## Key findings as at June 2026

### Exports

The unit value index (UVI) for exported commodities shows an annual rate of change of 12,2% in June 2026. From May 2026 to June 2026 the UVI for exported commodities increased by 1,1% – see Table A.

The main positive contributors to the annual rate of 12,2% were:

- metal products, machinery and equipment (22,9% and contributing 11,2 percentage points);
- other transportable goods (6,2% and contributing 0,9 of a percentage point); and
- beverages (7,3% and contributing 0,6 of a percentage point) – see Table 1 and Figure 4.1.

The main positive contributor to the monthly increase of 1,1% was metal products, machinery and equipment (1,7% and contributing 0,9 of a percentage point) – see Table 1 and Figure 4.2.

### Imports

The UVI for imported commodities shows an annual rate of change of -3,2% in June 2026. From May 2026 to June 2026 the UVI for imported commodities decreased by 1,9% – see Table A.

The main negative contributors to the annual rate of -3,2% were metal products, machinery and equipment (-5,2% and contributing -2,5 percentage points) and crude petroleum (-8,2% and contributing -0,5 of a percentage point) – see Table 2 and Figure 5.1.

The main negative contributor to the monthly decrease of 1,9% was other transportable goods (-4,1% and contributing -1,5 percentage points) – see Table 2 and Figure 5.2.

| <b>Purpose and results</b> | The unit value index provides information on the trends in import and export unit values that are weighted with quantities of the current reference period. The calculation of unit value indices of commodities in exports and imports covers transactions reported by the South African Revenue Service (SARS). The results are used to compile export and import unit value indices, which are a measure of changes in export prices of locally produced commodities and changes in prices of imported commodities. Further information can be found in the XMUVI sources and methods document which can be accessed on the Statistics South Africa (Stats SA) website: <a href="https://www.statssa.gov.za/?page_id=16474">https://www.statssa.gov.za/?page_id=16474</a> . |

| <b>Gold</b>                | <p>The export unit value index for gold is calculated from net gold values and quantities obtained quarterly from the South African Reserve Bank (SARB).</p> <p>The index changes quarterly and is published in this publication with a one-quarter lag (e.g. the November 2013 gold value and quantity will only be included in the December 2013 publication).</p>                                                                                                                                                                                                                                                                                                                                                                                                           |

## Glossary

|                          |                                                                                                                                                                                                                                                                                                                                                                                                                                           |
|--------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Chain linking</b>     | The construction of a continuous price series by multiplying together price indices that have been using different weights for different periods. The resulting index is referred to as a chained index ( <i>Practical Guide to Producing Consumer Price Indices, 2009</i> ). Linking is intended to ensure that the individual indices on all levels show the correct development through time, but leads to non-additivity (IMF, 2005). |
| <b>Contributions</b>     | The contribution (percentage points) of a sub-index to the percentage change in the total index for a given period is calculated by multiplying the difference (i.e. change) in the sub-index by its weight and then dividing by the previous period's total index. In the case of annual percentage changes, the contributions are approximations owing to annual changes in weights.                                                    |
| <b>Percentage change</b> | The percentage change in an index for any given period is the change between that period's index value and the previous period's index value expressed as a percentage of the latter.                                                                                                                                                                                                                                                     |

## General information

Stats SA publishes approximately 300 different statistical releases each year. It is not economically viable to produce them in more than one of South Africa's 12 official languages. Since the releases are used extensively locally and by international economic and social-scientific communities, Stats SA releases are published in English only.

Stats SA has a copyright on this publication. Users may apply the information as they wish, provided that they acknowledge Stats SA as the source of the basic data wherever they process, apply, utilise, publish or distribute the data; and also that they specify that the relevant application and analysis (where applicable) result from their own processing of the data.

## Advance release calendar

An advance release calendar is disseminated on [www.statssa.gov.za](http://www.statssa.gov.za).

## Forthcoming issues

| Issue          | Expected release date |
|----------------|-----------------------|
| July 2026      | 10 September 2026     |
| August 2026    | 15 October 2026       |
| September 2026 | 12 November 2026      |

## Stats SA products

A complete set of Stats SA publications is available at the Stats SA Library and the following libraries:

National Library of South Africa, Pretoria Division  
 National Library of South Africa, Cape Town Division  
 Natal Society Library, Pietermaritzburg  
 Library of Parliament, Cape Town  
 Bloemfontein Public Library  
 Johannesburg Public Library  
 Eastern Cape Library Services, Qonce  
 Central Regional Library, Polokwane  
 Central Reference Library, Mbombela  
 Central Reference Collection, Kimberley  
 Central Reference Library, Mmabatho

Stats SA also provides a subscription service.

## Electronic services

A large range of data are available via online services. For more details about our electronic data services, contact (012) 310 8600.

You can visit us on the internet at: [www.statssa.gov.za](http://www.statssa.gov.za).
