KEY FINDINGS

Headline consumer price index (CPI for all urban areas)

Annual consumer price inflation was 5,2% in May 2021, up from 4,4% in April 2021. The consumer price index increased by 0,1% month-on-month in May 2021.

The main contributors to the 5,2% annual inflation rate were food and non-alcoholic beverages; housing and utilities; transport; and miscellaneous goods and services (Table C on page 6).

Food and non-alcoholic beverages increased by 6,7% year-on-year, and contributed 1,2 percentage points to the total CPI annual rate of 5,2%.

Housing and utilities increased by 2,3% year-on-year, and contributed 0,6 of a percentage point.

Transport increased by 15,3% year-on-year, and contributed 2,0 percentage points.

Miscellaneous goods and services increased by 4,1% year-on-year, and contributed 0,7 of a percentage point.

Note: Not all items in the CPI are surveyed every month. Table F (page 9) shows the survey schedule for items that are not surveyed monthly.

Note regarding COVID-19

Resulting from COVID-19 health protocols, retail-based prices recorded across all regions (including online prices) have been pooled to create national average price changes which are then applied to each elementary index at a regional level. This means that the geographic index (including total country) changes will, in the main, vary according to different weights and not different price changes.

| Inflation rate | The inflation rate is the change in the CPI for all items of the relevant month of the current year compared with the CPI for all items of the same month in the previous year expressed as a percentage. |
| Monthly percentage change | The monthly percentage change is the change in the index of the relevant month compared with the index of the previous month expressed as a percentage. |
| Rural CPI | The rural CPI is compiled using data from rural and urban areas in accordance with the purchasing patterns of rural residents. |

GENERAL INFORMATION

Stats SA publishes approximately 300 different statistical releases each year. It is not economically viable to produce them in more than one of South Africa's eleven official languages. Since the releases are used extensively, not only locally but also by international economic and social-scientific communities, Stats SA releases are published in English only.

Stats SA has copyright on this publication. Users may apply the information as they wish, provided that they acknowledge Stats SA as the source of the basic data wherever they process, apply, utilise, publish or distribute the data; and also that they specify that the relevant application and analysis (where applicable) result from their own processing of the data.
