Overseas travellers

In September 2000, the leading source country of overseas arrivals was the UK, 25 809 (20,7%) followed by

Germany, 19 779 (15,9%) and the USA, 14 378 (11,5%).

During September 2000, the number of travellers from the UK visiting South Africa was 25 809 (20,7%), making it the leading country of origin of overseas travellers. This was followed by travellers from Germany, 19 779 (15,9%). The other main countries of origin of overseas travellers were: the USA, 14 378 (11,5%); the Netherlands, 8 864 (7,1%); France, 5 687 (4,6%); Australia, 5 173 (4,1%); Belgium, 3 374 (2,7%) and Italy, 2 976 (2,4%). Upon comparing the figures for September 2000 with those of September 1999, the highest increase in the number of arrivals from these leading source countries was for the Netherlands, (7,1% up from 8 273), as shown in Figure 2. The main stated purpose of visit for travellers coming from these leading source countries was holidays, followed by business.

Travellers from mainland Africa

The leading source country of travellers from mainland Africa in September 2000 was Lesotho, 121 110 (33,9%).

During September 2000, the top eight countries in mainland Africa from which travellers arriving in South Africa came, were: Lesotho, 121 110 (33,9%); Swaziland, 64 858 (18,2%); Botswana, 50 675 (14,2%); Mozambique, 41 270 (11,6%); Zimbabwe, 40 316 (11,3%); Namibia, 17 647 (4,9%); Zambia, 6 574 (1,8%) and Malawi, 5 888 (1,6%). Departing South African residents

South African residents: Purpose of travel

During September 2000, South African residents travelled within mainland Africa more for business than for holidays (56,4% as opposed to 41,1%) and similarly, they travelled overseas more for holidays than business (70,5% as opposed to 25,4%).

During September 2000, the total number of South African residents who departed 'temporarily' (through all ports of exit) was 353 611, a decrease of 0,6% compared to the number of South African residents who departed temporarily during the same month in 1999. Of these departing South African residents, the number who travelled by air was 126 753 (35,8%). Of those who travelled by air and left through the three international airports of Johannesburg, Cape Town and Durban, 79 191 (62,5%) filled in departure forms. From the completed September 2000 departure forms, one can see that, on the whole, South African residents travelled within mainland Africa more for business than holidays (56,4% as opposed to 41,1%) and travelled overseas more for holidays than business (70,5% as opposed to 25,4%).

South African residents: Destination countries

The two leading destinations for South African residents for September 2000 were the UK, 16 712 (21,1%) and the USA, 6 039 (7,6%).

The predominant mode of travel used by South African residents departing temporarily from South Africa in September 2000 was road, 226 038 (63,9%) followed by air 126 753 (35,8%).

For South African residents who departed temporarily in September 2000 using the three international airports as ports of exit, the leading countries of destination were the UK, 16 712 (21,1%); the USA, 6 039 (7,6%); Namibia, 3 174 (4,0%); Germany, 3 159 (4,0%); Mauritius, 2 657 (3,4%); Australia, 2 437 (3,1%); Zimbabwe, 2 308 (2,9%) and Italy, 1 839 (2,3%). Among these leading destination countries, Australia showed a significant increase in the number of visiting South African residents during September 2000 as compared to September 1999, (72,6% up from 1 412) as shown in Figure 4.

Returning South African residents

The number of returning South African residents in September 2000 was 345 869, an increase of 1,8% compared to those returning during September 1999. The predominant mode of travel used by South African residents in returning to South Africa was road, 225 931 (65,3%) followed by air 119 406 (34,5%).

Of the South African residents returning by air, 99 669 (83,5%) used Johannesburg International Airport as port of re-entry while 15 428 (12,9%) used Cape Town International Airport as port of re-entry. For the same month in 2000, the number of South African residents returning through Durban International Airport was 1 521 (1,3%) and through other airports 2 78 (2,3%).

Documented immigration and self-declared emigration

The four leading sources of documented immigrants to South Africa in September 2000 were: India, 38 (18,5%); Pakistan, 13 (6,3%); China, 11 (5,4%) and Zambia, 11 (5,4%). The four leading destination countries for self-declared emigrants during September 2000 were: the UK, 278 (33,7%); the USA, 86 (10,4%), Australia, 81 (9,8%) and New Zealand, 50 (6,1%).

For the purpose of clarification, in the migration statistics published here, the emigration status reported refers to self-declared status. South Africans who leave permanently under the pretext of temporary visits will not appear as emigrants in the emigration statistics collected. Similarly, as per definition, 'undocumented immigrants' will not appear in the statistics collected. It is against this background that we report the migration statistics for September 2000.

The total number of self-declared emigrants departing through the three international airports was 826 in September 2000. For documented immigrants into South Africa, the total number approved as immigrants (either before or after arrival) was 205 for September 2000.

In September 2000, the leading source countries of documented immigrants were: India, 38 (18,5%); Pakistan, 13 (6,3%); China, 11 (5,4%) and Zambia, 11 (5,4%). The four leading destination countries for self-declared emigrants during September 2000 were: the UK, 278 (33,7%); the USA, 86 (10,4%), Australia, 81 (9,8%) and New Zealand, 50 (6,1%) as

shown in Figure 5.

Historical trends in tourism, immigration and self-declared emigration

It should be borne in mind that there is often quite a substantial month to month variation in tourism and migration figures, and one needs to look at a longer period of several months to be able to detect any trends and patterns. The trend regarding the number of overseas travellers arriving in South Africa since 1994 is shown in Figure 6. Although the figure shows evidence of seasonal fluctuations, the level of overseas tourism over the period has shown an upward trend. The historical trends in the number of immigrants and self-declared emigrants are shown in Figure 7. The figure shows that since 1994, the number of documented immigrants has remained less than the number of self-declared emigrants. The gap between the two which has been widening apart during the first half of 2000, continues to widen apart during the third quarter of 2000.

EXPLANATORY NOTES

Source of data and background

Legal movements across South African borders as well as legal immigration into South Africa fall under the jurisdiction of the Department of Home Affairs (DHA). Information on tourism and documented immigration are obtained from all ports of entry while the data on self-declared emigration statistics are obtained from only the three international airports of Johannesburg, Cape Town and Durban. Information on arrivals into and departures from South Africa are captured by DHA and loaded onto the mainframe at Bureau Nucleus. Stats SA accesses this data remotely, which is then used as part of the input data for this report. Information on emigration from South Africa and reason for temporary departure of South African residents is obtained from departure forms. The forms are sent to Stats SA on a weekly basis for data capture and processing. Lastly, information on legal immigrants to South Africa is sent to Stats SA on computer printout from DHA. The information on the printout is coded and captured by clerical staff at Stats SA.

Stats SA published complete emigration data up to and including December 1992. Since basic information on emigration was not available thereafter, it was not possible to publish data on emigration on a monthly basis for the period June 1993 to November 1993. However, as from 26 November 1993, the Department of Home Affairs implemented a system according to which South African residents departing for overseas from Johannesburg, Cape Town and Durban International Airports complete departure forms. The system was implemented at these three airports only since approximately 97% of the emigrants left the country through these three ports. This system again made it possible to obtain and process information on South African tourists and emigrants leaving the country through these three ports as from November 1993.
