1. INTRODUCTION

The Annual Report of Statistics South Africa (Stats SA) is an integral part of financial and non-financial reporting with the intention of promoting accountability and transparency. For the 2019/20 financial year, Stats SA is presenting its financial and non-financial information in two parts in order to improve cost-efficiency in the production of the report. The two parts consist of:

Book 1 provides general information, summary performance information, governance, human resource management information and detailed financial information. Book 1 provides an overview of the organisational performance, achievements and challenges, and a detailed account of the financial performance and position of the organisation. The Auditor-General's findings are included in this book. Book 1 is available in both print and electronic formats, and is accessible on the Stats SA website: www.statssa.gov.za

Book 2 provides a detailed account of performance information in tabular format in relation to the Strategic Plan and Work Programme. Book 2 is available in electronic format and on the Stats SA website: www.statssa.gov.za

2. PERFORMANCE INFORMATION AGAINST PREDETERMINED OBJECTIVES

Stats SA's strategy is informed by emerging priorities as set out in the Medium-Term Strategic Framework (MTEF) development outcomes, and the National Development Plan (NDP). In summary, these policy documents aim to improve the social, cultural and economic welfare of all South Africans. The core of Stats SA's strategy is to lead and coordinate the provision of relevant, reliable and quality statistical information that enables users to understand the dynamics of the economy and society.

Stats SA produces statistical products under two broad programmes, namely Economic Statistics, and Population and Social Statistics. These programmes are supported by five programmes, namely (i) Methodology, Standards and Research, (ii) Statistical Support and Informatics, (iii) Survey Operations, (iv) Statistical Collection and Outreach, and (v) Administration. The official statistics produced by Stats SA are based on data collected through censuses, surveys and administrative data sources. All official statistics are characterised by common statistical principles and practices.

In order to implement the organisational strategy, five strategic outcomes were identified to drive strategic change in the statistics system. Activities and projects in the organisation are aligned to these strategic outcomes to achieve the objectives of the organisation. For easy reference, the relevant programme and subprogramme are included for each target.

The strategic outcomes are:

- a) An informed nation;
- b) Trusted statistics;
- c) Partners in statistics;
- d) A capable organisation; and
- e) Statistical leadership.

The following is a detailed performance report against the strategic plan and annual performance plan targets as outlined in the Strategic Plan and Work Programme, respectively.
