**Forthcoming issue:**

P9115 June 2011

**Expected release date**

30 August 2012

## PREFACE

Statistics South Africa (Stats SA) has undertaken an annual non-financial census of municipalities with effect from 2002. The purpose of the census is to measure the level of service delivery performance of selected aspects of the functions of municipalities. The results of the census provide information that can serve as a framework for stakeholders and policy-makers for planning and monitoring. It allows national and provincial governments to analyse the actual services provided by municipalities in terms of water, electricity, solid waste management, sewerage and sanitation. The 2010 non-financial census of municipalities obtained information on various issues, including:

- ♦ Particulars of services provided between 1 July 2009 and 30 June 2010
- ♦ Particulars of total employment in the municipalities as at 30 June 2009 and 30 June 2010.

This statistical release contains the preliminary results of the 2010 non-financial census of municipalities and the revised figures for 2009. In the event of revised figures being obtained for 2010, they will be incorporated into the 2011 non-financial census of municipalities (if applicable).

For the purposes of this printed version, all results are presented at provincial level. Detailed information of each respondent (for 2009 and 2010) can be obtained from the Stats SA website (or can be made available upon request).

## Introduction

### Background

The census provides information that serves as a framework for stakeholders and policy-makers for analysis, planning and monitoring in terms of service delivery of water, electricity, solid waste management, sewerage and sanitation.

### Purpose of the survey

This publication is directed towards the following major measurements:

- Assist in monitoring the progress made with regard to the implementation of service provision, free basic services and poverty alleviation as national priorities.
- Provide baseline non-financial information from those institutions classified as municipalities in terms of the Local Government Municipal Structures Act, 1998 (Act No. 117 of 1998).
- Provide information that can serve as a framework for stakeholders and policy-makers for planning, as well as monitoring and evaluating the performance of municipalities.
- Allow national and provincial governments and other stakeholders to analyse the actual services provided by municipalities.
- Make data available for use by researchers, organisations and individuals for research.

### Questionnaire and data collection

- The methods used for collection included personal visits, telephone calls, facsimiles, emails and post. Data are generally comparable between the 2009 and 2010 publications.

## Methodology

### Scope of the survey

All 283 municipalities were covered in the census for 2009 and 2010. For both years there were 100% response rates.

### Limitations of the survey

- This publication is not necessarily comparable with the Stats SA population census of 2001 and/or household survey data, due mainly to:
  - i. The data source is municipalities as opposed to households.
  - ii. The different definitions of 'household'. Most municipalities do not have a system for identifying multiple households served by one billing unit or delivery point.
- 'Household' refers to a consumer / billing unit and is therefore not comparable with other Stats SA surveys of households.

## List of municipalities (2010)

### Western Cape

#### City of Cape Town Metro

#### West Coast District Municipality

Matzikama

## Key findings

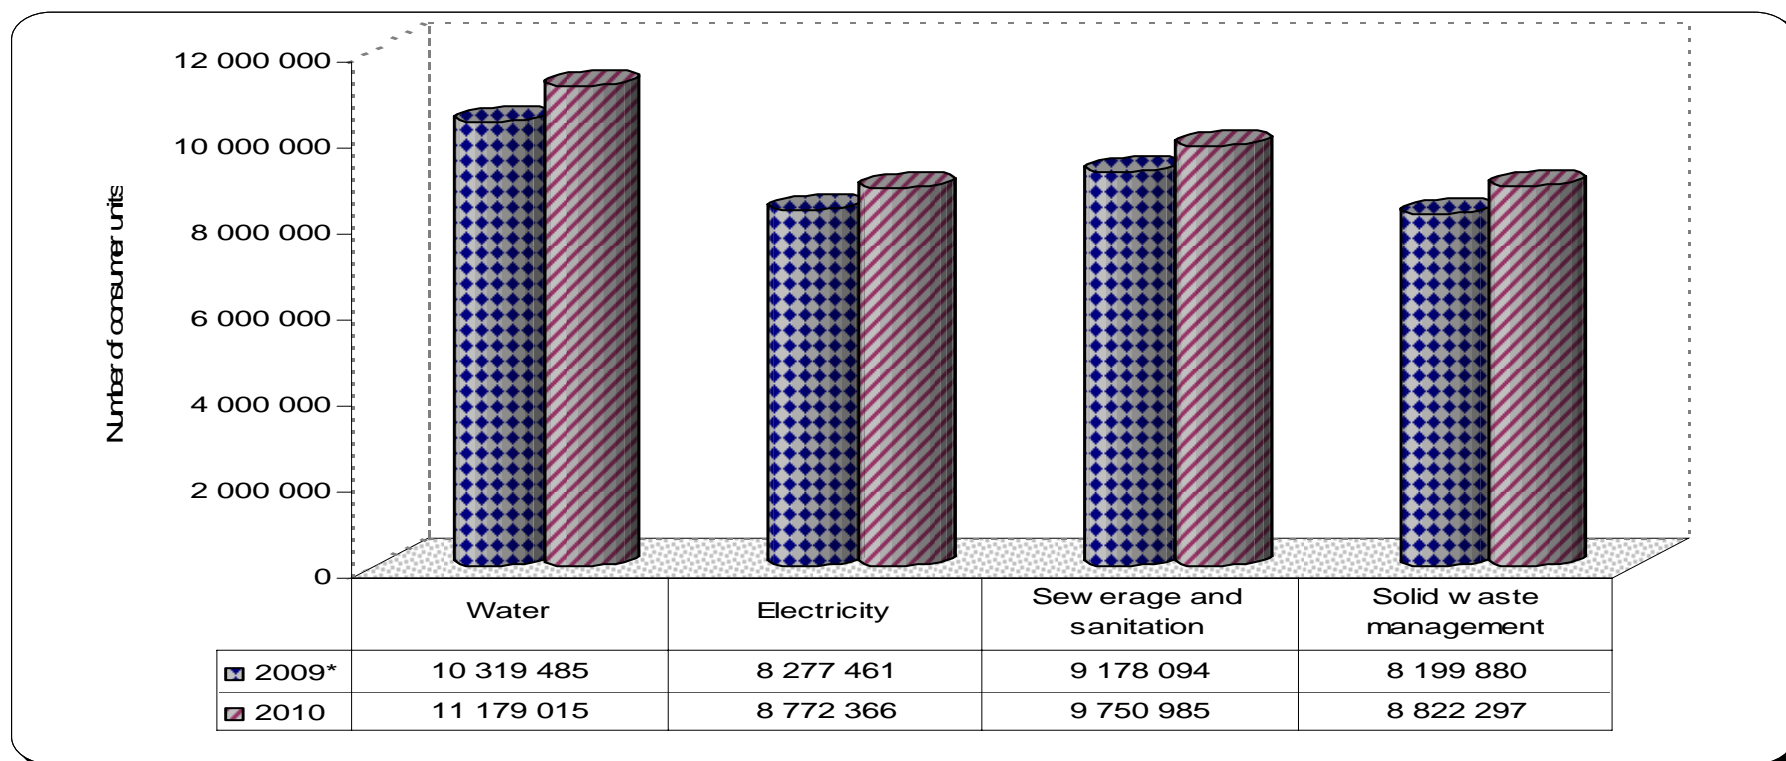

**Figure A: Number of consumer units using bucket toilet system in each province over the period 2009 and 2010**

\* Revised figures for 2009.

Over the period 2009 to 2010, the following provinces reported a decline in the use of the bucket toilet system: Eastern Cape, Western Cape, North West and Gauteng. An increase in the use of the bucket toilet system was reported by

Free State and Northern Cape. There was no bucket toilet system in KwaZulu-Natal, Mpumalanga and Limpopo.

**Figure B: Number of consumer units receiving services from municipalities in South Africa over the period 2009 and 2010**

\* Revised figures for 2009.

The number of consumer units receiving services from municipalities and service providers increased between 2009 and 2010. The highest percentage increase from 2009 to 2010 in the provision of services was recorded in water

(8,3%), followed by solid waste management (7,6%), sewerage and sanitation (6,2%) and electricity services (6,0%).

**Figure C: Number of consumer units receiving services and free basic services from municipalities in South Africa for the year ended 2010**

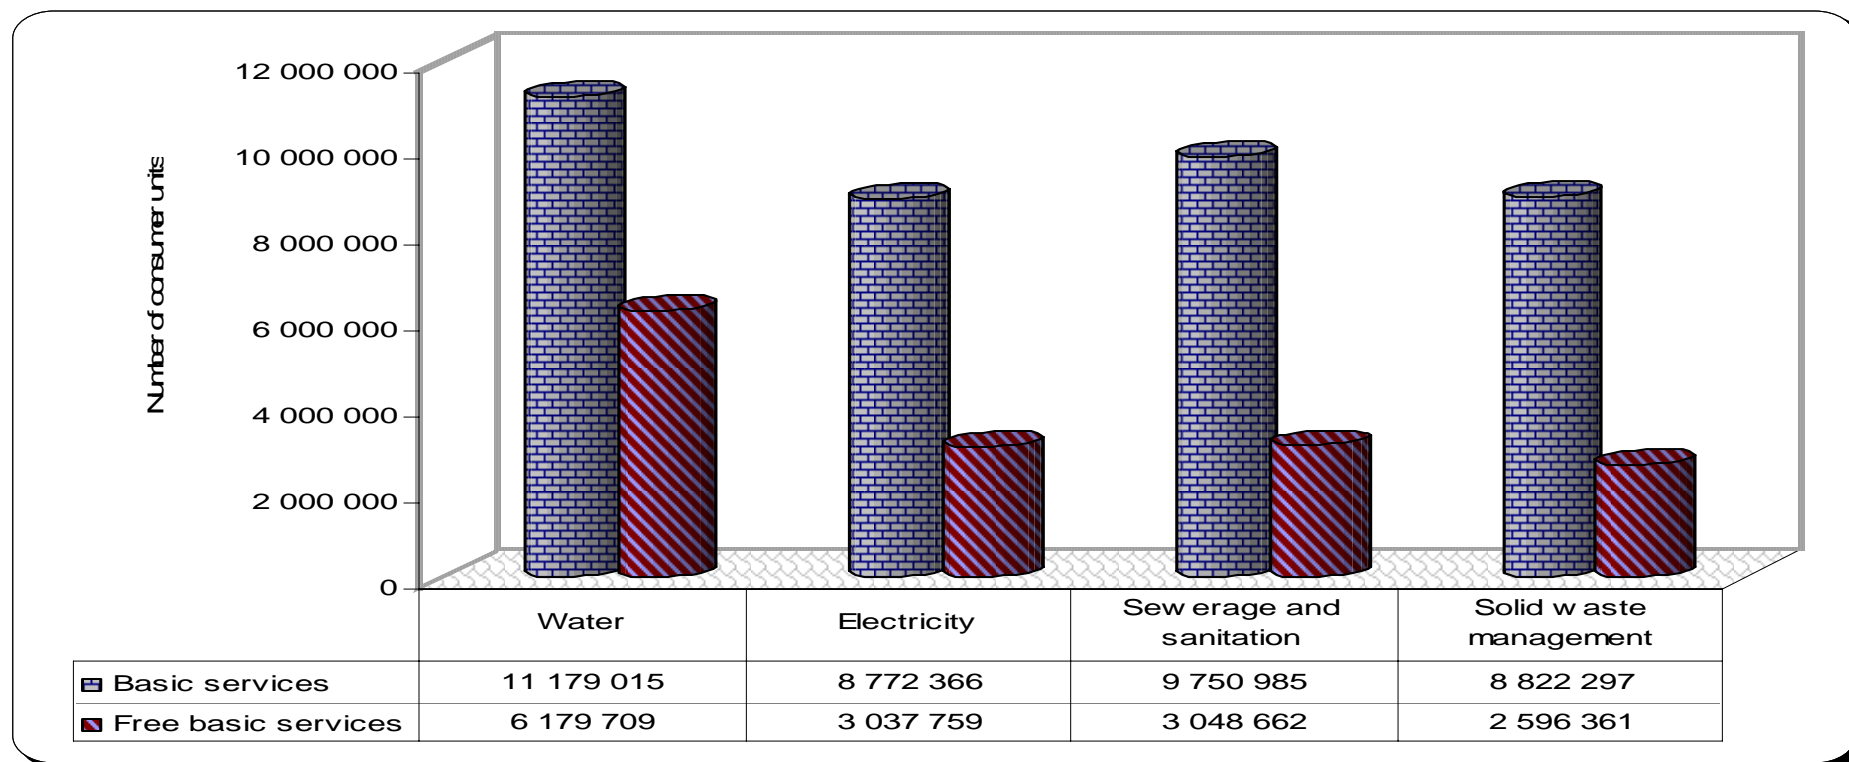

Figure C shows the proportion of consumer units that benefited from the free basic services policy. Of the 11,2 million consumer units receiving water from municipalities in South Africa, 6,2 million consumer units had access to free basic water. Out of 8,8 million consumer units receiving electricity, 3,0 million consumer units were receiving free basic electricity. Consumer units receiving sewerage

and sanitation were 9,8 million and 3,0 million received sewerage and sanitation as a free basic service from municipalities. About 2,6 million consumer units received free basic solid waste management services from a total of 8,8 million consumer units.

**Table A: Number of consumer units receiving water and free basic water services from municipalities over the period 2009 and 2010**

Mpumalanga	889 776	378 290	42,5	994 953	389 752	39,2
Limpopo	1 054 284	577 408	54,8	1 370 137	733 184	53,5
<b>South Africa</b>	<b>10 319 485</b>	<b>6 177 390</b>	<b>59,9</b>	<b>11 179 015</b>	<b>6 179 709</b>	<b>55,3</b>

\* Revised figures for 2009.

Table A shows the proportion of consumer units that benefited from the free basic water policy. According to 2010 estimates, 11,2 million consumer units were receiving water from municipalities in South Africa, of which 6,2 million (55,3%) consumer units were receiving free basic water.

Western Cape showed the highest proportion of consumer units that benefited from the free basic water policy (78,0%), followed by Gauteng (62,2%) and

Eastern Cape (58,1%). The province with the lowest proportion of consumer units that benefited from the free basic water policy was Mpumalanga (39,2%), followed by North West (41,9%) and Northern Cape with 43,3%.

Fluctuations between 2009 and 2010 are due to the change in the mechanisms used by municipalities to roll out such services, from broad-based to either self-targeting, technical or geographical mechanisms.

**Table B: Number of consumer units receiving electricity and free basic electricity services from municipalities over the period 2009 and 2010**

Province	2009*			2010

\* Revised figures for 2009.

Table B shows the proportion of consumer units that benefited from the free basic electricity policy. According to 2010 estimates, 8,8 million consumer units were receiving electricity from municipalities in South Africa, and 3,0 million (34,6%) consumer units had access to free basic electricity.

Free State showed the highest proportion of consumer units that benefited from the free basic electricity policy (51,9%), followed by Western Cape (46,7%) and

Northern Cape (43,8%). KwaZulu-Natal showed the lowest proportion (13,5%), followed by North West (22,7%).

Fluctuations between 2009 and 2010 are due to the change in the mechanisms used by municipalities to roll out such services, from broad-based to either self-targeting, technical or geographical mechanisms.

**Table C: Number of consumer units receiving sewerage and sanitation and free basic sewerage and sanitation services from municipalities over the period 2009 and 2010**

Limpopo	928 563	177 207	19,1	948 985	211 340	22,3
<b>South Africa</b>	<b>9 178 094</b>	<b>2 905 921</b>	<b>31,7</b>	<b>9 750 985</b>	<b>3 048 662</b>	<b>31,3</b>

\* Revised figures for 2009.

Table C shows the proportion of consumer units receiving free basic sewerage and sanitation from municipalities. According to 2010 estimates, 9,8 million consumer units were receiving sewerage and sanitation from municipalities in South Africa and 31,3% consumer units had access to free basic sewerage and sanitation.

Western Cape showed the highest proportion of consumer units that benefited from free basic sewerage and sanitation (69,0%), followed by Eastern Cape (55,1%) and Northern Cape (30,0%). The province with the lowest proportion was Mpumalanga (10,1%), followed by North West (15,6%) and KwaZulu-Natal (19,8%).

There were 3,0 million consumer units receiving free basic sewerage and sanitation from municipalities in 2010 compared with 2,9 million consumer units in 2009.

Fluctuations between 2009 and 2010 are due to the change in the mechanisms used by municipalities to roll out such services, from broad-based to either self-targeting, technical or geographical mechanisms.

**Table D: Number of consumer units receiving solid waste management and free basic solid waste management services from municipalities and service providers over the period 2009 and 2010**

Province	2009*			2010

Limpopo	368 265	102 841	27,9	373 534	102 063	27,3
<b>South Africa</b>	<b>8 199 880</b>	<b>1 905 136</b>	<b>23,2</b>	<b>8 822 297</b>	<b>2 596 361</b>	<b>29,4</b>

\* Revised figures for 2009.

Table D shows the proportion of consumer units receiving solid waste management as a free basic service. According to 2010 estimates, 8,8 million consumer units were receiving solid waste management from municipalities in South Africa and 29,4% consumer units had access to free basic solid waste management.

Western Cape showed the highest proportion of consumer units that benefited from free basic solid waste management (48,5%), followed by Northern Cape (32,7%)

and Eastern Cape (31,8%). The province with the lowest proportion was Mpumalanga (19,3%), followed by Free State (20,2%).

Fluctuations between 2009 and 2010 are due to the change in the mechanisms used by municipalities to roll out such services, from broad-based to either self-targeting, technical or geographical mechanisms.

\* Revised figures for 2009.

Table E depicts the number of indigent households identified by the municipalities and those benefiting from the indigent support system for the years ended 30 June 2009 and 30 June 2010. According to 2010 estimates, there were 3,7 million indigent households as identified by municipalities. Out of this total, 2,5 million (67,6%) indigent households benefited from the indigent

support system for water, while 1,8 million (48,4%) benefited from free basic electricity provided by municipalities. The table also shows that 1,8 million (50,0%) indigent households benefited from the indigent support for sewerage and sanitation and 1,6 million (43,0%) indigent households benefited from the indigent support system for solid waste management.

## Explanatory notes

<b>Introduction</b>	This publication contains results of the annual non-financial census of municipalities for the years ended 30 June 2009 and 30 June 2010.																
<b>Scope of the survey</b>	This survey covers non-financial information of all 283 municipalities for 2009 and 2010. The census provides information that can serve as a framework for stakeholders and policy-makers for analysis, planning and monitoring in terms of service delivery of water, electricity, solid waste management, sewerage and sanitation.																
<b>Statistical unit</b>	The statistical unit for the collection of information is the municipality.																
<b>Survey methodology and design</b>	The information is collected annually from 283 municipalities administered through questionnaires by means of post, email and facsimile.																
<b>Reliability of estimates</b>	Inaccuracies may occur because of imperfections in reporting by municipalities. Every effort is made to reduce errors to a minimum by carefully designing the questionnaire, undertaking pilot studies/workshops and editing the data.																
<b>Abbreviations and symbols</b>	<table> <tr> <td>0</td><td>Nil or not applicable</td></tr> <tr> <td>IDP</td><td>Integrated Development Plan</td></tr> <tr> <td>.</td><td>Not selected by municipalities</td></tr> <tr> <td>WSDP</td><td>Water Services Development Plan</td></tr> <tr> <td>SIC</td><td>Standard Industrial Classification of all Economic Activities</td></tr> <tr> <td>ISIC</td><td>International Standard Industrial Classification of all Economic Activities</td></tr> <tr> <td>Stats SA</td><td>Statistics South Africa</td></tr> <tr> <td>DWA</td><td>Department of Water Affairs</td></tr> </table>	0	Nil or not applicable	IDP	Integrated Development Plan	. DWA	Department of Water Affairs																
<b>Comparability with previous census</b>	The 2010 non-financial census of municipalities is generally comparable with the 2009 non-financial census of municipalities.																
<b>Revision of data</b>	The 2010 information is preliminary, and may be revised. The revised figures are due to respondents reporting revisions. Estimations made in 2009 have been revised on information provided by respondents.																

## Glossary

<b>Broad-based approach</b>	Each consumer unit in that municipality receives free basic services on the current billing system of the municipality.
<b>Consumer unit/billing unit</b>	An entity to which the service is (or would be) delivered, and which receives one bill if the service is billed, alternatively known as a delivery point. (This concept is often referred to as a household by municipalities, but this is not strictly correct, as households and consumer units do not coincide one to one, particularly in blocks of flats, on stands where there are multiple households in the same dwelling, or in additional dwellings, such as garden flats, backyard rooms, etc. and in the case of public taps.)
<b>District municipality</b>	District municipality means a municipality that has municipal executive and legislative authority in an area that includes more than one municipality, and which is described in section 155(1) of the Constitution as a category C municipality. (Refer to Local Government: Municipal Structures Act, 1998 (Act No.117 of 1998).)
<b>Employees</b>	Employees are those people employed by the individual / enterprise / business / organisation who received payment (in salaries, wages, commission, piece rates or payments in kind) for any part of the reference period (excluding independent contractors and employers).
<b>Free basic electricity</b>	An amount of electricity determined by government that should be provided free to poor households to meet basic needs, currently set at 50 kWh per month per household.
<b>Free basic water</b>	An amount of water determined by government that should be provided free to poor households to meet basic needs, currently set at 6 kl per month per household within 200 metres from each dwelling.
<b>Full-time employees</b>	Full-time employees are those employees (permanent, temporary or casual) who normally work the agreed hours for a full-time employee in a specific occupation. If agreed hours do not apply, employees are regarded as full-time if they normally work 35 hours per week, including seasonal employees.
<b>Geographical targeting</b>	The process whereby consumers living in a particular area are assumed to have the same socio-economic profile and therefore tariffs can be set on location.
<b>Household</b>	(a) A group of persons who live together and provide themselves jointly with food or other essentials for living, or a single person who lives alone. (b) A billing unit or delivery point. (Both definitions were specified in the questionnaire.) Given the different meanings of 'household', users are advised to use caution when comparing this publication with other Stats SA publications that report data at the household level (for example, the General Household Survey and the Quarterly Labour Force Survey).
<b>Indigent household</b>	These are poor households as defined by municipalities. The basis on which a municipality determines if a household is indigent (and the criteria used for such determination) can vary.
<b>Infrastructure</b>	Physical structures used for the delivery of services (e.g. power lines, pipes, roads and assets such as trucks and equipment to unblock sewerage, pay-point offices and computers).

---

<b>Integrated Development Plan</b>	A process by which municipalities prepare 5-year strategic plans that are reviewed annually in consultation with communities and stakeholders.
<b>Local municipality</b>	Local municipality means a municipality that shares municipal executive and legislative authority in its area with a district municipality within whose area it falls, and which is described in section 155(1) of the Constitution as a category B municipality. (Refer to Local Government: Municipal Structures Act, 1998 (Act No. 117 of 1998).)
<b>Managerial position</b>	For the purpose of this survey, managerial positions refer to section 57 managers, according to the Local Government Municipal System Act, 2000 (Act No. 32 of 2000) and other managers according to the organogram.
<b>Metropolitan municipality</b>	Metropolitan municipality means a municipality that has exclusive executive and legislative authority in its area, and which is described in section 155(1) of the Constitution as a category A municipality. (Refer to Local Government: Municipal Structure Act 1998, (Act No. 117 of 1998).)
<b>Municipality</b>	Municipality is a generic term describing the unit of government in the local spheres responsible for local government in a geographically demarcated area and includes district, local and metropolitan municipalities. A municipality is an institution consisting of a municipal council (elected political representatives) and the municipal administration (appointed officials).
<b>Part-time employees</b>	Part-time employees are employees (permanent, temporary or casual) who are not full-time employees as defined above or who normally work less than 35 hours per week, including seasonal employees.
<b>Self-targeting approach</b>	A system whereby only indigent households receive the benefits of the free basic services programme as mutually determined by the service provider and service authority.
<b>Technical targeting</b>	The process whereby technology is used to regulate the provision of free basic services (including water and electricity meters).
<b>Water Service Development Plan</b>	The WSDP is a sectoral plan that falls within the inter-sectoral umbrella plan of the IDP.

## General information

Stats SA publishes approximately 300 different statistical releases each year. It is not economically viable to produce them in more than one of South Africa's eleven official languages. Stats SA releases are published in English since the releases are used extensively, not only locally but also by international economic and social-scientific communities.

Data from this publication may be produced, applied or processed, provided Statistics South Africa (Stats SA) is acknowledged as the original source of the data; that it is specified that the application and/or analysis is the result of the user's independent processing of the data; and that neither the basic data nor any processed version or application thereof may be sold or offered for sale in any form whatsoever without the prior permission of Stats SA.

## Stats SA products

A complete set of Stats SA publications is available at the Stats SA Library and from the following libraries:

State Library, Pretoria  
Library of Parliament, Cape Town  
South African Library, Cape Town  
Bloemfontein Public Library  
Natal Society Library, Pietermaritzburg  
Johannesburg Public Library

Eastern Cape Library Services, King William's Town  
Central Regional Library, Polokwane  
Central Reference Library, Nelspruit  
Central Reference Collection, Kimberly  
Central Reference Library, Mmabatho

Stats SA also provides a subscription service.

## Electronic services

A large range of data is available via on-line services, diskette and computer printouts. For more details about our electronic data services, contact 012 310 8095. You can visit us on the Internet at: [www.statssa.gov.za](http://www.statssa.gov.za)
