CONSTRUCTION LARGE SAMPLE SURVEY, 2004

Purpose of the survey
The Construction Large Sample Survey is a periodic survey covering the activities of a sample of private and public enterprises operating in the construction industry of the South African economy. Results of the survey are used to compile estimates of the Gross Domestic Product (GDP) and its components, which are used in monitoring the state of the economy and the formulation of economic policy. These statistics are also used by the private sector in analyses of comparative business and industry performance.

Collection authority
The information required is collected under Section 16 of the Statistics Act, 1999 (Act No. 6 of 1999). Your co-operation is sought in completing and returning this questionnaire by the due date.

Confidentiality
According to Section 17 of the Statistics Act, 1999 (Act No. 6 of 1999), your completed questionnaire remains confidential to Statistics South Africa (Stats SA). Your response is not shared with any individual institution, e.g. the South African Revenue Service.

Due date
Please complete this questionnaire and return it in the business reply envelope or fax it to Stats SA by 30 September 2004. Stats SA recommend that you retain a copy to consult in the event of a query.

Example

- Consider, as an example, an enterprise consisting of two branches, with 20 employees whose total salaries and wages is R1 million
- The total income and expenditure of the enterprise is R3 million and R2.6 million respectively
- The two branches are situated in Bloemfontein in the Free State and Pretoria in Gauteng respectively
- The branch in Bloemfontein has eight employees whose salaries and wages are R400 000
- Exact figures for the income and expenditure according to branch are not available. However, the branch in Bloemfontein generated approximately 40% of the total income and was responsible for approximately 42% of the total expenditure
- The information of the two branches should be completed as shown in the table below
