Key findings as at November 2023

Final manufactured goods – headline PPI

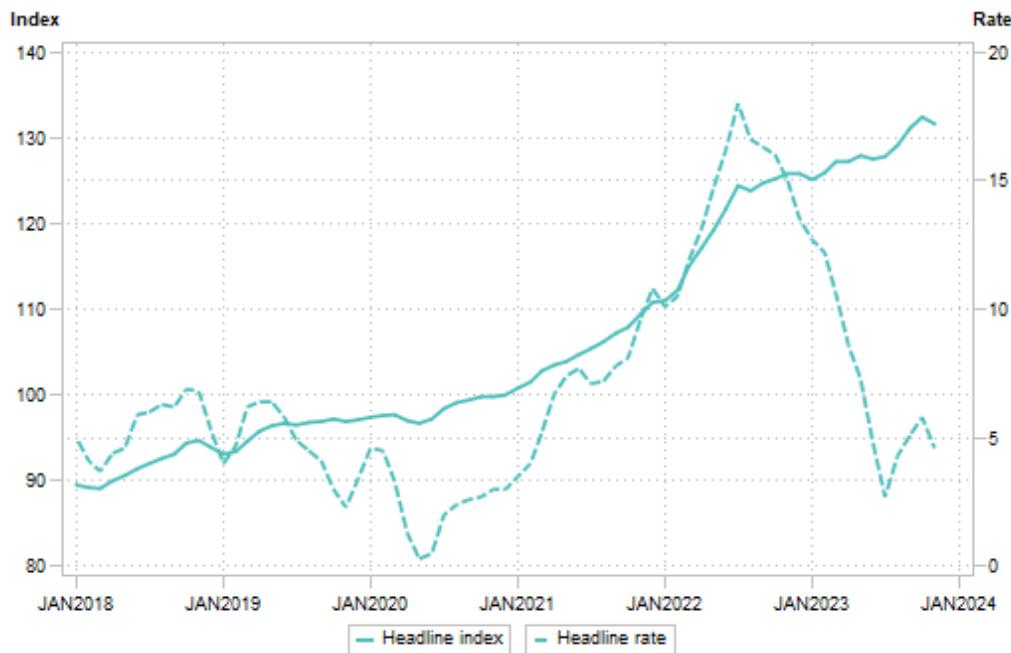

Annual producer price inflation (final manufacturing) was 4,6% in November 2023, down from 5,8% in October 2023. The producer price index (PPI) decreased by 0,6% month-on-month in November 2023.

The main contributors to the headline PPI annual inflation rate were:

- food products, beverages and tobacco products (increased by 4,7% year-on-year and contributed 1,2 percentage points);
- metals, machinery, equipment and computing equipment (increased by 6,8% year-on-year and contributed 1,0 percentage point); and
- coke, petroleum, chemical, rubber and plastic products (increased by 2,4% year-on-year and contributed 0,7 of a percentage point) – see Figure 1.1.

The main contributor to the headline PPI monthly decrease was coke, petroleum, chemical, rubber and plastic products (decreased by 1,8% month-on-month and contributed -0,5 of a percentage point) – see Figure 1.2.

Figure 1 – PPI headline index numbers and year-on-year rate of change

Intermediate manufactured goods

The annual percentage change in the PPI for intermediate manufactured goods was -2,3% in November 2023 (compared with -2,9% in October 2023). The index increased by 0,2% month-on-month.

The main negative contributors to the annual rate were chemicals, rubber and plastic products (-2,3 percentage points) and basic and fabricated metals (-0,5 of a percentage point) – see Figure 2.1.

The main contributor to the monthly rate was sawmilling and wood (0,2 of a percentage point) – see Figure 2.2.

Electricity and water

The annual percentage change in the PPI for electricity and water was 16,1% in November 2023 (compared with 16,1% in October 2023). The index remained unchanged month-on-month.

Electricity contributed 15,0 percentage points and water contributed 1,2 percentage points to the annual rate – see Figure 3.1.

Mining

The annual percentage change in the PPI for mining was -3,8% in November 2023 (compared with -2,2% in October 2023). The index decreased by 4,5% month-on-month.

The main negative contributors to the annual rate were non-ferrous metal ores (-8,5 percentage points) and coal and gas (-2,3 percentage points) – see Figure 4.1.

The main negative contributors to the monthly rate were non-ferrous metal ores (-3,6 percentage points) and coal and gas (-1,1 percentage points) – see Figure 4.2.

Agriculture, forestry and fishing

The annual percentage change in the PPI for agriculture, forestry and fishing was 8,0% in November 2023 (compared with 12,0% in October 2023). The index decreased by 0,6% month-on-month.

The main contributors to the annual rate were agriculture (6,6 percentage points) and fishing (1,2 percentage points) – see Figure 5.1.

The main negative contributor to the monthly rate was agriculture (-0,4 of a percentage point) – see Figure 5.2.

Notice of changes to the PPI basket, weights and index reference period

The basket and weights of the PPIs for final and intermediate manufacturing will be updated with effect from the January 2024 release, to be published in February 2024. The primary source for this update is Stats SA's 2021 large sample survey of the manufacturing industry (Report No. 30-02-04). This is in addition to the regular annual weight updates for all PPI tables. The index reference (base) period for all PPI indices will be set to 100 for December 2023.

Stats SA will provide detailed information on the changes to the PPI basket and weights following the publication of the December 2023 release in January 2024.

Explanatory notes

Purpose and results of the survey	The Producer Price Index (PPI) measures changes in the prices of locally produced commodities. A sample of producers is surveyed each month and the results of this survey are used to compile the producer price indices for final manufactured goods, intermediate manufactured goods, electricity and water, mining, and agriculture, forestry and fishing. PPI can be used as an economic indicator of inflation, as an escalator in contracts and as a deflator in the calculation of the national accounts. Further information on the weighting structure, sources of information and methods of compilation of PPI can be found in the PPI sources and methods document, available on the Stats SA website.
Response rate	The response rate for November 2023 was 92,2%.

Glossary

Annual inflation rate	The annual inflation rate per specific PPI is the change in the specific PPI for all items of the relevant month of the current year compared with the specific PPI for all items of the same month in the previous year expressed as a percentage.
Annual percentage change	The annual percentage change is the change in the index of the relevant month of the current year compared with the index of the same month in the previous year expressed as a percentage.
Average annual inflation rate	The average annual inflation rate is the change in the average specific PPI for all items of one year compared with the average specific PPI for all items of the previous year expressed as a percentage.
Average annual percentage change	The average annual percentage change is the change in the average index of one year compared with the average index of the previous year expressed as a percentage.
Contribution	The monthly (annual) contribution of a specific product or group of products to the specific PPI is calculated by multiplying the weight of this product or group of products with the difference of the current index and the previous month (year) index for this product or group of products, divided by the index for the specific index, for the previous month (year).
Monthly percentage change	The monthly percentage change is the change in the specific PPI of the relevant month compared with the specific PPI of the previous month expressed as a percentage.
Producer Price Index	PPI is defined as "A measure of the change in the prices of goods either as they leave their place of production or as they enter the production process" (OECD, 2006)."

General information

Stats SA publishes approximately 300 different statistical releases each year. It is not economically viable to produce them in more than one of South Africa's 12 official languages. Since the releases are used extensively, not only locally but also by international economic and social-scientific communities, Stats SA releases are published in English only.

Stats SA has copyright on this publication. Users may apply the information as they wish, provided that they acknowledge Stats SA as the source of the basic data wherever they process, apply, utilise, publish or distribute the data; and also that they specify that the relevant application and analysis (where applicable) result from their own processing of the data.

Advance release calendar

An advance release calendar is disseminated on www.statssa.gov.za.

Forthcoming issues

Issue	Expected release date
December 2023	25 January 2024
January 2024	29 February 2024
February 2024	28 March 2024

Stats SA products

A complete set of Stats SA publications is available at the Stats SA Library and the following libraries:

- National Library of South Africa, Pretoria Division
- National Library of South Africa, Cape Town Division
- Natal Society Library, Pietermaritzburg
- Library of Parliament, Cape Town
- Bloemfontein Public Library
- Johannesburg Public Library
- Eastern Cape Library Services, Qonse
- Central Regional Library, Polokwane
- Central Reference Library, Mbombela
- Central Reference Collection, Kimberley
- Central Reference Library, Mmabatho

Stats SA also provides a subscription service.

Electronic services

A large range of data are available via online services. For more details about our electronic data services, contact (012) 310 8600.
