Explanatory notes

- Introduction** 1 Statistics South Africa (Stats SA) conducts a monthly survey of civil cases recorded and civil summonses for debt issued in South Africa. This information is obtained from selected magistrates' offices.
- 2 Except for cases recorded, all other information relates to debt cases only, therefore claims for damages, ejectment orders and other non-debt cases are excluded.
- Purpose of the survey** 3 The survey of civil cases for debt covers selected magistrates' offices in South Africa. This survey collects information regarding civil cases recorded, civil summonses issued and civil judgements recorded in order to provide users with information on the extent of unpaid debt in South Africa. The results of the survey are used by the private and public sectors as an indicator of economic performance.
- Scope of the survey** 4 This survey covers:
- number of civil cases recorded;
 - number of civil summonses issued for debt;
 - number of civil judgements recorded for debt; and
 - value of civil judgements recorded for debt.
- Statistical unit** 5 The statistical unit for collection of information is a magistrate's office. Magistrates' offices include the small claims courts.
- The largest magistrates' offices in South Africa are included in the monthly survey of civil cases for debt. The monthly survey of 203 magistrates' courts represents approximately 98% of all cases in South Africa.
- Survey methodology and design** 6 The survey is conducted by email and telephone each month from 203 magistrates' offices.
- Collection rate** 7 The preliminary collection rate for the civil cases for debt survey for April 2025 was 79,8%. The collection rate for March 2025 was 78,8%.
- Revised figures** 8 Revised figures are mainly due to late submission of data to Stats SA, or respondents reporting revisions or corrections to their figures. The reasons for routine revisions are outlined in the following schedule. Any unscheduled revisions will be promptly indicated in relevant tables to maintain transparency and accuracy.

- Rounding-off of figures** 9 Where figures have been rounded off, discrepancies may occur between sums of the component items and the totals.

Seasonal adjustment	10	<p>Seasonally adjusted estimates of all categories are generated each month, using the X-12 Seasonal Adjustment Program developed by the United States Census Bureau. Seasonal adjustment is a means of removing the estimated effects of normal seasonal variation from the series so that the effects of other influences on the series can be more clearly recognised. Seasonal adjustment does not aim to remove irregular or non-seasonal influences, which may be present in any particular month. Influences that are volatile or unsystematic can still make it difficult to interpret the movement of the series even after adjustment for seasonal variations. Therefore, the month-to-month movements of seasonally adjusted estimates may not be reliable indicators of trend behaviour. The X-12-ARIMA procedure for civil cases for debt is described in more detail on the Stats SA website:</p> <p>Click to download seasonal adjustment for civil cases for debt February 2022.</p>	
Trend cycle	11	<p>The trend is the long-term pattern or movement of a time series. The X-12-ARIMA Seasonal Adjustment Program is used for smoothing seasonally adjusted estimates to estimate the underlying trend cycle.</p>	
Unpublished statistics	12	<p>In some cases, Stats SA can also make available statistics which are not published.</p>
