017	Feb 2017 vs. Feb 2016
Exports excluding gold	95,18	97,5	101,8	98,0	-3,7	0,5
Exports excluding ores and minerals	80,80	101,6	100,5	98,7	-1,8	-2,9
Exports excluding basic metals	76,25	97,9	102,5	97,3	-5,1	-0,6
Imports excluding crude petroleum	88,30	112,3	99,3	99,0	-0,3	-11,8

EXPLANATORY NOTES

- | | |
|----------------------------|---|
| Purpose and results | 1 The unit value index provides information on the trends in import and export unit values that are weighted with quantities of the current reference period. The calculation of unit value indices of commodities in exports and imports covers transactions reported by the South African Revenue Service. The results are used to compile export and import unit value indices, which are a measure of changes in export prices of locally produced commodities and changes in prices of imported commodities. Further information can be found in the XMUVI sources and methods document which can be accessed on this website:
http://www.statssa.gov.za/?page_id=2528 . |
| Source | 2 South African Revenue Service (SARS). |
| Gold | 3 The export unit value index for gold is calculated from net gold values and quantities obtained from the South African Reserve Bank (SARB) quarterly.

The index changes quarterly and is published in this publication with a one quarter lag (e.g. the September 2013 gold value and quantity will only be included in the December 2013 publication). |

GLOSSARY

- | | |
|--------------------------|--|
| Chain linking | The construction of a continuous price series by multiplying together price indices that have been using different weights for different periods. The resulting index is referred to as a chained index (Practical Guide to producing Consumer Price Indices; 2009). Linking is intended to ensure that the individual indices on all levels show the correct development through time, but leads to non-additivity (IMF, 2005). |
| Contributions | The contribution (percentage points) of a sub-index to the percentage change in the total index for a given period is calculated by multiplying the difference (i.e. change) in the sub index by its weight and then dividing by the previous period's total index. In the case of annual percentage changes, the contributions are approximations owing to annual changes in weights. |
| Percentage change | The percentage change in an index for any given period is the change between that period's index value and the previous period's index value expressed as a percentage of the latter. |

GENERAL INFORMATION

Stats SA publishes approximately 300 different statistical releases each year. It is not economically viable to produce them in more than one of South Africa's eleven official languages. Since the releases are used extensively, not only locally but also by international economic and social-scientific communities, Stats SA releases are published in English only.

Stats SA has copyright on this publication. Users may apply the information as they wish, provided that they acknowledge Stats SA as the source of the basic data wherever they process, apply, utilise, publish or distribute the data; and also that they specify that the relevant application and analysis (where applicable) result from their own processing of the data.

Advance release calendar

An advance release calendar is disseminated on www.statssa.gov.za

Forthcoming issues

Issue	Expected release date
March 2017	25 May 2017
April 2017	29 June 2017
May 2017	27 July 2017

Stats SA products

A complete set of Stats SA publications is available at the Stats SA Library and the following libraries:

National Library of South Africa, Pretoria Division
National Library of South Africa, Cape Town Division
Natal Society Library, Pietermaritzburg
Library of Parliament, Cape Town
Bloemfontein Public Library
Johannesburg Public Library
Eastern Cape Library Services, King William's Town
Central Regional Library, Polokwane
Central Reference Library, Nelspruit
Central Reference Collection, Kimberley
Central Reference Library, Mmabatho

Stats SA also provides a subscription service.

Electronic services

A large range of data are available via on-line services, diskette and computer printouts. For more details about our electronic data services, contact (012) 310 8600.
