## APPROVAL OF STANDARD

### **Stats SA 059:2021: The South African National Ecosystem Classification System**

I, .....Risenga Maluleke, Statistician-General of the Republic of South Africa, and Accounting Officer for Statistics South Africa in terms of section 7(3)(b) of the Public Service Act, 1994 (as amended by Act No. 30 of 2007) read in conjunction with section 7(2)(e) of the Statistics Act, 1999 (Act No. 6 of 1999), hereby approve and publish the standard as set out in this document.

## Foreword

Statistical Standards is a chief directorate in Statistics South Africa (Stats SA), and is responsible for coordinating the development of standards for use in the organisation. The development of statistical standards is carried out through working groups (WGs) consisting of staff from the Statistical Standards Chief Directorate and representatives from different subject-matter areas and support areas. These representatives are specific subject-matter specialists and thus provide expert information regarding the subject matter, while Statistical Standards staff members provide expertise regarding standards development processes, and standards formulation and writing. All WGs operate on the principle of consensus on best practice.

Stats SA standards are drafted in accordance with the Standards Development Life Cycle (SDLC) based on the *Standardisation framework for Statistics South Africa*. The standards are approved by the Statistician-General (SG). This is done in accordance with the Stats SA policy on *Standards Development, Implementation and Management*.

The South African National Ecosystem Classification System (Edition 1) (SA-NECS) was adopted as is for use in Stats SA. The SA-NECS (Edition 1) was developed and is maintained by the National Ecosystem Classification Committee (NECC) convened by SANBI. The NECC includes relevant organs of state, research institutions and independent experts in the scientific community. The classification will be reviewed periodically, according to the review timetable as set by NECC.

### Document version control

Title	Version number	Date approved
The South African National Ecosystem Classification System Stats SA 059: 2021	Version 1.00	2021
Next Review: As per the review timetable of National Ecosystem Classification Committee (NECC)		

## 1. Purpose

An ecosystem is a dynamic complex of plant, animal and micro-organism communities and their non-living environment interacting as a functional unit. The major groups of ecosystems include forests, savannas, grasslands, shrublands, rivers, wetlands, inshore and offshore marine ecosystems. Ecosystem types are increasingly being used as units of assessment in national and international processes linked to natural capital accounting, biodiversity conservation and ecological infrastructure management. Classification and mapping ecosystem types support various applications related to the management of natural resources, biodiversity, marine spatial planning, land-use planning, assessment, and monitoring in all realms.

The South African National Ecosystem Classification System (SA-NECS) is a national classification system that integrates ecosystem classification and maps across all realms (terrestrial, freshwater, estuarine and marine/coastal). The aim of the classification is to provide a structured hierarchical classification system into which all ecosystem types nest, and accompanying maps.

The purpose of the SA-NECS is to provide a standard approach for ecosystem classification and mapping at a national level, across all realms in South Africa.

## 2. Scope and applicability

The SA-NECS describes ecosystem classification systems and maps for the terrestrial, marine, freshwater and estuarine realms of South Africa. The SA-NECS Handbook (Edition 1) includes an array of uses, applications of the maps and the process that supports updates and maintenance. The classification is applicable to national accounts, environmental-economic accounts and natural capital accounting.

## 3. Normative references

The following referenced document(s) are indispensable for the application of this standard. For dated references, only the cited version applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

- 3.1 [Concepts and definitions for Statistics South Africa](#)
- 3.2 [Statistics Act of South Africa \(Act No. 6 of 1999\)](#)
- 3.3 [National Environmental Management: Biodiversity Act \(Act No. 10 of 2004\)](#)
- 3.4 [The South African National Ecosystem Classification System Handbook \(Edition1\)](#)

## 4. Glossary

For the purpose of this standard, following definitions and the definitions given in the latest version of the *Concepts and Definitions for Statistics South Africa* and, the definitions given in the *South African National Ecosystem Classification System Handbook (Edition 1)*, apply.

### **realm**

one of four major components of the biosphere that differ fundamentally in ecosystem organisation and function: terrestrial, freshwater, estuarine and marine.

### **ecosystem type**

ecosystem unit, or set of ecosystem units, that has been identified and delineated as part of a hierarchical classification system, based on biotic and abiotic factors.

## 5. The South African National Ecosystem Classification System

For the purposes of this standard, please refer to the *South African National Ecosystem Classification System Handbook (Edition 1)* for further information on the classification system. The list of ecosystem types in the SA-NECS is provided below for all realms in both the mainland and Prince Edward Islands. Ecosystem types are grouped into biomes, bioregions or ecoregions, and a unique code for each ecosystem type is provided.

**Table 1a – Mainland terrestrial biomes and ecosystem types**

Terrestrial – SubAntarctic	SubAntarctic Tundra Biome	SubAntarctic Fellfield	ST 6
Terrestrial – SubAntarctic	SubAntarctic Tundra Biome	SubAntarctic Mire-Slope Vegetation	ST 3, 4

**Table 2b – Prince Edward Islands marine bioregions and ecosystem types**

REALM	MARINE BIOREGION	MARINE ECOSYSTEM TYPE	CODE
Marine – SubAntarctic	Ob And Lena Polar Front	Ob And Lena Polar Front Abyss	PEOL1
Marine – SubAntarctic	Prince Edward Island Basin Polar Front	PEI Polar Front Abyss	PEBP1
Marine – SubAntarctic	Prince Edward Island Basin Polar Front	PEI Polar Front Seamount	PEBP2
Marine – SubAntarctic	Prince Edward Island SubAntarctic	PEI SubAntarctic Abyss	PES1
Marine – SubAntarctic	Prince Edward Island SubAntarctic	PEI SubAntarctic Deep Rift Valleys and Troughs	PES2
Marine – SubAntarctic	Prince Edward Island SubAntarctic	PEI SubAntarctic Exposed Cliff and Broken Shore	PES3
Marine – SubAntarctic	Prince Edward Island SubAntarctic	PEI SubAntarctic Highly Exposed Cliff and Broken Shore	PES4
Marine – SubAntarctic	Prince Edward Island SubAntarctic	PEI SubAntarctic Inner Shelf	PES5
Marine – SubAntarctic	Prince Edward Island SubAntarctic	PEI SubAntarctic Least Exposed Cliff and Broken Shore	PES6
Marine – SubAntarctic	Prince Edward Island SubAntarctic	PEI SubAntarctic Least Exposed Mixed Shore	PES7
Marine – SubAntarctic	Prince Edward Island SubAntarctic	PEI SubAntarctic Lower Plateau	PES8
Marine - SubAntarctic	Prince Edward Island SubAntarctic	PEI SubAntarctic Lower Rift Valleys and Troughs	PES9
Marine - SubAntarctic	Prince Edward Island SubAntarctic	PEI SubAntarctic Lower Slope	PES10
Marine - SubAntarctic	Prince Edward Island SubAntarctic	PEI SubAntarctic Lower Spreading Ridge	PES11
Marine - SubAntarctic	Prince Edward Island SubAntarctic	PEI SubAntarctic Mid Plateau	PES12
Marine - SubAntarctic	Prince Edward Island SubAntarctic	PEI SubAntarctic Mid Slope	PES13
Marine - SubAntarctic	Prince Edward Island SubAntarctic	PEI SubAntarctic Mid Spreading Ridge	PES14
Marine - SubAntarctic	Prince Edward Island SubAntarctic	PEI SubAntarctic Outer Shelf	PES15
Marine - SubAntarctic	Prince Edward Island SubAntarctic	PEI SubAntarctic Seamount	PES16
Marine - SubAntarctic	Prince Edward Island SubAntarctic	PEI SubAntarctic Shallow Plateau	PES17
Marine - SubAntarctic	Prince Edward Island SubAntarctic	PEI SubAntarctic Shallow Seamount	PES18
Marine - SubAntarctic	Prince Edward Island SubAntarctic	PEI SubAntarctic Shallow Spreading Ridge	PES19
Marine - SubAntarctic	Prince Edward Island SubAntarctic	PEI SubAntarctic Shelf Edge	PES20
Marine - SubAntarctic	Prince Edward Island SubAntarctic	PEI SubAntarctic Upper Slope	PES21
Marine - SubAntarctic	Prince Edward Island SubAntarctic	PEI SubAntarctic Upper Spreading Ridge	PES22
Marine - SubAntarctic	Prince Edward Island Temperate	PEI Temperate Abyss	PET1
Marine - SubAntarctic	Prince Edward Island Temperate	PEI Temperate Lower Slope	PET2
Marine - SubAntarctic	Prince Edward Island Temperate	PEI Temperate Mid Slope	PET3
Marine - SubAntarctic	Prince Edward Island Temperate	PEI Temperate Seamount	PET4
