STATISTICAL RELEASE

P0441

Gross domestic product

First quarter 2024

This release provides an analysis of revisions. If you have any questions or comments, please send these to Bontlenyana Makhoba, bontlenyanam@statssa.gov.za.

Important note: The Excel tables accompanying the release now include seasonally adjusted data for estimates of the Compensation of Employees. It is added as "32. Coe QNS".

Embargoed until:
4 June 2024
11:30

ENQUIRIES:
Bontlenyana Makhoba
Tel: (012) 310 8567

FORTHCOMING ISSUE:
Second quarter 2024

EXPECTED RELEASE DATE:
3 September 2024

Key findings for the first quarter of 2024

Real gross domestic product (GDP) measured by production, decreased by 0,1%¹ in the first quarter of 2024, following an increase of 0,3% in the fourth quarter of 2023.

Figure 1 – Growth in GDP (%)

Six industries recorded negative growth between the fourth quarter of 2023 and the first quarter of 2024.

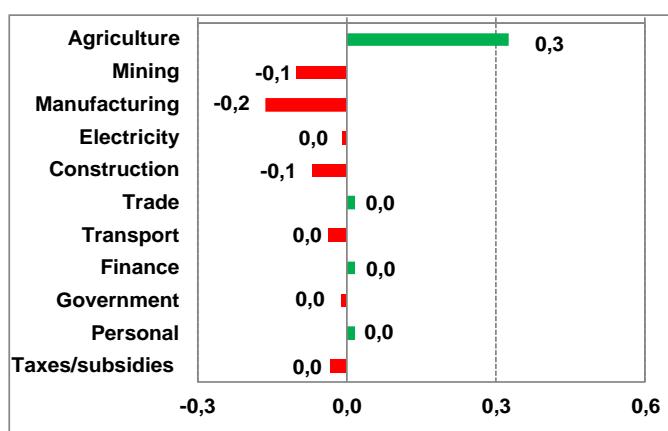

The manufacturing industry decreased by 1,4% and contributed -0,2 of a percentage point to the negative GDP growth.

The mining industry decreased by 2,3% and contributed -0,1 of a percentage point.

The construction industry decreased by 3,1% and contributed -0,1 of a percentage point.

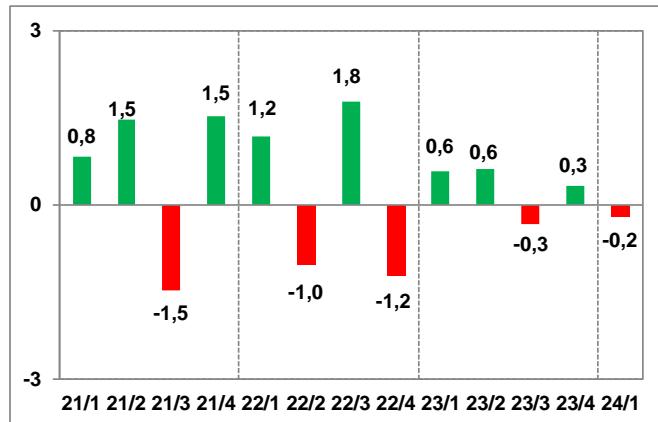

The agriculture industry was the main positive contributor, increasing by 13,5% and contributing 0,3 of a percentage point.

Figure 2 – Contributions to growth in GDP, Q1 2024 (% points)

Expenditure on real GDP decreased by 0,2% in the first quarter of 2024, following an increase of 0,3% in the fourth quarter of 2023.

Figure 3 – Growth in expenditure on GDP (%)

Household final consumption expenditure decreased by 0,3% in the first quarter of 2024, contributing -0,2 of a percentage point to the total negative growth.

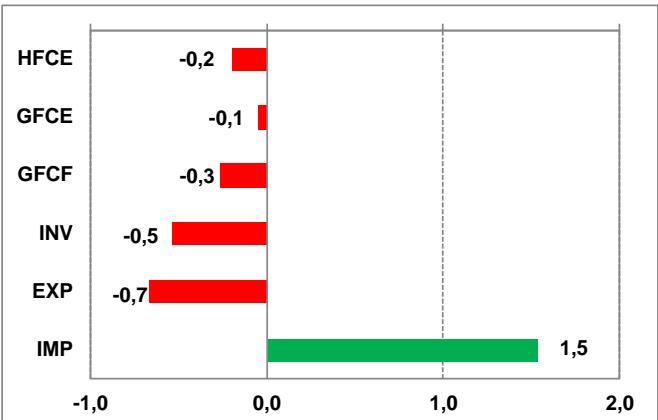

Government final consumption expenditure decreased by 0,3%, contributing -0,1 of a percentage point.

Gross fixed capital formation decreased by 1,8%, contributing -0,3 of a percentage point.

Changes in inventories in the first quarter of 2024 contributed -0,5 of a percentage point.

Net exports contributed 0,9 of a percentage point, following decreases of 2,3% and 5,1% in exports and imports respectively.

Figure 4 – Contributions to growth in expenditure on GDP, Q1 2024 (% points)

¹ Unless otherwise specified, growth rates are quarter-on-quarter, seasonally adjusted. All growth rates are calculated on the basis of series at constant prices.

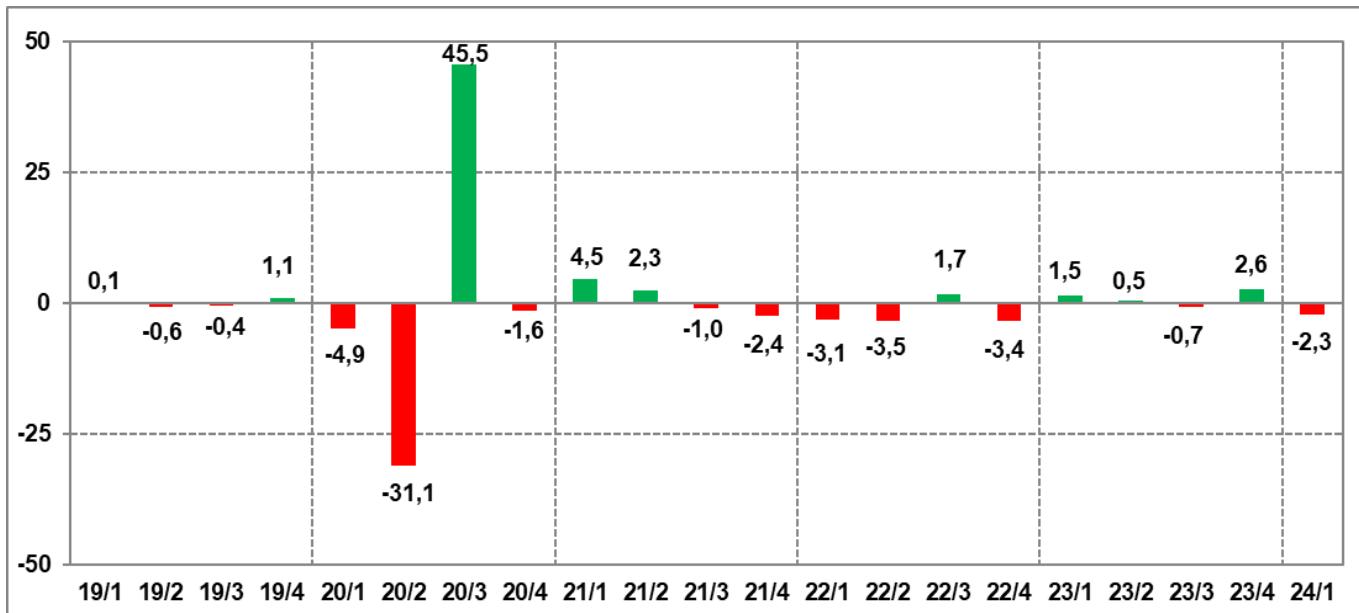

Gross domestic product at constant 2015 prices: First quarter of 2024

Primary sector

The agriculture, forestry and fishing industry increased by 13,5% in the first quarter of 2024, contributing 0,3 of a percentage point to the negative GDP growth. This was primarily due to increased economic activities reported for horticulture products.

The mining and quarrying industry decreased by 2,3% in the first quarter, contributing -0,1 of a percentage point. Decreased economic activities were reported for platinum group metals (PGMs), coal, gold and manganese ore.

Figure 5 – Mining and quarrying growth rate (%)

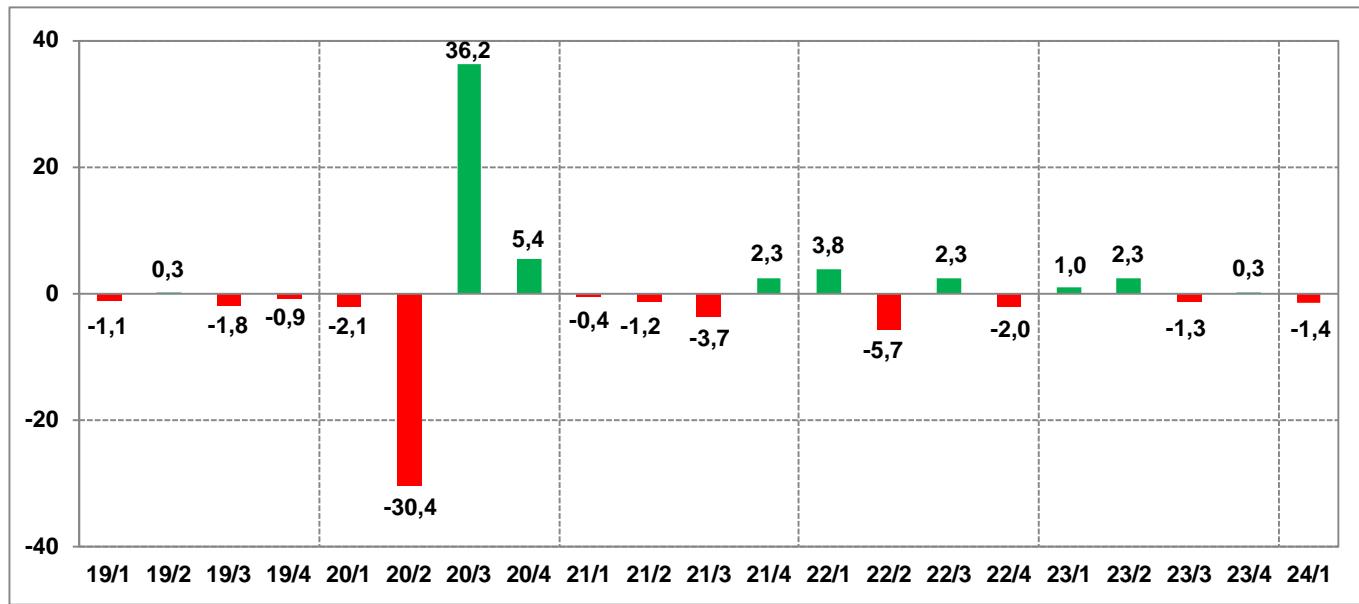

Secondary sector

The manufacturing industry decreased by 1,4% in the first quarter of 2024, contributing -0,2 of a percentage point to the negative GDP growth. Five of the ten manufacturing divisions reported negative growth rates in the first quarter. The motor vehicles, parts and accessories and other transport equipment division and the basic iron and steel, non-ferrous metal products, metal products and machinery division made the largest negative contributions to the decrease in the first quarter.

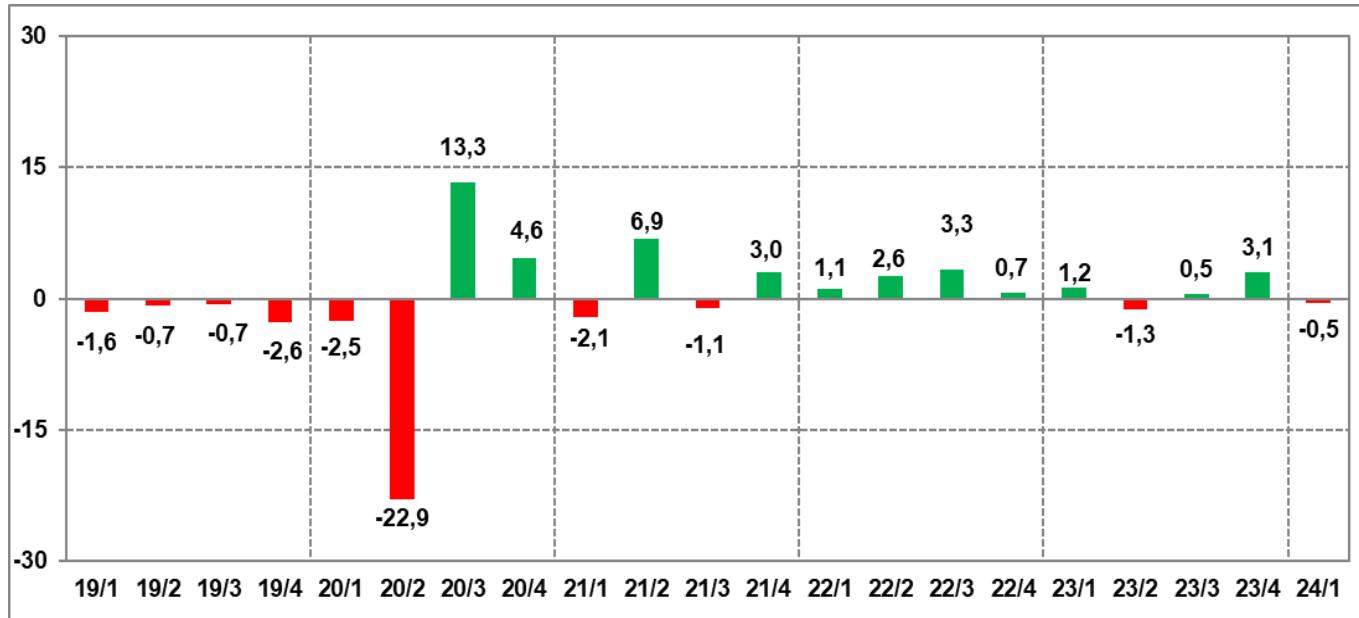

The electricity, gas and water industry decreased by 0,4% in the first quarter, largely due to decreases in electricity production and consumption, and water consumption.

The construction industry decreased by 3,1% in the first quarter, contributing -0,1 of a percentage point. Decreases were reported for residential buildings and construction works.

Figure 6 – Manufacturing growth rate (%)**Tertiary sector**

The trade, catering and accommodation industry increased by 0,1% in the first quarter of 2024. Increased economic activities were reported for wholesale trade, accommodation and food and beverages.

The transport, storage and communication industry decreased by 0,5% in the first quarter. Decreased economic activities were reported for land transport.

Figure 7 – Transport, storage and communication growth rate (%)

The finance, real estate and business services industry increased by 0,1% in the first quarter of 2024. Increased economic activities were reported for financial intermediation, insurance and pension funding and real estate activities.

General government services decreased by 0,1% in the first quarter, mainly due to decreased employment in the provincial government.

The personal services industry increased by 0,1% in the first quarter. Increased economic activities were reported for health and education.

Expenditure on gross domestic product at constant 2015 prices: First quarter of 2024

Household final consumption expenditure (HFCE)

Household final consumption expenditure decreased by 0,3% in the first quarter of 2024, contributing -0,2 of a percentage point to the total negative growth. Decreases were reported for durable goods, semi-durable goods and services.

The main negative contributors to the decrease in HFCE were expenditures on clothing and footwear (-7,0 and contributing -0,4 of a percentage point), transport (-1,3% and contributing -0,2 of a percentage point) and the 'other' category² (-1,3% and contributing -0,2 of a percentage point).

The main positive contributors were expenditures on food and non-alcoholic beverages; furnishings, household equipment and maintenance; housing, water, electricity, gas and other fuels; and restaurants and hotels.

Figure 8a – HFCE growth rate (%)

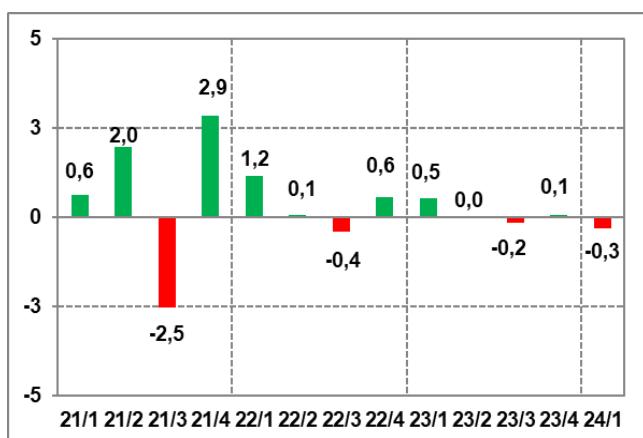

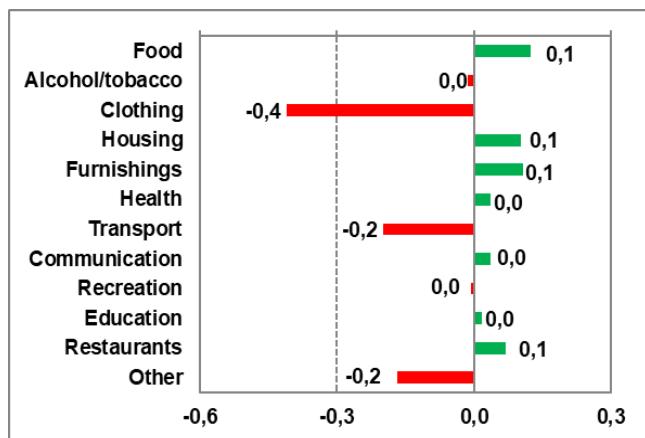

Figure 8b – HFCE contributions, Q1 2024 (% points)

Government final consumption expenditure (GFCE)

Final consumption expenditure by general government decreased by 0,3% in the first quarter of 2024, contributing -0,1 of a percentage point to the total negative growth. This was mainly driven by decreases in purchases of goods and services and compensation of employees.

² Given the sources used to estimate HFCE, spending by non-residents in South Africa needs to be deducted from HFCE. Hence, an increase in non-residents' expenditure decreases the 'other' component of HFCE and makes a negative contribution to the HFCE growth rate.

Gross fixed capital formation (GFCF)

Total gross fixed capital formation decreased by 1,8% in the first quarter of 2024, contributing -0,3 of a percentage point to the total negative growth. The main negative contributors to the decrease were machinery and other equipment (-1,4% and contributing -0,6 of a percentage point), residential buildings (-4,3% and contributing -0,5 of a percentage point) and construction works (-2,5% and contributing -0,4 of a percentage point).

Figure 9a – GFCF growth rate (%)

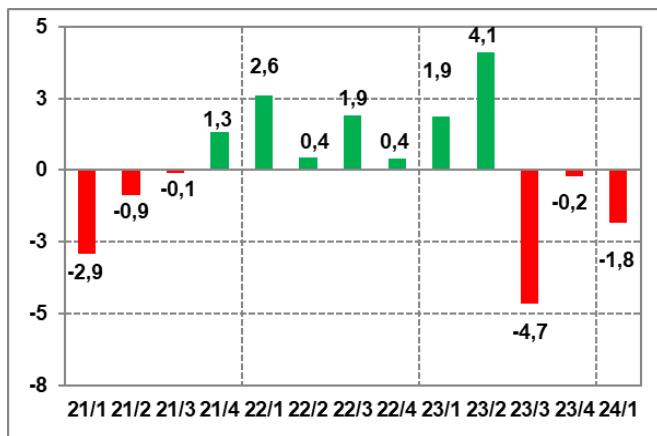

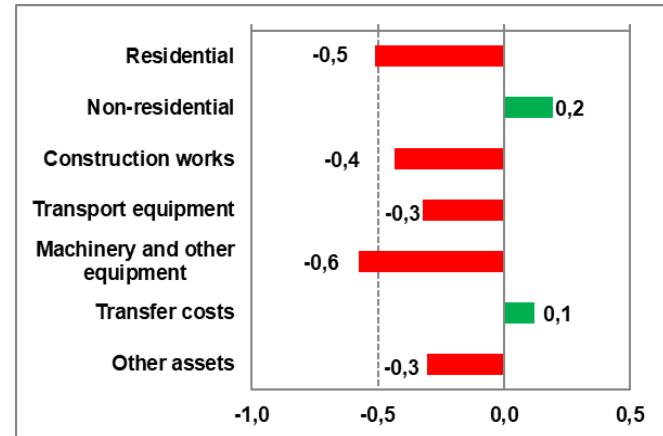

Figure 9b – GFCF contributions, Q1 2024 (% points)

Changes in inventories

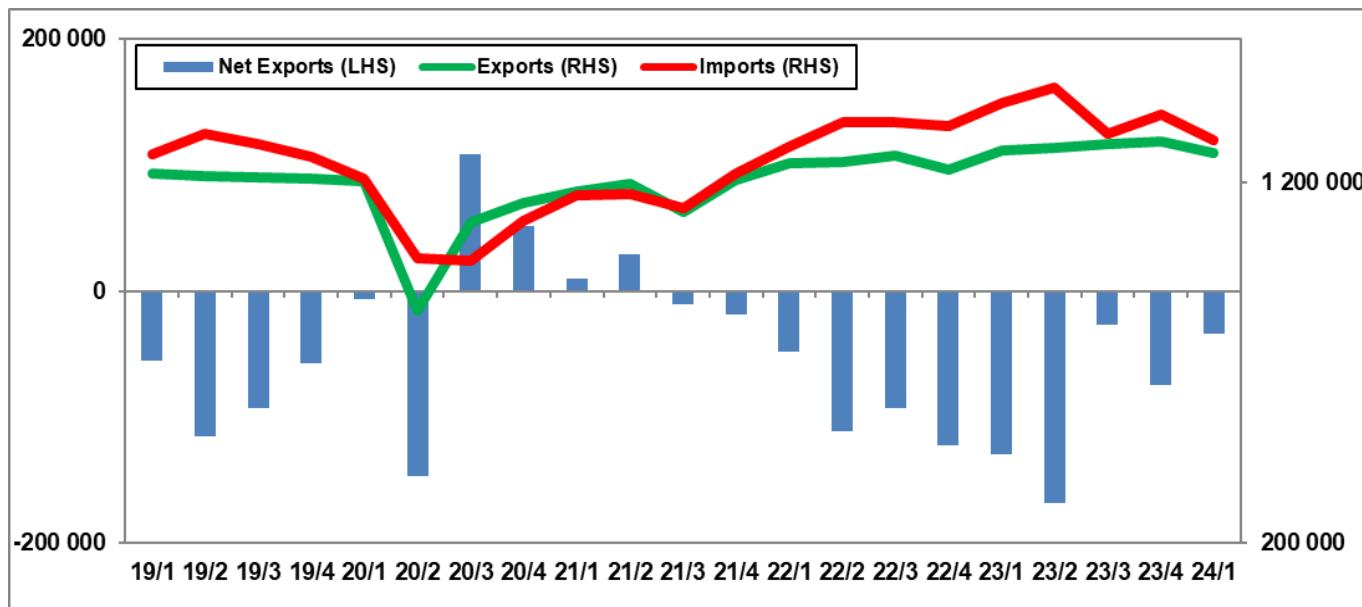

There was a R5,5 billion drawdown of inventories in the first quarter of 2024 (seasonally adjusted and annualised value). Large decreases in three industries, namely manufacturing; mining and quarrying; and personal services, contributed to the inventory drawdown.

Exports and imports of goods and services

Net exports contributed positively to expenditure on GDP in the first quarter. Exports of goods and services decreased by 2,3%, largely influenced by decreased trade in pearls, precious and semi-precious stones and precious metals; vehicles and transport equipment excluding aircraft; chemical products; base metals and articles of base metals; and mineral products.

Imports of goods and services decreased by 5,1%, largely influenced by decreased trade in mineral products; vehicles and transport equipment excluding aircraft; and vegetable products.

Figure 10 – Exports and imports of goods and services (R million, seasonally adjusted and annualised)

Important note: The revised 2020 and preliminary 2021 supply and use tables (SUTs) are available in a Microsoft Excel workbook, downloadable from Stats SA's website (https://www.statssa.gov.za/?page_id=1854&PPN=P0441)

Analysis of revisions

Introduction

Preliminary GDP growth rates are published approximately nine weeks after the reference quarter, e.g. the preliminary GDP growth rate for the March quarter is published in the first (or sometimes second) week of June. The preliminary values are revised the following quarter using updated source data. The revisions schedule for GDP is shown below.

Revisions schedule for GDP

Reason for revision	Schedule
Additional information from data sources	Quarterly (revision of previous quarter)
Independent annuals from detailed data sources i.e. AFS consolidated government statistics, capital expenditure by public sector, etc.	Annual (June publication)
Benchmarking and rebasing	Periodic, approximately every five years

Analysis

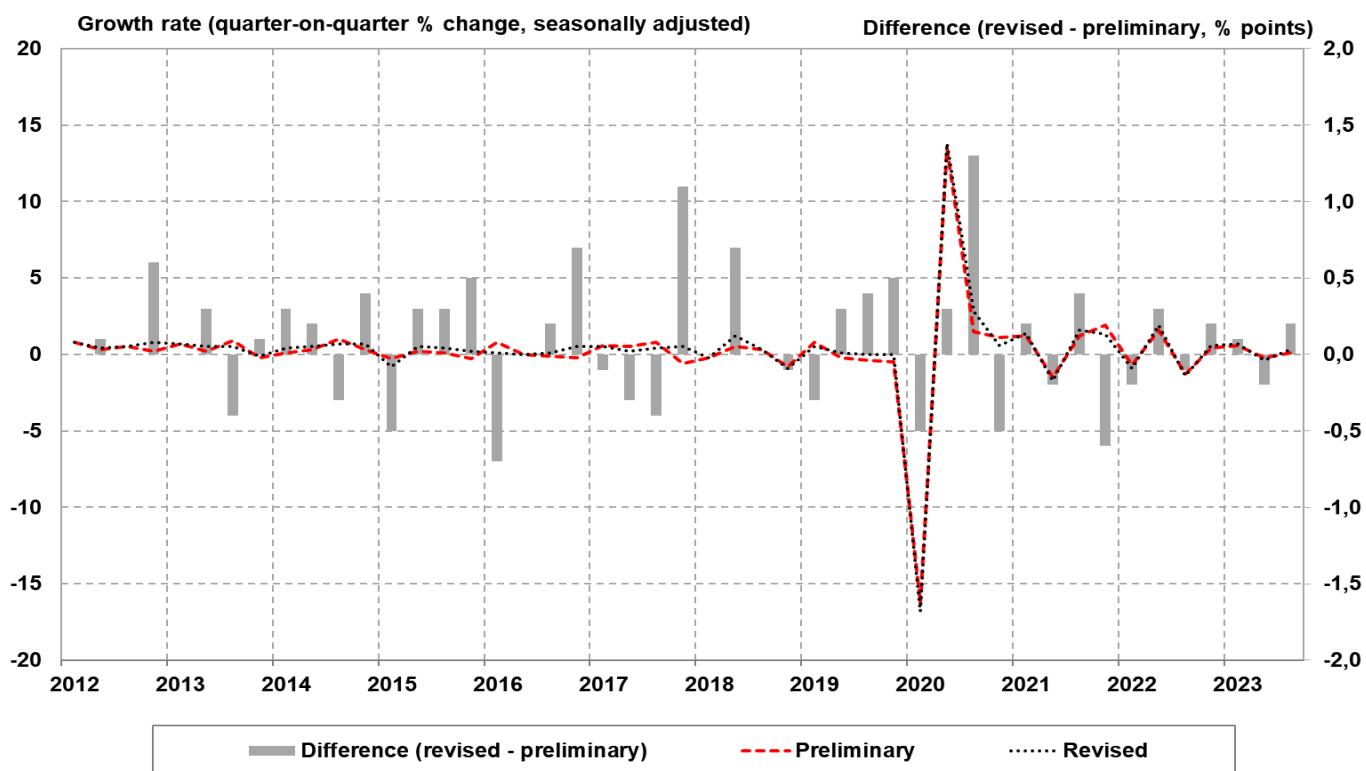

Revisions may be analysed in terms of several dimensions, namely rand values and/or growth rates (e.g. quarter-on-quarter percentage changes, year-on-year percentage changes); current prices and/or constant prices; seasonally adjusted and/or unadjusted data; totals and/or components; preliminary estimate compared with first revision and/or latest available revision; and various combinations of these options.

This analysis is confined to the following:

- Headline GDP growth rate, i.e. GDP measured by production, quarter-on-quarter growth rate, constant prices, seasonally adjusted.
- Preliminary growth rates are compared with the latest available revised growth rates, where the preliminary growth rate refers to the first growth rate published for the quarter in question.
- Time period: first quarter of 2012 to fourth quarter of 2023. Between 2012 Q1 and 2021 Q2, the headline growth rate was annualised. For the purposes of this analysis, the growth rates for this period have been converted to non-annualised (for direct comparison with the latest available revised growth rates).

Figure 11 shows the preliminary and revised growth rates (line chart, left vertical axis) and the difference between them (bar chart, right vertical axis, where difference = revised - preliminary).

Table 11 provides key results relating to revisions.

Figure 11 – Real GDP growth rates: preliminary and revised**Table 11 – GDP growth rates: preliminary and revised (quarter-on-quarter, seasonally adjusted)**

Description	Value / outcome	Comment
Average growth rate over the whole period	Preliminary: 0,21% Revised: 0,30%	The average of revised growth rates is higher than the average of preliminary growth rates
Mean revision	0,09 of a percentage point	This is the average of the revisions
Mean absolute revision	0,32 of a percentage point	Average of the revisions, but based on the absolute value of each revision (positives and negatives do not cancel each other)
Largest upward revision	1,3 percentage points	Preliminary 1,5% was revised up to 2,8% (2020 Q4) (this quarter was severely affected by COVID-19)
Largest downward revision	-0,7 of a percentage point	Preliminary 0,8% was revised down to 0,1% (2016 Q2)
Range for all revisions	-0,7 to 1,3 percentage points	
Range within which 90% of the revisions lie	-0,56 to 0,92 of a percentage point	This may be regarded as the normal range for revisions, with revisions outside this range being outliers

Description	Value/outcome	Comment
Number of upward revisions	25 (or 52,1% of the total observations)	
Number of downward revisions	17 (or 35,4% of the total observations)	
Number of zero revisions	6 (or 12,5% of the total observations)	
Is the mean revision (0,09) significantly different from zero?	No	This indicates that there is no bias in the preliminary estimate – see Note 1 below
Standard deviation of the revisions	0,41 of a percentage point	Standard deviation is a measure of dispersion about the mean – see the row below
Percentage of revisions that lie within one standard deviation of the mean	75,0%	This is the percentage of revisions that lie between -0,32 and 0,51 of a percentage point; the higher the percentage, the lower is the dispersion about the mean – see Figure 12

Note 1: Is the mean revision significantly different from zero?

The formula for the test statistic is as follows:

$$\text{test statistic} = \frac{\bar{R}}{\sqrt{\left(\frac{1}{n(n-1)}\right)\left(\sum_{t=1}^n \hat{\varepsilon}_t^2 + \frac{3}{4}\sum_{t=2}^n \hat{\varepsilon}_t \hat{\varepsilon}_{t-1} + \frac{2}{3}\sum_{t=3}^n \hat{\varepsilon}_t \hat{\varepsilon}_{t-2}\right)}}$$

where

n = number of observations

\bar{R} = mean revision

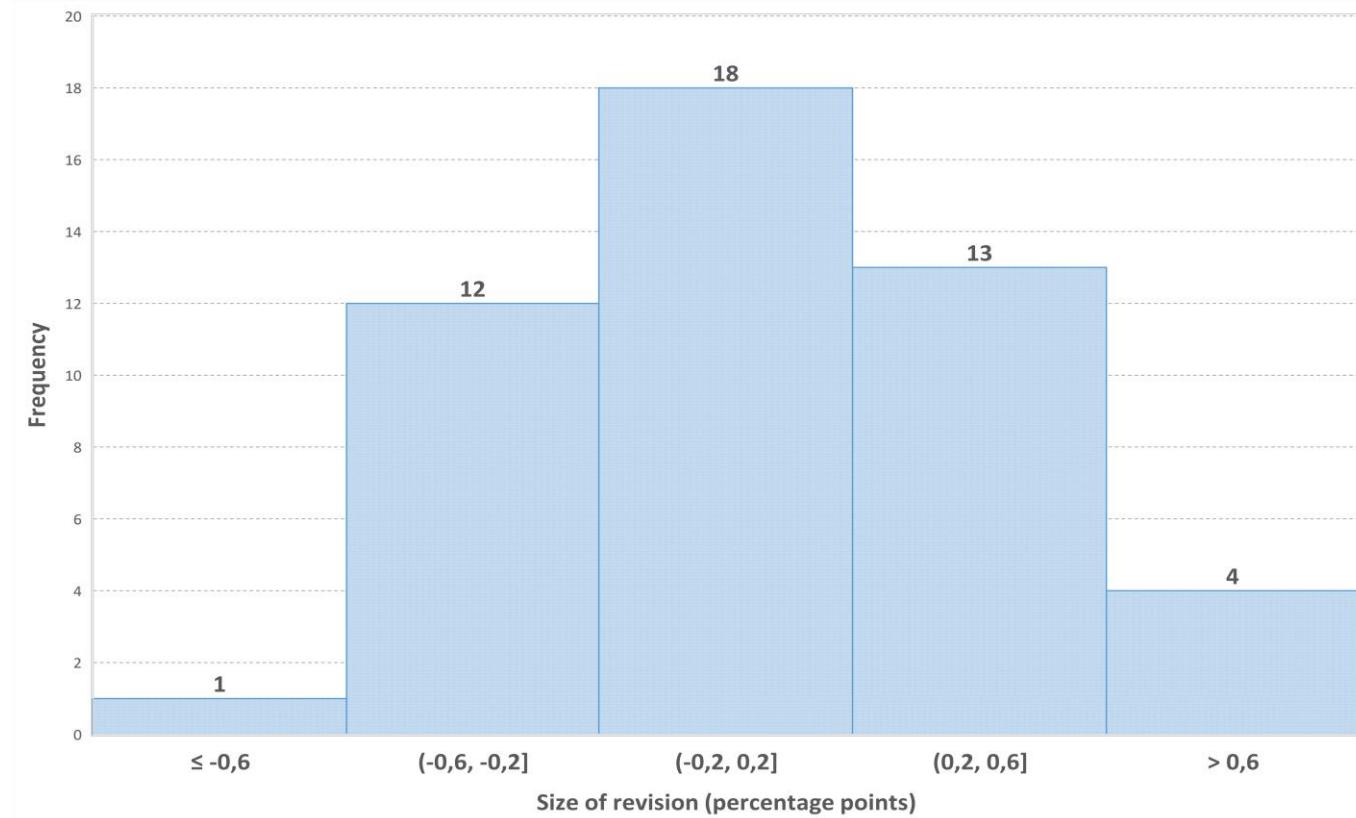

$\hat{\varepsilon}_t = R_t - \bar{R}$, with R_t = revision in period t

Note that if the test statistic shows that the mean revision (MR) is significantly different from zero, then there is bias in the preliminary estimates. Bias in a series suggests there is scope to enhance the compilation of that series in an attempt to remove or minimise the bias. $MR > 0$ (statistically significant) implies under-estimation of the preliminary estimates. $MR < 0$ (statistically significant) implies over-estimation of the preliminary estimates.

In this case the test statistic is 1,84, which lies below the critical value of 2,01, indicating that the MR is not significantly different from zero at a 5% significance level. Accordingly, no bias is detected in the preliminary estimates.

Figure 12 shows the revisions in terms of a histogram. There were 12 revisions between -0,6 and -0,2 ($-0,6 < \text{revision} \leq -0,2$); 18 revisions between -0,2 and 0,2 ($-0,2 < \text{revision} \leq 0,2$); and 13 revisions between 0,2 and 0,6 ($0,2 < \text{revision} \leq 0,6$). 89,6% of revisions lay between -0,6 and 0,6 of a percentage point.

Figure 12 – Real GDP quarter-on-quarter growth rates, seasonally adjusted: histogram of revisions

Explanatory notes

Forthcoming issues	Issue:	Expected date of publication:
	Second quarter 2024	3 September 2024
	Third quarter 2024	3 December 2024
	Fourth quarter 2024	4 March 2025
	First quarter 2025	3 June 2025
Reference documents	Information related to the compilation of the GDP estimates is available in the National Accounts: Sources and Methods document on the Stats SA website: http://www.statssa.gov.za/publications/Report%2004-04-04/Report%2004-04-042021.pdf .	
Revised figures	Revised figures are mainly due to updated source data. The reasons for routine revisions are outlined in the following schedule. Any unscheduled revisions will be promptly indicated in relevant tables to maintain transparency and accuracy.	
Statistical release	Reason for revision	Period subject to revision
Second quarter 2024	Independent annuals from detailed data sources i.e. AFS, consolidated government statistics, capital expenditure by public sector, etc.	First quarter 2020 to Fourth quarter 2023
Third quarter 2024	Updated source data	Third quarter 2023 to Second quarter 2024
Fourth quarter 2024	Updated source data	Fourth quarter 2023 to Third quarter 2024
First quarter 2025	Updated source data	First quarter 2024 to Fourth quarter 2024
Benchmarking and rebasing in 2026/27 - periodic, approximately five-year intervals

General information

Stats SA publishes approximately 300 different statistical releases each year. It is not economically viable to produce them in more than one of South Africa's 12 official languages. Since the releases are used extensively, not only locally but also by international economic and social-scientific communities, Stats SA releases are published in English only.

Stats SA has copyright on this publication. Users may apply the information as they wish, provided that they acknowledge Stats SA as the source of the basic data wherever they process, apply, utilise, publish or distribute the data; and also that they specify that the relevant application and analysis (where applicable) result from their own processing of the data.

Advance release calendar

An advance release calendar is disseminated on www.statssa.gov.za.

Stats SA products

A complete set of Stats SA publications is available at the Stats SA Library and the following libraries:

National Library of South Africa, Pretoria Division
National Library of South Africa, Cape Town Division
Natal Society Library, Pietermaritzburg
Library of Parliament, Cape Town
Bloemfontein Public Library
Johannesburg Public Library
Eastern Cape Library Services, Qonse
Central Regional Library, Polokwane
Central Reference Library, Mbombela
Central Reference Collection, Kimberley
Central Reference Library, Mmabatho

Stats SA also provides a subscription service.

Electronic services

A large range of data are available via online services. For more details about our electronic data services, contact (012) 310 8600.

You can visit us on the internet at: www.statssa.gov.za.
