Key findings

Table A - Purchases and sales of water and electricity

	Quarter ended						
Item	Dec-22	Mar-23	Jun-23	Sep-23	Dec-23		
		Yo	ear-on-year%chang	je			
Purchases of water	3,3	14,4	25,2	26,4	24,8		
Sales of water	12,9	5,6	15,3	-5,2	1,5		
Purchases of electricity	-5,6	-7,5	5,0	6,0	23,8		
Sales of electricity	1,7	1,3	0,1	2,7	8,1		

Table A shows annual growth rates in the purchases and sales of water and electricity. Purchases of water increased by 24,8% from the quarter ended December 2022 to the quarter ended December 2023 while sales of water increased by 1,5%. Purchases and sales of electricity increased by 23,8% and 8,1% respectively over the same period.

Figure 1 - Purchases and sales of water and electricity

Purpose of survey

The Quarterly financial statistics of selected municipalities (QFSSM) (statistical release P9110.1) is a quarterly survey that obtains financial information from institutions that are determined to be municipalities in terms of the Local Government: Municipal Structures Act 1998 (Act No. 117 of 1998). The results of the survey are used to compile estimates of national accounts in order to calculate the gross domestic product (GDP) and its components; by the fiscal and monetary authorities for policy formulation; and for the analysis of local government finances.

Response rates

 December 2022 quarter:
 99% (of 130)

 March 2023 quarter:
 99% (of 130)

 June 2023 quarter:
 99% (of 130)

 September 2023 quarter:
 98% (of 130)

 December 2023 quarter:
 97% (of 130)

Imputation

Imputations were performed for four municipalities (City of Tshwane metropolitan municipality and Merafong City local municipality did not respond and the figures for Ditsobotla and Kopanong local municipalities were not usable).

Cautionary note

The QFSSM survey provides quarterly financial updates based on preliminary figures from municipalities. Please refer to the annual *Financial census of municipalities* (statistical release P9114), where most results are based on audited figures, for a more in-depth report.

Implementation of Municipal Standard Chart of Accounts (mSCOA)

The implementation of mSCOA caused a few municipalities to experience challenges with their newly upgraded or acquired systems. The following were some of the most common issues:

- municipalities were not able to integrate their reporting systems (such as payroll and municipal systems) into the newly upgraded mSCOA-compliant system; and
- ii. municipalities experienced difficulty in capturing figures into the new systems this was primarily a problem for municipalities that were moving from one system to another.

Stats SA is working with the affected municipalities and other stakeholders to resolve the issues reported above. The data for the quarter ended December 2023 are preliminary (see explanatory note 6 on page 16: Revised figures).

Explanatory notes

Introduction

1 The purpose of the quarterly financial statistics survey of selected municipalities is to provide stakeholders with information for allowing analysis and assessment of the state of local government finances.

This publication contains estimates for the quarters ended December 2022, March 2023, June 2023, September 2023 and December 2023. The survey is designed to obtain financial information of local government institutions relating to the consolidated statement of financial performance of municipalities for:

- · rates and general services; and
- housing and trading services.

Survey methodology and design

2

With effect from the quarter ended December 2020, Stats SA has conducted a quarterly survey of selected municipalities which focuses on the largest 130 municipalities, which include metropolitan municipalities, secondary cities, other large local municipalities and district municipalities (see Annexure C on page 10 for a full list of these municipalities). The ranking of municipalities was based on their total expenditures as of the 2017/2018 annual financial statements from the largest to the smallest. This quarterly survey represents approximately 85 percent of the total value when the full scope of municipalities is surveyed. Data for 130 municipalities were available since December 2016. Prior to this, there were re-demarcation issues which resulted in the scope reduction. So not all 130 can be extracted from the 278, 283, and 284, etc. municipalities that were there before 2016. A similar survey called *Financial Census of Municipalities* (P9114) inclusive of the other municipalities is conducted annually.

The statistical unit for the collection of information is the municipality.

Scope of the survey

According to note 2, the survey covers quarterly financial information for 130 selected municipalities. Consequently, there is comparable information available for this new scope because it is included in a collection of 257 municipalities that collects, processes, analyses and publishes *Quarterly financial statistics of municipalities* (P9110).

Classification and accounting standards

For the purposes of classification of local government institutions according to activities, Statistics South Africa (Stats SA) used the *Standard Industrial Classification of All Economic Activities* (SIC), Fifth Edition, Report No.09-90-02 of January 1993. Activities of local government institutions also adhere to the accounting standards and requirements in terms of the Generally Recognised Accounting Practice (GRAP).

The Municipal Standard Chart of Accounts (mSCOA) was initially rolled out (piloted-tested) in some municipalities in 2016. Since then, it has been implemented in all municipalities beginning in 2017. As part of the general ledger, which forms part of the books of account containing a standard list of all available accounts, this framework provides the method and format for recording and classifying financial transaction information. See Annexure D for changes made as a result of the alignment to mSCOA.

Imputation

A historical method is used to impute for non-response. Historical imputation is when a previous value of a non-respondent is used for the imputation of a current value. This value may be brought forward unchanged (un-weighted historical imputation), or have some kind of movement applied to it (weighted historical imputation). QFSSM (P9110.1) uses the unweighted imputation method currently.

Revised figures

6 Estimates for the current quarter are preliminary. Figures will be revised if respondents report revisions or corrections to their figures and also if the data were received late by Stats SA (after the cut-off date for submitting their questionnaires).

Rounding-off of figures

7 The figures in the tables have been rounded off to the nearest digit shown and as a result there may be slight discrepancies between the sums of the constituent items and the totals shown.

Glossary of the selected terms

Agency services

The guideline underlying agency services is that the municipality performs a service on behalf of another entity. The amounts collected on behalf of the principal are not revenue. Instead, revenue is the amount of any commission received or receivable for the collection or handling of the gross flows.

Consolidated statement of financial performance

The aggregate or consolidated statement of financial performance (previously referred to as income statement) reports the institution's financial performance during a specific period of time. This statement covers all the revenue and expenditure of an entity over a specific period of time.

Consultants and professional services

Consulting services refer to specialist services and skills provided that are required for the achievement of a specific objective, with the aim of providing expert and professional advice on a time and material basis. It is unnecessary to maintain these skills in-house, since they are required on a once-off or temporary basis. Therefore, a consultant is a professional person appointed by the municipality to provide technical and specialist advice or to assist with the design and implementation of specific projects or programmes.

Contracted services

This group of accounts consists of outsourced services, consultants and professional services, and contractors. See above and below for descriptions of these.

Contractors

Contractors are required to provide services that are not the core business of the municipality. It is normally not cost effective to maintain these skills within the department. Contractors include costs associated with the use of contracted individuals or businesses on projects or tasks. This does not include amounts payable to contractors in respect of provision of services such as cleaning and security even if a staff element can be identified. Note also that it is common practice that the said contractor provides all the materials required for the project – the tenders are for the whole project, materials included.

Current expenditure

Current expenditure refers to transactions that decrease the net worth of the institution, including interest paid, compensation of employees, grants and subsidies paid and depreciation, but excluding the acquisition of fixed capital. It consists of the total expenditure of rates and general services (excluding the surplus) and the total expenditure of housing and trading services (excluding the surplus).

Debt impairment

Impaired debt is debt of any kind that is unlikely to be paid in full. This results in a loss of value of the amounts that an entity has pending to claim from its customers for the goods or services delivered.

Depreciation, amortisation and impairment

Depreciation is the systematic allocation of the cost of an asset from the statement of financial position to depreciation expense on the statement of financial performance over the useful life of the asset.

Amortisation is the systematic allocation of the discount, premium or issue cost of a financial instrument over the life of the instrument, or an intangible asset over a certain period

Impairment is a permanent reduction in the value of an asset. It may occur as a result of an unusual or one-time event, such as a change in legal or economic conditions, a change in consumer demand, or damage that impacts an asset.

District municipality

District municipality refers to a municipality that has a municipal executive and legislative authority in an area that includes more than one municipality and which is described in section 155(1) of the Constitution as a category C municipality. Refer to the Local Government: Municipal Structures Act, 1998 (Act No.117 of 1998).

STATISTICS SOUTH AFRICA 19 P9110.1

Employee-related costs

Employee-related costs include payment to full-time and part-time employees irrespective of whether the remuneration is paid out of revenue capital or any other account.

Employee-related costs also include:

- basic compensation;
- allowances:
- contributions to other benefit funds of employees such as medical aid, pension fund contributions, group life, etc. (excluding unemployment insurance and workmen's compensation, etc. which may be looked upon as a form of insurance and would appear under general expenditure), and other benefits such as housing subsidies; and
- uniform and clothing allowances (clothing, boots, overalls etc. supplied to uniformed employees).

Also refer to the *Quarterly employment statistics* (QES) – statistical release P0277, which measures employment and gross earnings of all employees on a given municipal payroll.

Fines, penalties and forfeits

This item consists of all compulsory receipts imposed by a court or quasi-judicial body considered to be non-exchange revenue, e.g. traffic fines, fines for illegal connections, disconnection fees, motor vehicle licences, tender withdrawals, retentions, unclaimed money or deposits etc.

Housing services

Housing includes all activities associated with the municipal provision of housing.

Licences or permits

This item provides accounts for the granting of licences or permits associated with a regulatory function administered by the municipality.

Local municipality

Local municipality refers to municipalities that share municipal executive and legislative authority in its area with a district municipality within whose area it falls that is described in section 155(1) of the Constitution as a category B municipality. Refer to the Local Government: Municipal Structures Act, 1998 (Act No.117 of 1998).

Metropolitan municipality

Metropolitan municipality refers to an institution that has municipal executive and legislative authority in an area that includes more than one municipality and which is described in section 155(1) of the Constitution as a category A municipality. Refer to the Local Government: Municipal Structures Act, 1998 (Act No.117 of 1998).

Municipality

Municipality is a generic term describing the 'unit' of government in the local spheres responsible for local government in a geographically demarcated area and includes district, local and metropolitan municipalities. A municipality is an institution consisting of a municipal council (elected political representatives) and the municipal administration (appointed officials). Refer to the Local Government: Municipal Structures Act, 1998 (Act No.117 of 1998).

Operating leases

These are leases other than a finance lease. A lease is classified as an operating lease if it does not transfer substantially all the risks and rewards incidental to ownership.

Operational costs including other operational costs not covered separately

This group of accounts provides for all expenditure items not specifically provided for in any other category and replaces the customary "miscellaneous, general, sundry, other, etc." classification. An operating expense is a day-to-day expense such as sales and administration, or research and development, accounting expenses, licence fees, advertising, office expenses, utilities such as telephone, insurance, property management, travel and vehicle expenses.

Operational revenue

This group of accounts provides for "all other types of revenue" not specifically provided for in the revenue accounts, e.g. administrative handling fees, bad debts recovered, breakages recovered, collection charges, commission, incidental cash surpluses, insurance refunds, skills development levy refunds, agricultural activities, etc.

Other expenditure

The following are included in other expenditure:

- departmental charges/fees;
- books and magazines;
- licences and trade licences;
- workshops;
- · refreshments; and
- sundries.

Outsourced services

Refers to activities performed by the municipality through external providers rather than the municipality's own staff. Reasons for such arrangements include temporary incapacity and cost savings (e.g. cleaning, security and recruitment).

Rates and general services

Rates and general services refer to municipal services that are not economically self-supporting and are financed by imposing assessment and other rates, the receipt of subsidies, and other contributions. This includes ambulance services, fire control (or fire-fighting), health services (clinics, old-age homes), roads and storm water drainage, parks and recreation (libraries, cultural activities, museums, sport administration, community halls, swimming pools, sports grounds, nature reserves, etc.), sewerage and cleansing, traffic (licensing offices) and other services (city engineers, administration, personnel, legal services, city treasurer, etc.).

Sale of goods and rendering of services

This category consists of sales and services rendered provided that the municipality produced or partially produced the good or service. Goods include goods produced by the municipality for the purpose of sale, such as publications, and goods purchased for resale, such as merchandise or land and other property held for resale. The rendering of services typically involves the performance by the municipality of an agreed task over an agreed period of time. Examples of services rendered by entities for which revenue is typically received in exchange may include the provision of housing, management of water facilities, management of toll roads, and management of transfer payments.

Service charges

This group of accounts provides for the typical services rendered by the municipality as "exchange transactions", for example electricity, water, waste water management and waste management.

Trading services

Trading services are services for which the tariffs are determined in such a way that the provision of the service should yield a trading profit (market-related goods and services). These include waste management (refuse removal, solid waste disposal [landfill sites], street cleaning, recycling, etc.), waste water management (sewerage, storm water management and public toilets), water (water distribution, water storage, etc.), electricity (electricity distribution, electricity generation, street lighting, etc.), etc.

Transfers and subsidies paid

Transfers and subsidies include all unrequited payments made by the municipality to other institutions, businesses and individuals; it does not constitute final expenditure by the municipality. A payment is unrequited provided that the municipality does not receive anything directly in return for the transfer to the other party.

Subsidies are unrequited payments that municipalities make to public corporations and private enterprises. These payments usually have a direct policy outcome, either by subsidising the price of goods and services or by influencing the level of production.

Transfers and subsidies received

This category includes all unrequited, voluntary receipts from other parties. Thus, an entry should be made under this item when the municipality does not provide anything of similar value directly in return for the transfer from the other party and the transfer is voluntary. Subsidies are unrequited payments that municipalities obtain from public and private enterprises. These payments usually have a direct policy outcome, either by subsidising the price of goods and services or by influencing the level of production.

General information

Stats SA publishes approximately 300 different statistical releases each year. It is not economically viable to produce them in more than one of South Africa's 12 official languages. Since the releases are used extensively, not only locally but also by international economic and social-scientific communities, Stats SA releases are published in English only.

Stats SA has copyright on this publication. Users may apply the information as they wish provided that they acknowledge Stats SA as the source of the basic data whenever they process, apply, utilise, publish or distribute the data; and also that they specify that the relevant application and analysis (where applicable) result from their own processing of the data.

Advance release calendar

An advance release calendar is disseminated on www.statssa.gov.za.

Stats SA products

A complete set of Stats SA publications is available at the Stats SA Library and the following libraries:

National Library of South Africa, Pretoria Division
National Library of South Africa, Cape Town Division
Natal Society Library, Pietermaritzburg
Library of Parliament, Cape Town
Bloemfontein Public Library
Johannesburg Public Library
Eastern Cape Library Services, Qonce
Central Regional Library, Polokwane
Central Reference Library, Mbombela
Central Reference Collection, Kimberley
Central Reference Library, Mmabatho

Stats SA also provides a subscription service.

Electronic services

A large range of data is available via online services. For more details about our electronic services contact Stats SA's user information service at (012) 310 8600.
