**Preface**

This monthly statistical release provides information on South African residents and foreign travellers who entered or left South Africa in November 2019. Specific focus is on foreign tourists who entered the country during this month. The tourists are classified by region and country of residence. Details of their mode of travel; purpose of visit; age and sex distribution are also provided.

## 1. Key findings

### 1.1 Travellers

#### 1.1.1 Number of travellers

The routine data collected by the Department of Home Affairs' (DHA) immigration officers at the ports of entry into and out of South Africa shows that a total of 3 504 412 travellers (arrivals, departures and transits) passed through South African ports of entry/exit in November 2019. As presented in Table 1 on page 10, these travellers were made up of 909 878 South African residents and 2 594 534 foreign travellers. A further breakdown of the figures for South African residents indicates that there were 445 039 arrivals, 464 103 departures and 736 travellers in transit. The corresponding volume for foreign arrivals, departures and travellers in transit was 1 336 068, 1 193 490 and 64 976, respectively.

A comparison between the movements in November 2018 and November 2019 indicates that the volume of arrivals and departures increased for South African residents but decreased for foreign travellers. Travellers in transit decreased for both groups of travellers. For South African residents, the volume of arrivals increased by 1,9% (from 436 946 in November 2018 to 445 039 in November 2019). Departures increased by 2,0% (from 455 068 in November 2018 to 464 103 in November 2019), and transits decreased by 6,2% (from 785 in November 2018 to 736 in November 2019). For foreign travellers, arrivals decreased by 0,4% (from 1 341 316 in November 2018 to 1 336 068 in November 2019), departures decreased by 0,6% (from 1 200 690 in November 2018 to 1 193 490 in November 2019), and transits decreased by 6,3% (from 69 342 in November 2018 to 64 976 in November 2019).

A comparison between the movements in October 2019 and November 2019 indicates that the volume of arrivals decreased for South African residents but increased for foreign travellers, whereas the volume of departures increased for both South African residents and foreign travellers. Travellers in transit decreased for both groups of travellers. For South African residents, the volume of arrivals decreased by 6,8% (from 477 340 in October 2019 to 445 039 in November 2019), departures increased by 3,2% (from 449 801 in October 2019 to 464 103 in November 2019), and transits decreased by 9,1% (from 810 in October 2019 to 736 in November 2019). For foreign travellers, arrivals increased by 3,0% (from 1 297 483 in October 2019 to 1 336 068 in November 2019), departures increased by 4,8% (from 1 139 310 in October 2019 to 1 193 490 in November 2019), and transits decreased by 8,4% (from 70 909 in October 2019 to 64 976 in November 2019).

Detailed information on the departure of travellers is not available in the movement control system. Data on the purpose of travel and the number of days South African residents intend to spend or spent abroad are not collected by the DHA. It is therefore not possible to categorise South African residents as tourists or non-tourists. However, some data are available on foreign arrivals for this categorisation.

As presented in Table 1 on page 10, in November 2019, 83 037 (6,2%) of foreign arrivals were classified as non-visitors while 1 253 031 (93,8%) were classified as visitors. The visitors were categorised into three groups:

- i. Arrivals only – comprising visitors who entered the country in November 2019 but did not depart in November 2019 [304 257 (24,3%)];
- ii. Single trips – visitors who came to South Africa once in November 2019 and left in November 2019 [475 021 (37,9%)]; and
- iii. Multiple trips – visitors who came to and left South Africa more than once in November 2019 [473 753 (37,8%)].

Visitors were further grouped as same-day visitors and overnight visitors (tourists). In November 2019, there were 402 494 (32,1%) same-day visitors and 850 537 (67,9%) tourists. Between November 2018 and November 2019, the volume of same-day visitors increased by 3,9% (from 387 374 in November 2018 to 402 494 in November 2019) and that of tourists decreased by 2,8% (from 875 172 in November 2018 to 850 537 in November 2019). Between October 2019 and November 2019, the volume of same-day visitors increased by 6,6% (from 377 483 in October 2019 to 402 494 in November 2019), and tourists increased by 1,9% (from 834 275 in October 2019 to 850 537 in November 2019).

### 1.1.2 Mode of travel

Information presented in Table 2 on page 11, shows that in November 2019, road transport was the most common mode of travel used by 2 432 566 (69,4%) of the 3 504 412 travellers. The total number of travellers who used air transport was 1 033 546 (29,5%). Compared to the use of air and land transport, a smaller number of travellers, 38 300 (1,1%) used sea transport. Information on arrivals of South African residents shows that 167 647 (37,7%) came by air, 268 433 (60,3%) came by road and 8 959 (2,0%) arrived by sea transport. For departures, 168 279 (36,3%) used air, 284 680 (61,3%) used road and 11 144 (2,4%) left by sea transport. All travellers in transit, 736 (100,0%) used air transport.

In the case of foreign travellers, 306 319 (22,9%) arrived by air, 1 019 394 (76,3%) came by road and 10 355 (0,8%) arrived by sea transport. When departing South Africa, 325 589 (27,3%) foreign travellers left by air, 860 059 (72,1%) left by road and 7 842 (0,7%) left by sea transport. All travellers in transit, 64 976 (100,0%) used air transport. Table 2 further shows that of the 402 494 same-day visitors, an overwhelming majority, 382 263 (95,0%) arrived in the country by road, 19 609 (4,9%) flew into the country; and 622 (0,2%) arrived by sea transport. Information on tourists shows that 573 410 (67,4%) used road transport, 272 542 (32,0%) came by air transport and 4 585 (0,5%) arrived by sea transport.

## 1.2 Tourists

### 1.2.1 Mode of travel

The country of residence of tourists is used to categorise them according to their respective countries and regions. Information on the specific region and country of residence of tourists and the mode of travel used to enter South Africa is provided in Table 3 on pages 12 to 15. In November 2019, 218 284 (88,3%) of the 247 136 overseas tourists arrived in the country by air transport, whilst 24 485 (9,9%) came in by road transport and 4 367 (1,8%) arrived by sea transport. Tourists from the Southern African Development Community (SADC) countries, on the other hand, came predominantly by road, 547 343 (93,2%), followed by air travel, 39 766 (6,8%) and sea transport, 215 (less than 0,1%). The number of tourists who came into South Africa by air from 'other' African countries was 13 116 (91,5%), with 1 212 (8,5%) using road transport and 3 (less than 0,1%) using sea transport.

### 1.2.2 Regional and national distribution

In November 2019, the distribution of overseas tourists was as follows: Europe, 164 704 (66,6%); North America, 33 420 (13,5%); Asia, 24 390 (9,9%); Australasia, 10 193 (4,1%); Central and South America, 10 004 (4,0%); and the Middle East, 4 425 (1,8%).

Figure 1 on page 8 and Table 3 on pages 12 to 13, indicate that the ten leading overseas countries in terms of the number of tourists visiting South Africa in November 2019 were Germany, 41 119 (16,6%), United Kingdom (UK), 41 064 (16,6%); United States of America (USA), 27 288 (11,0%); France, 16 673 (6,7%); The Netherlands, 14 417 (5,8%); Australia, 8 723 (3,5%); China, 8 416 (3,4%); Switzerland, 7 397 (3,0%); India, 7 247 (2,9%); and Brazil, 6 495 (2,6%). Tourists from these ten countries constituted 72,4% of all tourists from overseas countries. A comparison of movements in the ten leading countries between November 2018 and November 2019 shows that the number of tourists increased for three of the ten leading countries (Brazil, Australia and UK), and decreased for seven of the ten leading countries (India, France, China, The Netherlands, Germany, Switzerland and USA). Brazil had the largest increase of 8,6% (from 5 979 tourists in November 2018 to 6 495 tourists in November 2019). India, on the other hand, had the largest decrease of 22,2% (from 9 315 tourists in November 2018 to 7 247 tourists in November 2019).

Virtually, most tourists from Africa, 587 324 (97,6%), came from the SADC countries. The distribution of the remaining tourists from Africa is as follows: East and Central Africa, 6 388 (1,1%); West Africa, 6 075 (1,0%); and North Africa 1 868 (0,3%). The ten leading SADC countries in terms of the number of tourists visiting South Africa in November 2019 were: Zimbabwe, 172 672 (29,4%); Lesotho, 114 844 (19,6%); Mozambique, 110 399 (18,8%); Swaziland, 76 104 (13,0%); Botswana, 56 288 (9,6%); Malawi, 16 462 (2,8%); Namibia, 14 622 (2,5%); Zambia, 12 186 (2,1%); Angola, 4 622 (0,8%) and Tanzania, 3 322 (0,6%). (See Figure 2 on page 8 and Table 3 on pages 13 to 14). Tourists from these ten countries constituted 99,0% of all tourists from the SADC countries.

A comparison between movements in November 2018 and November 2019 for the ten leading SADC countries shows that the number of tourists increased for two of the ten leading countries (Swaziland and Mozambique), and decreased for eight of the ten leading countries (Zambia, Angola, Malawi, Namibia, Tanzania, Lesotho, Zimbabwe and Botswana). Swaziland showed the largest increase of 2,1% (from 74 540 tourists in November 2018 to 76 104 in November 2019), while Zambia showed the largest decrease of 10,6% (from 13 638 tourists in November 2018 to 12 186 in November 2019), followed closely by Angola which decreased by 10,3% (from 5 151 tourists in November 2018 to 4 622 in November 2019).

The ten leading countries in terms of the number of tourists visiting South Africa in November 2019 from 'other' African countries, as shown in Figure 3 on page 9 and Table 3 on pages 14 to 15, were: Nigeria, 2 903 (20,3%); Kenya, 2 794 (19,5%); Ghana, 1 581 (11,0%); Uganda, 1 325 (9,2%); Egypt, 854 (6,0%); Ethiopia, 647 (4,5%); Cameroon, 526 (3,7%); Gabon, 316 (2,2%); Morocco, 315 (2,2%) and Côte d'Ivoire, 288 (2,0%). Tourists from these ten countries constituted 80,6% of all tourists from 'other' African countries. A comparison between movements in November 2018 and November 2019 shows that the number of tourists increased for five of the ten leading countries (Morocco, Cameroon, Uganda, Egypt and Côte d'Ivoire) and decreased for the other five of the ten leading countries (Nigeria, Gabon, Ghana, Ethiopia and Kenya). Morocco showed the largest increase of 44,5% (from 218 tourists in November 2018 to 315 in November 2019), while Nigeria showed the largest decrease of 45,8% (from 5 353 tourists in November 2018 to 2 903 in November 2019).

### 1.2.3 Purpose of visit

As observed in Table 4 on pages 16 to 19, in November 2019, the majority of tourists, 826 580 (97,2%), were in South Africa for holiday<sup>1</sup> compared to 20 611 (2,4%); 2 869 (0,3%) and 477 (0,1%) who were in South Africa for business, study and for medical treatment respectively.

Compared to other overseas regions, Europe had the highest numbers of tourists, 159 300 (66,9%) who came for holiday, 5 082 (60,2%) who came for business, 265 (48,8%) who came for study and 57 (67,9%) who came for medical treatment.

Within the overseas regions, Central and South America had the highest proportion of its tourists who came for holiday, 98,6% (9 860), followed by Australasia, 98,3% (10 019), North America, 96,9% (32 381), Europe, 96,7% (159 300), the Middle East, 92,8% (4 105), and Asia, 91,9% (22 407).

Asia, 7,4% (1 805) had the highest proportion of its tourists who came to South Africa for business, followed by the Middle East, 6,0% (267), Europe, 3,1% (5 082), North America, 2,9% (980), Australasia, 1,7% (170), and Central and South America, 1,3% (133).

The Middle East had the highest proportion of its tourists who came to study, 1,2% (52), followed by Asia, 0,7% (165), Europe, 0,2% (265), North America, 0,1% (47), Central and South America, 0,1% (11), and Australasia, less than 0,1% (3).

Asia had 0,1% of their tourists who came for medical treatment. For the other four overseas regions, less than 0,1% of tourists from North America, Europe, the Middle East and Australasia came for medical treatment, whilst Central and South America had no tourists who came for medical treatment.

The majority of African tourists, 586 951 (97,6%) came to South Africa for holiday. However, the following differences in terms of reasons for travel were observed between tourists from the SADC countries and 'other' African countries, namely:

- A higher proportion of tourists from SADC countries, 97,9% (574 789) were on holiday, compared to 84,9% (12 162) from 'other' African countries who came for the same purpose. Information on the regions of 'other' African countries shows that 87,2% (5 296) of tourists from West Africa were on holiday, followed by tourists from East and Central Africa, 83,9% (5 357); and North Africa 80,8% (1 509) respectively.

<sup>1</sup> The holiday category includes tourists who came for vacation, visiting friends and relatives, shopping and other personal reasons. See section 5.5.2 on page 26 for a more detailed discussion.

- Business persons constituted 12,1% (1 736) of tourists from 'other' African countries compared to 1,7% (10 252) from SADC countries. North Africa had the highest proportion, 16,1% (301) of its tourists who came to South Africa for business purposes, followed by East and Central Africa, 13,1% (840) and West Africa, 9,8% (595).
- Students constituted 2,7% (383) of tourists from 'other' African countries compared with 0,3% (1 942) from SADC countries. North Africa, 2,9% (55) had the highest proportion of its tourists who came to South Africa for study purposes, followed by West Africa, 2,8% (169) and East and Central Africa, 2,5% (159).
- Medical treatment tourists constituted 0,3% (50) of tourists from 'other' African countries, while those from SADC constituted 0,1% (341) of its tourists. East and Central Africa, 0,5% (32) had the highest proportion of its tourists who came for medical treatment, followed by West Africa, 0,2% (15) and North Africa, 0,2% (3).

#### 1.2.4 Sex and age distribution

Table 5 on page 20 shows that in November 2019, there were 470 385 (55,3%) male and 380 152 (44,7%) female tourists. Overseas tourists were made up of 133 055 (53,8%) male tourists and 114 081 (46,2%) female tourists. There were 326 946 (55,7%) male and 260 378 (44,3%) female tourists from SADC countries. Tourists from 'other' African countries were made up of 9 276 (64,7%) male and 5 055 (35,3%) female tourists.

The ages of the tourists were categorised into seven broad groups (see Table 5 for detailed classification). The results presented in Table 5 further show that the majority of tourists were aged between 35 and 44 years [231 167 (27,2%)], followed closely by the age group 25 to 34 years [230 893 (27,1%)]. Taking the regions of residence into consideration, the results show that the highest proportion of tourists from SADC countries [185 858 (31,6%)] and those from 'other' African countries [4 857 (33,9%)] were aged between 35 and 44 years, whereas those from overseas countries [51 709 (20,9%)] were aged between 55 and 64 years. The second highest proportion of tourists from SADC countries [176 264 (30,0%)], 'other' African countries [3 827 (26,7%)] and overseas countries [50 571 (20,5%)] were aged between 25 and 34 years. The median ages of tourists from overseas, SADC and 'other' African countries were 48, 36 and 39 years respectively. The proportion of tourists aged less than 15 years was higher among tourists from SADC countries, 4,0% (23 449) compared to those from overseas countries, 2,9% (7 057) and to those from 'other' African countries, 2,5% (354).

A comparison of the three regions shows higher proportions of the elderly among both male and female tourists from overseas. Tourists aged 65 years and older comprised 16,9% (22 466) of male and 18,0% (20 585) of female tourists from overseas. This is in contrast to the pattern observed among tourists from the other two regions where tourists aged 65 years and older comprised less than 4,0% of both male and female tourists. From SADC countries, elderly tourists made up 2,2% (7 194) and 3,5% (9 102) of male and female tourists respectively; while in 'other' African countries elderly tourists made up 2,5% (234) and 2,6% (131) of male and female tourists respectively.

## 2. Figures

**Figure 1 – Number of tourists from the ten leading overseas countries in November 2018 and November 2019**

**Figure 2 – Number of tourists from the ten leading Southern African Development Community (SADC) countries in November 2018 and November 2019**

**Figure 3 – Number of tourists from the ten leading 'other' African countries in November 2018 and November 2019**

### 3. Tables

## 5. Explanatory notes

### NOTE TO USERS

In January 2014, Statistics South Africa (Stats SA), made changes in the *Tourism and Migration* statistical release. This change has become necessary as a result of the implementation of the enhanced Movement Control System (e-MCS) at the country's ports of entry. Currently, the new system (e-MCS) is operational at over 95% of the country's ports of entry. The change affects the identification of Transit Travellers that are currently categorised under Direction instead of Purpose of Movement. With this revision, Table 1 and Table 2 in the release now include a category for Transit while all tables reporting on tourists exclude transit travellers.

### 5.1 Introduction

Legal movements across South African borders, as well as legal immigration into South Africa, fall under the jurisdiction of the Department of Home Affairs (DHA). Stats SA then processes, analyses and publishes this information.

Administrative data sources from the DHA, that is, information from all the country's ports of entry and applications for permanent residence, constitute the only comprehensive source of information on foreign arrivals and departures, documented immigrants and emigrants. The information from this source of data provides the best national coverage (both in terms of space and time) of the population movements of South African residents and foreign travellers. The data can be used for the following:

- To estimate, monitor and understand salient characteristics of foreign travellers and volumes of South African residents travelling outside South Africa.
- To provide information that can be used to (a) assess the extent of government's progress in strengthening bilateral political and economic relations by assessing the number of international tourist arrivals, and (b) benchmark surveys focusing on the demand for local tourism services by foreign travellers.

### 5.2 Purpose of the statistical release

This release reports on arrivals, departures and transit travellers of South African residents and foreign travellers. Detailed information on the age and sex distribution; mode of travel; national and regional distribution; and purpose of travel of overnight visitors or tourists are also provided.

### 5.3 Scope and coverage

The release covers data collected by DHA officials on travellers who departed from or entered the Republic of South Africa (RSA).

### 5.4 Data

Information published in this release is based on data obtained from the following data sources within the DHA:

- Data routinely collected by immigration officers at all road, air and sea entry ports on all travellers (South African residents and foreign travellers) arriving into or departing from South Africa are captured into the DHA's population Movement Control System (MCS). The counts/statistics relate to the number of individual movements, rather than to the number of people. Hence, the multiple movements of individual people during the calendar month are each counted separately. Generally, the data are collected directly from travel documents either by scanning or capturing onto the ports' electronic database. No forms or cards are used (except on rare occasions when the capturing system is down) to collect information from travellers. Individual ports regularly transmit data onto the national database at the head office of the DHA.
- Stats SA receives downloaded data covering a particular calendar month from the DHA.

- As part of data interrogation, data from O.R. Tambo International Airport, which has the highest volume of travellers, are compared with passenger statistics from the Airports Company of South Africa (ACSA). As expected, in any specific month, an increase in the volume of passengers reported by ACSA is also reflected in an increase in the volume of travellers recorded by DHA. A similar pattern has also been observed when the volume of travellers decreased. In November 2019, the DHA data was 2,9% higher than that of ACSA.

## 5.5 Limitations

### 5.5.1 Outbound tourists

The information on the total number of arrivals and departures of South African residents is collected from the scanning of passports. However, data on the country visited are not collected from passengers; country of final destination; intended duration of stay and purpose of visit. With this limitation, it is impossible to identify the number of tourists from the data on South African residents.

### 5.5.2 Purpose of visit

The holiday category includes tourists who came for vacation, visiting friends and relatives, shopping and other personal reasons such as attending weddings. While it's possible to separate 'visiting friends and relatives' from the broad category of Holiday, shopping and other reasons for visiting South Africa are all combined with vacation in the DHA movement control system. Discussions are in progress with the Department of Home Affairs to capture vacation and shopping as separate categories for a clearer breakdown of tourists by purpose of visit.

## 5.6 Definition of terms

### 5.6.1 Definitions used by the United Nations World Tourism Organisation (UNWTO)

**Traveller** is someone who moves between different geographical locations for any purpose and any duration.

**Visitor** refers to any person travelling to a place other than that of his/her usual environment for less than 12 months and whose main purpose of the trip is other than the exercise of an activity remunerated from within the place visited.

**Same-Day visitor** is a visitor who visits a place for less than one night.

**Tourist** (overnight visitor) is a visitor who stays at least one night in collective or private accommodation in the place visited.

**Tourism** comprises the activities of persons travelling to, and staying in places outside their usual environment, for not more than one consecutive year, for leisure, business and other purposes. The usual environment of a person consists of a certain area around his/her place of residence, plus all the other places he/she frequently visits.

### 5.6.2 Definitions used specifically in this release

**South African resident** refers to either a South African citizen or a non-South African citizen with a South African permanent residence permit.

**Foreign traveller** refers to a traveller who is not a South African citizen or permanent resident.

**Region** refers to the following country classification:

- Overseas: Europe, North America, Central and South America, Australasia, the Middle East and Asia.
- Africa: SADC and 'other' Africa (East and Central Africa, West Africa and North Africa).

**Country** refers to individual countries within a region. The country of residence is used. The country of residence should not be confused with the country from which the visitor travelled.

**Africa** refers to all the countries in Africa (both mainland and island countries).

**SADC** refers to the fourteen countries, excluding South Africa, which belong to the Southern African Development Community.

**'Other' African** refers to all non-SADC African countries.

**Overseas** refers to all countries outside Africa.

**Trip** refers to the arrival and departure of a visitor in a specified month.

## 5.7 Symbols used

- = nil

< = less than

## 5.8 Rounding off

Percentages may not add up to 100 due to rounding.

## 6. General information

Stats SA publishes approximately 300 different statistical releases each year. It is not economically viable to produce them in more than one of South Africa's eleven official languages, since the releases are used extensively, not only locally but also by international economic and social-scientific communities. Stats SA releases are published in English.

Stats SA has copyright on this publication. Users may apply the information as they wish, provided that they acknowledge Stats SA as the source of the basic data wherever they process, apply, utilise, publish or distribute the data; and also that they specify that the relevant application and analysis (where applicable) result from their own processing of the data.

### Advance release calendar

An advance release calendar is disseminated at [www.statssa.gov.za](http://www.statssa.gov.za)
