In publishing Volume 48(4) of the Bulletin of Statistics, Statistics South Africa (Stats SA) continues to present one of the country's oldest journals that has been published since 1922.

As the producer of official statistics in South Africa, most of the information presented in the Bulletin of Statistics is based on the data that were released by Stats SA in the preceding three months prior to the date of publication. In this publication, the *Documented Migration* chapter is suspended as Stats SA is still sorting out data acquisition processes with the Department of Home Affairs. All tables presented in this publication, except those indicated otherwise, relate to South Africa.

We thank you for all the feedback you have provided us in the past to ensure that this publication continues to meet your needs as users. We hope you will continue to do so to help improve our services.

Statistician-General: Statistics South Africa

Extract from the Report of the Census Subcommittee to the South African Statistics Council on Census 2001

Preliminary investigations indicate that the 2001 census probably resulted in:

- an underestimate of the number of children below age five;¹
- an overestimate of the number of teenagers aged between 10 and 20;
- an underestimate of the number of men relative to the number of women;¹
- an underestimate of the number in the white population;
- higher than expected numbers aged 80 and older, in the African population;
- an underestimate of the number of foreign-born, since some identified themselves incorrectly as being South African-born;
- age misstatement in the range 60-74;
- an overestimate of the extent of unemployment;
- an underestimate of those who were employed for only few hours per week;
- an underestimate of household income; and
- an overestimate of the number of paternal orphans and the number of fathers missing from the household.

In addition:

- Scanning problems caused some births to be recorded in the wrong province. The number of cases is relatively small and should not lead to too much distortion for most purposes for which these data are used; however, it does produce obviously erroneous results in when one tries to estimate the extent of inter-provincial migration of those born since the previous census.
- The fertility data (numbers of children ever born, children surviving) are problematic.

For further details of these investigations see the full report of the Census Subcommittee.

Tables comparing Census data

For Census 2001 imputation was used to allocate values for unavailable, unknown, incorrect or inconsistent responses, to other categories. 'Undetermined' values were used for only a few variables in a few cases (such as industry and occupation). For Census '96, all such values were grouped as 'Other' or 'Unspecified'.

¹ This is a common feature of censuses, particularly in developing countries.

Abbreviations used

| | |
|----------|---------------------------|
| incl. | - including |
| F | - Female |
| FS | - Free State |
| M | - Male |
| T | - Total |
| VAT | - value-added tax |
| W | - Weights |
| SA | - South Africa(n) |
| Stats SA | - Statistics South Africa |

Units of measurements

| | |
|----------------|--|
| Ton | - Metric ton of 1 000 kilograms (except where otherwise indicated). |
| Year and month | - Calendar years and calendar months (except where otherwise indicated). |

The code, where it appears under the column number, refers to the variable in Stats SA's data bank. This data bank contains data on time series and is available at a fee on diskettes and other media.

Symbols used

| | | |
|----------|---|---|
| .. | = | Data not available |
| — | = | Nil or not applicable |
| 0 or 0,0 | = | Figure too small to publish |
| () | = | Figures excluded from totals |
| _____ | = | A line drawn across a column of figures, indicates an interruption in the comparability of the series |
| a | = | As a result of the unaccountable low number of recorded births during January and February, the rates as well as the natural increase for 1987 were calculated on an adjusted number of births and are indicated with an 'a'. |
| † | = | For all values of 10 000 or less the sample size is too small for reliable estimates. |

A blank space in a column of figures means that the figure or figures are not yet available.

Rounding

Figures are rounded off independently of one another; details, therefore, may not add to totals because of rounding.

DEMOGRAPHY

1.1 Census population figures

The data for 1996, 2001 and 2011 are the official census figures for October of the census year. In the 1996 data 'Unspecified' and 'Other' population groups are included in the totals. In 2001, however, these categories were imputed. Users of Census 1996 and Census 2001 data should refer to the following paragraphs on page ii: 'Comments by the Statistical Council Census Subcommittee' and 'Tables comparing census data'.

1.1.1 Census population figures by population group and gender Numbers

| Year | Total population | | | Black African | | |
|------|------------------|------------|------------|---------------|------------|------------|
| | Total | Male | Female | Total | Male | Female |
| | 1 | 2 | 3 | 4 | 5 | 6 |

DEMOGRAPHY

1.2 Mid-year population estimates

The mid-year population figures are estimates of the population as at 30 June. These figures are revised annually based on new projections from Stats SA. For updated estimates see www.statssa.gov.za

VITAL STATISTICS

2.1 Births and deaths (2002 – 2012) and deaths (2002 – 2012)

Birth occurrences

- Birth occurrences as at the end of June 2013 registered through the civil registration system are presented in Table 2.1.1.
- The total birth occurrences include birth occurrences births that were registered late (a year or more later after the year of occurrence), as updated at the end of June 2013.
- The total birth occurrences also include those of non-South African citizens and those of people whose citizenship status was still under investigation.
- All in all, birth registration suffers from incomplete coverage as well as late registration.

Deaths

- These mortality statistics are based on data collected through the civil registration system and updated in 2012. The numbers of deaths shown in Table 2.1.2 include late registrations. However, stillbirths which are collected through the civil registration system using the same form are excluded.
- Mortality data collected through the civil registration system are subject to content errors and omissions.
- Under registration of deaths, particularly in rural areas and among children still occurs.

2.1.1 Births

Numbers

| Year | Births | | |
|------|-----------|---------|---------|
| | Total | Male | Female |

TOURISM

3.1 Tourists

Statistics South Africa (Stats SA) has completed its Duration of Stay exercise as part of improving its information on foreign travellers and measurement of foreign tourists. As a result of this exercise, it is now possible to remove SAME DAY visitors and OVERNIGHT visitors (tourists) from the foreign arrivals data it receives from the Department of Home Affairs. Stats SA started publishing information on TOURISTS as defined by United Nations World Tourism Organisation (UNWTO) with the January 2009 data.

3.1.1 Tourists by mode of travel

LABOUR

4.1 Number of employees and gross earnings by industry

As from December 2004, Stats SA introduced a new employment statistics survey that covers employing enterprises in the formal non-agricultural business sector of the South African economy that are registered for Income Tax (IT), resulting in the extensive coverage of all small businesses. Previously the coverage was restricted to both employing and non-employed VAT registered enterprises with an annual turnover of R300 000 or more. By restricting the coverage to employing businesses, the new survey is able to provide estimates for employment and earnings as well as estimates for average monthly earnings and it is in accordance with the International Labour Organisation (ILO) definitions and concepts.

Introduction of the new sample from the June quarter 2006 enables Stats SA to provide users with survey results for the June and September 2006 quarters from the new sample.

Stats SA has been working for some years to improve the quality of its economic statistics. The latest series to benefit from these improvements are those for employment and average monthly earnings derived from the *Quarterly Employment Statistics* (QES) survey, a survey of formal non-agricultural businesses and other entities which are employers.

Considerable work has been undertaken over the last two years to improve the completeness of the list of employers in the economy, held on Stats SA's Business Register, from which the samples for the survey are drawn. Greater use has been made of additional administrative sources of employer entities, particularly the lists maintained by the South African Revenue Service (SARS) of employers making contributions on behalf of their employees for Pay As You Earn (PAYE), and the Department of Labour's Unemployment Insurance Fund (UIF).

It is important to distinguish between the lift in the level of the series from improvements in the coverage of employers and the growth in employment shown by the series due to new employer entities entering the economy and continuing employers taking on additional staff. This break in series relates mainly to the level of employment, rather than the growth rate of employment. However, an outcome of not publishing data from a sample revised in 2005 has been that any new employer entity commencing operations from early 2004 onwards would not have had a chance of being selected until the reselection of the sample in March 2006. The effect is that the published series based on the 2004 sample show somewhat smaller growth than would have been shown from a sample revised in 2005.

Further factors affecting the growth of the series between 2004 and 2006 were the expansion of the formal sector as a result of legislative changes, growth resulting from small businesses moving from the informal to the formal sector and greater overall compliance by businesses leading to their registration for PAYE and/or UIF.

Employment and gross earnings - Unless otherwise indicated in a subscription, the following is applicable:

Employment refers to the number of people employed by the business, who received payment (in salaries; wages; commission, in addition to a retainer, salary or wage; piece rates; or payments in kind) for any part of the reference period. This excludes independent contractors and consultants; working proprietors; sole and joint owners; employees paid on a commission basis where a retainer, salary or wage was not paid; and employees based in South Africa but paid from abroad, e.g. embassy employees.

Annual employment data are shown as at 30 June of the relevant year, whereas quarterly data are shown as at the last pay-day of the relevant quarter.

Gross earnings are payments for ordinary, standard or agreed hours during the reference period for all permanent, temporary, casual, executive and managerial employees, before taxation and other deductions. Gross earnings include salaries and/or fees paid to all directors, executives and managers; employers' contributions to holiday, pension, provident and medical funds and contributions to the Unemployment Insurance and Compensation Funds; payments paid from South Africa to employees based abroad, e.g. embassy employees; payments for all types of leave, except those paid on termination; fringe benefits paid in cash such as housing, mortgage and rent subsidies, transport allowances, and cell phone allowances; allowances and penalty payments relating to ordinary-time hours. Annual gross earnings data reflect the total for the relevant year, whereas quarterly data are the sum of the gross earnings for the three months of the relevant quarter.

LABOUR

4.2 Average monthly earnings per employee by industry

Average monthly earnings at current prices are calculated by dividing the total gross earnings, excluding severance, termination and redundancy payments, for the reference month by the number of employees as at the end of the reference month.

Average monthly earnings at constant 2000 prices measure average monthly earnings after the direct effects of inflation have been eliminated. The deflator used to deflate the current average earnings is the consumer price index (2000=100). This index has been linked to the new CPI that has been rebased to 2008 = 100 from January 2009.

LABOUR

4.3 Quarterly Labour Force Survey

The *Quarterly Labour Force Survey* (QLFS) is a household-based sample survey, specifically designed to measure the dynamics of employment and unemployment in the country. It measures a variety of issues related to the labour market, including unemployment rates (official), according to standard definitions of the International Labour Organisation (ILO).

OFFICIAL AND EXPANDED UNEMPLOYMENT RATES

Statistics South Africa (Stats SA) uses the following definition of unemployment as its official definition: The unemployed are those people within the economically active population who, (a) did not work in the calendar week preceding the interview, (b) have taken active steps to look for work or to start a business in the four weeks prior to the interview, and (c) want to work and were available to start work in the reference week.

Stats SA reports on the situation of the unemployed using the official definitions only. However, in the present economic climate, there is a proportion of discouraged job seekers who face constraints, for example high travel costs and lack of transport, when seeking work, and these are reported on separately.

4.3.1 Estimated population of working age (15 to 64 years) by population group, gender and labour market status, according to the official definition of unemployment, September 2014

| Population group and gender | | Economically active | | | | Not economically active (1 000) | Total 1 000 |
|-----------------------------|--------|---------------------|------------------|-------------|---------------------|---------------------------------|-------------|
| | | Workers 1 000 | Unemployed 1 000 | Total 1 000 | Unemployed rate (%) | | |
| | | 127 | 128 | 129 | 130 | | |
| Black/African | Male | 6 217 | 2 229 | 8 447 | 26,4 | 5 394 | 13 841 |

PRICES

5.1 Producer price indices

The *Producer Price Index* (PPI) measures price trends of commodities in domestic output (including exports), imported and exported commodities throughout the major sectors of the economy, i.e. agriculture, forestry, fishing, mining, manufacturing, electricity, gas and water supply

All commodities included in the PPI, are classified according to the *Standard Industrial Classification of All Economic Activities* (SIC). The SIC is based on a standard industrial classification compiled by the United Nations (UN) for international use. Commodities in the manufacturing sector are divided into 23 major industrial groups according to the SIC.

Price information is collected for products known as 'indicator products'. Indicator products are identified as those products whose sale value represents the largest part of the total value of sales (turnover) in an industrial group. Prices are collected at the first sales point after production, which is producers in the case of locally produced commodities, and importers and exporters in the case of imported and exported commodities. Prices 'ex-factory' are requested but 'delivered' or 'free on rail/free on board' are accepted if it is the normal basis of quotation. Where prices are dependent on the quantity purchased or the class of purchaser, the price for the predominant quantity or class of purchaser is collected. Value-added tax (VAT) is excluded and normal discounts generally available to purchasers are excluded from quoted prices.

Where possible, price information is collected at successive time intervals for the same grade or quality of commodities. In the case of specialised commodities, such as machinery and transport equipment, price information is collected for equivalent items. Where quality or other changes occur in commodities, or where substitute commodities are introduced, the price indices are adjusted to compensate for any change in the price solely due to quality or similar changes.

Price information refers to the first seven days of the relevant month, except in the mining and agricultural sectors where average prices for the relevant month are collected. Most prices for commodities manufactured locally are collected at three-monthly intervals, while prices of imported commodities are collected monthly. If Statistics South Africa (Stats SA) were notified of price changes for products not surveyed on a monthly basis, products would be surveyed whenever price changes occur.

MINING**7.1 Indices of the physical volumes of mining production**

The indices of the physical volume of mining production are based on information furnished by the Minerals Bureau, Department of Mineral Resources. The weighting factors used for the computation of the indices, are based on the gross values of production of the individual minerals in 2010. Two indices are shown for total mining production, namely an index including gold production and an index which excludes gold production.

Monthly statistics are preliminary and subject to amendments.

¹ Iron ore includes haematite and magnetite.

² PGMs (Platinum Group Metals) include platinum, iridium, osmiridium, palladium, rhodium, ruthenium and osmium.

³ Other metals include silver, antimony, cobalt, lead concentrate, titanium, uranium oxide, zinc and zirconium minerals concentrate.

⁴ Diamonds include alluvial, non-alluvial and marine diamonds.

⁵ Building materials include limestone for cement, brickmaking clay, brickmaking shale, granite or norite, aggregate and sand, slate, sandstone and shales for cement manufacture.

⁶ Other non-metals include andalusite, barites, calcite, natural gas, natural gas condensate, petroleum crude, feldspar, fluorspar, gypsum, limestone and lime (excluding limestone for cement), magnesite, perlite, pigment minerals, phosphate concentrate, pyrophyllite, salt, semi-precious stones, silica, ammonium sulphate, sodium sulphate, sulphur, talc, vermiculite, and special clays.

⁴ Diamonds include alluvial, non-alluvial and marine diamonds.⁵ Building materials include limestone for cement, brickmaking clay, brickmaking shale, granite or norite, aggregate and sand, slate, sandstone and shales for cement manufacture.⁶ Other non-metals include andalusite, barites, calcite, natural gas, natural gas condensate, petroleum crude, feldspar, fluorspar, gypsum, limestone and lime (excluding limestone for cement), magnesite, perlite, pigment minerals, phosphate concentrate, pyrophyllite, salt, semi-precious stones, silica, ammonium sulphate, sodium sulphate, sulphur, talc, vermiculite, and special clays.

MINING**7.2 Production and sales**

Amended monthly figures are not published in all cases, but are taken into account when annual figures are compiled. The published monthly figures, therefore, do not necessarily add up to the annual figures.

Gold and silver production is shown in kilograms (kg), i.e. 1 kg = 32,15075 troy ounces. Diamond production is published in 1 000 carats (columns 50 and 51), while the production of all minerals is published in 1 000 metric tons, (1 t = 1 000 kg).

MANUFACTURING

8.1 Indices of the physical volumes of manufacturing production

The calculation of the manufacturing production indices (columns 1 to 110) is based on the value of manufactured products and articles after the effect of price changes has been eliminated by deflation by using appropriate sub-indices of the production price index (PPI). For 38 of the 44 SIC major groups in manufacturing, the value of production is calculated from the value of sales and stocks of manufactured products obtained from the monthly survey of manufacturing enterprises.

The sample of manufacturing production and sales is based on an updated version of Stats SA's business register, based on the database of units registered for value-added tax (VAT) and income tax, obtained from the South African Revenue Service (SARS). The latest sample was drawn in April 2014. The weighting factors for combining of manufacturing major groups to total manufacturing were calculated on the basis of the 2011 national accounts value added weights as from January 2011. According to international practice, indices are re-based every five years. The indices are presented here at reference year 2010=100. The industrial classification used in this publication is based on the *Standard Industrial Classification of All Economic Activities (SIC)*, January 1993.

¹ Including recycling and tobacco products.

MANUFACTURING

8.2 Values of sales

Data relating to sales (columns 111 to 220) are collected together with the monthly production data. The sample data are weighted according to the original sample design in order to represent the population of enterprises in the manufacturing industry.

The latest sample was drawn in April 2014.

The values shown represent net sales (i.e. gross sales less returns, discounts and other deductions) of own manufactured goods, and net charges for work done.

8.2.1 Values of sales: Food and beverages

MANUFACTURING

8.3 Utilisation of production capacity by large enterprises

The sample of utilisation of production capacity is based on large enterprises from an updated version of Stats SA's business register, based on the database of units registered for value-added tax (VAT) and income tax, obtained from the South African Revenue Service (SARS). The latest sample was drawn in August 2008.

The weights for aggregating the utilisation rate of manufacturing major groups to divisions and divisions to total manufacturing were calculated on the basis of the 2011 national accounts value added weights.

A weight is calculated for each enterprise based on the total manufacturing sales of the enterprise compared with the total manufacturing sales of enterprises classified in the major group.

The industrial classification used in this publication is based on the *Standard Industrial Classification of All Economic Activities (SIC)*, January 1993.

8.3.1 Total manufacturing, manufacturing divisions and manufacturing major groups

CONSTRUCTION

9.1 Building statistics of the private sector at current prices: South Africa

Statistics South Africa (Stats SA) conducts a monthly building statistics survey collecting information regarding building plans passed and buildings completed, financed by the private sector, from the largest local government institutions in South Africa. According to these institutions, they are not always notified about low-cost housing projects and therefore do not include the bulk of low-cost dwelling-houses.

Building activities are classified in division 5 according to the 1993 edition of the *Standard Industrial Classification of All Economic Activities*, (SIC) Fifth Edition, Report No. 09-90-02. The SIC is based on the 1990 *International Standard Industrial Classification of All Economic Activities* (ISIC) with suitable adaptations for local conditions.

Note that all figures for the last month are preliminary.

¹ Total includes other residential buildings, tourism accommodation and casinos.

CONSTRUCTION

9.2 Building statistics of the private sector at constant 2010 prices: South Africa

The value of building plans passed and buildings completed at constant prices measures building activities in terms of ruling prices in a specific base year, which is currently 2010. The value of building plans passed at constant prices for each month is obtained by deflating the values at current prices with a price index known as the 'lump sum domestic buildings' as published in statistical release P0151: *Contract Price Adjustment Provisions (CPAP) Work Groups and Selected Materials Indices*. In order to be applicable, these indices (base February 1991=100) are converted to the base year 2010=100.

The value of buildings completed at constant prices is obtained by deflating the values at current prices with the price index which is used to calculate building plans passed at constant prices (see paragraph above). Since the completion of buildings may extend over a few months to a few years, the current value of buildings completed is deflated by price indices which prevailed at the time the plans were passed. Therefore, the duration of the completion of different types of buildings are taken into account in ascertaining the deflators e.g. the value of dwelling-houses completed at constant prices at January 2013 is obtained by deflating the current value of dwelling-houses completed for January 2013 with the price index of a month six months prior to January 2013. Furthermore, the value of other residential buildings, non-residential buildings and additions and alterations at constant prices is obtained by deflating the current values with price indices of 12 months, 18 months and 12 months prior to the relevant month, respectively.

Note that all figures for the last month are preliminary.

ELECTRICITY**10.1 Units produced and consumed**

The data are collected on a sample basis and raised to obtain estimated figures. The level of the data was adjusted according to the results of the 1995 census of electricity, gas and steam.

The figures shown relate to public supply undertakings and self-producers. Public supply undertakings comprise Eskom and local authorities, while self-producers are undertakings which, in addition to their main activities, themselves produce electric energy intended in greater part or in its entirety to meet their own needs - mines, manufacturing establishments and selected local authorities are inter alia included.

INTERNAL TRADE

11.1 Wholesale trade, retail trade and motor trade

Stats SA introduced new wholesale trade sales, retail trade sales and motor trade sales samples utilising an upgraded business register commencing with the month of July 2013. The previous samples and the current ones were run side by side from April to June 20013, which provided a set of factors that could be applied to the old series to revise previous estimates back to January 1998 for wholesale trade sales and motor trade sales and back to 2002 for retail trade sales. The figures up to March 2013 are thus backcasted data based on the movements of the old series and the levels of the new series.

The figures in columns 1-10 represent estimated total sales of merchandise in the trade sector.

Wholesale trade sales at constant (2012) prices: For January 1998 to December 2011 wholesale trade sales at constant prices were calculated using the "all groups" PPI for domestic output, but excluding electricity and other utilities. From January 2012, wholesale trade sales at constant prices are compiled in three stages:

1. Deflate sales of dealers in agricultural raw materials and livestock using the PPI for agriculture.
2. Deflate sales of dealers in food, beverages and tobacco using the PPI for food products, beverages and tobacco.
3. Deflate the remaining wholesale trade sales with the headline PPI (final manufacturing) excluding the PPIs for food products, beverages and tobacco; and transport equipment.

Total wholesale trade sales at constant prices is obtained by aggregating (1), (2) and (3).

Retail trade sales at constant (2012) prices for January 2002 to December 2007 are calculated using the price index for goods excluding petrol and purchases of vehicles, for all urban areas from the consumer price index (CPI) to deflate sales at current prices. From January 2008 onwards total retail trade sales at constant prices are obtained by adding up the deflated sales by type of retailer. Retail trade sales at constant prices by type of retailer are obtained by deflating estimated sales at current prices by the relevant weighted price index. To obtain total retail trade sales at constant prices, estimates of the deflated sales for each type of retailer are aggregated.

In order to be classified as a **wholesaler**, an enterprise must derive 50 per cent or more of its income from sales of merchandise to other enterprises and/or institutions.

In order to be classified as a **retailer**, an enterprise must derive more than 50 per cent of its income from sales of merchandise to the general public for private or domestic consumption.

The data provided by motor service stations and dealers in motor vehicles, spares and accessories are classified as **motor trade**.

Stats SA collects information regarding wholesale trade and motor trade excluding VAT, but retail trade including VAT.

INTERNAL TRADE

11.2 Tourist accommodation by type of accommodation

The results presented in this table are derived from the monthly survey of the tourist accommodation industry. This survey is based on a sample of private and public enterprises operating in the tourist accommodation industry.

The sample was drawn from Statistics South Africa's (Stats SA) business sampling frame, which contains all enterprises that are registered for income tax and/or value-added tax (VAT). Thus, enterprises that are not registered for tax are excluded from this survey.

All figures are preliminary.

INTERNAL TRADE

11.3 Food and beverages

The *Food and beverages survey* is a monthly survey covering a sample of public and private enterprises involved in the production of meals and drinks for immediate consumption, in South Africa. For example, restaurants, takeaways, coffee-shops, caterers and bars are included in this category. The purpose of the survey is to increase the scope and coverage of South African tourism enterprises and establishments surveyed. The results of the survey are used to compile estimates of the Tourism Satellite Accounts (TSA) and the Gross Domestic Product (GDP) and its components, which are used to develop and monitor government policy. These statistics are also used in the analysis of comparative business and industry performance.

The sample was drawn from Statistics South Africa's (Stats SA) business sampling frame, which contains all enterprises that are registered for income tax and/or value-added tax (VAT). Thus, enterprises that are not registered for tax, are excluded from this survey.

INTERNAL TRADE

11.4 Civil cases

The survey of civil cases for debt collects information regarding civil cases recorded, civil summonses issued for debt, civil judgements recorded for debt and the value of civil judgements recorded for debt in order to provide users with information on the extent of unpaid debt in South Africa. The data are based on a sample of the largest 203 magistrate offices introduced from January 2011 and they represent approximately 98% of all civil cases for debt in South Africa.

Civil cases recorded (columns 102,112 and 122) - relate to all cases, in other words debt cases as well as claims for damages, ejectment orders and other non-debt cases are included.

Civil summonses (columns 103 to 111, 113 to 121 and 123 to 131) - relate to debt cases only and thus exclude claims for damages, ejectment orders and other non-debt cases.

Civil judgements - relate to default and consent judgements.

Note that due to rounding, figures do not necessarily add up to totals.

TRANSPORT

12.1 Transport by private sector institutions for remuneration

The *Land transport survey* is a monthly survey which covers passenger and freight transportation by rail and road in South Africa. This survey is based on a sample drawn from the 2014 Business Sampling Frame (BSF) that contains businesses registered for value-added tax.

12.1.1 Freight transport

| Year and month | | | Total income | Payload | Income by type of commodity | | | | | | | |
|----------------|------|-----|--------------|---------|---|---|---|---|--|--|---|---|
| | | | | | Transportation of agriculture and forestry primary products | Transportation of primary mining and quarrying products | Transportation of manufactured food, beverages and tobacco products | Transportation of textiles, clothing and leather products | Transportation of chemicals, coke, petroleum, rubber, plastic and other mineral products | Transportation of basic metals and fabricated metal products | Transportation of non-metallic products | Transportation of electrical machinery, transport machinery and equipment |
| | | | | | R million | 1 000 tons | R million | R million | R million | R million | R million | R million |
| A | 2012 | | 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 |

FINANCIAL STATISTICS (PRIVATE ENTERPRISES)

13.1 Selected income and expenditure items by industry

The *Quarterly Financial Statistics Survey* covers a sample of private enterprises operating in the formal non-agricultural business sector of the South African economy. It excludes financial intermediation, insurance and government institution. Results of the survey are used in compiling estimates of the Gross Domestic Product (GDP) and its components, which in turn are used to develop and monitor government policy. These statistics are also used by the private sector in analysis of comparative business and industry performance. The results are published quarterly in the statistical release P0044: *Quarterly Financial Statistics*.

13.1.1 All industries

| Year and quarter | | | Turnover | Interest paid | Tax and company tax brought into account | Net profit or loss before providing for company tax and dividends | Total capital expenditure on new assets | R million | | Book value of land, buildings, machinery, furniture, vehicles and other equipment as at the end of the quarter | Total stock (inventories) | |
