Key findings as at January 2024

Final manufactured goods – headline PPI

Annual producer price inflation (final manufacturing) was 4,7% in January 2024, up from 4,0% in December 2023. The producer price index (PPI) increased by 0,1% month-on-month in January 2024.

The main contributors to the headline PPI annual inflation rate were:

- food products, beverages and tobacco products (increased by 4,0% year-on-year and contributed 1,2 percentage points);
- metals, machinery, equipment and computing equipment (increased by 5,8% year-on-year and contributed 0,8 of a percentage point);
- coke, petroleum, chemical, rubber and plastic products (increased by 2,7% year-on-year and contributed 0,7 of a percentage point); and
- transport equipment (increased by 7,3% year-on-year and contributed 0,6 of a percentage point) – see Figure 1.1.

The main positive contributors to the headline PPI monthly increase were metals, machinery, equipment and computing equipment (increased by 1,9% month-on-month and contributed 0,3 of a percentage point) and transport equipment (increased by 2,5% month-on-month and contributed 0,2 of a percentage point) – see Figure 1.2.

Figure 1 – PPI headline index numbers and year-on-year rate of change

Intermediate manufactured goods

The annual percentage change in the PPI for intermediate manufactured goods was 0,2% in January 2024 (compared with -2,2% in December 2023). The index increased by 0,7% month-on-month.

The main positive contributor to the annual rate was sawmilling and wood (0,4 of a percentage point) – see Figure 2.1.

The main contributor to the monthly rate was basic and fabricated metals (0,4 of a percentage point) – see Figure 2.2.

Electricity and water

The annual percentage change in the PPI for electricity and water was 16,8% in January 2024 (compared with 15,5% in December 2023). The index increased by 0,7% month-on-month.

Electricity contributed 15,2 percentage points and water contributed 1,5 percentage points to the annual rate – see Figure 3.1.

Electricity contributed 0,7 of a percentage point to the monthly rate – see Figure 3.2.

Mining

The annual percentage change in the PPI for mining was -5,9% in January 2024 (compared with -7,6% in December 2023). The index increased by 0,6% month-on-month.

The main negative contributors to the annual rate were non-ferrous metal ores (-12,3 percentage points) and coal and gas (-0,9 of a percentage point) – see Figure 4.1.

The main contributors to the monthly rate were coal and gas (0,4 of a percentage point) and gold and other metal ores (0,4 of a percentage point) – see Figure 4.2.

Agriculture, forestry and fishing

The annual percentage change in the PPI for agriculture, forestry and fishing was 6,6% in January 2024 (compared with 6,8% in December 2023). The index decreased by 3,7% month-on-month.

The main contributors to the annual rate were agriculture (5,6 percentage points) and fishing (0,9 of a percentage point) – see Figure 5.1.

The contributor to the monthly rate was agriculture (-3,7 percentage points) – see Figure 5.2.

Notice of changes to the PPI basket, weights and index reference period

The basket and weights of the PPIs for final and intermediate manufacturing are updated with effect from this release for January 2024. The primary source for this update is Stats SA's 2021 large sample survey of the manufacturing industry (Report No. 30-02-04). This is in addition to the regular annual weight updates for all PPI tables. The index reference (base) period for all PPI indices is set to 100 for December 2023.

The new basket and weights were published on 22 February 2024 (P0142.8). Further information can be found in the PPI reweighting (2024) note (http://www.statssa.gov.za/?page_id=2528) and the updated PPI sources and methods document.

Explanatory notes

Purpose and results of the survey	<p>The Producer Price Index (PPI) measures changes in the prices of locally produced commodities. A sample of producers is surveyed each month and the results of this survey are used to compile the producer price indices for final manufactured goods, intermediate manufactured goods, electricity and water, mining, and agriculture, forestry and fishing. PPI can be used as an economic indicator of inflation, as an escalator in contracts and as a deflator in the calculation of the national accounts.</p> <p>Further information on the weighting structure, sources of information and methods of compilation of PPI can be found in the PPI sources and methods document, available on the Stats SA website.</p>
Response rate	The response rate for January 2024 was 95,5%.

Glossary

Annual inflation rate	The annual inflation rate per specific PPI is the change in the specific PPI for all items of the relevant month of the current year compared with the specific PPI for all items of the same month in the previous year expressed as a percentage.
Annual percentage change	The annual percentage change is the change in the index of the relevant month of the current year compared with the index of the same month in the previous year expressed as a percentage.
Average annual inflation rate	The average annual inflation rate is the change in the average specific PPI for all items of one year compared with the average specific PPI for all items of the previous year expressed as a percentage.
Average annual percentage change	The average annual percentage change is the change in the average index of one year compared with the average index of the previous year expressed as a percentage.
Contribution	The monthly (annual) contribution of a specific product or group of products to the specific PPI is calculated by multiplying the weight of this product or group of products with the difference of the current index and the previous month (year) index for this product or group of products, divided by the index for the specific index, for the previous month (year).
Monthly percentage change	The monthly percentage change is the change in the specific PPI of the relevant month compared with the specific PPI of the previous month expressed as a percentage.
Producer Price Index	PPI is defined as "A measure of the change in the prices of goods either as they leave their place of production or as they enter the production process" (OECD, 2006)."

General information

Stats SA publishes approximately 300 different statistical releases each year. It is not economically viable to produce them in more than one of South Africa's 12 official languages. Since the releases are used extensively, not only locally but also by international economic and social-scientific communities, Stats SA releases are published in English only.

Stats SA has copyright on this publication. Users may apply the information as they wish, provided that they acknowledge Stats SA as the source of the basic data wherever they process, apply, utilise, publish or distribute the data; and also that they specify that the relevant application and analysis (where applicable) result from their own processing of the data.
