Key findings as at March 2023

Final manufactured goods – headline PPI

Annual producer price inflation (final manufacturing) was 10,6% in March 2023, down from 12,2% in February 2023. The producer price index increased by 1,0% month-on-month in March 2023.

The main contributors to the headline PPI annual inflation rate were coke, petroleum, chemical, rubber and plastic products; food products, beverages and tobacco products; metals, machinery, equipment and computing equipment; transport equipment; and paper and printed products (Figure 1.1 on page 8).

- Coke, petroleum, chemical, rubber and plastic products increased by 12,2% year-on-year and contributed 3,3 percentage points.
- Food products, beverages and tobacco products increased by 8,1% year-on-year and contributed 2,1 percentage points.
- Metals, machinery, equipment and computing equipment increased by 9,2% year-on-year and contributed 1,4 percentage points.
- Transport equipment increased by 14,5% year-on-year and contributed 1,3 percentage points.
- Paper and printed products increased by 14,1% year-on-year and contributed 1,2 percentage points.

The main contributors to the headline PPI monthly increase were:

- coke, petroleum, chemical, rubber and plastic products, which increased by 1,9% month-on-month and contributed 0,5 of a percentage point; and
- food products, beverages and tobacco products, which increased by 1,0% month-on-month and contributed 0,3 of a percentage point (Figure 1.2 on page 8).

Figure 1 - PPI headline index numbers and year-on-year rate of change

Intermediate manufactured goods

The annual percentage change in the PPI for intermediate manufactured goods was 5,0% in March 2023 (unchanged from 5,0% in February 2023). The index increased by 0,5% month-on-month.

The main contributors to the annual rate were basic and fabricated metals (1,7 percentage points); chemicals, rubber and plastic products (1,6 percentage points); and sawmilling and wood (1,0 percentage point) (Figure 2.1).

The main contributor to the monthly rate was basic and fabricated metals (0,8 of a percentage point) (Figure 2.2).

Electricity and water

The annual percentage change in the PPI for electricity and water was 10,1% in March 2023 (compared with 11,2% in February 2023). The index decreased by 1,3% month-on-month.

Electricity contributed 9,2 percentage points and water contributed 1,0 percentage point to the annual rate (Figure 3.1).

Electricity contributed -1,2 percentage points to the monthly rate (Figure 3.2).

Mining

The annual percentage change in the PPI for mining was 17,1% in March 2023 (compared with 19,5% in February 2023). The index increased by 2,2% month-on-month.

The main contributors to the annual rate were coal and gas (6,6 percentage points); non-ferrous metal ores (4,5 percentage points); and gold and other metal ores (3,1 percentage points) (Figure 4.1).

The main contributors to the monthly rate were gold and other metal ores (1,1 percentage points); coal and gas (0,9 of a percentage point); and non-ferrous metal ores (0,7 of a percentage point) (Figure 4.2).

Agriculture, forestry and fishing

The annual percentage change in the PPI for agriculture, forestry and fishing was 7,5% in March 2023 (compared with 14,2% in February 2023). The index decreased by 2,2% month-on-month.

The main contributors to the annual rate were agriculture (4,5 percentage points) and fishing (2,4 percentage points) (Figure 5.1).

The main contributor to the monthly rate was agriculture (-2,5 percentage points) (Figure 5.2).

Explanatory notes

Purpose and results of the survey	<p>The Producer Price Index (PPI) measures changes in the prices of locally produced commodities. A sample of producers is surveyed each month and the results of this survey are used to compile the producer price indices for final manufactured goods, intermediate manufactured goods, electricity and water, mining, and agriculture, forestry and fishing. The PPI can be used as an economic indicator of inflation, as an escalator in contracts and as a deflator in the calculation of the national accounts.</p> <p>Further information on the weighting structure, sources of information and methods of compilation of the PPI can be found in the PPI sources and methods document, available on the Stats SA website.</p>
Response rate	The response rate for March 2023 was 92,6%.

Glossary

Annual inflation rate	The annual inflation rate per specific PPI is the change in the specific PPI for all items of the relevant month of the current year compared with the specific PPI for all items of the same month in the previous year expressed as a percentage.
Annual percentage change	The annual percentage change is the change in the index of the relevant month of the current year compared with the index of the same month in the previous year expressed as a percentage.
Average annual inflation rate	The average annual inflation rate is the change in the average specific PPI for all items of one year compared with the average specific PPI for all items of the previous year expressed as a percentage.
Average annual percentage change	The average annual percentage change is the change in the average index of one year compared with the average index of the previous year expressed as a percentage.
Contribution	The monthly (annual) contribution of a specific product or group of products to the specific PPI is calculated by multiplying the weight of this product or group of products with the difference of the current index and the previous month (year) index for this product or group of products, divided by the index for the specific index, for the previous month (year).
Monthly percentage change	The monthly percentage change is the change in the specific PPI of the relevant month compared with the specific PPI of the previous month expressed as a percentage.
Producer Price Index	The PPI is defined as “A measure of the change in the prices of goods either as they leave their place of production or as they enter the production process (OECD).”

General information

Stats SA publishes approximately 300 different statistical releases each year. It is not economically viable to produce them in more than one of South Africa's eleven official languages. Since the releases are used extensively, not only locally but also by international economic and social-scientific communities, Stats SA releases are published in English only.

Stats SA has copyright on this publication. Users may apply the information as they wish, provided that they acknowledge Stats SA as the source of the basic data wherever they process, apply, utilise, publish or distribute the data; and also that they specify that the relevant application and analysis (where applicable) result from their own processing of the data.

Advance release calendar

An advance release calendar is disseminated on www.statssa.gov.za

Forthcoming issues

Issue	Expected release date
April 2023	25 May 2023
May 2023	29 June 2023
June 2023	27 July 2023

Stats SA products

A complete set of Stats SA publications is available at the Stats SA Library and the following libraries:

National Library of South Africa, Pretoria Division
 National Library of South Africa, Cape Town Division
 Natal Society Library, Pietermaritzburg
 Library of Parliament, Cape Town
 Bloemfontein Public Library
 Johannesburg Public Library
 Eastern Cape Library Services, Qonce
 Central Regional Library, Polokwane
 Central Reference Library, Mbombela
 Central Reference Collection, Kimberley
 Central Reference Library, Mmabatho

Stats SA also provides a subscription service.

Electronic services

A large range of data are available via on-line services. For more details about our electronic data services, contact (012) 310 8600.
