Sales at constant 2019 prices: results for December 2025

Table A – Key growth rates in wholesale trade sales at constant 2019 prices

	Jul-25	Aug-25	Sep-25	Oct-25	Nov-25	Dec-25
Year-on-year % change, unadjusted	-0,6	1,5	1,4	-3,0	-0,7	0,3
Month-on-month % change, seasonally adjusted	0,3	0,8	-1,1	0,2	1,8	-1,1
3-month % change, seasonally adjusted ¹	-0,5	0,3	0,3	0,5	0,3	0,6

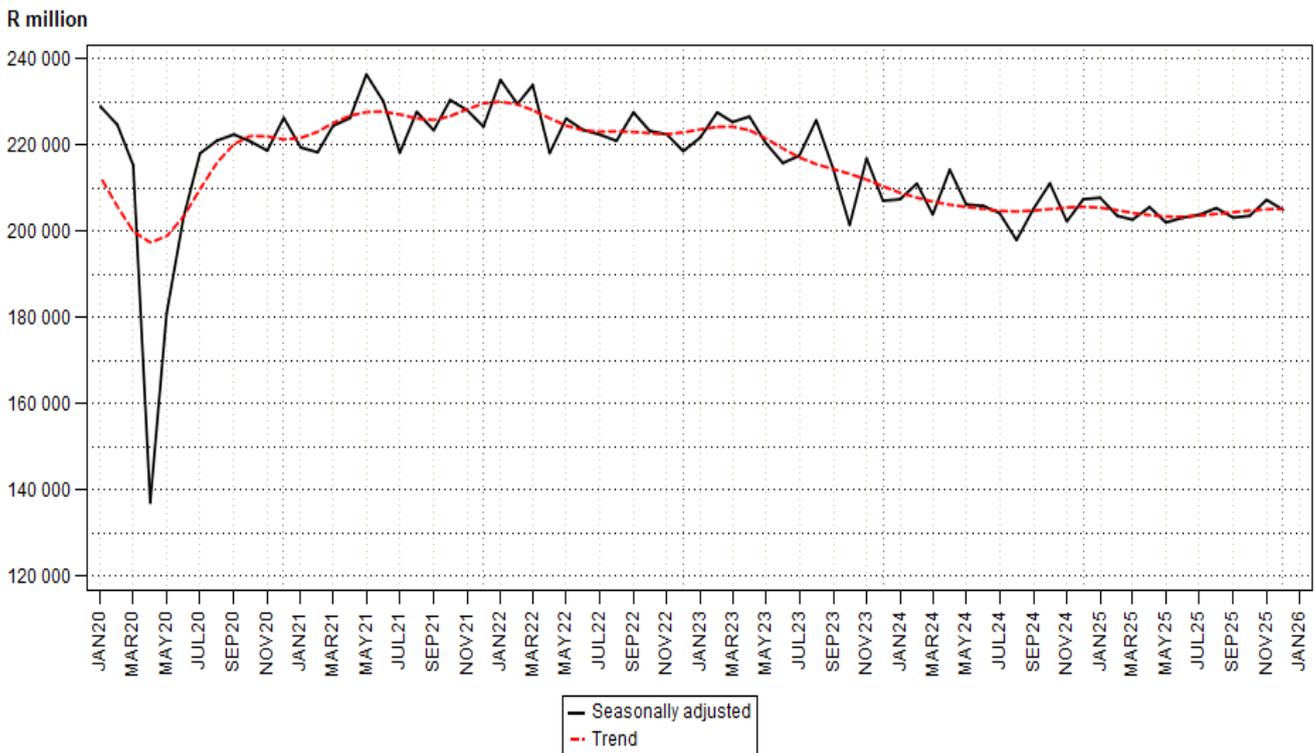

¹ Percentage change between the previous 3 months and the 3 months ending in the month indicated.

Measured in real terms (constant 2019 prices), wholesale trade sales decreased by 1,4% in 2025 compared with 2024 – see Table 2. In December 2025, wholesale trade sales increased by 0,3% year-on-year.

Seasonally adjusted wholesale trade sales decreased by 1,1% in December 2025 compared with November 2025. This followed month-on-month changes of 1,8% in November 2025 and 0,2% in October 2025.

In the fourth quarter of 2025, seasonally adjusted wholesale trade sales increased by 0,6% compared with the third quarter of 2025.

Figure 1 – Wholesale trade sales at constant 2019 prices

Sales at current prices: results for December 2025

Table B – Key growth rates in wholesale trade sales at current prices

	Jul-25	Aug-25	Sep-25	Oct-25	Nov-25	Dec-25
Year-on-year % change, unadjusted	-0,1	2,5	2,8	-0,9	1,3	2,3
Month-on-month % change, seasonally adjusted	1,6	0,0	-0,6	0,7	0,3	0,2
3-month % change, seasonally adjusted ¹	-0,1	1,5	1,2	1,2	0,5	0,6

¹ Percentage change between the previous 3 months and the 3 months ending in the month indicated.

Measured in nominal terms (current prices), wholesale trade sales increased by 2,3% in December 2025 compared with December 2024. The main positive contributors were dealers in:

- food, beverages and tobacco (6,4% and contributing 1,2 percentage points);
- 'other' goods (5,9% and contributing 0,5 of a percentage point); and
- 'other' household goods except precious stones (4,5% and contributing 0,5 of a percentage point) – see Table 8 and Table 9.

Table C – Wholesale trade sales at current prices for the latest three months by type of dealer

Type of dealer	Oct – Dec 2024 (R million)	Weight (%)	Oct – Dec 2025 (R million)	% change between Oct – Dec 2024 and Oct – Dec 2025	Contribution % (points) to the total % change
Fee or contract basis	32 847	3,6	35 089	6,8	0,2
Agricultural raw materials and livestock	69 172	7,6	63 368	-8,4	-0,6
Food, beverages and tobacco	145 976	16,0	154 039	5,5	0,9
Textiles, clothing and footwear	21 211	2,3	20 096	-5,3	-0,1
Other household goods except precious stones	97 124	10,6	102 358	5,4	0,6
Precious stones, jewellery and silverware	15 636	1,7	11 077	-29,2	-0,5
Solid, liquid and gaseous fuels and related products	193 874	21,3	190 023	-2,0	-0,4
Metals and metal ores	24 814	2,7	25 156	1,4	0,0
Construction and building materials	44 869	4,9	46 110	2,8	0,1
Other intermediate products, waste and scrap	56 283	6,2	55 021	-2,2	-0,1
Machinery, equipment and supplies	133 355	14,6	138 425	3,8	0,6
Other goods	76 976	8,4	78 864	2,5	0,2
Total	912 136	100,0	919 627	0,8	0,8

Wholesale trade sales increased by 0,8% in the fourth quarter of 2025 compared with the fourth quarter of 2024. The main positive contributor was dealers in food, beverages and tobacco (5,5% and contributing 0,9 of a percentage point) – see Table C.

Explanatory notes

- Introduction** 1 Statistics South Africa (Stats SA) conducts a monthly survey covering enterprises in the wholesale trade industry (see point 3 below). This survey is based on a sample drawn from Stats SA's 2025 statistical business register (SBR) that contains businesses registered at the South African Revenue Service (SARS) for value-added tax (VAT) and income tax (IT). Stats SA continuously updates its SBR, which is linked to the SARS administrative data. Published wholesale trade sales estimates exclude VAT.
- Purpose of the survey** 2 The results of the monthly wholesale trade sales survey are used to compile estimates of the gross domestic product (GDP) and its components, which are used in monitoring the state of the economy and formulation of economic policy. These statistics are also used in the analysis of comparative business and industry performance.
- Scope of the survey** 3 This survey covers wholesale enterprises according to the following types of dealers:
- wholesale trade on a fee or contract basis – sales by commission agents, commodity brokers, auctioneers and 'other' wholesale trade on a fee or contract basis;
 - wholesale trade in agricultural raw materials and livestock;
 - wholesale trade in food, beverages and tobacco;
 - wholesale trade in textiles, clothing and footwear;
 - wholesale trade in 'other' household goods except precious stones. This group includes wholesale trade in household furniture, requisites and appliances, wholesale trade in books and stationery, wholesale trade in pharmaceuticals and toiletries and wholesale trade in 'other' household goods not elsewhere classified;
 - wholesale trade in precious stones, jewellery and silverware;
 - wholesale trade in solid, liquid and gaseous fuels and related products;
 - wholesale trade in metals and metal ores;
 - wholesale trade in construction materials, hardware, plumbing and heating equipment and supplies;
 - wholesale trade in 'other' intermediate products, waste and scrap;
 - wholesale trade in machinery, equipment and supplies; and
 - wholesale trade in 'other' goods. This group covers general wholesale trade and 'other' wholesale trade not classified elsewhere.
- Classification** 4 The 1993 edition of the *Standard Industrial Classification of All Economic Activities* (SIC), Fifth Edition, Report No. 09-90-02, was used to classify the statistical units in the survey. The SIC is based on the 1990 *International Standard Industrial Classification of All Economic Activities* (ISIC) with suitable adaptations for local conditions. Each enterprise is classified to the industry which reflects its predominant activity. Statistics in this publication are presented at SIC group four-digit level.
- Collection rate** 5 The preliminary collection rate for the survey on wholesale trade sales for December 2025 was 65,7%. The revised collection rate for November 2025 was 71,8%.

Statistical unit 6 The statistical unit for which information is compiled and published is the enterprise, defined as a legal unit or a combination of legal units that includes and directly controls all functions necessary to carry out its sales activities. The statistical units are derived from and linked to the South African Revenue Service (SARS) administrative data.

Revised figures 7 Revised figures are mainly due to late submission of data to Stats SA, or respondents reporting revisions or corrections to their figures. The reasons for routine revisions are outlined in the following schedule. Any unscheduled revisions will be promptly indicated in relevant tables to maintain transparency and accuracy. It is important to note that seasonally adjusted figures are revised monthly.

Statistical release	Reason for revision	Period subject to revision
Dec-25	Additional information from respondents	Nov-25
Jan-26	Additional information from respondents	Dec-25
Feb-26	Additional information from respondents	Jan-26
Mar-26	Additional information from respondents	Feb-26
Apr-26	Additional information from respondents	Mar-26
May-26	Additional information from respondents	Apr-26
Jun-26	Additional information from respondents	May-26
Jul-26	Additional information from respondents New sample	Jan-98–Jun-26
Aug-26	Additional information from respondents	Jul-26
Sep-26	Additional information from respondents	Aug-26
Oct-26	Additional information from respondents	Sep-26
Nov-26	Additional information from respondents	Oct-26
New base year in 2027/28 - periodic, approximately four- to five-year intervals		

Related publications 8 Users may also refer to the *Stats in Brief* publication available from Stats SA.

Rounding-off of figures 9 Where figures have been rounded off, discrepancies may occur between sums of the component items and the totals.

Technical notes

Survey methodology and design

- 1 The survey is conducted monthly. Questionnaires are sent to a sample of 1 730 enterprises from a population of 18 170 enterprises. Completed questionnaires are required to be returned to Stats SA within 10 days after the end of the reference month. Email and telephone reminders are used to follow up on non-respondents.
- 2 A stratified random sample was drawn at the SIC four-digit level in April 2025 from Stats SA’s statistical business register (SBR). Strata were formed using a combination of Standard Industrial Classification and the measure of size classes for enterprises (see point 3 below). The Neyman optimal allocation formula given below was used to allocate samples to each stratum:

$$n_h = n * (N_h * S_h) / [\sum (N_i * S_i)].$$

Neyman allocation formula not only allocates sample sizes to each stratum but also calculates the relative precision for each stratum as well as the relative precision for all strata. The relative precision for these strata was 5,25%.

Class limits

- 3 The wholesale sampling frame is divided into four size groups. All large enterprises (size group one) are completely enumerated. Simple random sampling is applied to the remaining size groups (medium, small and very small). The total value of sales of the large enterprises (size group one) is added to the weighted totals of size groups two, three and four to reflect the total value of sales.

Measure of size classes (Rand)

Enterprise size	Size group	Lower limit	Upper limit
Very small	4	6 738 900	36 000 000
Small	3	36 000 001	192 000 000
Medium	2	192 000 001	384 000 000
Large	1	384 000 001	

Sample weighting

- 4 For those strata not completely enumerated, the weights to produce estimates are the inverse ratio of the sampling fraction, modified to take account of non-response in the survey. Stratum estimates are calculated and then aggregated with the completely enumerated stratum to form group estimates. These procedures are consistent with international best practice.

Seasonal adjustment

- 5 Seasonally adjusted estimates are generated each month using the X-12-ARIMA Seasonal Adjustment Program developed by the United States Census Bureau. Seasonal adjustment is a means of removing the estimated effects of normal seasonal variation from the series so that the effects of other influences on the series can be more clearly recognised. Seasonal adjustment does not aim to remove irregular or non-seasonal influences that may be present in any particular month. Influences that are volatile or unsystematic can still make it difficult to interpret the movement of the series even after adjustment for seasonal variations. Therefore, the month-to-month movements of seasonally adjusted estimates may not be reliable indicators of trend behaviour. The X-12-ARIMA procedure for wholesale trade sales is described in more detail on the Stats SA website: [Click to download seasonal adjustment wholesale trade sales February 2022.](#)

Trend cycle

- 6 The trend is the long-term pattern or movement of a time series. The X-12-ARIMA Seasonal Adjustment Program is used for smoothing seasonally adjusted estimates to estimates of the underlying trend cycle.

Constant prices

- 7** Stats SA compiles its monthly estimates of wholesale trade sales at current prices from a survey of wholesalers in the formal sector. From January 1998 to December 2011, wholesale trade sales at constant prices were calculated using the 'all groups' PPI for domestic output, but excluding electricity and other utilities.

From January 2012, wholesale trade sales at constant prices are compiled as follows:

- (1) Deflate sales of dealers in agricultural raw materials and livestock using the PPI for agriculture.
- (2) Deflate sales of dealers in food, beverages and tobacco using the final manufacturing PPI for food products, beverages and tobacco.
- (3) Deflate sales of dealers in textiles, clothing and footwear using the final manufacturing PPI for textiles, clothing and footwear.
- (4) Deflate sales of dealers in solid, liquid and gaseous fuels and related products using the final manufacturing PPI for coal and petroleum products.
- (5) Deflate sales of dealers in machinery, equipment and supplies using the final manufacturing PPIs for general and special purpose machinery; household appliances and office machinery; and electrical machinery and communication and metering equipment.
- (6) Deflate the remaining wholesale trade sales using the headline PPI (final manufacturing) excluding the PPIs for food products, beverages and tobacco; textiles, clothing and footwear; coal and petroleum products; general and special purpose machinery; household appliances and office machinery; electrical machinery and communication and metering equipment; and transport equipment. The PPI for transport equipment is excluded because it measures producer prices of motor vehicles, which are not included in wholesale trade.

Total wholesale trade sales at constant prices are obtained by aggregating (1) to (6).

Reliability of estimates

- 8** Data presented in this publication are based on information obtained from a sample and are, therefore, subject to sampling variability; that is, they may differ from the figures that would have been produced if the data had been obtained from all enterprises in the wholesale industry in South Africa. Estimates are subject to sampling and non-sampling errors.
- 9** Inaccuracies may occur because of imperfections in reporting by enterprises and errors made in the collection and processing of the data. Inaccuracies of this kind are referred to as non-sampling errors. Every effort is made to minimise non-sampling errors by careful design of questionnaires, testing them in pilot studies, editing reported data and implementing efficient operating procedures. Fluctuations may occur in consecutive months as a result of seasonal and economic factors.

- Relative standard error** 10 One measure is the standard error (SE), which indicates the extent to which an estimate might have varied by chance because only a sample of enterprises was used. The relative standard error (RSE) provides an immediate indication of the percentage errors likely to have occurred due to sampling, and thus avoids the need to refer to the size of the estimate.

Estimates of total wholesale trade sales within 95% confidence limits – December 2025

	Lower limit (R million)	Sales (R million)	Upper limit (R million)	Relative standard error (RSE) %
Wholesale trade sales	271 698	281 957	292 216	1,8

- Month-on-month percentage change** 11 The month-on-month percentage change in a variable for any given month is the change between that month and the previous month, expressed as a percentage of the latter.
- Year-on-year percentage change** 12 The year-on-year percentage change in a variable for any given period is the change between that period and the corresponding period of the previous year, expressed as a percentage of the latter.
- Contribution (percentage points)** 13 The contribution (percentage points) to the year-on-year percentage change is calculated by multiplying the percentage change of each type of wholesaler by its corresponding weight, divided by 100. The weight is the percentage contribution of each type of wholesaler to total wholesale trade sales in the corresponding period of the previous year.

Glossary

Enterprise An enterprise is a legal entity or a combination of legal units that includes and directly controls all functions necessary to carry out its sales activities.

Industry An industry is made up of enterprises engaged in the same or similar kinds of economic activity. Industries are defined in the *System of National Accounts* (SNA) in the same way as in the *Standard Industrial Classification of All Economic Activities* (SIC), Fifth Edition, Report No. 09-90-02 of January 1993.

Symbols and abbreviations

GDP	Gross domestic product
ISIC	International Standard Industrial Classification of All Economic Activities
SARS	South African Revenue Service
SBR	Statistical Business Register
SIC	Standard Industrial Classification of All Economic Activities
Stats SA	Statistics South Africa
VAT	Value-added tax
*	Revised figures

Wholesale trade Wholesale trade includes the resale (sale without transformation) of new and used goods and products to other wholesalers, retailers, agricultural, industrial, commercial, institutional and professional users either directly or through agents on a fee or contract basis.

Wholesaler A wholesaler is an enterprise deriving 50% or more of its turnover from sales of goods to other businesses and institutions.

General information

Stats SA publishes approximately 300 different statistical releases each year. It is not economically viable to produce them in more than one of South Africa's 12 official languages. Since the releases are used extensively locally and by international economic and social-scientific communities, Stats SA releases are published in English only.

Stats SA has copyright on this publication. Users may apply the information as they wish, provided that they acknowledge Stats SA as the source of the basic data wherever they process, apply, utilise, publish or distribute the data; and also that they specify that the relevant application and analysis (where applicable) result from their own processing of the data.

Advance release calendar

A release calendar is disseminated on www.statssa.gov.za.

Stats SA products

A complete set of Stats SA publications is available at the Stats SA Library and the following libraries:

National Library of South Africa, Pretoria Division
National Library of South Africa, Cape Town Division
Natal Society Library, Pietermaritzburg
Library of Parliament, Cape Town
Bloemfontein Public Library
Johannesburg Public Library
Eastern Cape Library Services, Qonce
Central Regional Library, Polokwane
Central Reference Library, Mbombela
Central Reference Collection, Kimberley
Central Reference Library, Mmabatho

Stats SA also provides a subscription service.

Electronic services

A large range of data is available via online services. For more details about our electronic data services, contact Stats SA's user information service at (012) 310 8600.

You can visit us on the internet at: www.statssa.gov.za.
