Key findings as at June 2026

Final manufactured goods – headline PPI

Annual producer price inflation (final manufacturing) was 7,5% in June 2026, compared with 7,8% in May 2026. The producer price index (PPI) decreased by 0,1% month-on-month in June 2026.

The main contributors to the headline PPI annual inflation rate were:

- coke, petroleum, chemical, rubber and plastic products (22,0% and contributing 4,7 percentage points);
- paper and printed products (8,5% and contributing 0,7 of a percentage point); and
- metals, machinery, equipment and computing equipment (3,2% and contributing 0,5 of a percentage point) – see Table 1 and Figure 1.1.

The main negative contributors to the headline PPI monthly inflation rate were:

- coke, petroleum, chemical, rubber and plastic products (-0,3% and contributing -0,1 of a percentage point);
- food products, beverages and tobacco products (-0,2% and contributing -0,1 of a percentage point); and
- furniture and other manufacturing (-2,5% and contributing -0,1 of a percentage point) – see Table 1 Figure 1.2.

Figure 1 – PPI headline index numbers and year-on-year rate of change

Intermediate manufactured goods

The annual percentage change in the PPI for intermediate manufactured goods was 12,4% in June 2026, compared with 13,7% in May 2026. The index decreased by 1,8% month-on-month.

The main positive contributors to the annual rate were:

- chemicals, rubber and plastic products (22,7% and contributing 6,7 percentage points);
- basic and fabricated metals (9,0% and contributing 4,4 percentage points);
- sawmilling and wood (7,8% and contributing 0,8 of a percentage point); and
- recycling and manufacturing n.e.c. (9,1% and contributing 0,5 of a percentage point) – see Table 2 and Figure 2.1.

The main negative contributor to the monthly rate was basic and fabricated metals (-4,4% and contributing -2,1 percentage points) – see Table 2 and Figure 2.2.

Electricity and water

The annual percentage change in the PPI for electricity and water was 5,5% in June 2026, compared with 12,3% in May 2026. The index increased by 23,3% month-on-month.

The contributors to the annual rate were electricity (5,7% and contributing 4,9 percentage points) and water (11,0% and contributing 1,4 percentage points) – see Table 3 and Figure 3.1.

The contributor to the monthly rate was electricity (27,8% and contributing 23,2 percentage points) – see Table 3 and Figure 3.2.

Mining

The annual percentage change in the PPI for mining was 18,4% in June 2026, compared with 28,1% in May 2026. The index decreased by 6,0% month-on-month.

The positive contributors to the annual rate were:

- non-ferrous metal ores (32,6% and contributing 14,7 percentage points);
- gold and other metal ores (6,6% and contributing 1,8 percentage points); and
- coal and gas (5,0% and contributing 1,1 percentage points) – see Table 4 and Figure 4.1.

The main negative contributors to the monthly rate were:

- non-ferrous metal ores (-7,1% and contributing -3,6 percentage points);
- gold and other metal ores (-5,6% and contributing -1,4 percentage points); and
- coal and gas (-4,2% and contributing -0,8 of a percentage point) – see Table 4 and Figure 4.2.

Agriculture, forestry and fishing

The annual percentage change in the PPI for agriculture, forestry and fishing was -7,9% in June 2026, compared with -5,4% in May 2026. The index decreased by 2,4% month-on-month.

The negative contributor to the annual rate was agriculture (-10,3% and contributing -8,8 percentage points) – see Table 5 and Figure 5.1.

The contributor to the monthly rate was agriculture (-2,8% and contributing -2,4 percentage points) – see Table 5 and Figure 5.2.

Explanatory notes

Purpose and results of the survey	The Producer Price Index (PPI) measures changes in the prices of locally produced commodities. A sample of producers is surveyed each month and the results of this survey are used to compile the producer price indices for final manufactured goods, intermediate manufactured goods, electricity and water, mining, and agriculture, forestry and fishing. PPI can be used as an economic indicator of inflation, as an escalator in contracts and as a deflator in the calculation of the national accounts. Further information on the weighting structure, sources of information and methods of compilation of PPI can be found in the PPI sources and methods document, available on the Stats SA website.
Response rate	The response rate for June 2026 was 99,5%.

Glossary

Annual inflation rate	The annual inflation rate per specific PPI is the change in the specific PPI for all items of the relevant month of the current year compared with the specific PPI for all items of the same month in the previous year expressed as a percentage.
Annual percentage change	The annual percentage change is the change in the index of the relevant month of the current year compared with the index of the same month in the previous year expressed as a percentage.
Average annual inflation rate	The average annual inflation rate is the change in the average specific PPI for all items of one year compared with the average specific PPI for all items of the previous year expressed as a percentage.
Average annual percentage change	The average annual percentage change is the change in the average index of one year compared with the average index of the previous year expressed as a percentage.
Contribution	The monthly (annual) contribution of a specific product or group of products to the specific PPI is calculated by multiplying the weight of this product or group of products with the difference of the current index and the previous month (year) index for this product or group of products, divided by the index for the specific index, for the previous month (year).
Monthly percentage change	The monthly percentage change is the change in the specific PPI of the relevant month compared with the specific PPI of the previous month expressed as a percentage.
Producer Price Index	PPI is defined as “A measure of the change in the prices of goods either as they leave their place of production or as they enter the production process” (OECD, 2006).”
Historical data	Historical PPI data are available on the Stats SA webpage. Click on the following link (Time series data) to access the data electronically.

General information

Stats SA publishes approximately 300 different statistical releases each year. It is not economically viable to produce them in more than one of South Africa's 12 official languages. Since the releases are used extensively locally and by international economic and social-scientific communities, Stats SA releases are published in English only.

Stats SA has copyright on this publication. Users may apply the information as they wish, provided that they acknowledge Stats SA as the source of the basic data wherever they process, apply, utilise, publish or distribute the data; and also that they specify that the relevant application and analysis (where applicable) result from their own processing of the data.

Advance release calendar

An advance release calendar is disseminated on www.statssa.gov.za.

Forthcoming issues

Issue	Expected release date
July 2026	27 August 2026
August 2026	30 September 2026
September 2026	29 October 2026

Stats SA products

A complete set of Stats SA publications is available at the Stats SA Library and the following libraries:

National Library of South Africa, Pretoria Division
 National Library of South Africa, Cape Town Division
 Natal Society Library, Pietermaritzburg
 Library of Parliament, Cape Town
 Bloemfontein Public Library
 Johannesburg Public Library
 Eastern Cape Library Services, Qonce
 Central Regional Library, Polokwane
 Central Reference Library, Mbombela
 Central Reference Collection, Kimberley
 Central Reference Library, Mmabatho

Stats SA also provides a subscription service.

Electronic services

A large range of data are available via online services. For more details about our electronic data services, contact (012) 310 8600. You can visit us on the internet at: www.statssa.gov.za.
