EXPLANATORY NOTES	18
TECHNICAL ENQUIRIES	18
GENERAL INFORMATION	19

GDP in the third quarter of 2017 rose by 2,0%¹

Real gross domestic product (measured by production) increased by 2,0% in the third quarter of 2017, following an increase of 2,8% in the second quarter of 2017.

Figure 1 – Growth in GDP (%)

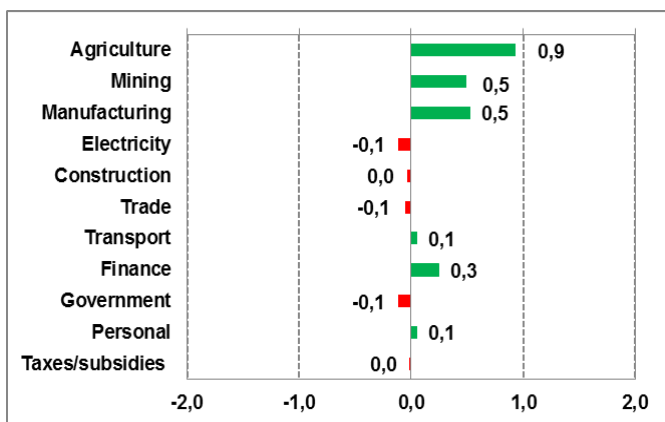

The largest contributor to growth in GDP in the third quarter was the agriculture, forestry and fishing industry, which increased by 44,2% and contributed 0,9 of a percentage point to GDP growth.

Mining and quarrying increased by 6,6% and contributed 0,5 of a percentage point to GDP growth. Manufacturing increased by 4,3%, which contributed a further 0,5 of a percentage point.

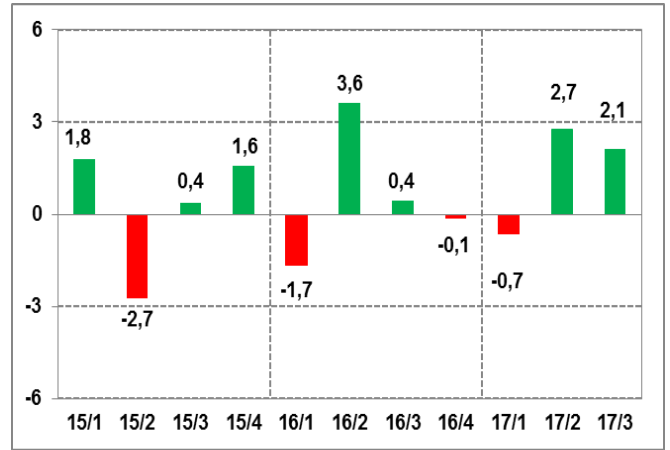

Three industries each contributed -0,1 of a percentage point to GDP growth, namely electricity, gas and water (-5,5% growth rate), trade (-0,4% growth rate) and general government (-0,7% growth rate).

Figure 2 – Contributions to growth in GDP, Q3 2017 (% points)

Expenditure on real gross domestic product increased by 2,1% in the third quarter of 2017, following an increase of 2,7% in the second quarter of 2017.²

Figure 3 – Growth in expenditure on GDP (%)

Household final consumption expenditure increased by 2,6% in the third quarter of 2017, contributing 1,6 percentage points to total growth.

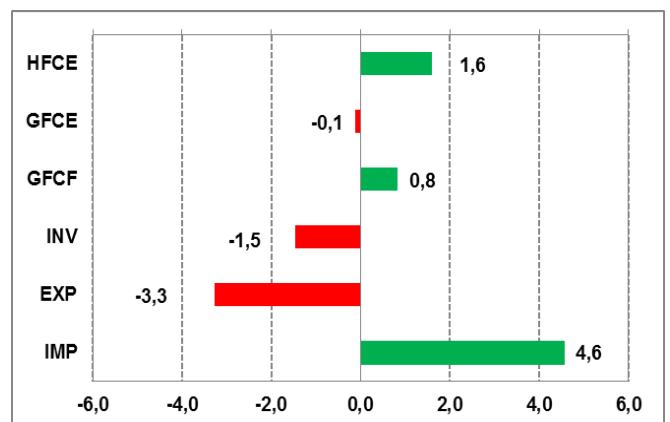

Government final consumption expenditure decreased by 0,5%, contributing -0,1 of a percentage point.

Gross fixed capital formation increased by 4,3%, contributing 0,8 of a percentage point.

Changes in inventories in the third quarter contributed -1,5 percentage points to total growth.

Exports decreased by 10,3% and imports decreased by 13,7%. Net exports contributed 1,3 percentage points to total growth.

Figure 4 – Contributions to growth in expenditure on GDP, Q3 2017 (% points)

¹ Unless otherwise specified, quarter-on-quarter growth rates are seasonally adjusted and annualised. All growth rates are calculated on the basis of series at constant prices.

² The figures showing growth in expenditure on GDP exclude the residual, calculated as the difference between GDP measured by production and the sum of the expenditure components. For more detail see Table 30 on the Stats SA website.

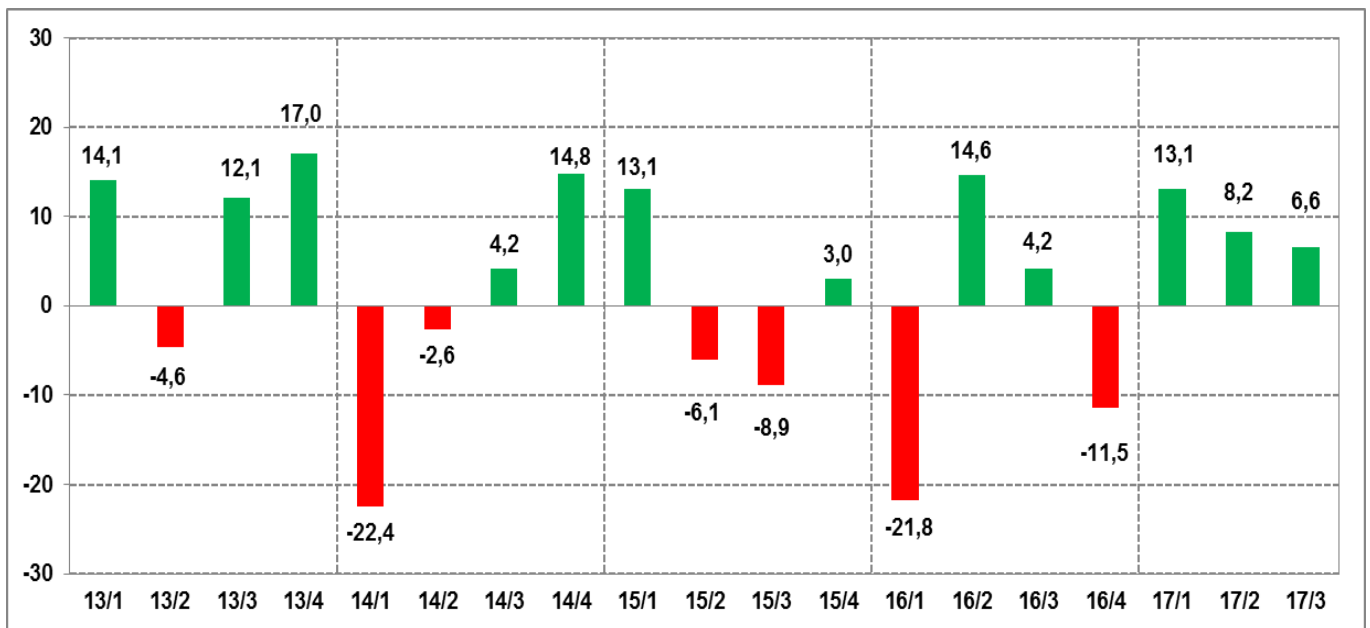

Gross domestic product at constant 2010 prices: third quarter of 2017

Primary sector

The agriculture, forestry and fishing industry increased by 44,2% in the third quarter of 2017. The increase was mainly the result of higher production of field crops and horticultural products.

The mining and quarrying industry increased by 6,6% in the third quarter, which was largely the result of higher production of gold and platinum group metals.

Figure 5 – Mining and quarrying growth rate (%)

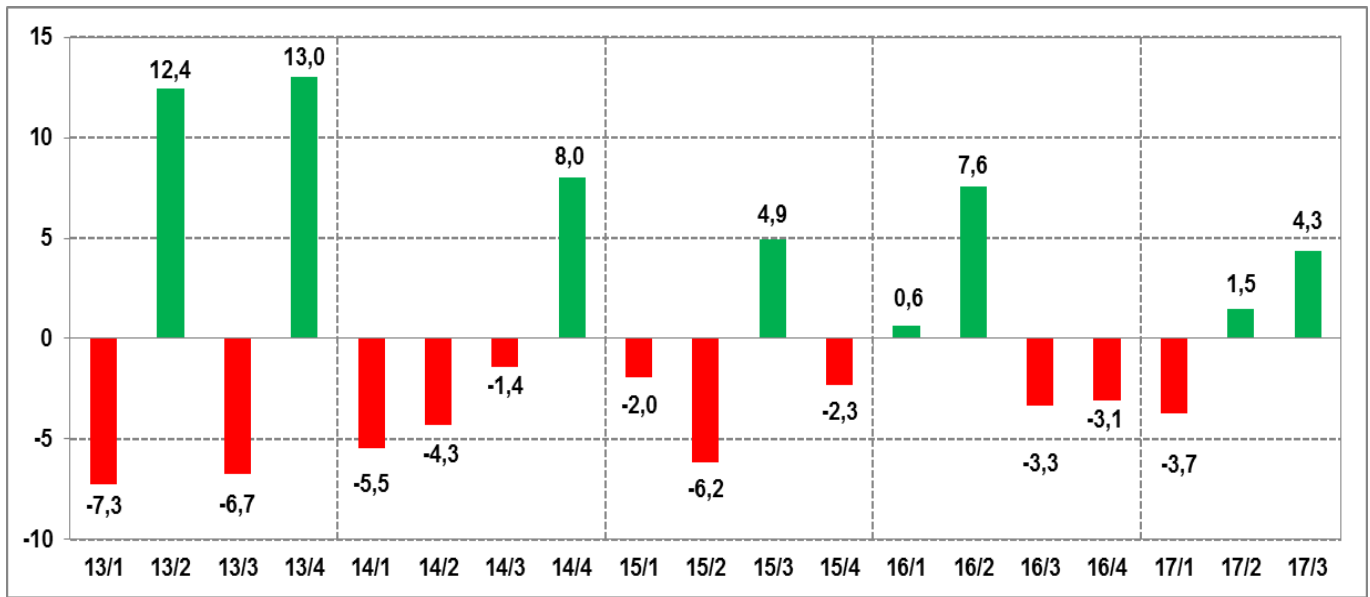

Secondary sector

The manufacturing industry increased by 4,3% in the third quarter. Notable increases were reported by the petroleum, chemical products, rubber and plastic products division, the basic iron and steel, non-ferrous metal products, metal products and machinery division, and the motor vehicles, parts and accessories and other transport equipment division.

The electricity, gas and water industry decreased by 5,5% in the third quarter, largely due to decreases in electricity consumed and produced and water available for distribution.

The construction industry decreased by 1,1%. Decreased activities were reported for residential and non-residential buildings and construction works.

Figure 6 – Manufacturing growth rate (%)

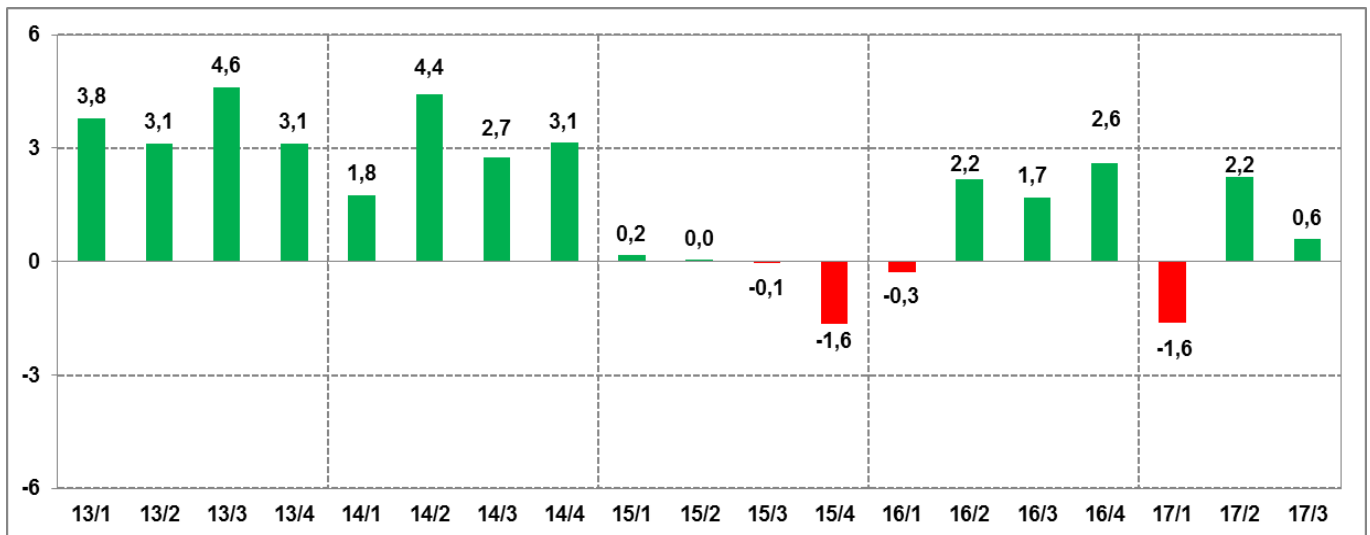

Tertiary sector

The trade, catering and accommodation industry decreased by 0,4%. Decreased economic activity was reported in wholesale trade, motor trade and catering and accommodation activities.

The transport, storage and communication industry increased by 0,6%. Increased economic activity was reported for land and air transport as well as communication services.

Figure 7 – Transport, storage and communication growth rate (%)

Finance, real estate and business services increased by 1,2% in the third quarter. Increased economic activity was reported for financial intermediation, insurance and auxiliary activities.

General government services decreased by 0,7%, partly attributable to declining levels of employment.

Personal services increased by 0,9%.

Expenditure on gross domestic product at constant 2010 prices: third quarter of 2017

Household final consumption expenditure (HFCE)

Final consumption expenditure by households increased by 2,6% in the third quarter of 2017.

Contributions to growth in HFCE are shown in Figure 8b. The four largest contributors were household furnishings and equipment (5,5% growth rate and contributing 0,4 of a percentage point), health (5,4% and 0,4 of a percentage point), transport (5,4% and 0,8 of a percentage point) and communication (9,7% and 0,4 of a percentage point). The positive growth in transport followed seven consecutive quarters of contraction.

Alcohol and tobacco (-1,5% growth rate) and housing (-0,5% growth rate) each contributed -0,1 of a percentage point to growth in HFCE.

Figure 8a – HFCE growth rate (%)

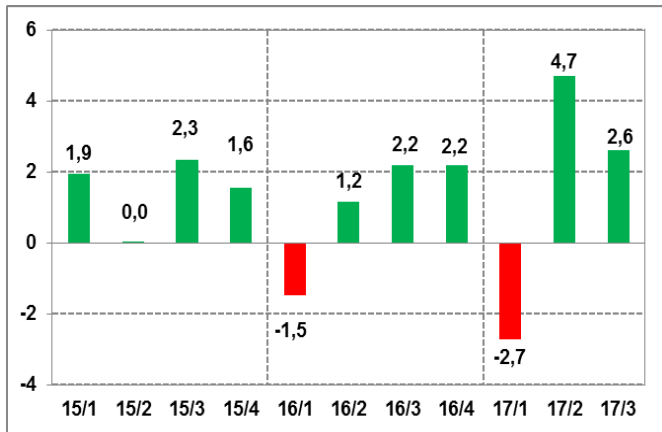

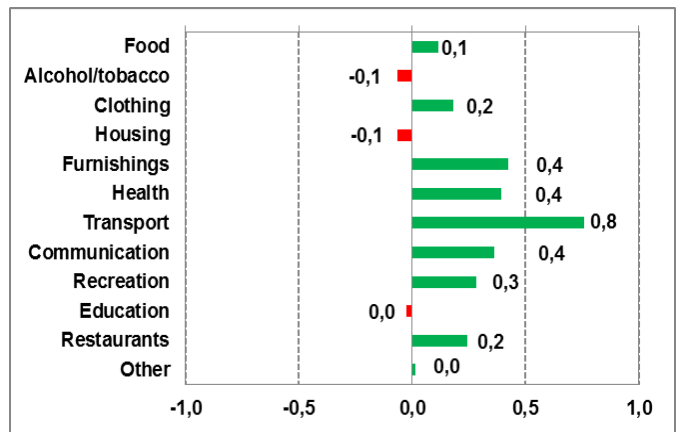

Figure 8b – HFCE contributions, Q3 2017 (% points)

Government final consumption expenditure (GFCE)

Final consumption expenditure by general government decreased by 0,5%. A decrease in employment numbers was reported.

Gross fixed capital formation (GFCF)

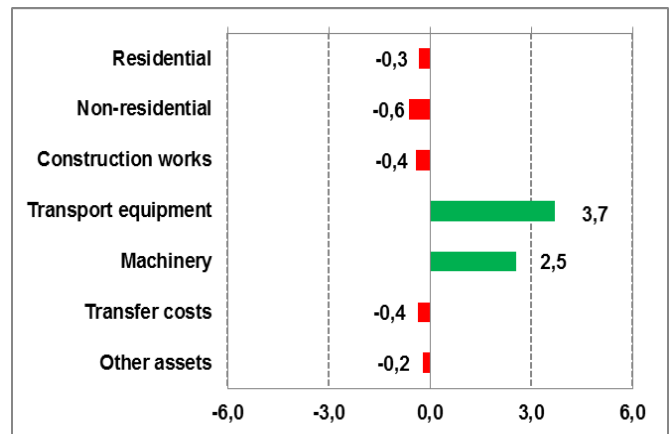

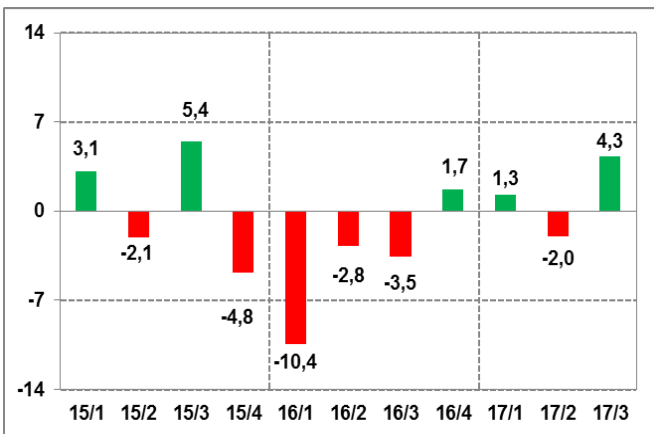

Gross fixed capital formation increased by 4,3% in the third quarter of 2017.

The largest contributor to growth was transport equipment, which increased by 37,5% and contributed 3,7 percentage points to growth in GFCF. Machinery and equipment increased by 7,9% and contributed 2,5 percentage points.

Residential and non-residential buildings, construction works, transfer costs and ‘other assets’ contributed negatively to growth in GFCF.

Figure 9a – GFCF growth rate (%)

Figure 9b – GFCF contributions, Q3 2017 (% points)

Changes in inventories

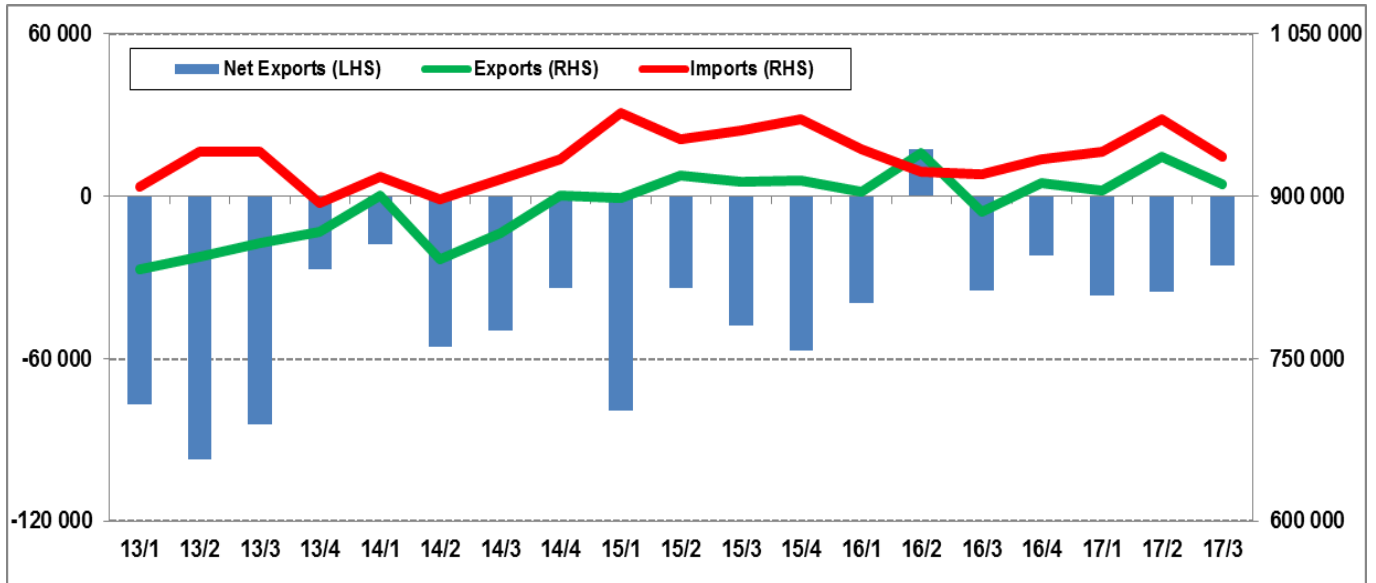

There was a R5,5 billion drawdown of inventories in the third quarter of 2017. Large decreases were reported for the trade sector. These drawdowns were partially offset by a build-up of inventories mainly in the transport, storage and communication industry.

Exports and imports of goods and services

Exports of goods and services decreased by 10,3%. Exports of mineral products, base metals and precious metals were largely responsible for the decrease in exports of goods.

Imports of goods and services decreased by 13,7%. Imports of mineral products, machinery and equipment and vehicles and transport equipment were largely responsible for the decrease in imports of goods.

GENERAL INFORMATION

Stats SA publishes approximately 300 different statistical releases each year. It is not economically viable to produce them in more than one of South Africa's eleven official languages. Since the releases are used extensively, not only locally but also by international economic and social-scientific communities, Stats SA releases are published in English only.

Stats SA has copyright on this publication. Users may apply the information as they wish, provided that they acknowledge Stats SA as the source of the basic data wherever they process, apply, utilise, publish or distribute the data; and also that they specify that the relevant application and analysis (where applicable) result from their own processing of the data.

Advance release calendar

An advance release calendar is disseminated on www.statssa.gov.za

Stats SA products

A complete set of Stats SA publications is available at the Stats SA Library and the following libraries:

National Library of South Africa, Pretoria Division
National Library of South Africa, Cape Town Division
Natal Society Library, Pietermaritzburg
Library of Parliament, Cape Town
Bloemfontein Public Library
Johannesburg Public Library
Eastern Cape Library Services, King William's Town
Central Regional Library, Polokwane
Central Reference Library, Nelspruit
Central Reference Collection, Kimberley
Central Reference Library, Mmabatho

Stats SA also provides a subscription service.

Electronic services

A large range of data are available via on-line services, diskette and computer printouts. For more details about our electronic data services, contact (012) 310 8600.
