Key findings for the quarter ended September 2025

The total capital expenditure on new assets measured at current prices, for the quarter ended September 2025, was estimated at R97 691 million, showing an increase of 12,6% compared with the quarter ended June 2025 (R86 746 million).

Table A – Quarterly capital expenditure¹ on new assets by category and percentage change

Asset category	September 2024	June 2025 ²	September 2025 ³	Difference between September 2025 and June 2025	Difference between September 2025 and September 2024
	R million			%	
Buildings and improvements	3 632	3 827	5 390	40,8	48,4
Construction works	12 329	13 424	17 756	32,3	44,0
Vehicles and other transport equipment	8 842	7 372	6 947	-5,8	-21,4
Plant, machinery and equipment	40 427	41 290	43 556	5,5	7,7
Computer and IT equipment	2 477	2 509	3 079	22,7	24,3
Computer software	3 645	2 219	2 022	-8,9	-44,5
Capital work in progress	13 102	11 634	13 051	12,2	-0,4
Investment property	299	1 303	1 321	1,4	341,8
Improvements to right-of-use assets	77	128	254	98,4	229,9
Other assets	4 298	3 040	4 315	41,9	0,4
Total assets	89 128	86 746	97 691	12,6	9,6

¹ Based on aggregates from a panel of selected businesses in the South African economy, excluding agriculture, financial intermediation, insurance, pension funding, business services not elsewhere classified, government and educational institutions.

² Revised.

³ Preliminary.

Table A shows capital expenditure on new assets for the quarters ended September 2024, June 2025 and September 2025. The largest increase in capital expenditure on new assets between the quarter ended June 2025 and the quarter ended September 2025 was recorded for improvements to right-of-use assets (+98,4%), followed by 'other' assets (+41,9%), buildings and improvements (+40,8%), construction works (+32,3%), computer and IT equipment (+22,7%), capital work in progress (+12,2%), plant, machinery and equipment (+5,5%) and investment property (+1,4%). Decreases were recorded for computer software (-8,9%) and vehicles and other transport equipment (-5,8%).

Total capital expenditure on new assets increased by 9,6% between the quarter ended September 2024 and the quarter ended September 2025. The largest year-on-year increase in capital expenditure was recorded for investment property (+341,8%), followed by improvements to right-of-use assets (+229,9%), buildings and improvements (+48,4%), construction works (+44,0%), computer and IT equipment (+24,3%), plant, machinery and equipment (+7,7%) and 'other' assets (+0,4%). Decreases were recorded for computer software (-44,5%), vehicles and other transport equipment (-21,4%) and capital work in progress (-0,4%).

Table B – Capital expenditure on new assets by category and percentage contribution¹

Asset category	September 2024		June 2025 ²		September 2025 ³	
	R million	% of total capital expenditure	R million	% of total capital expenditure	R million	% of total capital expenditure
Buildings and improvements	3 632	4,1	3 827	4,4	5 390	5,5
Construction works	12 329	13,8	13 424	15,5	17 756	18,2
Vehicles and other transport equipment	8 842	9,9	7 372	8,5	6 947	7,1
Plant, machinery and equipment	40 427	45,4	41 290	47,6	43 556	44,6
Computer and IT equipment	2 477	2,8	2 509	2,9	3 079	3,2

Total assets	89 128	100,0	86 746	100,0	97 691	100,0

¹ The aggregates of the asset category contributions may not add up to totals due to rounding-off.

² Revised.

³ Preliminary.

Figure 1 – Percentage contribution per category to total capital expenditure on new assets – quarter ended September 2025¹

¹ The aggregates of the asset category contributions may not add up to totals due to rounding-off.

The largest contributor to total capital expenditure on new assets in the quarter ended September 2025 was plant, machinery and equipment (contributing 44,6%), followed by construction works (18,2%), capital work in progress (13,4%), vehicles and other transport equipment (7,1%), buildings and improvements (5,5%), 'other' assets (4,4%), computer and IT equipment (3,2%), computer software (2,1%), investment property (1,4%) and improvements to right-of-use assets (0,3%).

Figure 2 – Percentage contribution per category to total capital expenditure on new assets – quarter ended June 2025¹

¹ The aggregates of the asset category contributions may not add up to totals due to rounding-off.

The largest contributor to total capital expenditure on new assets in the quarter ended June 2025 was plant, machinery and equipment (contributing 47,6%), followed by construction works (15,5%), capital work in progress (13,4%), vehicles and other transport equipment (8,5%), buildings and improvements (4,4%), 'other' assets (3,5%), computer and IT equipment (2,9%), computer software (2,6%), investment property (1,5%) and improvements to right-of use assets (0,1%).

¹ Revised.² Preliminary.

* From June 2024, 'other' assets were disaggregated into capital work in progress, investment property, improvements to right-of-use assets, and remaining 'other' assets. For comparability with earlier periods, these components should be aggregated when comparing estimates of 'other' assets from June 2024 onwards.

* The percentage change for 'other' assets in June 2024 is based on the aggregate value before the breakdown into capital work in progress, investment property, improvements to right-of-use assets, and remaining 'other' assets.

Explanatory notes

Background

This statistical release consists of aggregates of actual quarterly capital expenditure by selected enterprises operating in the formal business sector of the South African economy excluding agriculture, financial intermediation, insurance, government and educational institutions. The aggregates are generated from data collected through the *Quarterly capital expenditure* (QCE) survey conducted by Statistics South Africa (Stats SA).

The statistical release contains information regarding quarterly capital expenditure trends for the following asset categories:

- buildings and improvements;
- construction works;
- vehicles and other transport equipment;
- plant, machinery and equipment;
- computer and IT equipment;
- computer software;
- capital work in progress;
- investment property;
- improvements to right-of-use assets; and
- other assets.

Purpose of the survey

The purpose of the QCE survey is to collect data on new capital expenditure by asset type that is used in compiling gross fixed capital formation, which is a component of expenditure on gross domestic product (GDP). The survey is designed to improve the timeliness of capital information provided by respondents and quality gaps by focusing on a panel of large businesses, including providing data on expanded asset categories.

Scope of the survey

The QCE survey covers the capital expenditure of the large businesses operating in the following industries according to the *Standard Industrial Classification of All Economic Activities* (SIC), Fifth edition, January 1993:

- forestry and fishing;
- mining and quarrying;
- manufacturing;
- electricity, gas and water supply;
- construction;
- trade;
- transport, storage and communication;
- activities auxiliary to financial intermediation, real estate and other business services (excluding financial intermediation, insurance, pension funding and business services not elsewhere classified); and
- community, social and personal services (excluding government and educational institutions).

The values reported in this statistical release are net of capitalised interest.

Classification

The 1993 edition of the *Standard Industrial Classification of All Economic Activities* (SIC), Fifth edition, January 1993, was used to classify the enterprises in the survey. The SIC is based on the 1990 *International Standard Industrial Classification of All Economic Activities* (ISIC) with suitable adaptations for local conditions. Statistics in this publication are only presented at an industry level, i.e. one-digit level (SIC major division). Each enterprise is classified into an industry which reflects the predominant activity of the enterprise.

Statistical unit

The statistical unit for the collection of information in this survey is the enterprise, defined as a legal unit or combination of legal units that includes and directly controls all functions necessary to carry out its activities.

Survey methodology and design

The panel is selected from the data reported in the *Annual financial statistics* (AFS) survey (statistical release P0021). The design of the QCE survey is based on a panel of predominantly large enterprises with respect to reported total capital expenditure. The panel was chosen based on the largest contributors to capital expenditure, up to a cumulative 85% of total capital expenditure in the AFS. The rationale for using the AFS mainly relates to the large sample of the AFS, and the expectation that the panel-based aggregates will be benchmarked to AFS levels. A new panel was selected in 2024 and implemented in the December 2024 statistical release.

The release presents aggregates for selected industries that have a material contribution to the total capital expenditure on new property, plant and equipment (PPE), investment property and intangible assets.

Distribution of panel members across different industries:

Industry	Number of enterprises in the panel
Forestry and fishing	3
Mining and quarrying	66
Manufacturing	97
Electricity, gas and water supply	7
Construction	9
Trade	50
Transport, storage and communication	48
Activities auxiliary to financial intermediation, real estate and other business services (excluding financial intermediation, insurance, pension funding and business services not elsewhere classified)	77
Community, social and personal services, excluding government and educational institutions	7
Total panel	364

Capital expenditure

Capital expenditure comprises the total cost of an item of property, plant and equipment (PPE), investment property and intangible assets. According to IAS 16, the cost of PPE includes all costs necessary to bring the asset to working condition for its intended use. Items included in the cost of PPE are:

- acquiring fixed and, in some cases, intangible assets;
- repairing an existing asset to improve its useful life;
- upgrading an existing asset if it results in a superior fixture;
- preparing an asset to be used in business;
- restoring property or adapting it to a new or different use; and
- starting or acquiring a new business.

**Data comparison:
Quarterly financial
statistics (QFS) survey
and Quarterly capital
expenditure (QCE)
survey**

The QFS survey results comprise weighted estimates generated from a sample survey, and the QCE survey results comprise aggregates of capital expenditure reported by a selected panel of large enterprises. Refer to the explanatory note on survey methodology and design. The QFS survey discontinued publishing capital expenditure from the December 2022 quarter.

Aggregates

The results from the QCE survey represent aggregates from a panel of large private businesses.

Rounding-off of figures

Where figures have been rounded off, discrepancies may occur between the sums of the component items and totals.

Revised figures

Revised figures are mainly due to late submission of data to Stats SA, or respondents reporting revisions or corrections to their figures. The reasons for routine revisions are outlined in the following schedule. Any unscheduled revisions will be promptly indicated in relevant tables to maintain transparency and accuracy.

Statistical release	Reason for revision	Period subject to revision
Sep-25	Additional information from respondents	Jun-25
Dec-25	Additional information from respondents	Mar-25-Sep-25
Mar-26	Additional information from respondents	Dec-25
Jun-26	Additional information from respondents	Mar-26

Collection rate

The preliminary collection rate for the quarter ended September 2025 was 81,3%. The revised collection rate for the quarter ended June 2025 was 86,5%.

Imputations

Data that are not received at the time of publishing the results are imputed using the expected values reported by enterprises in the previous quarter's submission and the historical data method. Mean imputations are used where there are no historical enterprise data available.

Glossary

Buildings and improvements	This asset category consists of residential buildings, non-residential buildings and improvements conducted on buildings.
Capital expenditure	Any expenditure incurred or incidental to the acquisition or improvement of land, buildings, engineering structures and machinery and equipment and intangible assets.
Computer and IT equipment	<p>A physical electronics device that is capable of instructing the computer to execute various electronic functions. This asset category includes, but is not limited to, the following asset categories:</p> <ul style="list-style-type: none">• computers;• IT equipment;• peripherals;• built-in process computers;• support equipment; and• data processing equipment.
Computer software	<p>This asset category includes, but is not limited to, the following categories:</p> <ul style="list-style-type: none">• licence fees paid for standardised software; and• software developed for a specific function and unique to the process/organisation.
Enterprise	Legal unit or a combination of legal units that includes and directly controls all functions necessary to carry out its production activities.
Machinery, plant and equipment	<p>This asset category includes, but is not limited to, the following asset categories:</p> <ul style="list-style-type: none">• plant;• machinery;• equipment;• production assets;• furniture and fittings;• furnaces;• kilns;• earthmoving equipment;• containers;• printers and copiers;• fax machines; and• underground mining equipment.

Other assets

Other assets include, but are not limited to, the following asset categories:

- research and development;
- mineral exploration and evaluation;
- patents and trademarks;
- goodwill and marketing assets;
- entertainment, artistic and literary originals;
- contracts, leases and licences;
- concession assets;
- refractory relines; and
- shutdown costs capitalised.

Property, plant and equipment

These are tangible assets that an enterprise holds for its own use and expects to use during more than one financial year.

Vehicles and other transport equipment

This asset category includes, but is not limited to, the following asset categories:

- vehicles;
- trucks;
- aircraft;
- boats;
- trailers; and
- locomotives and other transport equipment.

General information

Stats SA publishes approximately 300 different statistical releases each year. It is not economically viable to produce them in more than one of South Africa's 12 official languages. Since the releases are used extensively locally and by international economic and social-scientific communities, Stats SA releases are published in English only.

Stats SA has copyright on this publication. Users may apply the information as they wish, provided that they acknowledge Stats SA as the source of the basic data wherever they process, apply, utilise, publish or distribute the data; and also that they specify that the relevant application and analysis where applicable result from their own processing of the data.

Advance release calendar

An advance release calendar is disseminated on www.statssa.gov.za.

Stats SA products

A complete set of Stats SA publications is available at the Stats SA Library and the following libraries:

National Library of South Africa, Pretoria Division

National Library of South Africa, Cape Town Division

Natal Society Library, Pietermaritzburg

Library of Parliament, Cape Town

Bloemfontein Public Library

Johannesburg Public Library

Eastern Cape Library Services, Qonce

Central Regional Library, Polokwane

Central Reference Library, Mbombela

Central Reference Collection, Kimberley

Central Reference Library, Mmabatho

Stats SA also provides a subscription service.

Electronic services

A large range of data are available via online services. For more details about our electronic data services, contact (012) 310 8600. You can visit us on the internet at: www.statssa.gov.za.
