### Key findings for the quarter ended September 2020

The total turnover of quarterly financial statistics (QFS) industries<sup>1</sup> in the third quarter of 2020 was estimated at R2 584 401 million (R2,58 trillion), an increase of 24,6% compared with the second quarter of 2020 (R2 073 506 million or R2,07 trillion).

Between the second and the third quarters of 2020, turnover increased in all of the eight industries covered by the survey. The largest percentage increase in turnover was recorded in construction (+54,3%), followed by mining and quarrying (+36,2%), manufacturing (+33,5%), electricity, gas and water supply (+29,1%), trade (+21,7%), community, social and personal services (excluding government and educational institutions) (+20,6%), transport, storage and communication (+13,1%) and real estate and other business services (excluding financial intermediation and insurance) (+10,1%).

Total closing inventories at the end of the third quarter of 2020 were estimated at R1 054 531 million, an increase of 3,1% compared with R1 022 577 million at the end of the second quarter of 2020. Increases were recorded for transport, storage and communication (+16,2%), mining and quarrying (+13,4%), electricity, gas and water supply (+7,9%), construction (+3,3%), manufacturing (+1,9%) and trade (+0,8%). Decreases were recorded in real estate and other business services (excluding financial intermediation and insurance) (-2,9%) and community, social and personal services (excluding government and educational institutions) (-1,8%).

Total capital expenditure on property, plant and equipment was estimated at R76 205 million in the third quarter of 2020, an increase of 11,3% compared with R68 461 million in the second quarter of 2020. The largest percentage increase was recorded in electricity, gas and water supply (+39,0%), followed by community, social and personal services (excluding government and educational institutions) (+37,8%), construction (+32,6%), mining and quarrying (+19,9%), manufacturing (+10,5%), transport, storage and communication (+2,4%) and real estate and other business services (excluding financial intermediation and insurance) (+1,9%). A decrease was recorded for trade (-13,7%).

Turnover was estimated at R2 584 401 million in the third quarter of 2020, an increase of 2,4% compared with R2 523 371 million in the third quarter of 2019. Four of the eight industries covered by the survey reflected annual increases. The largest percentage increase in turnover was recorded in mining and quarrying (+24,4%), followed by real estate and other business services (excluding financial intermediation and insurance) (+12,1%), trade (+4,1%) and electricity, gas and water supply (+3,4%). Decreases were recorded for community, social and personal services (excluding government and educational institutions) (-12,4%), transport, storage and communication (-9,7%), construction (-6,2%) and manufacturing (-2,4%).

<sup>1</sup>All industries in the South African economy, excluding agriculture, financial intermediation, insurance, government and educational institutions.

<sup>&</sup>lt;sup>1</sup> Revised.

Revised.

Preliminary.

Total capital expenditure on new property, plant and equipment / Carrying value of property, plant and equipment at the end of the quarter.

Cost of sales / [(Opening inventories + Closing inventories) / 2].

(Net profit or loss before taxation + Interest paid) / Interest paid.

Dividends paid / (Net profit or loss before taxation – Company tax).

Cost of sales = (Opening inventories + Purchases – Closing inventories).

### **Technical notes**

### **Confidence intervals**

The 95% confidence intervals of a population parameter (turnover) are obtained as follows:

### Lower limit

= lower 95% confidence limit of a population parameter

= estimate - 1,96 \* Standard error (estimate);

and

### Upper limit

= upper 95% confidence limit of a population parameter

= estimate + 1,96 \* Standard error (estimate)

Standard error (SE) = Upper limit (R million) - Lower limit (R million)

2 \* 1,96

**Relative standard error (RSE)** =  $\underline{SE}$  of estimate \* 100

Estimated

| Neyman Optimal Allocation | Before drawing samples in each of the surveys the population of enterprises on the Business Sampling Frame (BSF) was stratified. Strata were formed using a combination of the standard industrial classification variable and the measure of size variable for enterprises. The Neyman optimal allocation formula used to allocate samples to each stratum is given by a formula below. $n_h = \frac{N_h S_h}{\sum N_h S_h}$ |
|---------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                           | Where $N_h$ and $S_h$ are the stratum population size and the stratum variance, respectively.                                                                                                                                                                                                                                                                                                                                 |

<sup>1</sup>Enterprises with a turnover of less than R2 000 000 are excluded from this survey as from the 2009 sample.

### **Explanatory notes**

### Introduction

Stats SA conducts a quarterly sample survey to collect a range of financial statistics in respect of enterprises in the formal business sector of the South African economy, excluding agriculture, hunting, forestry and fishing and financial intermediation and insurance, government and educational institutions. This statistical release presents a selection of key findings and tables from Stats SA's *Quarterly financial statistics* (QFS) survey for the September and December 2019 and March, June and September 2020 quarters which examines key variables as required by the Systems of National Accounts (SNA) 2008, and are mentioned below:

- turnover;
- interest received and paid;
- dividends received and dividends payable;
- royalties, franchise fees, copyright, trade names and trade and patent rights received and paid;
- income and expenditure in respect of rental/leasing of land, buildings and other structures, including payments for water and electricity services;
- income and expenditure in respect of hiring/leasing of plant, machinery, vehicles and other equipment;
- employment costs;
- profit and loss on assets/investments sold or revalued;
- depreciation provided for;
- purchases;
- other income and other expenditure;
- total income and total expenditure;
- net profit or loss before providing for company tax and dividends;
- company tax;
- carrying value of property, plant and equipment at the end of the quarter;
- inventories as at the beginning and end of the guarter; and
- capital expenditure on new property, plant and equipment at the end of the quarter.
- 2 The statistical release also contains accounting ratios derived from estimates of selected key variables.
- In order to improve timeliness of the publication, some information for the current quarter may have been estimated due to late or non-submission by respondents. These estimates are revised as soon as the actual information is available.
- 4 Additional information regarding estimates of small, medium and large enterprises by industry per variable for the quarters ended June 2020 and September 2020 is available on the Stats SA website and can also be made available on request.

## Purpose of the survey

The QFS survey covers a sample of enterprises operating in the formal non-agricultural business sector of the South African economy, excluding financial intermediation, insurance, government and educational institutions. Results of the survey are used in compiling estimates of the Gross domestic product (GDP) and its components, which in turn are used to develop and monitor government policy.

These statistics are also used by the private sector in analysis of comparative business and industry performance. The results are published quarterly in the *Quarterly financial statistics* (QFS) statistical release P0044.

## Scope of the survey

- 6 This survey covers financial statistics of the following industries according to the Standard Industrial Classification of All Economic Activities (SIC), Fifth edition, January 1993:
  - mining and quarrying industry;
  - manufacturing industry;
  - · electricity, gas and water supply industry;
  - construction industry;
  - trade industry;
  - transport, storage and communication industry;
  - real estate and business services industry, excluding financial intermediation and insurance; and
  - community, social and personal services industry, excluding government and educational institutions.

### Classification

7 The 1993 edition of the Standard Industrial Classification of All Economic Activities (SIC), Fifth edition, January 1993, was used to classify the statistical units in the survey. The SIC is based on the 1990 International Standard Industrial Classification of All Economic Activities (ISIC) with suitable adaptations for local conditions. Statistics in this publication are only presented at SIC major division (one digit) level. Each enterprise is classified to an industry which reflects the predominant activity of the enterprise. Estimates on lower digits SIC can be made available on request.

### **Collection rate**

The preliminary collection rate for the survey on quarterly financial statistics for the September 2020 quarter was 71%. The improved collection rate for the June 2020 quarter was 75%.

### Statistical unit

9 For the purpose of this publication, the statistical unit in the quarterly financial statistics survey is the enterprise. An enterprise is defined as a legal unit or a combination of legal units that includes and directly controls all functions necessary to carry out its production activities. The statistical units are derived from and linked to the South African Revenue Service (SARS) value added tax (VAT) administrative data.

### Survey methodology and design

- The survey is conducted on a quarterly basis. Questionnaires are sent to a sample of approximately 4 766 enterprises. Questionnaires have to be returned to Stats SA within two weeks after the end of the quarter concerned. Fax, telephone and electronic reminders are used to follow up on non-responding enterprises.
- 11 Samples are normally drawn each year and the resulting level changes in estimates are indicated when the new sample is implemented. A new sample was drawn in 2019 and implemented from the December 2019 quarter onwards.
- 12 The sample was drawn from a population of enterprises that contributed approximately 95% to the total turnover per industry. Adjustments are made to the estimates to account for enterprises contributing less than 5% of the total turnover within each industry. All enterprises are stratified by type of enterprise according to

size groups based on the National Small Business Amendment Bill, 2003, size group allocations for industries as defined in the SIC.

All large enterprises, which comprise 54% of the number of enterprises in the sample, are completely enumerated, while simple random sampling is applied for medium sized, small and very small enterprises. Enterprises with a VAT turnover of less than R2 000 000 are excluded from this survey. The data reported by the enterprises in the sample are weighted to represent all enterprises in the population.

### Reliability of estimates

- Data presented in this publication are based on information obtained from a sample of enterprises and are, therefore, subject to sampling variability, that is, the data may differ from the figures that would have been produced if the data had been obtained from all enterprises in the different industries in South Africa, inaccuracies of this kind are referred to as sampling errors. See Tables A and B (page 28) to determine the extent that estimates may vary.
- 14 Inaccuracies may occur because of imperfections in reporting by enterprises and errors made with the collection and processing of the data. Inaccuracies of this kind are referred to as non-sampling errors. Every effort is made to minimise non-sampling errors by designing the questionnaire carefully, conducting pilot studies, editing of data and the implementation of efficient operating procedures. Preliminary figures are indicated in the relevant tables.

# Reasons for fluctuations in data

- 15 The fluctuations in the data can be attributed to:
  - revisions to previous quarters made in the event of new or revised information being furnished by the respondents;
  - · restructuring of large businesses;
  - exchange rate fluctuations;
  - changes in reporting due to new International Financial Reporting Standards (IFRS);
  - once-off items reflected in one or more quarters, but not reflected in other quarters;
  - year-end adjustments performed during the last quarter of the financial year;
  - seasonal factors;
  - items declared annually and not quarterly;
  - samples drawn annually (see paragraph 10 on page 33); and
  - response rates per industry and within sub sectors.

### Standard error

The estimates in this publication are based on a sample drawn from units in the surveyed population. The entire population is not surveyed. The published estimates are subject to sampling error. The most common way of quantifying such sampling error is to calculate the standard error for the published estimate or statistic (see Tables A and B on page 28).

### **Revised figures**

17 The revised figures are due to respondents reporting revisions or corrections in their figures and late submissions of their data to Stats SA. Editing of data occurs at individual enterprise level.

### Reference period

18 The reference period for this publication is from 1 July 2020 to 30 September 2020.

## Related publications

19 Users may also wish to refer to the following publications which are available from Stats SA:

- Annual financial statistics (P0021);
- Gross domestic product (P0441) issued quarterly and annually;
- Manufacturing: Production and sales (P3041.2) issued monthly;
- Mining: Production and sales (P2041) issued monthly;
- Motor trade sales (P6343.2) issued monthly;
- Quarterly employment statistics (P0277);
- Retail trade sales (P6242.1) issued monthly;
- Stats in brief issued annually; and
- Wholesale trade sales (P6141.2) issued monthly.

## Rounding-off of figures

21

The figures in the tables have, where necessary, been rounded off to the nearest three digits shown.

# Comparison of results with Quarterly employment statistics (QES) survey

Employment costs estimates produced in this publication are based on information as defined by the International Accounting Standards 19 (IAS19) from an accounting perspective. The *Quarterly employment statistics* (QES) survey produces estimates for employment and earnings from a payroll perspective.

The differences between the QFS employment costs and QES earnings can be attributed, but not limited, to the following factors:

- accounting and payroll timing differences in the recognition of employmentrelated transactions. The QFS employment costs are recognised on an accrual basis while the QES earnings are recognised on a cash basis;
- classification differences between surveys;
- changes in accounting standards (International Financial Reporting Standards (IFRS) revisions in the QFS);
- different sampling frames;
- different sampling methodology and sampling specifications;
- information sources (information from the payroll administrator vs. information from the accounting officer); and
- · restructuring of businesses.

## Adjustment of DTI 22 cut-off points

The DTI cut-off points sourced from the National Small Business Amendment Bill 2003 have been raised by a factor of 13,5 to comply with sample specifications.

### **Glossary**

### Capital expenditure on property, plant and equipment

Capital expenditure on property, plant and equipment includes:

- erection of new buildings and works, additions to and alterations of existing buildings and works, whether payments were made to outside contractors or concerns, or work done by the enterprise itself;
- · work in progress capitalised; and
- new plant and machinery, vehicles and equipment.

### Carrying value of property, plant and equipment

Carrying value of property, plant and equipment at the end of the quarter includes:

- land;
- residential buildings and non-residential buildings;
- construction works, roads and parking areas;
- computers and other IT equipment;
- motor vehicles and other transport equipment; and
- plant, machinery, furniture, fittings and other office equipment.

### Company tax

Company tax brought into account consists of taxes on incomes, profits and capital gains, excluding value-added tax (VAT). They are assessed on the actual or presumed incomes of enterprises and exclude employees' taxes, deferred tax and compulsory loan levies.

### **Employment costs**

Employment/staff costs according to IAS 19 are costs incurred in exchange for services rendered by employees. These costs are divided into four categories: short-term employee benefits, post-employment benefits, other long-term employee benefits and termination benefits.

Employment costs include (among other types of employment benefits):

- wages and salaries;
- compensated absences (paid vacation and sick leave);
- commissions paid;
- profit sharing plans;
- bonuses;
- medical and life insurance benefits during employment;
- housing benefits;
- free or subsidised goods or services given to employees;
- pension benefits;
- post-employment medical and life insurance benefits;
- long-service or sabbatical leave;
- jubilee benefits;
- deferred compensation programmes;
- severance, termination and redundancy payments to staff; and
- other employee-related costs not mentioned above.

### **Enterprise**

An enterprise is a legal unit or a combination of legal units that includes and directly controls all functions necessary to carry out its production activities.

### **Establishment**

An establishment is defined as an enterprise or part of an enterprise that is situated at a single location and in which only a single (non-ancillary) productive activity is carried out or in which the principal productive activity accounts for most of the value added.

### Industry

An industry consists of a group of enterprises engaged in the same or similar kinds of economic activity, and is classified according to the *Standard Industrial Classification of All Economic Activities* (SIC), Fifth edition, January 1993.

# International Financial Reporting Standards (IFRS)

International Financial Reporting Standards (IFRS) are international accounting standards stating how particular types of transactions and other events should be reported in financial statements. IFRS are issued by the Accounting Standards Board. The purpose of IFRS is to improve transparency and comparability within financial reporting and introduce consistency in accounting.

### **Inventories**

Inventories consist of:

- Outputs that are held by the enterprise that produced them prior to their being further processed, sold, delivered to other units or used in other ways.
- Products acquired from other enterprises that are intended to be used for intermediate consumption or for resale without further processing (factored goods).

Raw materials consist of components for processing, packing materials, fuel, consumable and maintenance stores.

Work in progress consists of goods in the process of manufacturing or work that has been partially done, but which has not yet been completed at the beginning and end of the quarter.

Finished goods include manufactured goods by own manufacturers and goods not produced by the enterprise but purchased for resale, not sold at the beginning and end of the quarter.

### Net profit or loss

Net profit or loss before drawings by proprietors or partners, company tax paid or provided for and dividends paid or provided for are taken into account is calculated as total income minus opening inventories plus closing inventories less total expenditure.

#### **Purchases**

### Purchases includes:

- raw materials, components, etc., used in production;
- fuels:
- spare parts and building materials; and
- purchases and transfers-in of factored goods, intermediate products and partially completed goods from related enterprises.

### Purchases excludes:

- subcontract and commission expenses;
- motor vehicle running expenditure, including parts and fuel;
- purchases of materials capitalised for "capital work done" by own employees; and
- containers and packaging materials.

### Turnover

Turnover refers to the following items for all industries, excluding real estate and other business services (excluding financial intermediation and insurance):

- value of sales;
- amounts received for work done; and
- amounts received for services rendered.

Turnover refers to the following items for the real estate and other business services industry (excluding financial intermediation and insurance):

- value of sales;
- amounts received for work done;
- amounts received for services rendered;
- interest received;
- rent and or lease payments received for land and buildings; and
- rent, leasing and hiring received for machinery, vehicles and other equipment.

### Turnover excludes:

- value-added tax (VAT); and
- net profit or loss on sales or revaluation of fixed assets (including profit or loss on foreign exchange).

### Value-added tax

VAT is an indirect tax based on consumption of goods and services in the economy.

### **General information**

Stats SA publishes approximately 300 different statistical releases each year. It is not economically viable to produce them in more than one of South Africa's eleven official languages. Since the releases are used extensively, not only locally but also by international economic and social-scientific communities, Stats SA releases are published in English only.

Stats SA has copyright on this publication. Users may apply the information as they wish, provided that they acknowledge Stats SA as the source of the basic data wherever they process, apply, utilise, publish or distribute the data, and also that they specify that the relevant application and analysis (where applicable) result from their own processing of the data.

### **Stats SA products**

A complete set of Stats SA publications is available at the Stats SA Library and the following libraries:

National Library of South Africa, Pretoria Division
National Library of South Africa, Cape Town Division
Natal Society Library, Pietermaritzburg
Library of Parliament, Cape Town
Bloemfontein Public Library
Johannesburg Public Library
Eastern Cape Library Services, King William's Town
Central Regional Library, Polokwane
Central Reference Library, Mbombela
Central Reference Collection, Kimberley
Central Reference Library, Mmabatho

Stats SA also provides a subscription service.

### **Electronic services**

A large range of data is available via online services. For more details about our electronic services, contact Stats SA's user information service at (012) 310 8600.

You can visit us on the Internet at: www.statssa.gov.za
