## Freight transportation: results for February 2018

**Table A – Year-on-year percentage change in freight transportation (income at current prices)**

	Sep-17	Oct-17	Nov-17	Dec-17	Jan-18	Feb-18
Freight payload	4,8	11,4	8,0	3,4	6,1	9,5
Freight income	9,9	14,2	11,9	4,4	9,2	10,8

The volume of goods transported (payload) increased by 9,5% in February 2018 compared with February 2017. The corresponding income increased by 10,8% over the same period.

**Table B – Freight transportation income at current prices for the latest three months by type of commodity**

Type of commodity	Dec 2016 – Feb 2017 (R million)	Weight	Dec 2017 – Feb 2018 (R million)	% change between Dec 2016 – Feb 2017 and Dec 2017 – Feb 2018	Contribution (% points) to the total % change
Agriculture and forestry primary products	2 596	7,5	2 802	7,9	0,6
Primary mining and quarrying products	12 192	35,4	13 454	10,4	3,7
Manufactured food, beverages and tobacco products	5 123	14,9	5 188	1,3	0,2
Textiles, clothing and leather goods	611	1,8	556	-9,0	-0,2
Chemicals, coke, petroleum, rubber, plastic and other mineral products	2 829	8,2	2 966	4,8	0,4
Basic metals and fabricated metal products	1 316	3,8	1 399	6,3	0,2
Non-metallic products	795	2,3	762	-4,2	-0,1
Electrical machinery, transport machinery and equipment	498	1,4	463	-7,0	-0,1
Motor vehicles, parts and accessories	519	1,5	611	17,7	0,3
Paper and paper products	476	1,4	520	9,2	0,1
Commercial products	548	1,6	585	6,8	0,1
Used household and office products	968	2,8	875	-9,6	-0,3
Containers	1 624	4,7	1 798	10,7	0,5
Parcels	610	1,8	736	20,7	0,4
Other freight	3 768	10,9	4 547	20,7	2,3
<b>Total income</b>	<b>34 473</b>	<b>100,0</b>	<b>37 266</b>	<b>8,1</b>	<b>8,1</b>

Income from freight transportation increased by 8,1% in the three months ended February 2018 compared with the three months ended February 2017. The main contributors to this increase were:

- primary mining and quarrying products (10,4% and contributing 3,7 percentage points); and
- 'other' freight (20,7% and contributing 2,3 percentage points) – see Table B.

**Figure 1 – Freight transportation: year-on-year percentage change in payload****Table C – Seasonally adjusted payload for the latest three months by type of transport**

Payload	Sep – Nov 2017 (000 tons)	Weight	Dec 2017 – Feb 2018 (000 tons)	% change between Sep – Nov 2017 and Dec 2017 – Feb 2018	Contribution (% points) to the total % change
Rail	56 951	24,6	57 605	1,1	0,3
Road	174 621	75,4	178 094	2,0	1,5
<b>Total</b>	<b>231 571</b>	<b>100,0</b>	<b>235 699</b>	<b>1,8</b>	<b>1,8</b>

Seasonally adjusted payload increased by 1,8% in the three months ended February 2018 compared with the previous three months. Road freight increased by 2,0% (contributing 1,5 percentage points) while rail freight increased by 1,1% (contributing 0,3 of a percentage point) – see Table C.

## Passenger transportation: results for February 2018

**Table D – Year-on-year percentage change in passenger transportation (income at current prices)**

	Sep-17	Oct-17	Nov-17	Dec-17	Jan-18	Feb-18
Passenger journeys	-14,7	-10,7	-11,7	-9,7	-7,1	-8,7
Passenger income	-6,9	1,1	-0,6	-3,1	-0,9	-5,2

The number of passenger journeys decreased by 8,7% in February 2018 compared with February 2017. The corresponding income decreased by 5,2% over the same period.

**Figure 2 – Passenger transportation: year-on-year percentage change in passenger journeys**

**Table E – Seasonally adjusted passenger journeys for the latest three months by type of transport**

Passenger journeys	Sep – Nov 2017 (000)	Weight	Dec 2017 – Feb 2018 (000)	% change between Sep – Nov 2017 and Dec 2017 – Feb 2018	Contribution (% points) to the total % change
Rail	68 178	44,9	73 300	7,5	3,4
Road	83 527	55,1	85 071	1,8	1,0
<b>Total</b>	<b>151 705</b>	<b>100,0</b>	<b>158 370</b>	<b>4,4</b>	<b>4,4</b>

Seasonally adjusted passenger journeys increased by 4,4% in the three months ended February 2018 compared with the previous three months. Rail passenger journeys increased by 7,5% (contributing 3,4 percentage points) while road passenger journeys increased by 1,8% (contributing 1,0 percentage point) – see Table E.

## Survey information

<b>Introduction</b>	<b>1</b>	Statistics South Africa (Stats SA) conducts a monthly survey of the land transportation industry, covering passenger and freight transportation by rail and road (see paragraph 4 below). This survey is based on a sample drawn from the 2017 business sampling frame (BSF) that contains businesses registered for value added tax (VAT) and income tax.
	<b>2</b>	In order to improve timeliness, some information for the latest month had to be estimated due to late response. These estimates will be revised in future statistical releases as soon as information becomes available. Published land transportation income estimates exclude VAT.
<b>Purpose of the survey</b>	<b>3</b>	The results of the monthly land transport survey are used to compile estimates of the gross domestic product (GDP) and its components, which are used in monitoring the state of the economy and formulation of economic policy. These statistics are also used in the analysis of comparative business and industry performance.
<b>Scope of the survey</b>	<b>4</b>	<p>This survey covers enterprises involved in land transportation according to the following type of transportation:</p> <ul style="list-style-type: none"> <li>• railway transport (including passenger and freight transportation);</li> <li>• 'other' scheduled passenger land transport – urban, suburban and inter-urban bus and coach passenger lines and school buses;</li> <li>• 'other' non-scheduled passenger land transport – safaris and sightseeing bus tours, metered taxis and 'other' passenger transport including renting of motor cars with drivers; and</li> <li>• freight transport by road.</li> </ul>
<b>Exclusions</b>	<b>5</b>	<p>Passenger transportation excludes:</p> <ul style="list-style-type: none"> <li>• minibus taxis;</li> <li>• metropolitan buses (including the Bus Rapid Transport system – BRT); and</li> <li>• rental of private cars/buses without drivers.</li> </ul> <p>Freight transportation excludes:</p> <ul style="list-style-type: none"> <li>• renting of trucks without drivers; and</li> <li>• in-house transportation.</li> </ul>
<b>Classification</b>	<b>6</b>	The 1993 edition of the <i>Standard Industrial Classification of all Economic Activities</i> (SIC), Fifth Edition, Report No. 09-90-02, was used to classify the statistical units in the survey. The SIC is based on the 1990 <i>International Standard Industrial Classification of all Economic Activities</i> (ISIC) with suitable adaptations for local conditions. Statistics in this publication are presented at SIC division (two-digit) level. Each enterprise is classified to the industry which reflects its predominant activity.
<b>Collection rate</b>	<b>7</b>	The preliminary collection rate for the survey on land transportation for February 2018 was 82,9%. The improved collection rate for January 2018 was 89,9%.
<b>Statistical unit</b>	<b>8</b>	The statistical unit for which information is compiled and published is an enterprise, defined as a legal unit or a combination of legal units that includes and directly controls all functions necessary to carry out its income activities. The statistical units are derived from and linked to the South African Revenue Service (SARS) administrative data.
<b>Revised figures</b>	<b>9</b>	Revised figures are mainly due to late submission of data to Stats SA, or respondents reporting revisions or corrections to their figures. Preliminary figures, as indicated in the relevant tables, are subject to change and when revised will not be indicated as such.

## Technical notes

- Survey methodology and design**
- 1 The survey is conducted on a monthly basis. Questionnaires are sent to a sample of 702 enterprises from a population of 4 245 enterprises. Completed questionnaires are required to be returned to Stats SA within 10 days after the end of the reference month. Fax and telephone reminders are used to follow up on non-respondents.
- 2 A stratified random sample was drawn at the SIC four-digit level in April 2017 from Stats SA's business sampling frame (BSF). Strata were formed using a combination of Standard Industrial Classification and the measure of size classes for enterprises (see paragraph 3 below).

The Neyman optimal allocation formula given below was used to allocate samples to each stratum:

$$n_h = n * ( N_h * S_h ) / [ \sum ( N_i * S_i ) ].$$

Neyman allocation formula not only allocates sample sizes to each stratum but also calculates the relative precision for each stratum as well as the relative precision for all strata. The relative precision for these strata was 0,8%.

- Sample design and class limits** 3 The land transportation industry is divided into four size groups. All large enterprises (size group one) are completely enumerated. Simple random sampling is applied to medium sized (size group two) and to small (size group three and four) enterprises. The total value of income of the large enterprises (size group one) is added to the weighted totals of size groups two, three and four to reflect the total value of income.

### Measure of size classes (Rand)

Enterprise size	Size group	Lower limits	Upper limits
Very small	4	1 054 150	9 000 000
Small	3	9 000 001	39 000 000
Medium	2	39 000 001	78 000 000
Large	1	78 000 001	

- Sample weighting** 4 For those strata not completely enumerated, the weights to produce estimates are the inverse ratio of the sampling fraction, modified to take account of non-response in the survey. Stratum estimates are calculated and then aggregated with the completely enumerated stratum to form division estimates. These procedures are in line with international best practice.

- Reliability of estimates** 5 Data presented in this publication are based on information obtained from a sample and are, therefore, subject to sampling variability; that is, they may differ from the figures that would have been produced if the data had been obtained from all enterprises in the land transport industry in South Africa. Estimates are subject to sampling and non-sampling errors.

	<b>6</b>	Inaccuracies may occur because of imperfections in reporting by enterprises and errors made in the collection and processing of the data. Inaccuracies of this kind are referred to as non-sampling errors. Every effort is made to minimise non-sampling errors by careful design of questionnaires, testing them in pilot studies, editing reported data and implementing efficient operating procedures. Fluctuations may occur in consecutive months as a result of seasonal and economic factors.
<b>Year-on-year percentage change</b>	<b>7</b>	The year-on-year percentage change in a variable for any given period is the change between that period and the corresponding period of the previous year, expressed as a percentage of the latter.
<b>Contribution (percentage points)</b>	<b>8</b>	The contribution (percentage points) to the annual percentage change for any given period is calculated by multiplying the percentage change of each type of commodity/service by its corresponding weight, divided by 100. The weight is the percentage contribution of each type of commodity/service to total income in the corresponding period of the previous year.
<b>Seasonal adjustment</b>	<b>9</b>	Seasonally adjusted estimates are generated each month using the X-12-ARIMA Seasonal Adjustment Program developed by the US Bureau of the Census. Seasonal adjustment is a means of removing the estimated effects of normal seasonal variation from the series so that the effects of other influences on the series can be recognised more clearly. Seasonal adjustment does not aim to remove irregular or non-seasonal influences which may be present in any particular month. Influences that are volatile or unsystematic can still make it difficult to interpret the movement of the series even after adjustment for seasonal variations. Therefore the month-to-month movements of seasonally adjusted estimates may not be reliable indicators of trend behaviour. The X-12-ARIMA procedure for land transportation is described in more detail on the Stats SA website at: <a href="#">Click to download seasonal adjustment land transport August 2017</a>
<b>Trend cycle</b>	<b>10</b>	The trend is the long-term pattern or movement of a time series. The X-12-ARIMA Seasonal Adjustment Program is used for smoothing seasonally adjusted estimates to estimates of the underlying trend cycle.

## Glossary

<b>Enterprise</b>	An enterprise is a legal entity or a combination of legal units that includes and directly controls all functions necessary to carry out its activities.	
<b>Industry</b>	An industry is made up of enterprises engaged in the same or similar kinds of economic activity. Industries are defined in the <i>System of National Accounts (SNA)</i> in the same way as in the <i>Standard Industrial Classification of all Economic Activities (SIC)</i> , <i>Fifth Edition</i> , Report No. 09-90-02 of February 1993.	
<b>Symbols and abbreviations</b>	BSF	Business sampling frame
	GDP	Gross domestic product
	ISIC	International Standard Industrial Classification
	SIC	Standard Industrial Classification of all Economic Activities
	SARS	South African Revenue Service
	Stats SA	Statistics South Africa
	VAT	Value added tax

## General information

Stats SA publishes approximately 300 different statistical releases each year. It is not economically viable to produce them in more than one of South Africa's eleven official languages. Since the releases are used extensively, not only locally but also by international economic and social-scientific communities, Stats SA releases are published in English only.

Stats SA has copyright on this publication. Users may apply the information as they wish, provided that they acknowledge Stats SA as the source of the basic data wherever they process, apply, utilise, publish or distribute the data: and also that they specify that the relevant application and analysis (where applicable) result from their own processing of the data.

## Advance release calendar

A release calendar is disseminated on [www.statssa.gov.za](http://www.statssa.gov.za)

## Stats SA products

A complete set of Stats SA publications is available at the Stats SA Library and the following libraries:

National Library of South Africa, Pretoria Division  
National Library of South Africa, Cape Town Division  
Natal Society Library, Pietermaritzburg  
Library of Parliament, Cape Town  
Bloemfontein Public Library  
Johannesburg Public Library  
Eastern Cape Library Services, King William's Town  
Central Regional Library, Polokwane  
Central Reference Library, Mbombela  
Central Reference Collection, Kimberley  
Central Reference Library, Mmabatho

Stats SA also provides a subscription service.

## Electronic services

A large range of data is available via online services. For more detail about our electronic services, contact Stats SA's user information service at (012) 310 8600.

You can visit us on the internet at: [www.statssa.gov.za](http://www.statssa.gov.za)
