## Key findings

### Headline consumer price index (CPI) for all urban areas

Annual consumer price inflation was 4,4% in August 2024, down from 4,6% in July 2024. The CPI increased by 0,1% month-on-month in August 2024.

The main contributors to the 4,4% annual inflation rate were:

- housing and utilities (4,8% and contributing 1,1 percentage points);
- miscellaneous goods and services (7,0% and contributing 1,0 percentage point);
- food and non-alcoholic beverages (4,7% and contributing 0,9 of a percentage point); and
- transport (2,8% and contributing 0,4 of a percentage point).

In August 2024, the annual inflation rate of:

- goods was 4,4%, down from 4,6% in July 2024; and
- services was 4,5%, down from 4,7% in July 2024.

**Note:** Not all items in the CPI are surveyed every month. Table F shows the survey schedule for items that are not surveyed monthly. Additional surveys are conducted for these items when Statistics South Africa (Stats SA) is aware of significant price changes outside regular survey months.

**Risenga Maluleke**

## Important notes

### Update of the CPI basket and weights

Stats SA will update the CPI basket of goods and services and respective weights in the January 2025 CPI release. This update will mainly be based on the results of the income and expenditure survey.

### Changes to the classification used in the CPI

Stats SA will also introduce changes to the classification of goods and services monitored in the CPI from the January 2025 release.

In 2018, the United Nations Statistics Division adopted an updated version of the Classification of individual consumption by purpose, known as COICOP 18. The current version of COICOP was adopted in 1999 and first used in the South African CPI in 2008. The new version aims to reflect changes in consumer expenditure patterns, including the impact of new technology. The greater details now available will improve the international comparability of economic data.

COICOP 18 was used to classify expenditure in the Income and Expenditure Survey (IES), which completed fieldwork in November 2023. The IES provides the comprehensive expenditure data for the updated CPI basket and weights to be implemented in the January 2025 CPI release. Stats SA will implement COICOP 18 in the Household Final Consumption Expenditure component of the national accounts for the next Gross Domestic Product benchmarking scheduled for publication in 2026.

The most significant change is the creation of a dedicated Insurance and Financial Services category. These services currently form part of the Miscellaneous Goods and Services category. Several products have moved between categories. For example, computers and televisions have moved to Information and Communication from Recreation, Sport and Culture. Postal and Courier services have moved from Information and Communication to Transport. Several food products will move between groups and be reclassified.

These changes will result in amendments to the format of the CPI release and the Excel time series files. Further details on the updates will be provided closer to the implementation date.

Stats SA will not revise the historical time series to COICOP 18. Instead, an indicative time series will be made available using the new classification to enable users to assess the impact of the changes on the inflation rates of different sub-aggregates.

## Detailed results

Table A – Consumer price index: Main indices<sup>1</sup>

Group		Weight	Index (Dec 2021=100)			% change	
			Aug 2023	Jul 2024	Aug 2024	Aug 2024 vs. Jul 2024	Aug 2024 vs. Aug 2023

May and November	Electricians, plumbers (housing and utilities)
July and August	Municipal charges for water, property rates and electricity (housing and utilities)
<b>Annual</b>	
January	Post box rental (communication) Lotto tickets (recreation and culture)
February	Private-sector doctors and dentists (health) Medical aid (miscellaneous)
March	School and university tuition fees (education) Toll fees (transport) University boarding fees (restaurants and hotels) Crèche fees (miscellaneous)
April	Public-sector hospitals and doctors (health)
<b>Other</b>	
January, March, April, June, July, September, October and December	Local bus fares (transport)

Additional surveys are conducted for these items when Stats SA is aware of significant price changes outside regular survey months.

## Glossary<sup>1</sup>

<b>Annual inflation rate / inflation rate</b>	The annual inflation rate is the change in the index of the relevant month of the current year compared with the index of the same month in the previous year expressed as a percentage. The inflation rate is the annual change in the CPI for all items.
<b>Annual percentage change</b>	The annual percentage change is the change in the index of the relevant month of the current year compared with the index of the same month in the previous year expressed as a percentage.
<b>Average annual inflation rate</b>	The average annual inflation rate is the change in the average index of one year compared with the average index of the previous year expressed as a percentage.
<b>Average annual percentage change</b>	The average annual percentage change is the change in the average index of one year compared with the average index of the previous year expressed as a percentage.
<b>CPI for administered prices</b>	An administered price is defined as the price of a product which is set consciously by an individual producer or group of producers and/or any price which can be determined or influenced by government, either directly or through a government agency/institution without reference to market forces. Products and services included are assessment rates, water, electricity, paraffin, petrol, diesel, public transport – trains, motor licences, motor registration, telephone fees, cell phone fees, television licence, school fees, university/technicons/colleges and university boarding fees.
<b>CPI for regulated prices</b>	Regulated prices are administered prices that are monitored and controlled by government policy. To this end, price regulation does not necessarily imply the presence of an economic regulator, but the restriction on the extent to which prices may vary, depending on government's policy objective. Products and services included are water, electricity, paraffin, petrol, diesel, telephone fees and cell phone fees.
<b>CPI per expenditure decile</b>	Decile 1 – up to R20 140 Decile 2 – R20 141 up to R33 619 Decile 3 – R33 620 up to R48 673 Decile 4 – R48 674 up to R65 213 Decile 5 – R65 214 up to R84 698 Decile 6 – R84 699 up to R109 163 Decile 7 – R109 164 up to R143 174 Decile 8 – R143 175 up to R199 920 Decile 9 – R199 921 up to R312 246 Decile 10 – R312 247 and more
<b>Monthly percentage change</b>	The monthly percentage change is the change in the index of the relevant month compared with the index of the previous month expressed as a percentage.
<b>Respondent response rate</b>	The respondent response rate for August 2024 was 98,9%. The rate was calculated by means of the total number of outlets where prices were collected as a percentage of the total sample.
<b>Rural CPI</b>	The rural CPI is compiled using data from rural and urban areas in accordance with the purchasing patterns of rural residents.

<sup>1</sup> A complete set of definitions is available in the sources and methods document on the Stats SA website [http://www.statssa.gov.za/?page\\_id=2528](http://www.statssa.gov.za/?page_id=2528).

## General information

Stats SA publishes approximately 300 different statistical releases each year. It is not economically viable to produce them in more than one of South Africa's 12 official languages. Since the releases are used extensively locally and by international economic and social-scientific communities, Stats SA releases are published in English only.

Stats SA has copyright on this publication. Users may apply the information as they wish, provided that they acknowledge Stats SA as the source of the basic data wherever they process, apply, utilise, publish or distribute the data; and also that they specify that the relevant application and analysis (where applicable) result from their own processing of the data.
