Preface

The report provides information on South African residents and foreign travellers who passed through all South African air, land and sea ports of entry/exit in 2014. It summarises data published in the monthly statistical releases on *Tourism and Migration* (Statistical release P0351) in 2014, highlighting annual numbers of travellers and tourists. Details on mode of travel, seasonal travel patterns, purpose of visit; length of stay of visit; and demographic characteristics of tourists who visited South Africa in 2014 are provided.

1. Introduction

1.1. Background

Administrative records regulating the flow of people across boundaries, specifically border statistics, are an important source of statistical data on temporary population movements in many countries. Generally, countries routinely collect some data from both residents and non-residents who pass through the demarcated air, land and sea ports on arrival in and departing from the country. The method, the kind of collected data, the quality of data and the dissemination and availability of processed data differ quite widely among countries since there is no international standardised template for the recording of information on travellers. Besides the impact of the level of infrastructure development, the national differences are largely shaped by the immigration policies and regulations of individual countries.

Data collection methods may be electronic, manual or both. Travel documents could be scanned and/or travellers are expected to complete an arrival and departure form/card. The level of documentation and the information collected from travellers are often influenced by the citizenship / nationality of the travel document and the purpose of entry.

Data obtained from foreigners or non-residents can be used to categorise them into visitors and non-visitors. Usually, the data given on the form regarding purpose of visit and/or length of stay is also used to categorise travellers into visitors and migrants. In countries that do not use cards/forms, data on type of visa/permit can also be used for the categorisation. In addition, there are countries that issue special cards for registered immigrants that they could use to cross in and out of the country of residence. Thus the information from the visa, permit and the card/form are used to classify non-visitors into migratory categories such as short-term and long-term migrants; temporary migrants; permanent migrants; labour migrants, asylum seekers, students, *etc.* according to a country's specifications.

Because border statistics are derived from arrival data they could be the most suitable data source for the direct measurement of the *flow* of immigrants (UN, 2011). The data are routinely collected as travellers pass through the immigration check points at the port of entry so data are available at any given time intervals. It is very crucial to note that unlike data from census or sample surveys that count individual persons, border statistics by their nature, do measure events *i.e.* movements of persons rather than the physical persons. The simple reason is that the same person can cross the border a number of times during a specified time and his or her information is recorded every time he or she passes through the border.

The management of population movements across South African borders and immigration into South Africa fall under the jurisdiction of the Department of Home Affairs (DHA). The jurisdiction of this responsibility is enshrined in the various immigration acts, amendments, laws and regulations. Currently, with respect to the collection of data on population movements in and out of South Africa, the DHA operates with the Immigration Act 2002 (Act No. 13 of 2002), its amendments and associated regulations. The latest Immigration Regulations came into operation on 26 May 2014. Any changes and amendments in the legislation and regulations affect both the flow of travellers as well as the methods of collecting data and the kind of information collected on travellers.

At the ports of entry/exit (see Appendix I for the distribution of all South African ports), the immigration officers of the DHA collect information on South African residents and foreign travellers arriving into or departing from South Africa. This information is used to produce statistical releases on all travellers, with emphasis on tourists and an annual report aggregating the results of one calendar year.

1.2. Objectives of this report

The report forms part of a regular annual series of publications on tourism. The main aim of the report is to present information on population movements into and out of South Africa in 2014. Specifically, the report provides:

- Information on arrivals, departures and transits of South African residents and foreign travellers.
- A detailed analysis of the movements of tourists and their demographic characteristics over the twelve months period.

1.3. Scope of this report

This report is based on information on population movements across South Africa's ports of entry/exit covering the period from 1 January 2014 to 31 December 2014. It covers data on arrivals and departures of South African residents and foreign travellers. A detailed analysis of the data on foreign tourists with respect to: mode of travel, purpose of visit, sex and age distribution is covered. The report also describes trends in the overall number of travellers and tourists from 2000 to 2014.

2. Data and methods

2.1 Data source

Data routinely collected by immigration officers at all land, air and sea ports of entry/exit (see Appendix I) on all travellers (South African residents and foreign travellers) arriving into or departing from South Africa are captured into the Department of Home Affairs's (DHA) population Movement Control System (MCS). The data provide the best national coverage (in terms of both space and time) on the population movements of South African residents and foreign travellers. Among other uses, the data:

- can be used to estimate, monitor and understand salient characteristics of South African residents and foreign travellers travelling into and out of South Africa;
- provide information that can be used to assess the extent of government's progress in strengthening bilateral and multilateral political and economic relations with other countries;
- can be used to estimate the number and some characteristics of same-day visitors and tourists that visit South Africa;
- provide information for marketing tourism by identifying niche, emerging and declining markets (both at country and regional levels); and
- provide information that can be used for monitoring the effects of major international and national events (positive or negative) on the arrival of visitors into the country.

Generally the data are collected directly from travel documents either by scanning them or by capturing information from the travel documents onto the port's electronic database. Individual ports regularly transmit the data into the national database *i.e.* the MCS at the head office of the DHA.

2.2 Data processing and analysis

Statistics South Africa (Stats SA) downloads the data covering a particular calendar month from DHA. SAS programme is used for data editing and analysis. Descriptive analyses (frequencies, cross-tabulations, percentage distributions and median ages) were used to summarise the data. The results are presented in table and graph formats. These are undertaken on a monthly basis to publish information on tourism in the monthly *Tourism and Migration* (P0351) statistical release in order to meet users' immediate needs. The cumulative data for twelve months are published in the *Tourism* report on an annual basis.

2.3 Limitations of data

The information on the total number of arrivals, departures and transits of South African residents is collected from the scanning of passports. However, data are not collected from passengers on country visited; country of final destination, the duration of stay; intended duration of stay and purpose of visit. With this limitation, it is impossible to identify the number of tourists from the data on South African residents.

3. All travellers

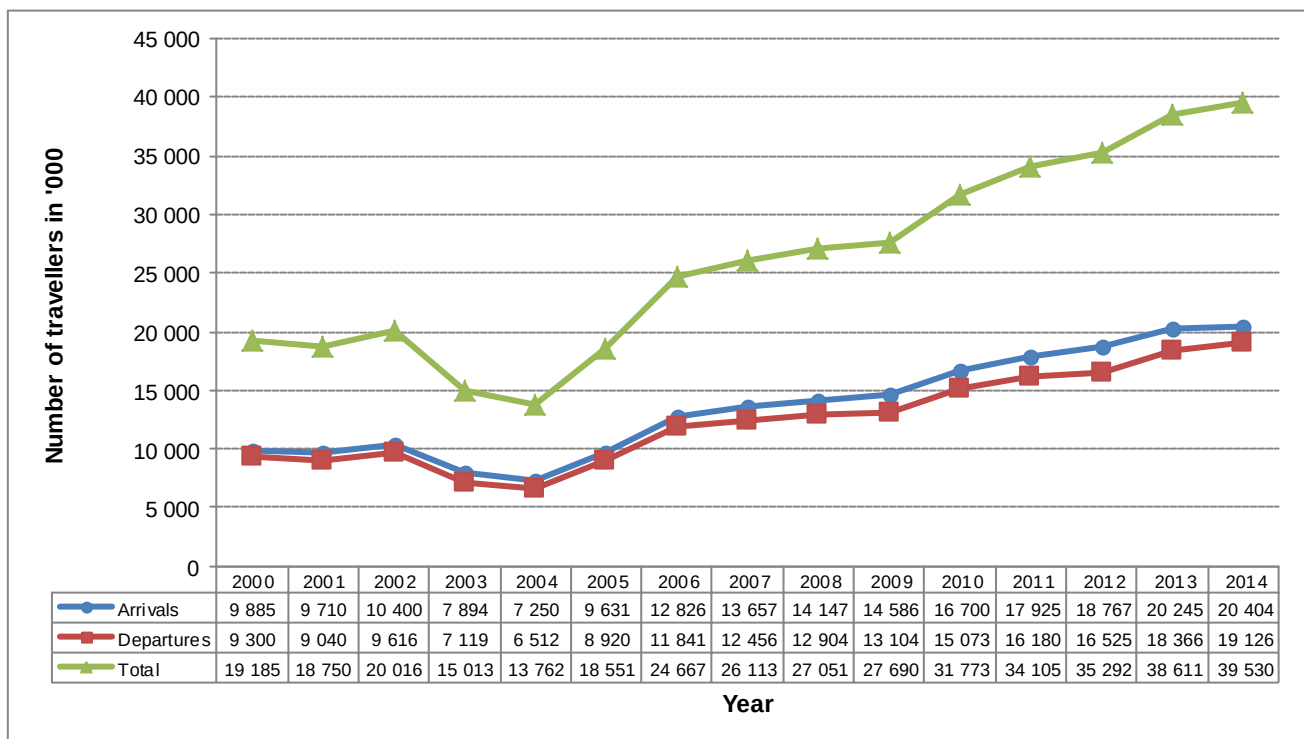

3.1 Number of travellers

The results present detailed information derived from the data published in the January 2014 to December 2014 *Tourism and Migration* monthly statistical releases (P0351). In addition to the 2014 data, data from 2013 or earlier are presented to provide some comparison in observed trends and patterns (see Appendix II).

Travellers are composed of passengers in transits, arrivals into and departures from South Africa regardless of residency status. According to data presented in Figure 3.1, a total of 39 529 143 travellers (arrivals plus departures) were recorded in 2014 compared to 19 185 135 recorded in 2000, indicating that the overall number of travellers doubled over this 14-year period. Similarly, there were 20 403 641 arrivals and 19 125 502 departures in 2014 compared to 9 884 953 and 9 300 182 of arrivals and departures respectively in 2000.

Recent trends show that the overall number of travellers grew by 4,4% between 2013 and 2014 while arrivals only increased by 0,8% and departures by only 4,1% during the same period.

Figure 3.1: Number of arrivals and departures of travellers by year of travel, 2000–2014

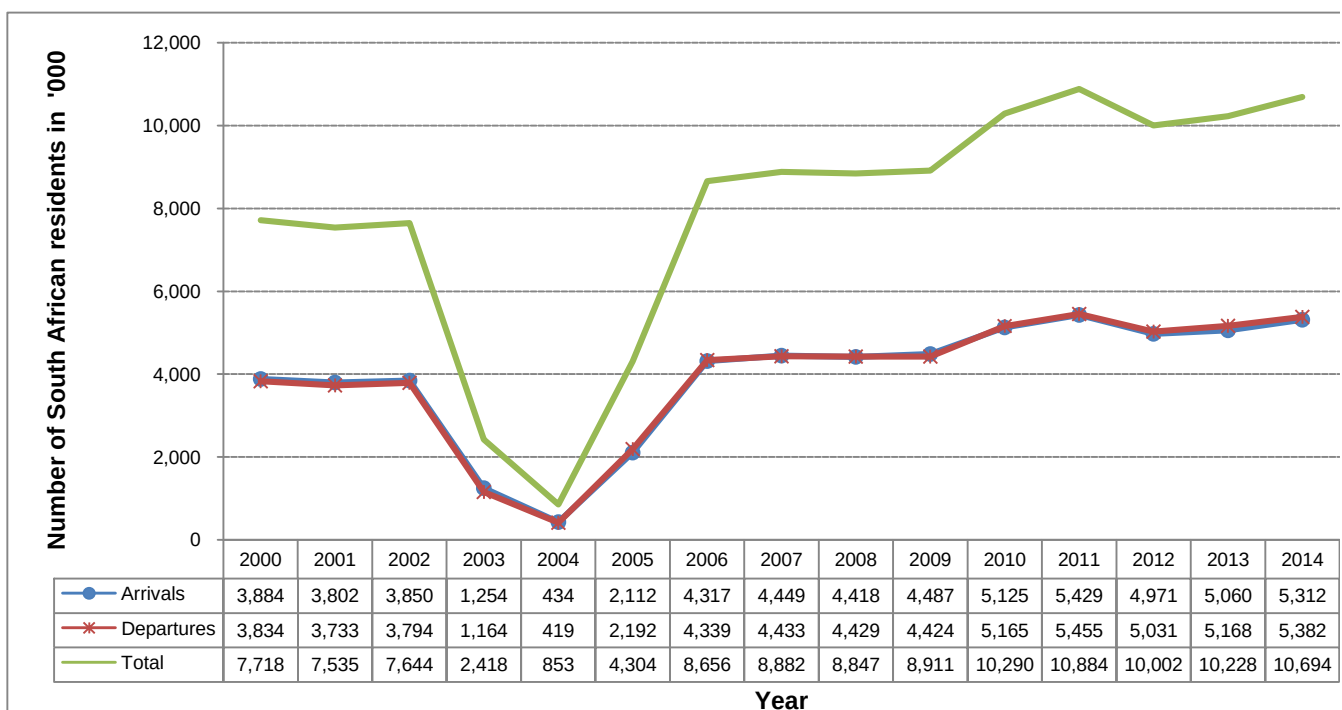

This graph excludes transit travellers

3.1.1 South African residents

In 2014, 10 701 942 South African resident travellers were recorded compared to the 2013 volume of 10 257 711. As shown in Appendix II, the 2014 volume was made up of 5 311 625 arrivals, 8 178 transit passengers and 5 382 139 departures. The data in Figure 3.2 indicate that the annual volumes of arrivals and departures remained more or less the same throughout the period from 2000 to 2014 despite sharp declines in 2003 and 2004. These declines in the volume of South African travellers between 2003 and 2004 were mainly due to the changes in the Immigration Act, 2002 (Act No.13 of 2002) regarding the recording of information on the international movements of South African residents. The amendments to the Act resulted in information on arrival and departure of South African residents not being consistently collected (i.e. misinterpretation of the Act led to some immigration officers collecting while others were not collecting information on South African residents). Collection resumed after the implementation of the Immigration Amendment Act, 2004 (Act No.19 of 2004).

Figure 3.2: Number of arrivals and departures of South African residents by year of travel, 2000–2014

This graph excludes transit travellers

Mode of travel

Table 3.1 shows that the mode of travel for South African residents entering and leaving the country in 2014 was largely the same. Most South African residents used road transport to arrive (63,8%) and leave (64,4%) the country. Air transport was the second most popular mode of travel used by 36,1% arrivals and 35,5% departures. All passengers in transit used air transport (8 178). Less than 1,0% arrived or left by sea.

Table 3.1: Number of arrivals, departures and transits of South African residents by mode of travel, 2014

Mode of travel	Arrivals		Departures		Transits	
	Number	%	Number	%	Number	%
Air	1 919 732	36,1	1 908 572	35,5	8 178	100,0
Road	3 386 944	63,8	3 468 176	64,4	-	0,0
Sea	4 363	0,1	4 783	0,1	-	0,0
Unspecified	586	0,0	608	0,0	-	0,0
Total	5 311 625	100,0	5 382 139	100,0	8 178	100,0

Detailed information on ports used by South African residents to leave, enter or transit the country by mode of travel is provided in Table 3.2 (absolute numbers are provided in Appendix III). Due to the large number of land ports as shown in Appendix I, border countries are used in the table instead of the specific land ports names. That is, data for all ports found on the border within a particular country are combined and the country name is used.

Amongst road users, a total of over half of South African residents used Lesotho and Swaziland ports of entry. For arrivals, 28,4% entered the country through Lesotho and 23,3% used Swaziland as a port of entry. Similarly, for departures, most road users went through both Lesotho (29,1%) and Swaziland (23,1%) ports. Out of the total number of residents using air as their mode of travel, the majority arrived (81,4%) and departed (80,9%) at O.R. Tambo International Airport while 12,2% arrived and 12,4% left through Cape Town International Airport. About 5,0% came in or left (5,2%) the country using King Shaka International Airport and 1,4% arrived and 1,5% left through other airports. Out of those who arrived by sea, most arrived (81,3%) or left (78,3%) through the Cape Town harbour.

Detailed information on mode of travel by place and month of arrival and departure for South African residents for 2014 is presented in Appendix IV and Appendix V respectively.

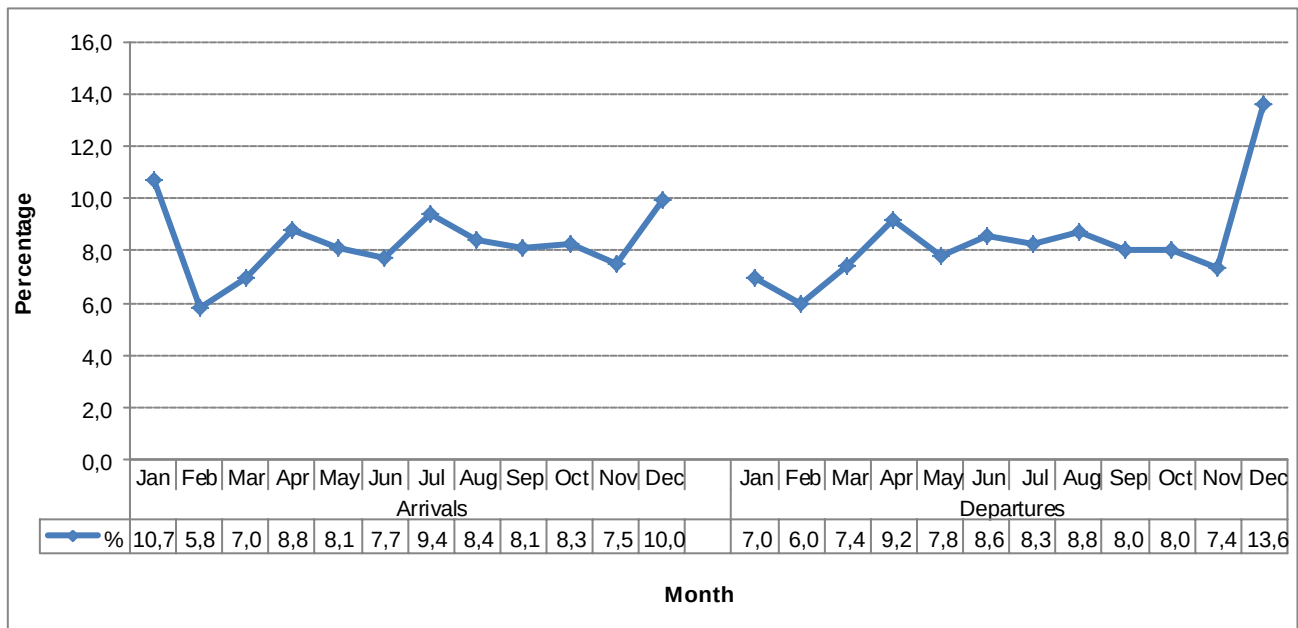

Table 3.2: Percentage distribution of South African residents by mode of travel and place of arrival or departure, 2014

Mode of travel and place of arrival, departure or transit	Percentage (arrivals)	Percentage (departures)	Percentage (transit)
Air	100,0	100,0	100,0
Cape Town International Airport	12,2	12,4	-
King Shaka International Airport	5,0	5,2	-

Port Elizabeth Harbour	2,1	2,7	-
Other Harbours	0,6	0,8	-

Month of travel

The distribution of South Africans arriving and departing the country classified by month of travel is provided in Figure 3.3. The result show that the highest proportion of arrivals (10,7%) was recorded in January, followed by December (10,0%) while the lowest proportion was recorded in February (5,8%). The highest percentage of departures was recorded in December (13,6%) and the lowest in February (6,0%).

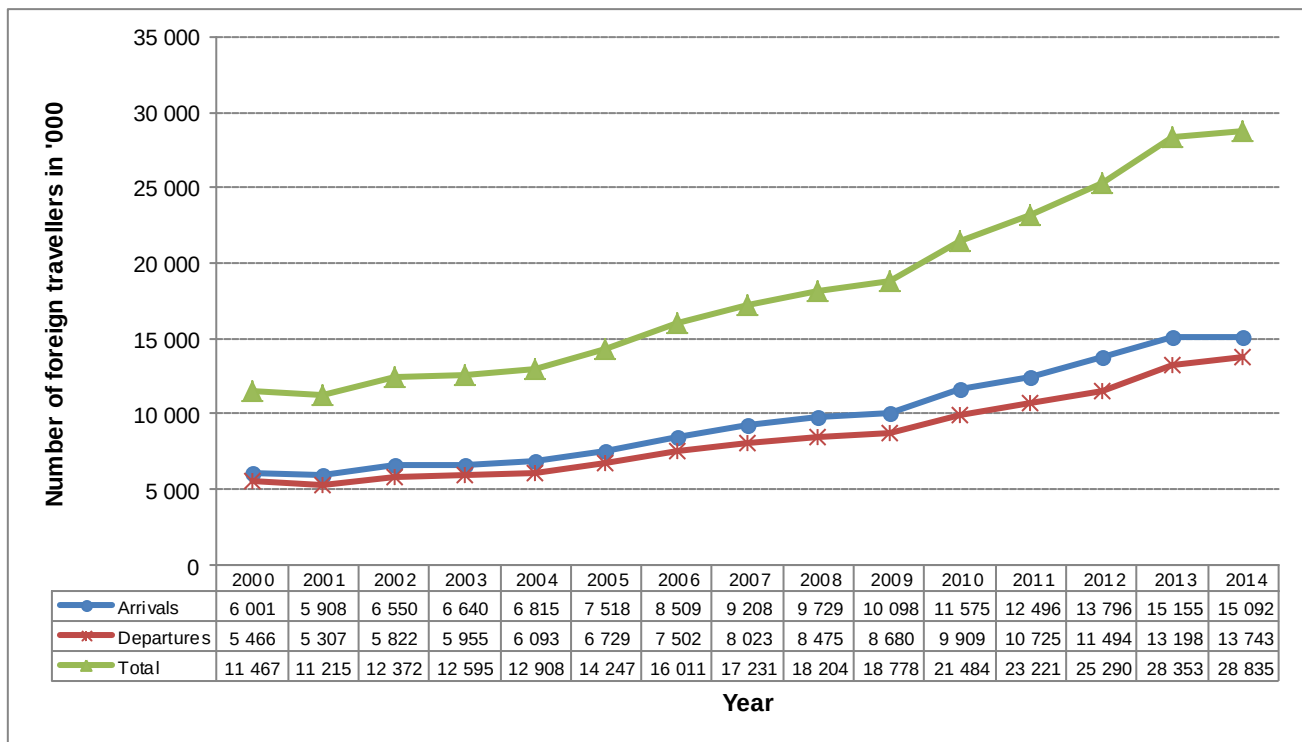

Figure 3.3: Percentage distribution of arrivals and departures of South African residents by month of travel, 2014

This graph excludes transit travellers

3.1.2 Foreign travellers

In 2014, 29 608 721 foreign travellers were recorded compared to the 2013 volume of 28 353 119. As shown in Appendix II, the 2014 volume was made up of 15 092 016 arrivals, 773 342 transit passengers and 13 743 363 departures. It is observed from Figure 3.4 (see Appendix II also) that apart from a slight decline in 2001, the number of both foreign arrivals and departures increased between 2000 and 2014, with a slight decrease in arrivals between 2013 and 2014 taking into account the exclusion of transit passengers from arrivals in 2014. Unlike in the case of South African travellers, the volume of departures of foreign travellers has been lower than that of arrivals throughout the fifteen-year period, with a notable widening of the gap since 2006.

Figure 3.4: Number of arrivals and departures of foreign travellers by year of travel, 2000–2014

This graph excludes transit travellers

Mode of travel

Table 3.3 indicates that during 2014 the mode of travel used by foreigners coming into South Africa or leaving the country was largely the same. More than three quarters of foreigners arrived (79,6%) or left (77,5%) the country by road. Air travel was used by about one fifth of foreign arrivals (20,1%) and foreign departures (22,1%). The sea was used by 0,3% and 0,4% of foreigners to enter and leave South Africa respectively.

Table 3.3: Number of arrivals, departures and transits of foreign travellers by mode of travel and place of arrival or departure, 2014

Mode of travel	Arrivals		Departures		Transits	
	Number	%	Number	%	Number	%
Air	3 034 160	20,1	3 036 493	22,1	773 340	100,0
Road	12 006 666	79,6	10 655 729	77,5	2	0,0
Sea	50 161	0,3	49 783	0,4	-	0,0
Unspecified	1 029	0,0	1 358	0,0	-	0,0
Total	15 092 016	100,0	13 743 363	100,0	773 342	100,0

Most of the foreigners who arrived by road entered through the Zimbabwe (28,1%) and the Lesotho (26,9%) ports of entry (see Table 3.4). These two countries were also mostly used by foreigners who left South Africa in 2014 (26,3% and 26,4%, respectively). Other common ports of entry/exit from Mozambique were used by about 17% of arrivals and departures.

The majority of the foreigners who travelled by air arrived (79,2%) and left (79,1%) South Africa through O.R. Tambo International Airport (see Appendix VI for absolute numbers) Almost all passengers in transit (99,9%) used O.R. Tambo international airport. Cape Town International Airport was used by 18,7% foreigners to arrive in the country and 18,5% to leave the country. Those who travelled by sea mainly used the Cape Town and Durban harbours. About 45,5% and 43,9% of foreign arrivals used Cape Town and Durban harbours, respectively while these harbours were used by 48,6% and 41,7% of foreigners to leave South Africa, respectively.

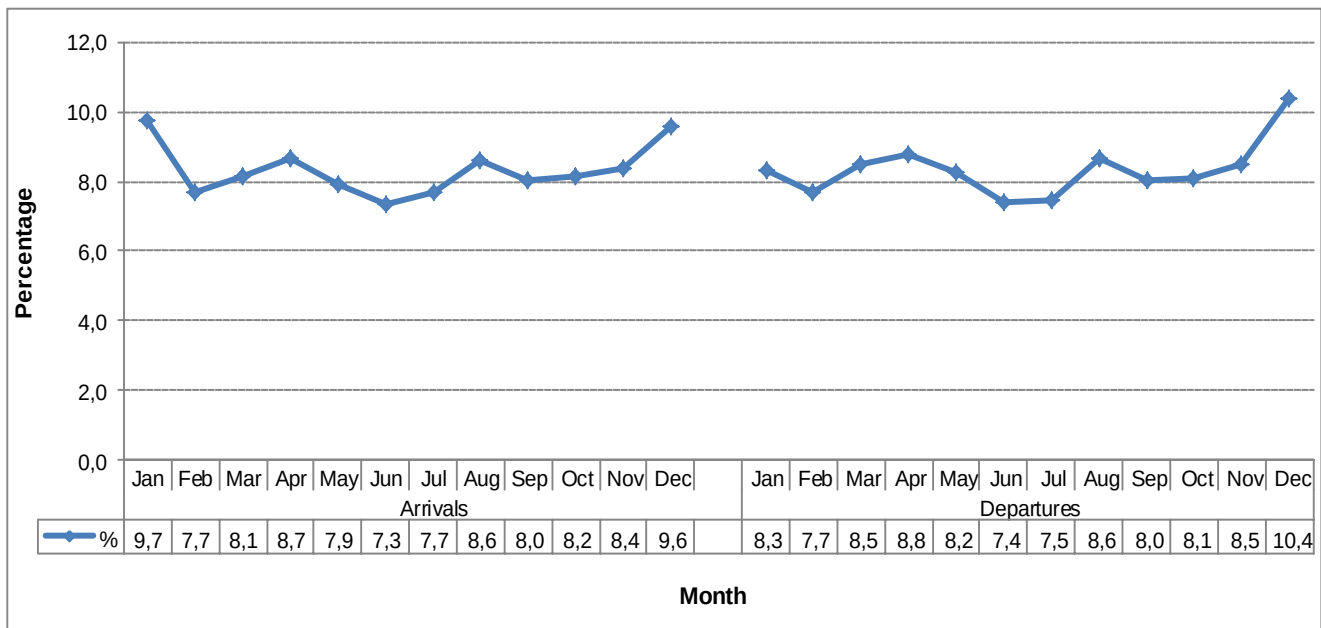

Table 3.4: Number of foreign arrivals, departures and transits by mode of travel and place of arrival or departure, 2014

Mode of travel and place of arrival, departure or transit	Percentage (Arrivals)	Percentage (Departures)	Percentage (Transits)
Air	100,0	100,0	100,0
Cape Town International Airport	18,7	18,5	0,0

Month of travel

The monthly distribution of foreign arrivals and departures by mode of travel and place of arrival and departure are provided in Appendices VII and VIII and summarised in Figure 3.5. The results indicate that most foreign arrivals were recorded in January (9,7%) and the least in June (7,3%) while most departures were also recorded in December (10,4%) and the least in June (7,4%).

Figure 3.5: Percentage distribution of foreign arrivals and departures by month of travel, 2014

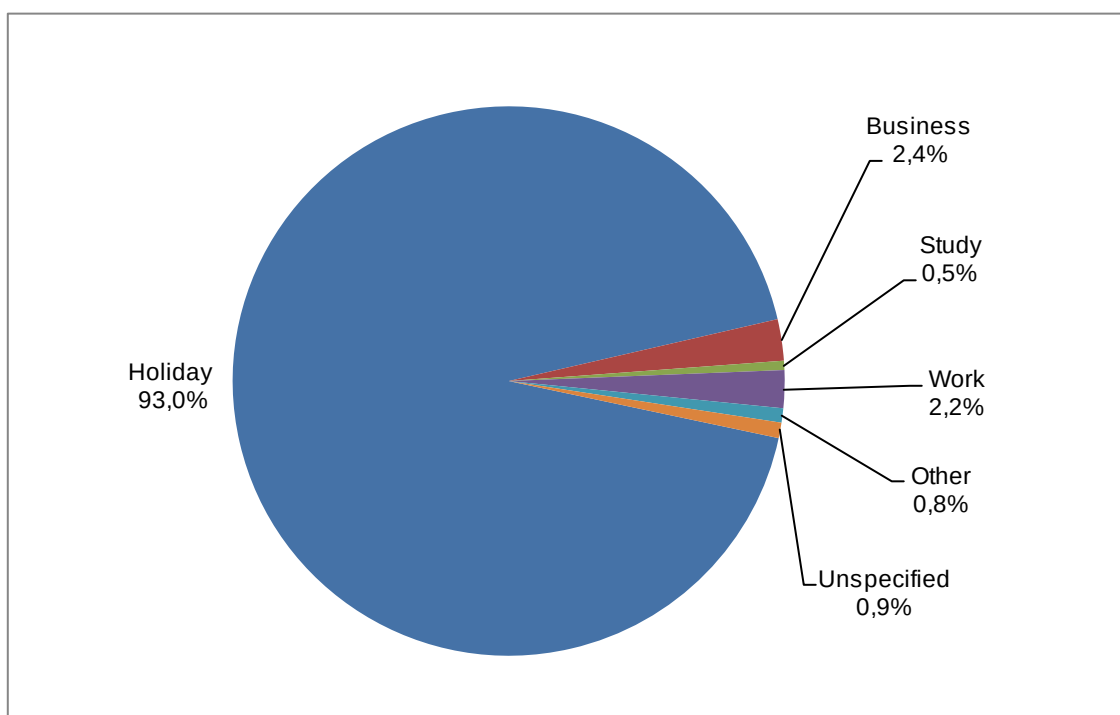

This graph excludes transit travellers

Purpose of visit

Figure 3.6 shows that in 2014, the main purpose of visit for foreign arrivals was holidays (93,0%). Whereas 2,4% of the 2014 arrivals were on business; 2,2% and 0,5% of arrivals were workers and students respectively. A detailed distribution of the number of foreign arrivals by purpose of visit and month can be seen in Appendix IX. The majority of foreign arrivals who were in South Africa in January 2014 came in for business (41 344); study (14 639) and work (42 654), while those who came in for holidays came mainly in December (1 385 411) and January (1 307 873).

Figure 3.6: Percentage distribution of foreign arrivals by purpose of visit, 2014

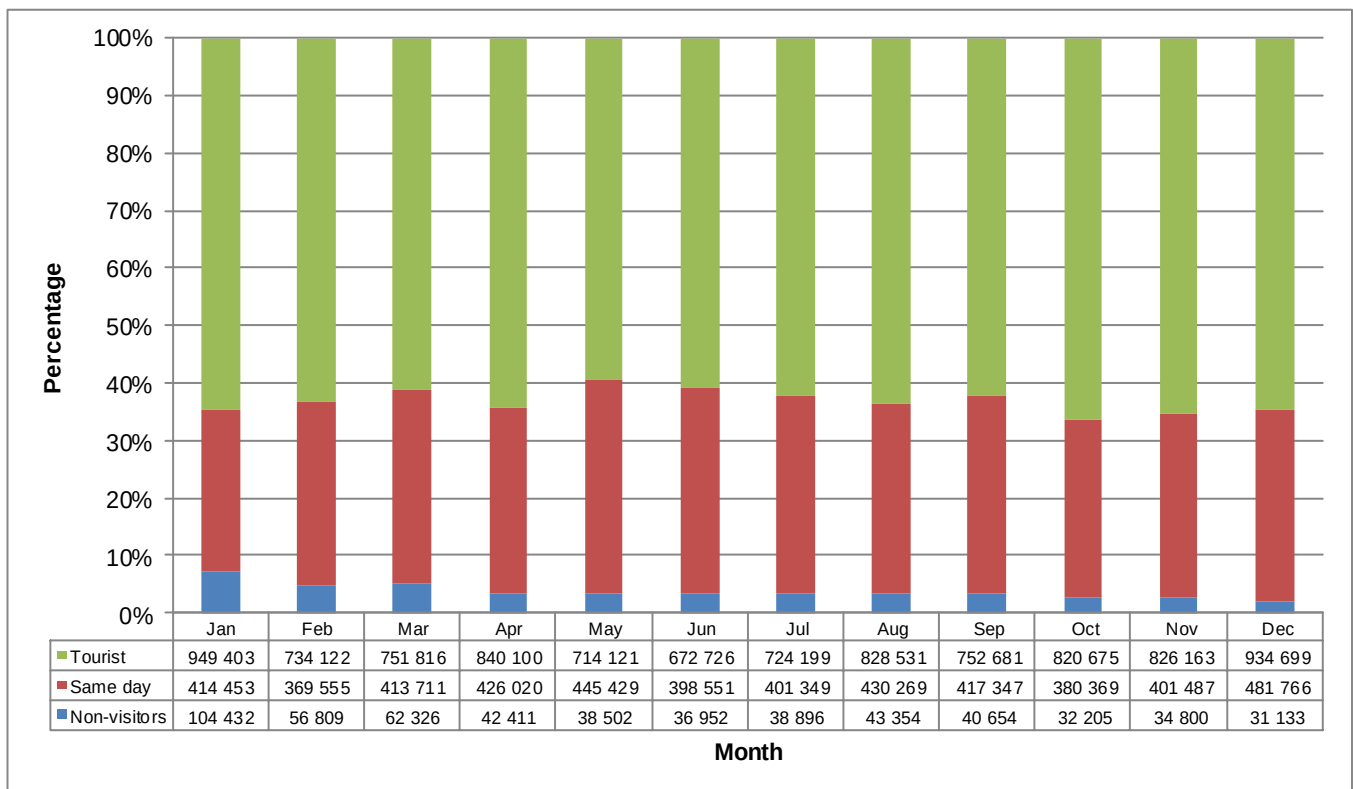

Type of visitors

Foreign arrivals can be classified as visitors and non-visitors depending on their purpose of visit. Furthermore, the visitors can be grouped as same-day visitors and tourists (overnight visitors). In 2014, there were 562 474 (3,7%) non-visitors and 14 529 542 (96,3%) visitors (see Appendix X). The visitors were made up of 4 980 306 (34,3%) same-day visitors and 9 549 236 (65,7%) overnight visitors or tourists.

It is observed from the monthly distribution of the data presented in Figure 3.7 that the volume of non-visitors was highest in January (104 432). December recorded the lowest number of non-visitors (31 133). The monthly volume of same-day visitors was quite uniform throughout the year, ranging from 369 555 in February to 481 766 in December with a monthly average of about 415 026 visitors.

Figure 3.7: Distribution of foreign arrivals by type of visitor, 2014

Further analysis on same-day visitors (see Appendix XI) indicates that a great majority of the same-day visitors [4 761 294 (95,6%)] came into the country by road; most of whom were from SADC countries [4 688 747 (98,5%)]. Virtually all same day visitors [4 937 044 (99,1%)] came for holidays. The rest were business persons [33 467 (0,7%)], students [9 795 (0,2%)].

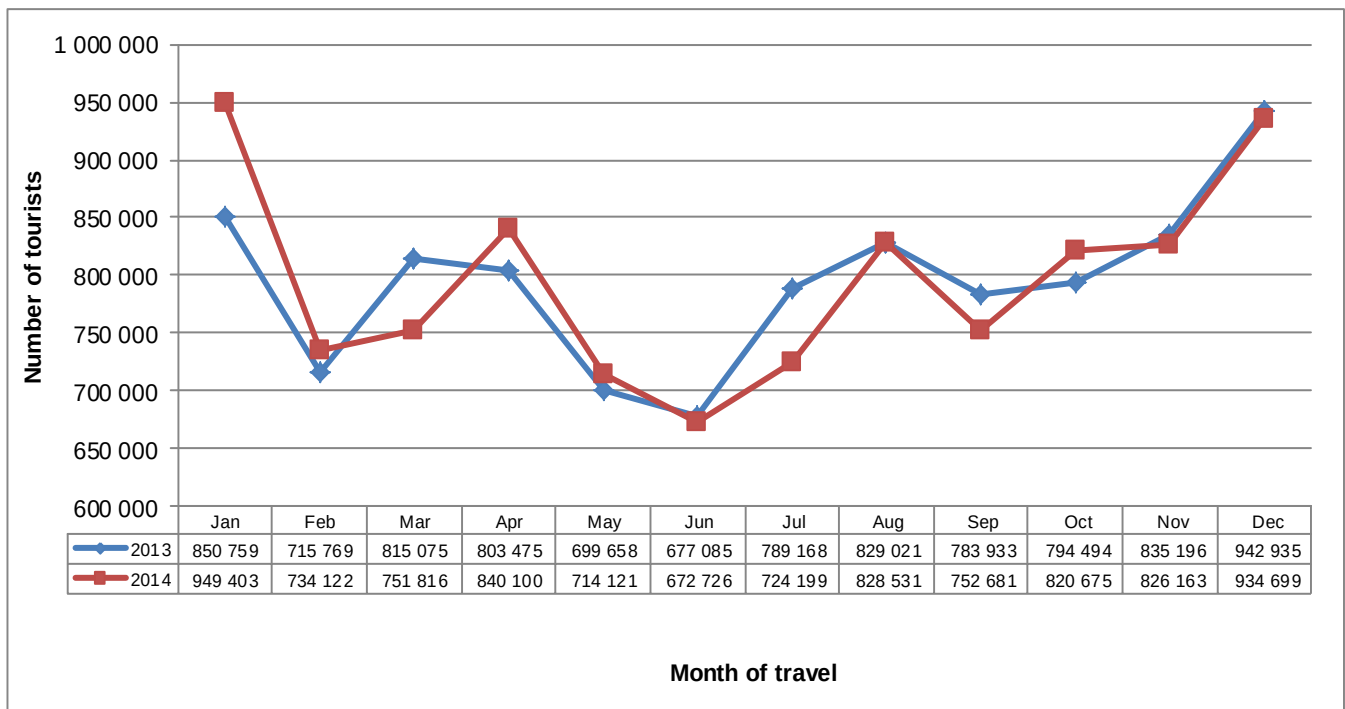

4. Tourists

This section presents the number of tourists that visited South Africa in 2014, as well as their regions of residence, mode of travel, purpose of visit, duration of stay and their demographic (age and sex) characteristics. A total of 9 549 236 tourists came to South Africa in 2014, showing an increase of 0,1% from the 9 536 568 tourists recorded in 2013.

Data in Figure 4.1 (and Appendix XII) indicate that the highest number of arrivals [949 403 (9,9%)] was recorded in January 2014 whilst the least number of arrivals was recorded in June 2014 [672 726 (7,0%)]. With the exception of January, February, April, May and October, data in Figure 4.1 further show that the monthly arrivals in 2014 were generally lower than the monthly arrivals observed in 2013. However, the trend shows that the monthly arrivals follow the same pattern for both years.

Appendix XII further indicates some diversity in the monthly arrival patterns regarding the types of tourists. Whereas the highest number of tourists on holidays was recorded in December 2014 [916 703 (10,0%)], that of business persons was recorded in January 2014 [38 774 (11,6%)] and that of students recorded in January [13 728 (18,9%)] and in July [11 974 (16,5%)].

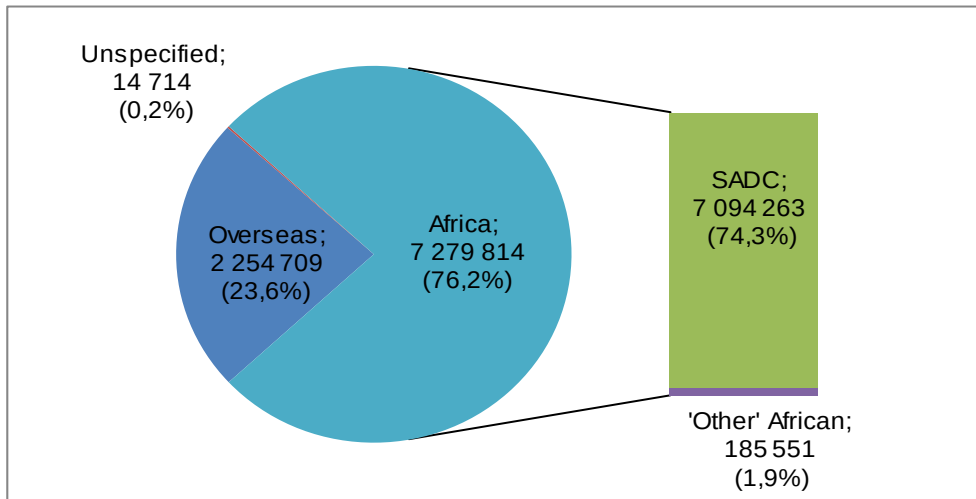

Figure 4.1: Number of tourists by month and year of travel, 2013 and 2014

4.1 Region of residence

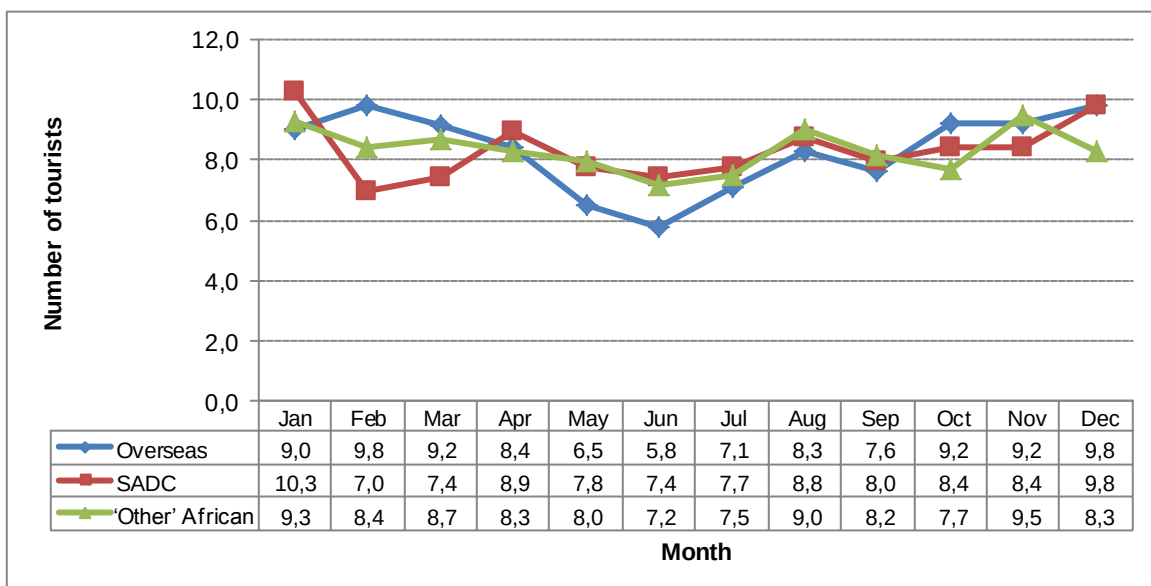

The breakdown of the number of tourists by region provided in Figure 4.2 indicates that 74,3% of the tourists who arrived in South Africa in 2014 were residents of SADC countries and 1,9% were from 'other' African countries, making up 76,2% of tourists from Africa in total. Residents of overseas countries made up 23,6% of the tourists.

Figure 4.2: Distribution of tourists by region of residence, 2014

Detailed information on the number of tourists by region and sub-region of residence and the month of arrival is provided in Appendix XIII and the percentage distribution at regional level is shown in Figure 4.3. It is observed that there are regional differences in the monthly arrivals of tourists. Thus in 2014 the lowest proportion of overseas travellers was recorded in June (5,8%) and the highest proportion in February and December (9,8%). The largest proportion of arrivals for tourists from the SADC region was recorded in January (10,3%), with the lowest proportion of arrivals recorded in February (7,0%). Furthermore, the least and the largest proportion of arrivals for tourists from the 'other' African region occurred in June (7,2%) and November (9,5%) respectively.

Figure 4.3: Percentage distribution of tourists by region of residence and month of arrival, 2014

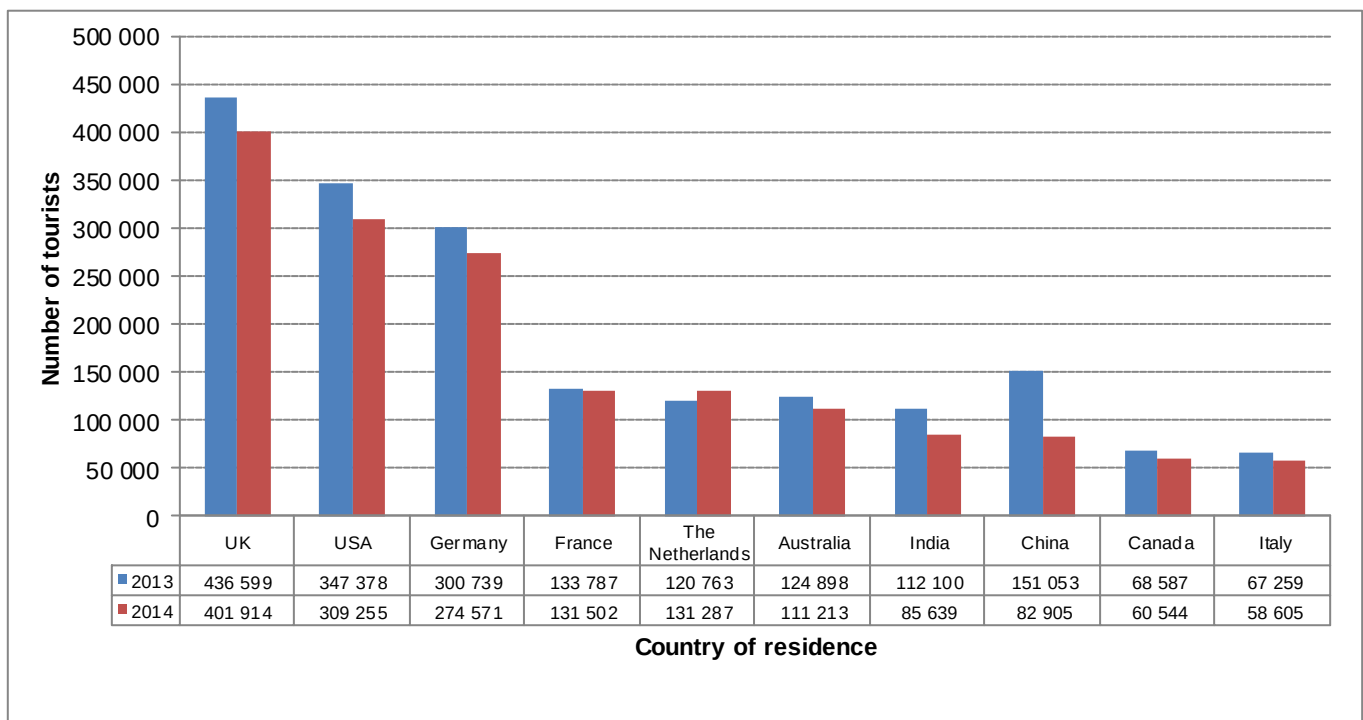

4.2 Ten leading countries

Overseas

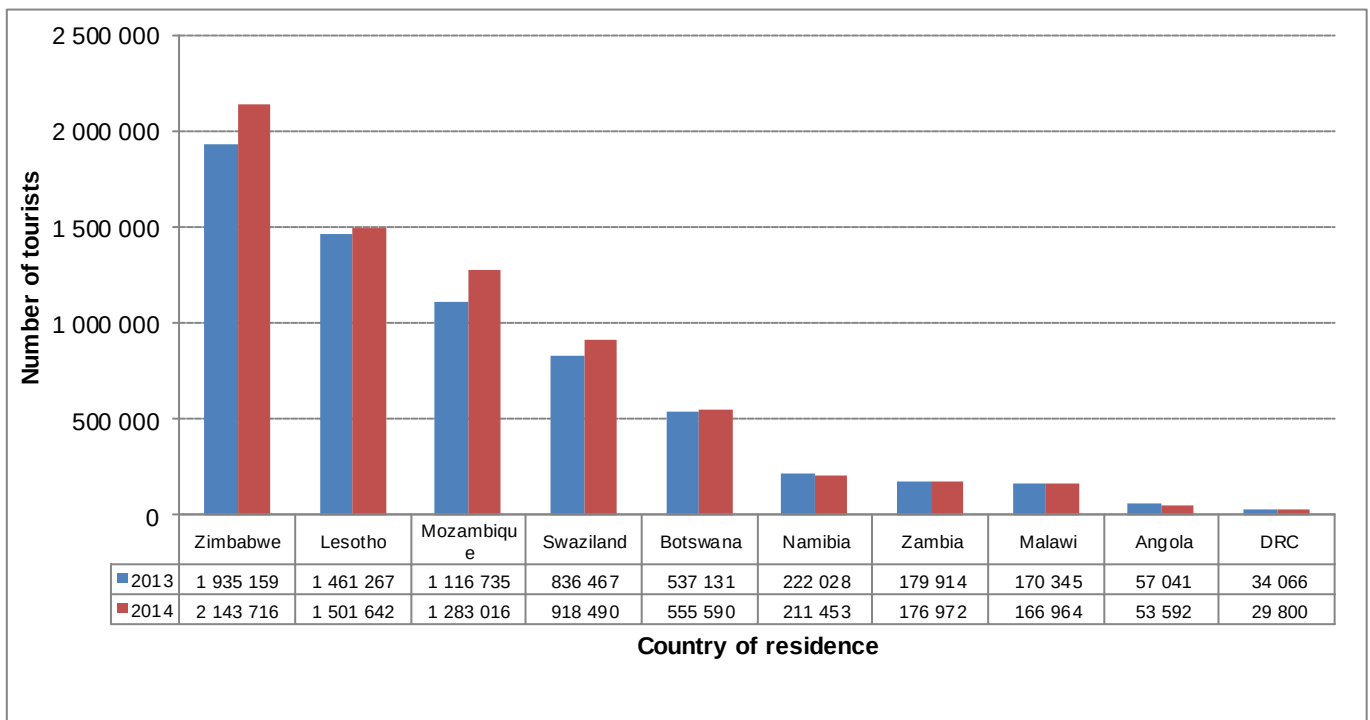

As presented in Figure 4.4, the ten leading countries for overseas tourists in 2014 were: United Kingdom (UK), 401 914 (17,8%); United States of America (USA), 309 255 (13,7%); Germany, 274 571 (12,2%); France, 131 502 (5,8%); The Netherlands, 131 287 (5,8%); Australia, 111 213 (4,9%); India, 85 639 (3,8%); China, 82 905 (3,7%); Canada, 60 544 (2,7%) and Italy, 58 605 (2,6%). A comparison of the 2014 volumes with the 2013 volumes indicates that the number of tourists decreased in all the overseas countries except The Netherlands. China had the highest decrease of 45,1% while tourists from The Netherlands increased by 8,7%.

Figure 4.4: Number of tourists from ten leading overseas countries in 2014 compared to 2013

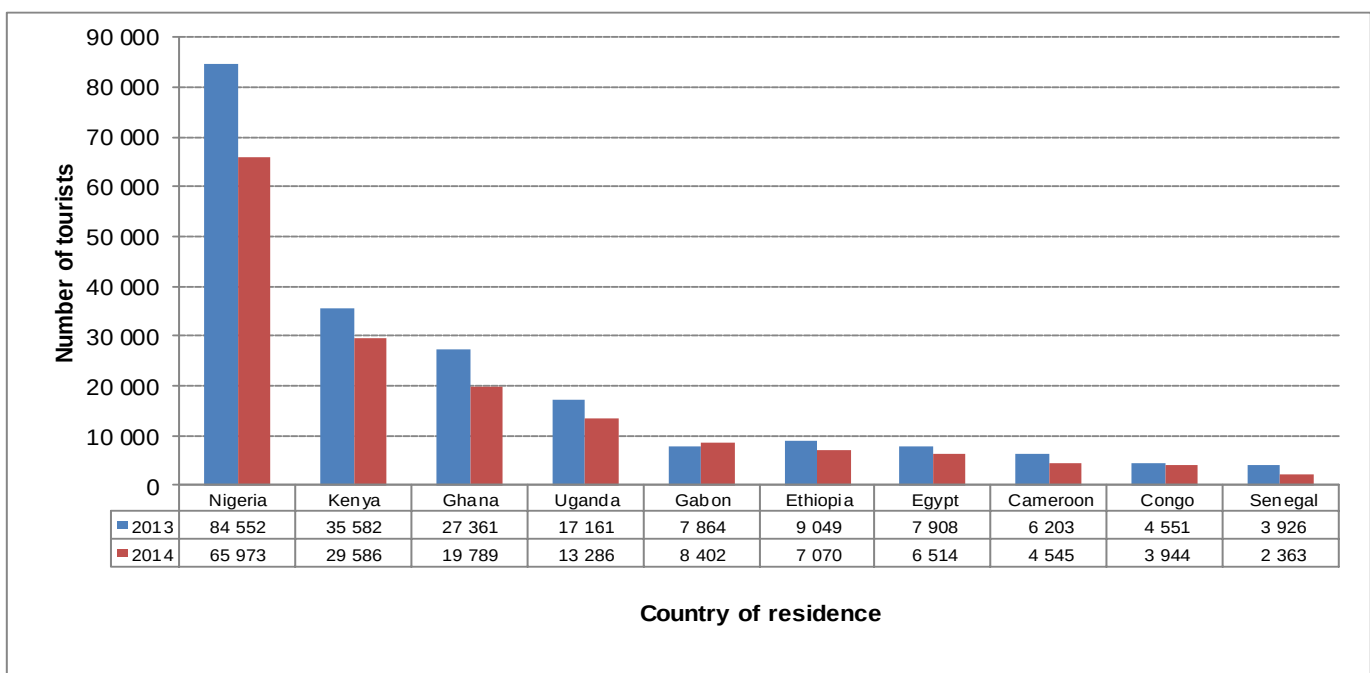

SADC

Figure 4.5 shows the ten leading countries for tourists from the SADC region in 2014. These were: Zimbabwe, 2 143 716 (30,2%); Lesotho, 1 501 642 (21,2%); Mozambique, 1 283 016 (18,1%); Swaziland, 918 490 (12,9%); Botswana, 555 590 (7,8%); Namibia, 211 453 (3,0%); Zambia, 176 972 (2,5%); Malawi, 166 964 (2,4%); Angola, 53 592 (0,8%) and DRC, 29 800 (0,4%). The SADC countries that showed an increase in the number of tourists from 2013 to 2014 are Zimbabwe, Lesotho, Mozambique, Swaziland and Botswana whilst Namibia, Zambia, Malawi, Angola and DRC showed a decrease in the number of tourists. Mozambique had the highest increase of 14,9% while DRC declined by 12,5%.

Figure 4.5: Number of tourists from ten leading SADC countries in 2014 compared to 2013**'Other' African**

The ten leading countries for tourists from 'other' African countries in 2014 were: Nigeria, 65 973 (35,6%); Kenya, 29 586 (15,9%); Ghana, 19 789 (10,7%); Uganda, 13 286 (7,2%); Gabon, 8 402 (4,5%); Ethiopia, 7 070 (3,8%); Egypt, 6 514 (3,5%); Cameroon, 4 545 (2,4%); Congo, 3 944 (2,1%) and Senegal, 2 363 (1,3%) (see Figure 4.6). A comparison between the 2014 and 2013 volumes indicates that the number of tourists declined in nine countries but increased in Gabon. Senegal had the highest decrease of 39,8% whereas Gabon increased by 6,8%.

Figure 4.6: Number of tourists from ten leading 'other' African countries in 2014 compared to 2013

4.3 Mode of travel

Place of arrival

Table 4.1 provides information on the number of tourists by mode of travel and place of arrival. A large number of tourists who came to South Africa in 2014 used road transport [6 970 810 (73,0%)], followed by those who came by air [2 573 080 (26,9%)] and tourists who arrived through sea ports [4 402 (0,05%)]. Table 4.1 shows that the road users mainly came in through the Zimbabwe (30,2%) and the Lesotho (22,0%) ports of entry. Namibia had the least number of the 2014 tourists using its ports of entry.

Out of the 2 573 080 tourists that flew into the country, a large proportion (77,8%) used O.R. Tambo International Airport. Cape Town and King Shaka international airports were used by 20,4% and 1,5% tourists respectively. Most of the tourists that used sea ports of entry came in through the Cape Town (56,2%) and Port Elizabeth (39,6) harbours.

A detailed table including month of travel is shown in Appendix XIV. The highest volumes of tourists that passed through the Zimbabwe ports of entry were recorded in January whereas the lowest volumes were recorded in February. Meanwhile, the highest volumes of tourists that entered South Africa through the Namibia ports of entry were recorded in December 2014 whereas the lowest volumes were recorded in June 2014. Further details on the number of tourists by country of residence and month of arrival are provided in Appendix XV.

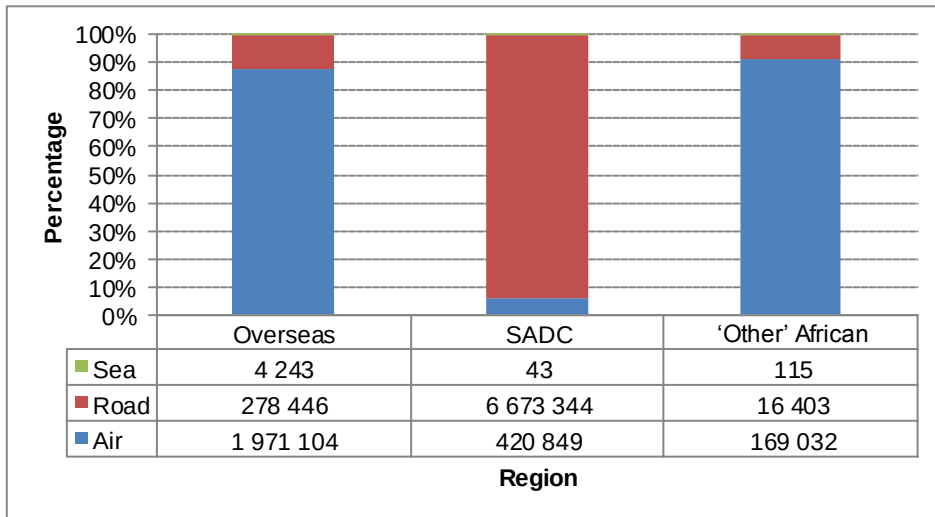

Table 4.1: Distribution of tourists by mode of travel and place of arrival, 2014

Mode of travel and place of arrival	Total	%
Total	9 549 236	100,0
Air	2 573 080	100,0
Cape Town International Airport	524 131	20,4
King Shaka International Airport	38 449	1,5
O. R. Tambo International Airport	2 001 365	77,8
Other Airports	9 135	0,4
Road	6 970 810	100,0
Botswana	806 293	11,6
Lesotho	1 535 433	22,0
Mozambique	1 256 032	18,0
Namibia	135 769	1,9
Swaziland	1 135 486	16,3
Zimbabwe	2 101 797	30,2
Sea	4 402	100,0
Cape Town Harbour	2 472	56,2
Durban Harbour	59	1,3
Port Elizabeth Harbour	1745	39,6
Other Harbours	126	2,9
Unspecified	944	100,0

Region of residence

As observed from Figure 4.7, a large proportion of overseas tourists flew [87,4% (1 971 104)] into South Africa compared to [12,3% (278 446)] who came in by road and [0,2% (4 243)] who came by sea. Similarly, tourists from 'other' African countries generally entered the country by air [91,1% (169 032)] rather than by road [8,8% (16 403)] or sea [0,1% (115)]. However, the mode of travel used by most tourists from SADC countries was road [94,1% (6 673 344)] compared to air [5,9% (420 849)]. Detailed data on sub-region and country of residence and mode of travel is presented in Appendix XVI.

Figure 4.7: Distribution of tourists by region of residence and mode of travel, 2014

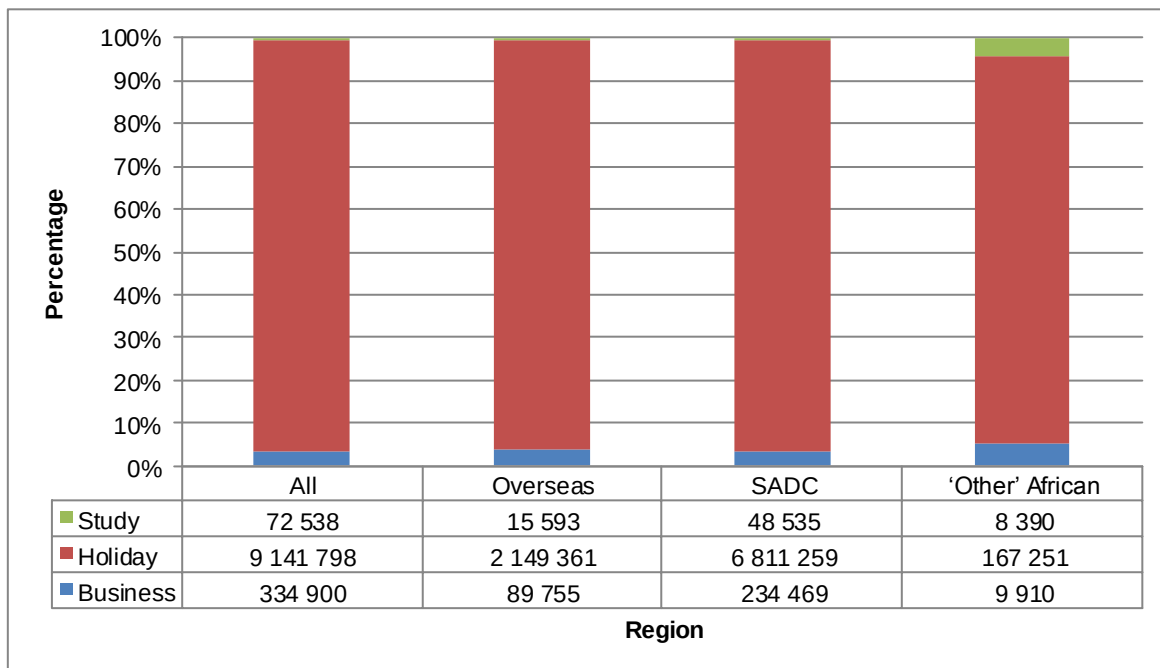

4.4 Purpose of visit

Region of residence

Besides information in Figure 4.8, reference has been made to data on the main types of tourists that visit South Africa (see Appendix XII) – using the purpose of visit to identify them. In 2014 most tourists came to South Africa for holidays [9 141 798 (95,7%)]. The remaining tourists came for business [334 900 (3,5%)] or were in the country to study [72 538 (0,8%)].

The 2014 data revealed some regional and country differentials with respect to the purpose of visit. For example, [9 910 (5,3%)] tourists from 'other' African countries and [89 755 (4,0%)] of tourists from overseas countries came for business compared to [234 469 (3,3%)] from SADC countries. In addition, students made up [8 390 (4,5%)] of tourists from 'other' African countries compared to [48 535 (0,7%)] of tourists from SADC countries and [15 593 (0,7%)] of overseas tourists. Detailed data on country of residence and purpose of visit is presented in Appendix XVII.

Figure 4.8: Percentage distribution of tourists by region and purpose of visit, 2014

Country of residence

Data shown in Figures 4.9 and 4.10 reveal that most overseas tourists on holiday (17,8%) and business persons (20,0%) were UK residents. However, it is shown in Figure 4.11 that the highest proportion of overseas students came from the USA (15,2%).

As observed from Figure 4.12, the majority of SADC tourists on holiday were from Zimbabwe (30,9%). Whereas the highest proportion of SADC tourists on business came from Mozambique (51,4%); SADC students were mainly from Zimbabwe (18,9%), Swaziland (17,2%) and Namibia (16,2%) as shown in Figure 4.13 and Figure 4.14.

Regarding tourists from 'other' African countries, Nigerian residents were the majority on holiday (36,5%), study (29,3%) and business (24,2%) (see Figures 4.15–4.17).

4.5 Duration of stay

The number of days tourists spent in South Africa is based on the tourists who arrived and left in the same month. Data in Figure 4.18 indicate that generally tourists from overseas and 'other' African countries spent on the average more days (about five days per month) in the country compared to SADC residents that spent an average of about two to three days in a month. The results further show that in May 2014, tourists from 'other' African countries spent four days per month in South Africa, on average. Overseas tourists spent, on average, only six days per month in South Africa. Tourists from SADC countries spent, on average, only two to three days per month.

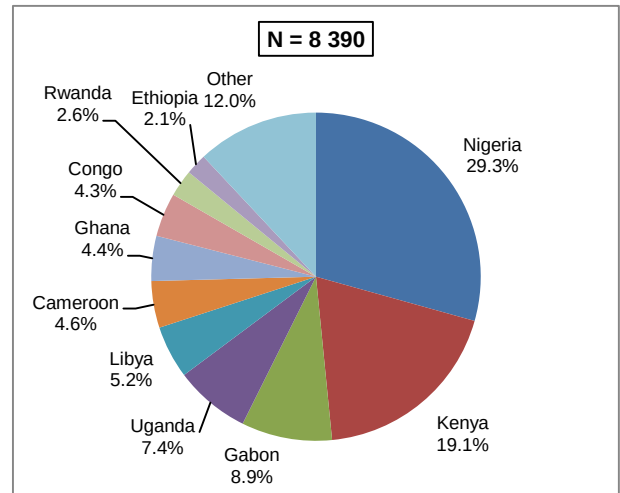

Figure 4.17: Percentage distribution of tourists from 'other' African countries on business, 2014

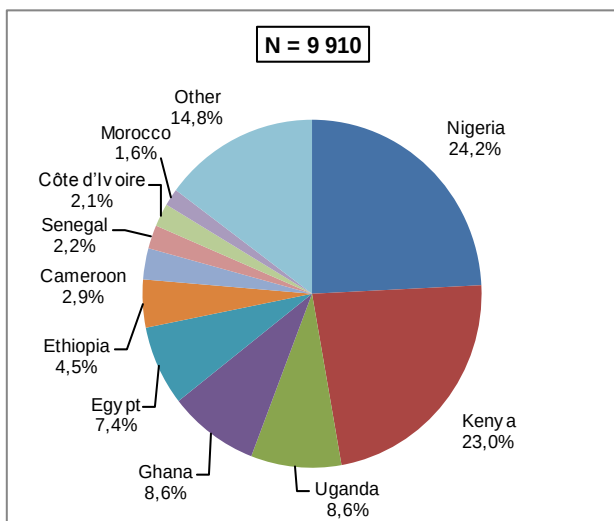

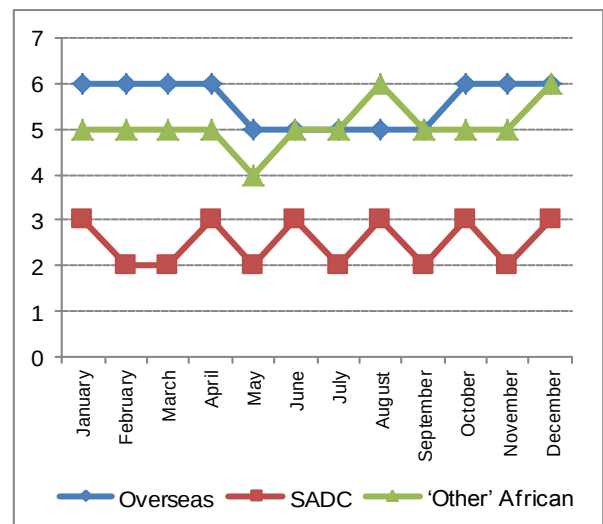

Figure 4.18: Average (median) number of days tourists spent by month of arrival, 2014

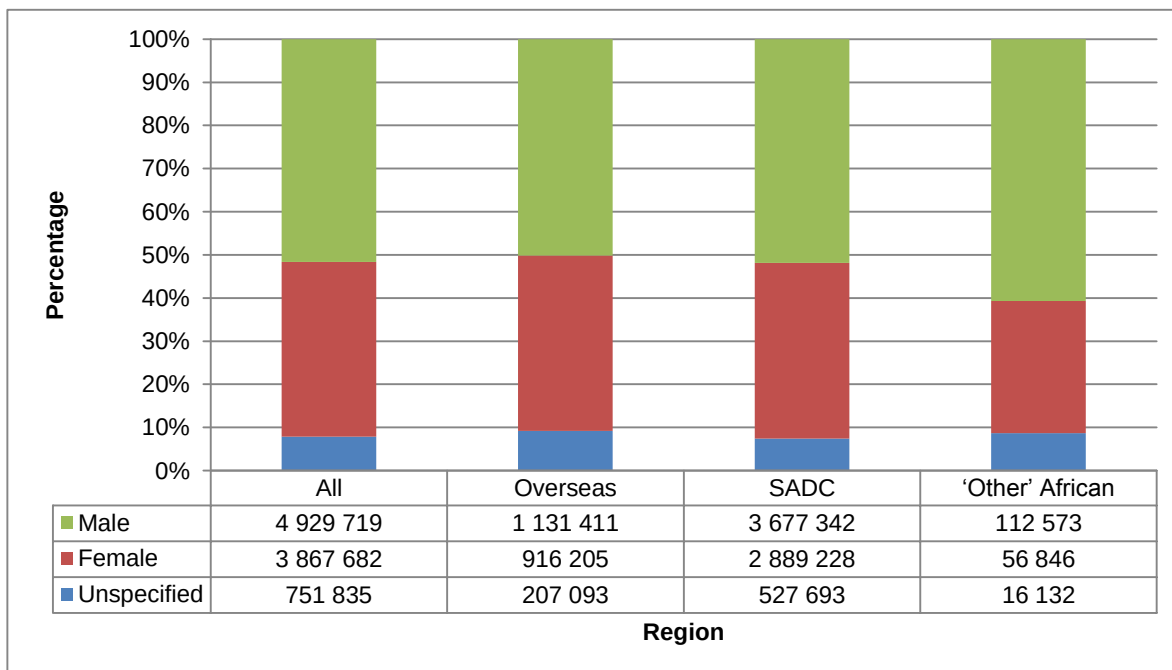

4.6 Sex and age distribution

Sex

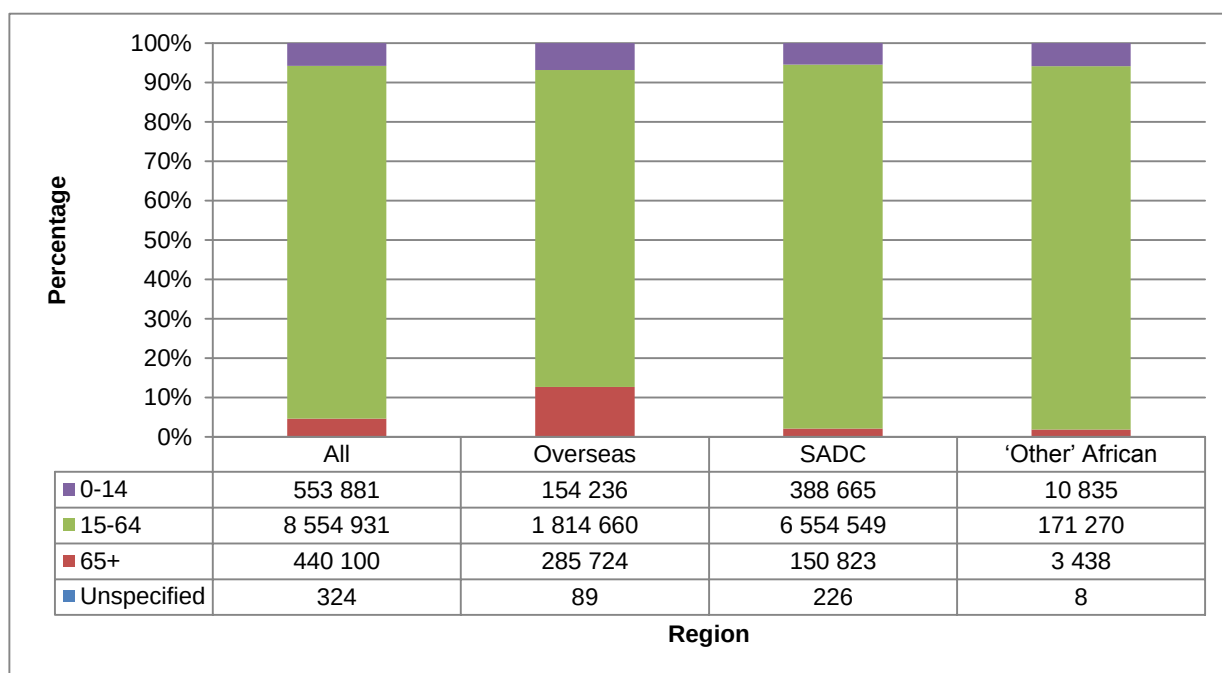

In 2014, as shown in Figure 4.19, there were more male [4 929 719 (51,6%)] than female [3 867 682 (40,5%)] tourists. Although males constituted the majority of SADC [3 677 342 (51,8%)] and Overseas [1 131 411 (50,2%)] tourists, the proportion of males was relatively higher among tourists from 'other' African countries [112 573 (60,7%)]. Tourists from SADC countries had the highest proportion of females [2 889 228 (40,7%)] whereas tourists from 'other' African countries had the lowest proportion [56 846 (30,6%)]. Detailed information on the number of tourists by sex, age and region of residence are shown in Appendix XVIII while the same distribution by month of arrival is shown in Appendix IXX.

Figure 4.19: Distribution of tourists by region of residence and sex, 2014

Age

The age distribution indicates that out of all tourists, [8 554 931 (89,6%)] were aged between 15 and 64 years; [553 881 (5,8%)] were aged less than 15 years; and [440 100 (4,6%)] were aged 65 years and over (see Figure 4.20). Taking regions into consideration, the age distribution shows that at least 80,0% of tourists from overseas, SADC and 'other' African countries, were aged between 15 and 64 years. The results further show a relatively higher proportion [12,7% (285 724)] of the elderly among overseas residents compared with [2,1% (150 823)] and [1,9% (3 438)] of residents from SADC and 'other' African countries respectively. Detailed information on the number of tourists by sex, age group and month of arrival is presented in Appendix XVIII.

Figure 4.20: Distribution of tourists by region of residence and age, 2014

5. Summary

This report provides information collected by DHA immigration officers on South African residents and foreign travellers that passed through South African air, land and sea ports of entry/exit in 2014. The report also presents detailed information on the mode of travel, purpose of visit, length of stay and demographic characteristics of tourists (foreign). A total of 40 310 663 travellers (both South African residents and foreign travellers) entered or departed South Africa in 2014 showing an increase of 4,4% from the 2013 volume of 38 610 830. South African resident departures increased by 4,2%.

Conversely, foreign arrivals declined by 0,4% in 2014. Due to limited data on South African residents, information on tourists is available only from foreign travellers. In 2014, foreign arrivals were made up of 3,7% non-visitors and 96,3% visitors. The visitors were further categorised into same-day visitors (34,3%) and overnight visitors or tourists (65,7%).

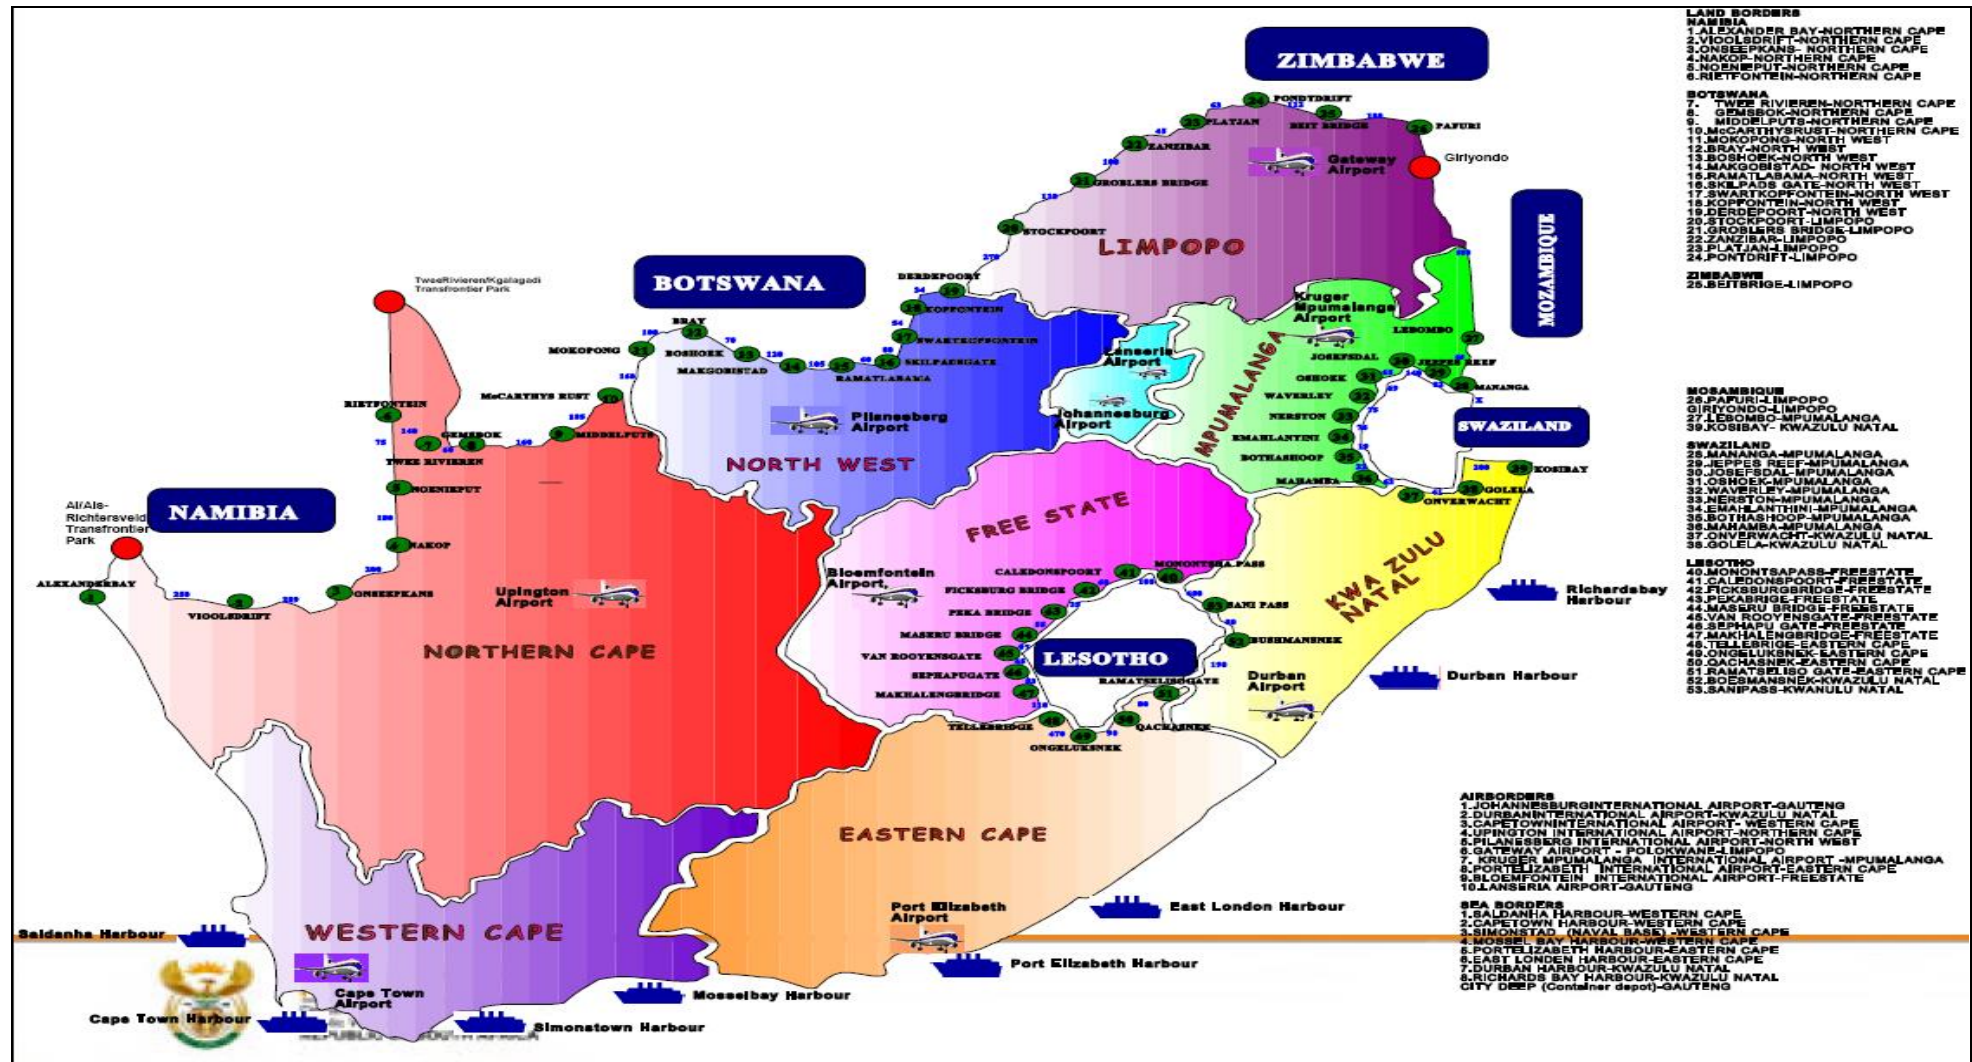

The volume of tourists increased by 0,1% from 9 536 568 in 2013 to 9 549 236 in 2014. The distribution of tourists by region of residence followed a similar pattern as shown in previous years. Thus, a high proportion (74,3%) of tourists was residents from the SADC countries; while 23,6% and 1,9% of tourists were from overseas and 'other' African countries respectively.

Likewise, the 2014 patterns of mode of travel and purpose of visit did not differ greatly from what was observed in 2013 and earlier years. Generally, overseas and 'other' African tourists flew into the country whereas tourists from SADC countries came in by road. Holiday continued to be the main reason for visiting South Africa. An overwhelmingly majority (95,7%) of tourists came for holidays whilst business persons and students constituted less than 4,0% of the 2014 tourists. Overseas business tourists were mainly UK residents and students were mostly USA residents. Residents of Mozambique, Zimbabwe and Lesotho made up the bulk of business tourists from SADC countries. SADC students came mainly from Zimbabwe and Swaziland. With regard to 'other' African countries, tourists on business and study were mostly from Nigeria.

In 2014, tourists from overseas and 'other' African countries spent, on average, five days per month in South Africa compared to tourists from SADC who spent two days. Tourists continued to be predominantly male (51,6%) and about 89,6% of the 2014 tourists were in the productive age group of 15 to 64 years.

7. DEFINITION OF TERMS

Definitions used by the United Nations World Tourism Organisation (UNWTO)

- **Traveller** is someone who moves between different geographical locations for any purpose and any duration. Note: in this publication, the geographical locations are countries. Hence in this report, the term traveller refers to an international traveller.
- **Visitor** refers to any person travelling to a place other than that of his/her usual environment for less than 12 months and whose main purpose of the trip is other than the exercise of an activity remunerated from within the place visited.
- **Same-day visitor** is a visitor who visits a place for less than one night.
- **Tourist** (overnight visitor) is a visitor who stays at least one night in collective or private accommodation in the place visited for less than twelve months.
- **Tourism** comprises the activities of persons travelling to, and staying in places outside their usual environment, for not more than one uninterrupted year, for leisure, business and other purposes. The usual environment of a person consists of a certain area around his/her place of residence, plus all other places he/she frequently visits.

Definitions used specifically in this report

- **South African resident** refers to either a South African citizen or a non-South African citizen with a South African permanent residence permit.
- **Foreign traveller** refers to a traveller who is not a South African citizen or permanent resident.
- **Country** refers to individual countries within a region. (Note: The country of residence is used here and not the country from which the visitor travelled).
- **Region** refers to the following country classification: Overseas, SADC and 'Other' African. Overseas consists of Europe, North America, Central and South America, Australasia, the Middle East and Asia.
- **Overseas:** refers to all countries outside Africa
- **Africa** refers to all the countries in Africa (both mainland and island countries).
- **SADC** refers to the fourteen countries, excluding South Africa, that belong to the Southern African Development Community
- **'Other' African** refers to all countries in Africa that are not members of the SADC. They are grouped as: East and Central Africa, West Africa and North Africa.

Symbol used

- = Nil (note: due to technical issues the November and December 2014 data could not be adequately used to classify arrivals into tourists resulting in either very low or no number of tourists from countries such as Moldavia, Venezuela, South Korea, Taiwan, Tanzania).

Limitations

Stats SA is unable to provide tourism information on South African residents. This is because the DHA does not collect data on purpose of travel and the number of days South African residents intends to spend or spent abroad.

Related publications

Tourism statistics are also published in the monthly Statistical Release P0351: *Tourism and Migration* and in the quarterly *Bulletin of Statistics*, *South African Statistics* and *Stats in Brief*.
