Sales at constant 2019 prices: results for June 2026

Table A – Key growth rates in retail trade sales at constant 2019 prices

	Jan-26	Feb-26	Mar-26	Apr-26	May-26	Jun-26
Year-on-year % change, unadjusted	4,4	1,6	2,5	1,2	2,2	1,6
Month-on-month % change, seasonally adjusted	0,8	-1,0	0,1	0,8	0,0	-0,6
3-month % change, seasonally adjusted ¹	1,2	0,4	0,0	-0,3	0,2	0,4

¹ Percentage change between the previous 3 months and the 3 months ending in the month indicated.

Measured in real terms (constant 2019 prices), retail trade sales increased by 1,6% year-on-year in June 2026. The largest positive contributors to this increase were:

- all 'other' retailers (7,5% and contributing 0,8 of a percentage point); and
- general dealers (1,8% and contributing 0,8 of a percentage point) – see Table 5 and Table 6.

Seasonally adjusted retail trade sales decreased by 0,6% in June 2026 compared with May 2026. This followed month-on-month changes of 0,0% in May 2026 and 0,8% in April 2026.

Table B – Retail trade sales at constant 2019 prices for the latest three months by type of retailer

Type of retailer	Apr – Jun 2025 (R million)	Weight (%)	Apr – Jun 2026 (R million)	% change between Apr – Jun 2025 and Apr – Jun 2026	Contribution (% points) to the total % change
General dealers	127 050	43,8	128 610	1,2	0,5
Food, beverages and tobacco in specialised stores	24 043	8,3	24 225	0,8	0,1
Pharmaceuticals and medical goods, cosmetics and toiletries	21 970	7,6	22 247	1,3	0,1
Textiles, clothing, footwear and leather goods	51 963	17,9	52 158	0,4	0,1
Household furniture, appliances and equipment	11 835	4,1	12 810	8,2	0,3
Hardware, paint and glass	21 962	7,6	21 626	-1,5	-0,1
All other retailers	31 258	10,8	33 193	6,2	0,7
Total	290 081	100,0	294 869	1,7	1,7

Retail trade sales increased by 1,7% in the second quarter of 2026 compared with the second quarter of 2025. The largest positive contributors to this increase were:

- all 'other' retailers (6,2% and contributing 0,7 of a percentage point); and
- general dealers (1,2% and contributing 0,5 of a percentage point) – see Table B.

Table C – Seasonally adjusted retail trade sales at constant 2019 prices for the latest three months by type of retailer

Type of retailer	Jan – Mar 2026 (R million)	Weight (%)	Apr – Jun 2026 (R million)	% change between Jan – Mar 2026 and Apr – Jun 2026	Contribution (% points) to the total % change
General dealers	134 750	43,8	135 279	0,4	0,2
Food, beverages and tobacco in specialised stores	24 868	8,1	25 508	2,6	0,2
Pharmaceuticals and medical goods, cosmetics and toiletries	22 923	7,5	22 317	-2,6	-0,2
Textiles, clothing, footwear and leather goods	54 825	17,8	54 755	-0,1	0,0
Household furniture, appliances and equipment	13 877	4,5	14 026	1,1	0,0
Hardware, paint and glass	22 629	7,4	22 449	-0,8	-0,1
All other retailers	33 781	11,0	34 412	1,9	0,2
Total	307 652	100,0	308 748	0,4	0,4

Seasonally adjusted retail trade sales increased by 0,4% in the second quarter of 2026 compared with the first quarter of 2026. The largest positive contributors were:

- food, beverages and tobacco in specialised stores (2,6% and contributing 0,2 of a percentage point);
- all 'other' retailers (1,9% and contributing 0,2 of a percentage point); and
- general dealers (0,4% and contributing 0,2 of a percentage point) – see Table C.

Explanatory notes

Introduction	1	Statistics South Africa (Stats SA) conducts a monthly survey of the retail trade industry, covering retail enterprises (see point 3 below). This survey is based on a sample drawn from Stats SA's 2025 statistical business register (SBR) that contains businesses registered for value-added tax (VAT). Published retail trade sales estimates include VAT.
Purpose of the survey	2	The results of the monthly retail trade sales survey are used to compile estimates of the gross domestic product (GDP) and its components, which are used in monitoring the state of the economy and formulation of economic policy. These statistics are also used in the analysis of comparative business and industry performance.
Scope of the survey	3	This survey covers retail enterprises according to the following types of retailers: • general dealers: ➢ retail trade in non-specialised stores with food, beverages and tobacco predominating; and ➢ 'other' retail trade in non-specialised stores. • retailers in food, beverages and tobacco in specialised stores: ➢ retailers in fresh fruit and vegetables; ➢ retailers in meat and meat products; ➢ retailers in bakery products; ➢ retailers in beverages; ➢ retailers in tobacco; and ➢ retailers in 'other' food in specialised stores. • retailers in pharmaceutical and medical goods, cosmetics and toiletries; • retailers in textiles, clothing, footwear and leather goods: ➢ retailers in men's and boys' clothing; ➢ retailers in ladies', girls' and infants' clothing; ➢ general outfitters; and ➢ retailers in footwear. • retailers in household furniture, appliances and equipment; • retailers in hardware, paint and glass; and • all 'other' retailers: ➢ retailers in reading matter and stationery; ➢ retailers in jewellery, watches and clocks; ➢ retailers in sport goods and entertainment requisites; ➢ retailers in 'other' specialised stores; ➢ repair of personal and household goods; ➢ retail trade in second-hand goods in stores; and ➢ retail trade not in stores.
Classification	4	The 1993 edition of the <i>Standard Industrial Classification of All Economic Activities</i> (SIC), Fifth Edition, Report No. 09-90-02, was used to classify the statistical units in the survey. The SIC is based on the 1990 <i>International Standard Industrial Classification of All Economic Activities</i> (ISIC) with suitable adaptations for local conditions. Each enterprise is classified to the industry which reflects its predominant activity. Statistics in this publication are presented at SIC group (four digit) level.
Collection rate	5	The preliminary collection rate for the survey on retail trade sales for June 2026 was 77,1%. The revised collection rate for May 2026 was 78,3%.

Statistical unit 6 The statistical unit for which information is compiled and published is the enterprise, defined as a legal unit or a combination of legal units that includes and directly controls all functions necessary to carry out its sales activities. The statistical units are derived from and linked to the South African Revenue Service (SARS) administrative data.

Revised figures 7 Revised figures are mainly due to late submission of data to Stats SA, or respondents reporting revisions or corrections to their figures. The reasons for routine revisions are outlined in the following schedule. Any unscheduled revisions will be promptly indicated in relevant tables to maintain transparency and accuracy. It is important to note that seasonally adjusted figures are revised monthly.

Statistical release	Reason for revision	Period subject to revision
Jun-26	Additional information from respondents	May-26
Jul-26	Additional information from respondents	Jun-26
Aug-26	Additional information from respondents	Jul-26
Sep-26	Additional information from respondents	Aug-26
Oct-26	Additional information from respondents	Sep-26
Nov-26	Additional information from respondents	Oct-26
Dec-26	Additional information from respondents	Nov-26
Jan-27	Additional information from respondents New base year for constant prices	Jan-02 - Dec-26
Feb-27	Additional information from respondents	Jan-27
Mar-27	Additional information from respondents	Feb-27
Apr-27	Additional information from respondents	Mar-27
May-27	Additional information from respondents	Apr-27
New base year in 2026/27 - periodic, approximately four- to five-year intervals

Technical notes

Survey methodology and design

- 1 The survey is conducted on a monthly basis. Questionnaires are sent to a sample of 1 671 enterprises from a population of 19 052 enterprises. Completed questionnaires are required to be returned to Stats SA within ten days after the end of the reference month. Email and telephone reminders are used to follow up on non-respondents.
- 2 A stratified random sample was drawn at the SIC four-digit level in April 2025 from Stats SA's statistical business register (SBR). Strata were formed using a combination of the Standard Industrial Classification and the measure of size classes for enterprises (see point three below).

The Neyman optimal allocation formula given below was used to allocate samples to each stratum:

$$n_h = n * (N_h * S_h) / [\sum (N_i * S_i)].$$

Neyman allocation formula not only allocates sample sizes to each stratum, but also calculates the relative precision for each stratum as well as the relative precision for all strata. The relative precision for these strata did not exceed 6,0%.

Class limits

- 3 The retail sampling frame is divided into four size groups. All large enterprises (size group one) are completely enumerated. Simple random sampling is applied to size groups two, three and four (medium, small and very small) enterprises. The total value of sales of the large enterprises (size group one) is added to the weighted totals of size groups two, three and four to reflect the total value of sales.

Measure of size classes (Rand)

Enterprise size	Size group	Lower limit	Upper limit
Very small	4	2 692 651	12 000 000
Small	3	12 000 001	57 000 000
Medium	2	57 000 001	117 000 000
Large	1	117 000 001	

Sample weighting

- 4 For those strata not completely enumerated, the weights to produce estimates are the inverse ratio of the sampling fraction, modified to take account of non-response in the survey. Stratum estimates are calculated and then aggregated with the completely enumerated stratum to form group estimates. These procedures are consistent with international best practice.

Seasonal adjustment

- 5 Seasonally adjusted estimates are generated each month using the X-12 Seasonal Adjustment Program developed by the United States Census Bureau. Seasonal adjustment is a means of removing the estimated effects of normal seasonal variation from the series so that the effects of other influences on the series can be recognised more clearly. Seasonal adjustment does not aim to remove irregular or non-seasonal influences which may be present in any particular month. Influences that are volatile or unsystematic can still make it difficult to interpret the movement of the series, even after adjustment for seasonal variations. Therefore, the month-to-month movements of seasonally adjusted estimates may not be reliable indicators of trend behaviour. The X-12-ARIMA procedure for retail trade sales is described in more detail on the Stats SA website: [Click to download seasonal adjustment retail trade sales February 2022](#).

Trend cycle

- 6 The trend is the long-term pattern or movement of a time series. The X-12 Seasonal Adjustment Program is used for smoothing seasonally adjusted estimates to estimate the underlying trend cycle.

- Constant prices**
- 7** For January 2002 to December 2007 retail trade sales at constant prices were calculated using the consumer price index (CPI) for goods, excluding petrol and purchases of vehicles, for all urban areas to deflate total sales at current prices. From January 2008 onwards total retail trade sales at constant prices are obtained by adding up the deflated sales by type of retailer.
- 8** Retail trade sales at constant prices by type of retailer are obtained by deflating estimated sales at current prices by the relevant weighted price index. To obtain total retail trade sales at constant prices, estimates of the deflated sales for each type of retailer are aggregated.
- Reliability of estimates**
- 9** Data presented in this publication are based on information obtained from a sample and are, therefore, subject to sampling variability; that is, they may differ from the figures that would have been produced if the data had been obtained from all enterprises in the retail industry in South Africa. Estimates are subject to sampling and non-sampling errors.
- 10** Inaccuracies may occur because of imperfections in reporting by enterprises and errors made in the collection and processing of the data. Inaccuracies of this kind are referred to as non-sampling errors. Every effort is made to minimise non-sampling errors by careful design of questionnaires, testing them in pilot studies, editing reported data and implementing efficient operating procedures. Fluctuations may occur in consecutive months as a result of seasonal and economic factors.
- Relative standard error**
- 11** One measure of the likely difference is given by the standard error (SE), which indicates the extent to which an estimate might have varied by chance because only a sample of enterprises was used. The relative standard error (RSE) provides an immediate indication of the percentage errors likely to have occurred due to sampling, and thus avoids the need to refer to the size of the estimate.
- Estimates of total retail trade sales within 95% confidence limits – June 2026**
- | | Lower limit
(R million) | Sales
(R million) | Upper limit
(R million) | Relative
standard error
(RSE) (%) |
|--------------------|----------------------------|----------------------|----------------------------|---|
| Retail trade sales | 121 626 | 124 943 | 128 259 | 1,3 |
- Month-on-month percentage change**
- 12** The month-on-month percentage change in a variable for any given month is the change between that month and the previous month, expressed as a percentage of the latter.
- Year-on-year percentage change**
- 13** The year-on-year percentage change in a variable for any given period is the change between that period and the corresponding period of the previous year, expressed as a percentage of the latter.
- Contribution (percentage points)**
- 14** The contribution (percentage points) to the year-on-year percentage change for any given period is calculated by multiplying the percentage change of each type of retailer by its corresponding weight, divided by 100. The weight is the percentage contribution of each type of retailer to total retail trade sales in the corresponding period of the previous year.

Glossary

Enterprise	An enterprise is a legal entity or a combination of legal units that includes and directly controls all functions necessary to carry out its sales activities.	
Industry	An industry is made up of enterprises engaged in the same or similar kinds of economic activity. Industries are defined in the <i>System of National Accounts</i> (SNA) in the same way as in the <i>Standard Industrial Classification of All Economic Activities</i> (SIC), Fifth Edition, Report No. 09-90-02 of January 1993.	
Retail trade	Retail trade includes the resale (sale without transformation) of new and used goods and products to the general public for household use.	
Retailer	A retailer is an enterprise deriving more than 50% of its turnover from sales of goods to the general public for household use.	
Symbols and abbreviations	CPI	Consumer price index
	GDP	Gross domestic product
	ISIC	International Standard Industrial Classification of All Economic Activities
	SARS	South African Revenue Service
	SBR	Statistical Business Register
	SIC	Standard Industrial Classification of All Economic Activities
	SNA	System of National Accounts
	Stats SA	Statistics South Africa
	VAT	Value-added tax
	*	Revised figures

General information

Stats SA publishes approximately 300 different statistical releases each year. It is not economically viable to produce them in more than one of South Africa's 12 official languages. Since the releases are used extensively locally and by international economic and social-scientific communities, Stats SA releases are published in English only.

Stats SA has copyright on this publication. Users may apply the information as they wish, provided that they acknowledge Stats SA as the source of the basic data wherever they process, apply, utilise, publish or distribute the data; and also that they specify that the relevant application and analysis (where applicable) result from their own processing of the data.

Advance release calendar

A release calendar is disseminated on www.statssa.gov.za.

Stats SA products

A complete set of Stats SA publications is available at the Stats SA Library and the following libraries:

National Library of South Africa, Pretoria Division
National Library of South Africa, Cape Town Division
Natal Society Library, Pietermaritzburg
Library of Parliament, Cape Town
Bloemfontein Public Library
Johannesburg Public Library
Eastern Cape Library Services, Qonce
Central Regional Library, Polokwane
Central Reference Library, Mbombela
Central Reference Collection, Kimberley
Central Reference Library, Mmabatho

Stats SA also provides a subscription service.

Electronic services

A large range of data is available via online services. For more details about our electronic services, contact Stats SA's user information service at (012) 310 8600.

You can also visit us on the internet at: www.statssa.gov.za.
